## Product Description

The HP Compaq nx8220, nw8240, and nc8230 Notebook PCs offer advanced modularity, Intel® Pentium® M processors, and extensive multimedia support.

*HP Compaq nx8220, nw8240, and nc8230 Notebook PCs*

## 1.1 Features

- Intel Pentium M 2.13-, 2.00-, 1.86-, 1.73-, or 1.60-GHz processors, varying by computer model
- The following displays are available, varying by computer model:
  - 15.4-inch, UXGA, TFT (1600 × 1200) with over 16.8 million colors
  - 15.4-inch, WSXGA, TFT (1680 × 1050) with over 16.8 million colors
  - 15.4-inch, WXGA, TFT (1366 × 768) with over 16.8 million colors
- 80-, 60-, or 40-GB high-capacity hard drive, varying by computer model
- 256-MB DDR2 synchronous DRAM (SDRAM) at 400 and 533 MHz, expandable to 2.0 GB
- Microsoft® Windows® XP Home Edition or Windows XP Professional, varying by computer model
- Full-size Windows keyboard with embedded numeric keypad
- TouchPad and pointing stick pointing devices, including a dedicated vertical scroll region.
- Integrated 10Base-T/100Base-TX Ethernet local area network (LAN) network interface card (NIC) with RJ-45 jack
- Integrated high-speed 56K modem with RJ-11 jack
- Integrated wireless support for Mini PCI IEEE 802.11a/b and 802.11a/b/g WLAN device
- Support for one Type I or Type II PC Card slot, with support for both 32-bit (CardBus) and 16-bit PC Cards

- External 90-watt AC adapter with 3-wire power cord
  - 8-cell Li-Ion battery pack
  - Stereo speakers
  - Volume up, volume mute, and volume down buttons (full-featured models only)
- 

Numerous references are made throughout this *Maintenance and Service Guide* to “full-featured” and “defeatured” units. A computer model is considered to be full-featured if it has 3 Universal Serial Bus ports and the following components:

- Volume control buttons
- Quick Launch buttons
- Infrared port
- SD Memory Card slot
- Serial port
- S-Video-out port
- Docking connector

A computer model is considered to be defeatured if it has only 2 Universal Serial Bus ports and none of the components listed above.

---

- Support for the following optical drives:
  - ❑ DVD-ROM drive
  - ❑ DVD+RW/R and CD-RW Combo Drive
  - ❑ DVD/CD-RW Combo Drive
- Connectors:
  - ❑ Infrared (full-featured models only)
  - ❑ Audio-out (headphone)
  - ❑ Audio-in (microphone)
  - ❑ Universal Serial Bus (USB) v. 2.0 (3 ports on full-featured computer models, 2 ports on defeatured computer models)
  - ❑ Serial port (full-featured models only)
  - ❑ Power
  - ❑ External monitor
  - ❑ RJ-45 (network)
  - ❑ RJ-11 (modem)
  - ❑ S-Video-out (full-featured models only)
  - ❑ IEEE 1394
  - ❑ PC Card
  - ❑ Smart card
  - ❑ SD Memory Card (full-featured models only)
  - ❑ Parallel port (full-featured models only)
  - ❑ Primary battery
  - ❑ Travel battery
  - ❑ Docking connector (full-featured models only)

## 1.2 Resetting the Computer

If the computer you are servicing has an unknown password, follow these steps to clear the password. These steps also clear CMOS:

1. Prepare the computer for disassembly (refer to [Section 6.3, “Preparing the Computer for Disassembly,”](#) for more information).
2. Remove the real-time clock (RTC) battery (refer to [Section 6.11, “RTC Battery,”](#) for more information on removing and replacing the RTC battery).
3. Wait approximately 5 minutes.
4. Replace the RTC battery and reassemble the computer.
5. Connect AC power to the computer. Do not reinsert any battery packs at this time.
6. Turn on the computer.

All passwords and all CMOS settings have been cleared.

## 1.3 Power Management

The computer comes with power management features that extend battery operating time and conserve power. The computer supports the following power management features:

- Standby
- Hibernation
- Setting customization by the user
- Hotkeys for setting the level of performance
- Battery calibration
- Lid switch standby/resume
- Power button
- Advanced Configuration and Power Management (ACPM) compliance

## 1.4 External Components

The external components on the front of the computer are shown below and described in Table 1-1.

Front Components

---

**Table 1-1**  
**Front Components**

Item	Component	Function
1	Wireless light	On: an integrated wireless device (selected models only) has been turned on.
2	Power light	■ On: The computer is on. ■ Blinking: The computer is in standby mode.

---

**Table 1-1**  
**Front Components (Continued)**

<b>Item</b>	<b>Component</b>	<b>Function</b>
3	Battery light	<ul style="list-style-type: none"> <li>■ Amber: A battery pack is charging.</li> <li>■ Green: A battery pack is close to full charge capacity.</li> <li>■ Blinking amber: A battery pack that is the only available power source has reached a low-battery condition. When the battery reaches a critical low-battery condition, the battery light blinks more quickly.</li> <li>■ Off: If the computer is connected to external power, the light is turned off when all batteries in the computer are fully charged. If the computer is not connected to external power, the light is turned off until the battery reaches a low-battery condition.</li> </ul>
4	Integrated Drive Electronics (IDE) drive light	On: A drive in the hard drive bay or MultiBay II is being accessed.
5	Infrared port (full-featured models only)	Provides wireless communication between the computer and an optional IrDA-compliant device.
6	Display release latch	Opens the computer.

The external components on the left side of the computer are shown below and described in Table 1-2.

*Left-Side Components*

---

**Table 1-2**

**Left-Side Components**

Item	Component	Function
1	Security cable slot	Attaches an optional security cable to the computer.  △ Security solutions are designed to act as deterrents. These deterrents may not prevent a product from being mishandled or stolen.
2	RJ-45 (network) jack	Connects a network cable.
3	RJ-11 (modem) jack	Connects the modem cable.
4	S-Video-out jack (full-featured models only)	Is a 7-pin, dual-purpose jack. It connects an optional S-Video device, such as a television, VCR, camcorder, overhead projector, or video capture card with an optional, standard (4-pin) S-Video cable.  The extra 3 pins also enable an optional S-Video-to-composite adapter to be used with the computer.

---

**Table 1-2**  
**Left-Side Components (Continued)**

<b>Item</b>	<b>Component</b>	<b>Function</b>
5	Vent	<p>Enables airflow to cool internal components.</p> <p> To prevent overheating, do not obstruct vents. Do not allow a hard surface, such as a printer, or a soft surface, such as pillows or thick rugs or clothing, to block airflow.</p>
6	1394 port (4 pin)	Connects an optional 4-pin 1394 device, such as a camcorder.
7	USB port	Connects USB 1.1- and 2.0-compliant devices to the computer using a standard USB cable, or connects an optional External MultiBay or External MultiBay II to the computer. The External MultiBay must be connected to an external power source.
8	Smart card reader	Accepts smart cards.
9	SD Memory Card slot	Accepts Secure Digital (SD) Memory Cards.
10	PC Card slot	Supports optional Type I or Type II PC Card.
11	PC Card eject button	Ejects PC Cards from the PC Card slot.

The external components on the right side of the computer are shown below and described in Table 1-3.

*Right-Side Components*

---

**Table 1-3**  
**Right-Side Components**

Item	Component	Function
1	Audio-out (headphone) jack	Produces system sound when connected to optional powered stereo speakers, headphones, headset, or television audio.
2	Internal microphone	Records sound.
3	Audio-in (microphone) jack	Connects an optional monaural microphone.
4	USB ports (2) (full-featured models only)	Connect USB 1.1- and 2.0-compliant devices to the computer using a standard USB cable, or connects an optional External MultiBay or External MultiBay II to the computer. The External MultiBay must also be connected to an external power source.
5	MultiBay II	Holds an optional MultiBay II device.
6	Serial port (full-featured models only)	Connects an optional serial device.

---

The external components on the rear panel of the computer are shown below and described in Table 1-4.

*Rear Panel Components*

**Table 1-4**  
**Rear Panel Components**

<b>Item</b>	<b>Component</b>	<b>Function</b>
1	Primary battery bay	Holds the primary battery pack.
2	Power connector	Connects an AC adapter or an optional automobile or aircraft adapter.
3	External monitor port	Connects an optional external VGA monitor or projector.

The standard keyboard components of the computer are shown below and described in Table 1-5.

*Standard Keyboard Components*

**Table 1-5**  
**Standard Keyboard Components**

<b>Item</b>	<b>Component</b>	<b>Function</b>
1	Function keys ( <b>f3, f4, f8–f11</b> )	Execute frequently used system functions when pressed in combination with the <b>fn</b> key.
2	<b>caps lock</b> key	Enables caps lock and turns on the caps lock light.
3	<b>fn</b> key	Executes frequently used system functions when pressed in combination with a function key or the <b>esc</b> key.
4	Windows logo key	Displays the Windows Start menu.
5	Windows applications key	Displays a shortcut menu for items beneath the pointer.
6	Arrow keys	Moves the cursor around the screen.
7	Keypad keys (15)	Can be used like the keys on an external numeric keypad.
8	<b>num lock</b> key	Enables numeric lock, turns on the embedded numeric keypad, and turns on the num lock light.

The computer top components are shown below and described in Table 1-6.

Top Components, Part 1

---

**Table 1-6**  
**Top Components, Part 1**

Item	Component	Function
1	Display lid switch	Initiates standby if the display is closed while the computer is turned on.
2	Power button	When the computer is: <ul style="list-style-type: none"><li>■ Off, press to turn on the computer.</li><li>■ On, briefly press to initiate hibernation.</li><li>■ In standby, briefly press to resume from standby.</li><li>■ In hibernation, briefly press to restore from hibernation.</li></ul> <p> If the system has stopped responding and Microsoft Windows shutdown procedures cannot be used, press and hold the power button for at least 4 seconds to turn off the computer.</p>

---

**Table 1-6**  
**Top Components, Part 1 (Continued)**

<b>Item</b>	<b>Component</b>	<b>Function</b>
3	Info Center button	Enables you to view a list of commonly used software solutions.
4	Wireless button Wireless light	Enables and disables wireless LAN or Bluetooth® devices (select models only). On: A wireless LAN or Bluetooth device is hardware enabled.
5	Presentation mode button	Turns on Presentation mode.
6	Caps lock light	On: <b>caps lock</b> is on.
7	Num lock light	On: <b>num lock</b> or the numeric keypad is on.
8	Volume mute button (full-featured models only)	Turns off computer sound.
9	Volume down button (full-featured models only)	Decreases system sound.
10	Volume up button (full-featured models only)	Increases system sound.

The computer top components are continued below and described in Table 1-7.

*Top Components, Part 2*

---

**Table 1-7**  
**Top Components, Part 2**

<b>Item</b>	<b>Component</b>	<b>Function</b>
1	Pointing stick (select models only)	Moves the pointer and selects or activates items on the screen.
2	Speakers	Produce stereo sound.
3	Pointing stick buttons (select models only)	Function like the buttons on an external mouse.
4	TouchPad scroll zone	Scrolls up or down.
5	TouchPad buttons	Function like the buttons on an external mouse.
6	TouchPad	Moves the pointer and selects or activates items on the screen. Can be set to perform other mouse functions, such as scrolling, selecting, and double-clicking.

---

The external components on the bottom of the computer are shown below and described in Table 1-8.

*Bottom Components*

---

**Table 1-8**  
**Bottom Components**

<b>Item</b>	<b>Component</b>	<b>Function</b>
1	Primary battery bay	Holds the primary battery pack.
2	Primary battery locking latch	Secures the primary battery pack into the battery bay. This latch must be set to unlock to release the battery.

---

**Table 1-8**  
**Bottom Components (Continued)**

Item	Component	Function
3	Travel battery connector	Connects an optional travel battery.
4	Memory module compartment	Contains one memory module slot.
5	Hard drive bay	Holds the primary hard drive.
6	Vents (5)	<p data-bbox="525 539 842 587">Enable airflow to cool internal components.</p> <p data-bbox="525 613 944 776">  To prevent overheating, do not obstruct vents. Do not allow a hard surface, such as a printer, or a soft surface, such as pillows or thick rugs or clothing, to block airflow. </p>
7	Primary battery release latch	Releases the primary battery pack from the battery bay. The primary battery locking latch must be in the unlocked position.
8	Docking connector (full-featured models only)	Connects the computer to an optional docking device.

## 1.5 Design Overview

This section presents a design overview of key parts and features of the computer. Refer to [Chapter 4, “Illustrated Parts Catalog,”](#) to identify replacement parts, and [Chapter 6, “Removal and Replacement Procedures,”](#) for disassembly steps.

The system board provides the following device connections:

- Audio
- Display
- Hard drive
- Intel Pentium M processors
- Keyboard
- Memory module
- Mini PCI communications devices
- PC Card
- Pointing stick
- TouchPad
- Trusted platform module (TPM) security module

**CAUTION:** To properly ventilate the computer, allow at least a 7.6-cm (3-inch) clearance on the left and right sides of the computer.

---

The computer uses an electric fan for ventilation. The fan is controlled by a temperature sensor and is designed to be turned on automatically when high temperature conditions exist. These conditions are affected by high external temperatures, system power consumption, power management/battery conservation configurations, battery fast charging, and software applications. Exhaust air is displaced through the ventilation grill located on the left side of the computer.

---

# Troubleshooting

**WARNING:** Only authorized technicians trained by HP should repair this equipment. All troubleshooting and repair procedures are detailed to allow only subassembly-/module-level repair. Because of the complexity of the individual boards and subassemblies, do not attempt to make repairs at the component level or modifications to any printed wiring board. Improper repairs can create a safety hazard. Any indication of component replacement or printed wiring board modification may void any warranty or exchange allowances.

---

## 2.1 Computer Setup

Computer Setup is a preinstalled, ROM-based utility that can be used even when the operating system is not working or will not load. If the operating system is working, the computer restarts the operating system after you exit Computer Setup.

Pointing devices are not supported in Computer Setup; you must use the keyboard to navigate and make selections.

---

The menu tables later in this chapter provide an overview of Computer Setup options.

## Accessing Computer Setup

The information and settings in Computer Setup are accessed from the **File**, **Security**, **Tools**, and **Advanced** menus.

1. Open Computer Setup by turning on or restarting the computer. Press **f10** while the F10 = Based Setup message is displayed in the lower-left corner of the screen.
  - To change the language, press **f2**.
  - To view navigation information, press **f1**.
  - To return to the Computer Setup menu, press **esc**.
2. Select the **File**, **Security**, **Tools**, or **Advanced** menu.
3. To exit Computer Setup, choose one of the following:
  - To exit without saving any changes, use the arrow keys to select **File > Ignore changes and exit**, and then follow the instructions on the screen.
  - To exit and save all the settings you have entered, use the arrow keys to select **File > Save changes and exit**, and then follow the instructions on the screen.

Your preferences are set when you exit Computer Setup and take effect when the computer restarts.

## Computer Setup Defaults

To return all settings in Computer Setup to the values that were set at the factory:

1. Open Computer Setup by turning on or restarting the computer. Press **f10** while the F10 = Based Setup message is displayed in the lower-left corner of the screen.
  - To change the language, press **f2**.
  - To view navigation information, press **f1**.
2. Use the arrow keys to select **File > Restore defaults**.
3. Select the **Restore Defaults** check box.

4. To confirm the restoration, press **f10**.
5. Select **File > Save changes and exit**, and then follow the instructions on the screen.

When the computer restarts, the factory settings are restored, and any identification information you have entered is saved.

## Selecting from the File Menu

**Table 2-1**  
**File Menu**

Select	To Do This
System Information	<ul style="list-style-type: none"> <li>■ View identification information about the computer and any battery packs in the system.</li> <li>■ View specification information about the processor, memory and cache size, video revision, keyboard controller version, and system ROM.</li> </ul>
Save to floppy	Save system configuration settings to a diskette.
Restore from floppy	Restore system configuration settings from a diskette.
Restore defaults	Replace configuration settings in Computer Setup with factory default settings. (Identification information is retained.)
Ignore changes and exit	Cancel changes entered during the current session. Then exit and restart the computer.
Save changes and exit	Save changes entered during the current session. Then exit and restart the computer. The changes you save are in effect when the computer restarts.

## Selecting from the Security Menu

**Table 2-2**  
**Security Menu**

Select	To Do This
Administrator password	Enter, change, or delete an HP Administrator password.
Power-on password	Enter, change, or delete a power-on password.
Password options	<ul style="list-style-type: none"> <li>■ Enable/Disable stringent security.</li> <li>■ Enable/Disable required password on restart.</li> </ul>
DriveLock passwords	<p>Enable/disable DriveLock; change a DriveLock user or master password.</p> <p> DriveLock Settings are accessible only when you enter Computer Setup by turning on (not restarting) the computer.</p>
Smart Card security	<p>Enable/disable power-on support for smart cards.</p> <p> This feature is supported by select Smart Card readers only.</p>
Embedded security	<ul style="list-style-type: none"> <li>■ Enable/Disable the embedded security chip.</li> <li>■ Restore embedded security chip to factory settings.</li> <li>■ Enable/Disable power-on authentication support.</li> <li>■ Enable/Disable automatic DriveLock.</li> <li>■ Reset power-on authentication credential</li> </ul> <p> Embedded Security settings are accessible only if the computer is equipped with an embedded security chip.</p>
Device security	<ul style="list-style-type: none"> <li>■ Enable/Disable devices in the system.</li> <li>■ Enable NIC for inclusion in MultiBoot.</li> </ul>
System IDs	Enter user-defined identification values.

## Selecting from the Tools Menu

**Table 2-3**  
**Tools Menu**

<b>Select</b>	<b>To Do This</b>
HDD Self Test options	Run a quick or comprehensive self-test on any hard drive in the system.
Battery Information	View information about any battery packs in the computer.
Memory Check	<ul style="list-style-type: none"> <li data-bbox="426 594 902 646">■ Run a self-test on memory modules in the computer.</li> <li data-bbox="426 659 902 711">■ View information about memory modules installed in the computer.</li> </ul>

## Selecting from the Advanced Menu

**Table 2-4**  
**Advanced Menu**

Select	To Do This
Language (ore press <b>f2</b> )	Change the Computer Setup language.
Boot options	<ul style="list-style-type: none"> <li>■ Enable/Disable MultiBoot, which sets a startup sequence that can include most bootable devices and media in the system.</li> <li>■ Set the boot order.</li> </ul>
Device options	<ul style="list-style-type: none"> <li>■ Swap the functions of the <b>fn</b> key and left <b>ctrl</b> key.</li> <li>■ Enable/Disable multiple pointing devices at startup. (To set the computer to support only a single, usually nonstandard, pointing device at startup, select <b>Disable</b>.)</li> <li>■ Enable/Disable USB legacy support for a USB keyboard, mouse, and hub. When USB legacy support is enabled           <ul style="list-style-type: none"> <li><input type="checkbox"/> A USB keyboard, mouse, and hub work even when a Windows operating system is not loaded.</li> <li><input type="checkbox"/> The computer starts from a bootable hard drive, diskette drive diskette, or CD, CD-RW, or DVD inserted into a drive connected by a USB connector to the computer or to an optional docking device.</li> </ul> </li> <li>■ Select a parallel port mode: EPP (Enhanced Parallel Port), standard, bidirectional, or ECP (Enhanced Capabilities Port).</li> <li>■ Enable/Disable all settings in the <b>SpeedStep</b> window. (When Disable is selected, the computer runs in Battery Optimized mode.)</li> </ul>

## 2.2 Troubleshooting Flowcharts

# Software Update and Recovery

## 3.1 Software Updates

To stay current with the newest technology and maintain optimal performance, install the latest versions of HP software on your computer as they become available.

To update HP software:

1. Identify your computer model, product category, and series or family. Prepare for a system ROM update by identifying the ROM version currently installed on the computer. For more information, refer to “[Accessing Computer Information](#).”

**CAUTION:** If your computer is connected to a network, it is recommended that you consult with your network administrator before installing any software updates, especially system ROM updates.

---

The computer system ROM stores the BIOS software. The BIOS initializes the operating system, determines how the computer will interact with the hardware devices, and provides for data transfer among hardware devices, including the time and date.

---

2. Access the updates through the HP Web site by visiting <http://www.hp.com> or by obtaining the *Support Software CD* (purchased separately). For information about obtaining the *Support Software CD*, refer to “[Obtaining the Support Software CD](#).”
3. Install the updates.

## Accessing Computer Information

Before you access the updates for your computer, collect the following information:

- The product *category* is Notebook.
- The product *family* name and *series* number are printed on the display bezel.
- *Model* information is provided on the serial number label on the bottom of the computer.

To determine whether available ROM updates contain later ROM versions than those currently installed on the computer, you need to know the version of the system ROM currently installed.

ROM version information (also known as ROM date and System BIOS) can be displayed by pressing **fn+esc** (if you are already in Microsoft Windows) or by opening Computer Setup.

To use Computer Setup for displaying ROM information:

1. Open Computer Setup by turning on or restarting the computer, and then pressing **f10** while the “F10 = ROM Based Setup” message is displayed in the lower-left corner of the screen.
2. Use the arrow keys to select **File > System Information**, and then press **enter**.  
ROM date information is displayed.
3. To exit Computer Setup, use the arrow keys to select **File > Ignore changes and exit**. Then follow the instructions on the screen.

## Obtaining the Support Software CD

The *Support Software* CD provides HP software updates and installation instructions. The CD includes device drivers, ROM updates, and utilities.

To purchase the current *Support Software* CD or a subscription that provides both the current version and future versions of the CD, visit the HP Web site at <http://www.hp.com>.

## Software Updates and the HP Web Site

Most software on the HP Web site is packaged in compressed files called *SoftPaqs*. Some ROM updates may be packaged in compressed files called *ROMPaqs*.

Most download packages contain a file named *Readme.txt*. A *Readme.txt* file contains information regarding installing and troubleshooting the file. The *Readme.txt* files included with *ROMPaqs* are provided in English only.

## Downloading a ROM Update

---

**CAUTION:** To prevent damage to the computer or an unsuccessful installation, download and install a ROM update only when the computer is connected to reliable external power using the AC adapter. Do not download or install a ROM update while the computer is running on battery power, docked in an optional docking device, or connected to an optional power source. During the download and installation:

- Do not disconnect power from the computer by unplugging the power cord from the AC outlet.
  - Do not shut down the computer or initiate standby or hibernation.
  - Do not insert, remove, connect, or disconnect any device, cable, or cord.
-

To download a ROM update:

1. Access the page on the HP Web site that provides software for your computer:
  - ❑ Select **Start > Help and Support**, and then click a software update link.
  - or –
  - ❑ Visit the HP Web site at <http://www.hp.com/support>.
2. Follow the instructions on the screen to identify your computer and access the ROM update you want to download.
3. At the download area:
  - a. Identify the ROM update that is later than the ROM version currently installed on your computer. Make a note of the date, name, or other identifier. You may need this information to locate the update later, after it has been downloaded to your hard drive.
  - b. Follow the instructions on the screen to download your selection to the hard drive.
    -  Make a note of the path to the location on your hard drive to which the ROM package will be downloaded. You may need to access the ROM package after it has been downloaded.

## Installing a ROM Update

---

If your computer is connected to a network, it is recommended that you consult with your network administrator before installing any software updates, especially system ROM updates.

---

ROM installation procedures vary. Follow any instructions that are displayed on the screen after the download is complete. If no instructions are displayed:

1. Open Windows Explorer by selecting **Start > All Programs > Accessories > Windows Explorer**.
2. In the left pane of the Windows Explorer window:
  - a. Click **My Computer** and then your hard drive designation. (The hard drive designation is typically Local Disk C.)
  - b. Open the folder on your hard drive that contains the update.

Follow the path you made a note of before you downloaded the update.

3. Double-click the file with an .exe extension (for example, filename.exe).

The ROM installation begins.

4. Complete the installation by following the instructions on the screen.

After a message on the screen reports a successful installation, you may delete the downloaded file from your hard drive.

---

## Downloading Other Software

To download and install software other than a ROM update:

1. Access the page on the HP Web site that provides software for your computer:

Select **Start > Help and Support**, and then click a software update link.

– or –

Visit the HP Web site at <http://www.hp.com/support> and click **Download drivers and software** to download the software for your computer model.

2. Follow the instructions on the screen to find the software you want to update.
3. At the download area, select the software you want and follow the download instructions on the Web page.

 Make a note of the path to the location on your hard drive to which the ROM package will be downloaded. You may need to access the ROM package after it has been downloaded.

4. When the download is complete, open Windows Explorer by selecting **Start > All Programs > Accessories > Windows Explorer**.
5. In the left pane of the **Windows Explorer** window, click **My Computer** and then your hard drive designation. (The hard drive designation is typically Local Disk C.)

 Follow the path you made a note of earlier to the folder on your hard drive that contains the update.

6. Open the folder and double-click the file with an .exe extension (for example, filename.exe).  
The installation begins.
7. Complete the installation by following the instructions on the screen.

After a message on the screen reports a successful installation, you may delete the download package from your hard drive.

---

## 3.2 System Recovery

The computer system recovery process provides several ways to recover optimal system functionality. For best results, attempt to recover optimal computer functionality by using the following procedures *in the order described here*.

## Safeguarding Your Data

Software or devices added to the computer can cause your system to become unstable. To safeguard your documents, store personal files in the My Documents folder and periodically create a backup copy of the My Documents folder.

## Using Altiris Local Recovery

Altiris Local Recovery is a preloaded application that protects the files on your computer by storing copies of files, called *snapshots*. If files on your computer are accidentally deleted or corrupted, you can easily restore the files yourself. You can also restore your complete file system to a previous state.

Altiris Local Recovery provides protection of files by backing up files to a hidden Altiris recovery partition. When you install the software, the Recovery Agent Partition Wizard guides you through the process of creating the recovery partition. After the partition is created, the computer restarts and creates the first snapshot. After the snapshot is created, the computer restarts, making the snapshot available for recovery through Windows.

By default, Local Recovery automatically takes snapshots of your files on a regular basis. You can change the snapshot schedule. For more information, refer to the Altiris Local Recovery Help.

To access your snapshots in the Altiris Recovery Agent folder:

1. Right-click the Altiris Recovery Agent icon on your desktop.
2. Click **Open**.

To restore one of the listed snapshots, drag the snapshot file to the appropriate location on your hard drive.

For more information on configuring and using Altiris Local Recovery, visit the HP Web site at <http://www.hp.com/go/easydeploy>, or open the software and click **Help** on the menu bar.

## Using System Restore Points

System Restore is a Windows operating system feature that allows you to reverse undesirable changes to your computer by restoring the computer to an earlier state, called a *restore point*. A restore point is a “snapshot” of your software, drivers, and operating system files at a particular time. The computer automatically creates restore points at regular intervals and may create additional restore points when you change your personal settings or add software or hardware.

You can manually create additional restore points to provide increased protection for your system files and settings. It is recommended that you manually create restore points

- Before you add or extensively modify software or hardware.
- Periodically, whenever the system is performing optimally.

Restoring to any restore point does not affect your data files. For example, restoring your system software to an earlier state will not affect documents or e-mails that you saved after that time.

If you do not like the results of your restoration, you can reverse the restoration.

---

## Creating a System Restore Point

To create a system restore point:

1. Select **Start > Help and Support**.
2. Click **System Restore**.

The System Restore window opens.

3. Click **Create a restore point**, and then click **Next**.
4. Follow the on-screen instructions.

## Restoring to a Restore Point

To restore the computer to a previous date and time when it was functioning optimally:

1. Select **Start > Help and Support**.
2. Click **System Restore**.  
The System Restore window opens.
3. Click **Restore my computer to an earlier time**, and then click **Next**.
4. Follow the on-screen instructions.

## Reinstalling Applications

Applications preinstalled or preloaded on your computer can be reinstalled by using the *Recovery* disc or a third-party software disc.

In most cases, the applications preloaded on your computer, such as those available in the Software Setup utility, can be reinstalled from your hard drive. To access the Software Setup utility, select **Start > All Programs > Software Setup**.

---

The application reinstallation process replaces corrupted system files within the application and reinstalls deleted system files within the application.

- In most cases: If the application you are reinstalling is still installed on your computer, the reinstallation process does not affect your settings within the application.
- In all cases: If an application has been deleted from your computer, the reinstallation process reinstalls the application or utility to the factory image but cannot restore your personal settings.

## Reinstalling Applications from the Hard Drive

To reinstall a preloaded application or utility from your hard drive:

1. Select **Start > All Programs > Software Setup**, and then follow the instructions on the screen.
2. When you are prompted to select the software you want to reinstall, select or clear the appropriate check boxes.

## Reinstalling Applications from Discs

To reinstall applications from discs:

1. Insert the disc into the optical drive.
  - If autorun is enabled, an installation wizard opens.
  - If autorun is disabled, select **Start > Run**. Enter  
`x:\setup.exe`  
where *x* is your optical drive designation  
and then select **OK**.
2. When the installation wizard opens, follow the installation instructions on the screen.
3. Restart the computer if prompted.

## Repairing the Operating System

To attempt an operating system repair without deleting your personal data, use the *Operating System* disc that was shipped with the computer:

If your computer does not have an internal optical drive, connect an optional external optical drive.

---

1. Connect the computer to external power through the AC adapter and turn on the computer.
2. Immediately insert the *Operating System* disc into the computer.
3. Press and hold the power button for at least 5 seconds to turn off the computer.
4. Press the power button again to turn on the computer.
5. When prompted, press any key to start from the disc.

After a few minutes, you may need to select your language, and then the Setup Wizard opens.

On the “Welcome to Setup” page, do not press **R** (step 8 in this procedure) until you have completed steps 6 and 7.

6. Press **enter** to continue.

A licensing agreement page is displayed.

7. Press **f8** to accept the agreement and continue.

The “Setup” page is displayed.

8. Press **R** to repair the selected Windows installation.

The repair process begins. This process takes 1 to 2 hours to complete.

The computer restarts in Windows after the process is complete.

## Reinstalling the Operating System

**CAUTION:** To protect your personal data and the software installed on the computer, back up your data before reinstalling the operating system. See the Windows online Help utility to learn more about backing up your files. Select **Start > Help and Support**. Then type "backup" in the Search box.

---

If other recovery efforts do not successfully repair the operating system, you can reinstall it.

To reinstall the operating system:

---

During the reinstallation, you may be prompted for your Product Key. Your Product Key is provided on the Microsoft Certificate of Authenticity label on the bottom of the computer.

---

If your computer does not have an internal optical drive, connect an optional external optical drive.

---

1. Connect the computer to external power through the AC adapter and turn on the computer.
2. Immediately insert the *Operating System* disc into the computer.
3. Press and hold the power button for at least 5 seconds to turn off the computer.

4. Press the power button again to turn on the computer.
  5. When prompted, press any key to start from the disc.  
After a few minutes, you may need to select your language, and then the Setup Wizard opens.
  6. Press **enter** to continue.  
A licensing agreement page is displayed.
  7. Press **f8** to accept the agreement and continue.  
The “Setup” page is displayed.
  8. Press **esc** to continue installing a new copy of the operating system instead of repairing it.
  9. Press **enter** to set up the operating system.
  10. Press **C** to continue setup using this partition.
  11. Select **Format the partition using the NTFS file system (Quick)**, and then press **enter**.  
 Formatting this drive deletes all current files.
  12. Press **F** to format the drive.  
The reinstallation process begins. This process takes 1 to 2 hours to complete.
- The computer restarts in Windows when the process is complete.

## Reinstalling Device Drivers and Other Software

After the operating system installation process is complete, you must reinstall drivers.

To reinstall drivers, use the *Recovery* disc included with the computer:

1. While running Windows, insert the *Recovery* disc into the optical drive.

If your computer does not have an internal optical drive, connect an optional external optical drive.

2. If you do not have autorun enabled:

- a. Select **Start > Run**.

- b. Then type `D:\SWSETUP\APPINSTL\SETUP.EXE`

where *D* indicates the optical drive.

3. Follow the on-screen instructions for installing the drivers.

After the drivers are reinstalled, you must reinstall any software you added to the computer. Follow the installation instructions provided with the software.

**Table 4-5**  
**Spare Part Information (Continued)**

Description	Spare Part Number
<b>Screw Kit</b> (includes the following screws; refer to <a href="#">Appendix C, "Screw Listing,"</a> for more information on specifications and usage)	382692-001
■ Hex socket HM5.0×12.0 screw lock	■ Phillips PM2.0×5.0 screw
■ Phillips PM3.0×5.0 screw	■ Phillips PM2.0×4.0 screw
■ Phillips PM3.0×4.0 screw	■ Phillips PM2.0×2.0 screw
■ Phillips PM2.5×13.0 spring-loaded screw	■ Phillips PM1.5×4.0 screw
■ Phillips PM2.0×10.0 spring-loaded screw	■ Phillips PM1.5×3.0 screw
■ Phillips PM2.0×8.0 shoulder screw	■ Torx 8 M2.0×9.5 screw
■ Phillips PM2.0×6.0 screw	■ Torx 8 M2.0×6.0 screw
	■ Torx 8 M2.0×4.0 screw

## 4.7 Sequential Part Number Listing

**Table 4-6**  
**Sequential Part Number Listing**

Spare Part Number	Description
246959-001	Power cord for use in Canada, French Canada, Latin America, Taiwan, Thailand, and the United States
246959-011	Power cord for use in Australia and New Zealand
246959-021	Power cord for use in Belgium, Europe, Finland, France, Germany, Greece, the Netherlands, Norway, Portugal, Spain, and Sweden
246959-031	Power cord for use in Hong Kong and the United Kingdom

**Table 4-6**  
**Sequential Part Number Listing (Continued)**

<b>Spare Part Number</b>	<b>Description</b>
246959-061	Power cord for use in Italy
246959-081	Power cord for use in Denmark
246959-201	Power cord for use in Brazil
246959-291	Power cord for use in Japan
246959-AD1	Power cord for use in Korea
246959-AG1	Power cord for use in Sweden
246959-BB1	Power cord for use in Israel
325521-001	Modem board (high-speed 56K)
325814-001	Nylon entry level carrying case
325815-001	Nylon top load carrying case
325815-002	Nylon top load carrying case
359118-001	USB 1.1 diskette drive
367456-001	8-cell travel battery pack
367871-001	Broadcomm Bluetooth wireless board, includes cable
372420-001	Adjustable Notebook Stand
372771-001	8-cell, 4.8-AHr battery pack
373032-001	802.11b/g combination WLAN Mini PCI communications module for use in the United States
373032-002	802.11b/g combination WLAN Mini PCI communications module for use internationally
373032-291	802.11b/g combination WLAN Mini PCI communications module for use in Japan
373033-001	802.11a/b/g combination WLAN module Mini PCI communications module for use in the United States

**Table 4-6**  
**Sequential Part Number Listing (*Continued*)**

<b>Spare Part Number</b>	<b>Description</b>
373033-002	802.11a/b/g combination WLAN Mini PCI communications module for use internationally
373033-291	802.11a/b/g combination WLAN Mini PCI communications module for use in Japan
373119-001	256-MB memory module (DDR2, PC2-4200, CL3, 533 MHz)
373120-001	512-MB memory module (DDR2, PC2-4200, CL3, 533 MHz)
373121-001	1024-MB memory module (DDR2, PC2-4200, CL3, 533 MHz)
373314-001	8X DVD-ROM drive
373315-001	24X DVD/CD-RW Combo Drive
373900-001	802.11a/b/g combination WLAN module Mini PCI communications module for use in most of the world
373900-021	802.11a/b/g combination WLAN Mini PCI communications module for use in Europe, Middle East, and Africa
373900-291	802.11a/b/g combination WLAN Mini PCI communications module for use in Japan
373901-001	802.11a/b/g High Band combination WLAN Mini PCI communications module
374791-001	90 watt, slim line profile power supply
374803-001	Docking Station
374804-001	Advanced Docking Station
375557-001	DVD+RW/R and CD-RW Combo Drive
378203-001	Keyboard, with pointing stick for use in the United States
378203-002	Keyboard, with pointing stick for use internationally
378203-031	Keyboard, with pointing stick for use in the United Kingdom
378203-041	Keyboard, with pointing stick for use in Germany

**Table 4-6**  
**Sequential Part Number Listing (*Continued*)**

<b>Spare Part Number</b>	<b>Description</b>
378203-051	Keyboard, with pointing stick for use in France
378203-061	Keyboard, with pointing stick for use in Italy
378203-071	Keyboard, with pointing stick for use in Spain
378203-081	Keyboard, with pointing stick for use in Denmark
378203-091	Keyboard, with pointing stick for use in Norway
378203-101	Keyboard, with pointing stick for use in Sweden
378203-111	Keyboard, with pointing stick for use in Switzerland
378203-121	Keyboard, with pointing stick for use in French Canada
378203-131	Keyboard, with pointing stick for use in Portugal
378203-141	Keyboard, with pointing stick for use in Turkey
378203-151	Keyboard, with pointing stick for use in Greece
378203-161	Keyboard, with pointing stick for use in Latin America
378203-171	Keyboard, with pointing stick for use in Saudi Arabia
378203-181	Keyboard, with pointing stick for use in Belgium
378203-201	Keyboard, with pointing stick for use in Brazil
378203-211	Keyboard, with pointing stick for use in Hungary
378203-221	Keyboard, with pointing stick for use in Czech Republic
378203-231	Keyboard, with pointing stick for use in Slovakia
378203-251	Keyboard, with pointing stick for use in Russia
378203-281	Keyboard, with pointing stick for use in Thailand
378203-291	Keyboard, with pointing stick for use in Japan
378203-AB1	Keyboard, with pointing stick for use in Taiwan

**Table 4-6**  
**Sequential Part Number Listing (*Continued*)**

<b>Spare Part Number</b>	<b>Description</b>
378203-AD1	Keyboard, with pointing stick for use in Korea
378203-BA1	Keyboard, with pointing stick for use in Slovenia
378203-BB1	Keyboard, with pointing stick for use in Israel
378203-DD1	Keyboard, with pointing stick for use in Iceland
378220-001	Intel Pentium M 1.60-GHz processor, includes thermal paste
378221-001	Intel Pentium M 1.73-GHz processor, includes thermal paste
378222-001	Intel Pentium M 1.86-GHz processor, includes thermal paste
378223-001	Intel Pentium M 2.00-GHz processor, includes thermal paste
378224-001	Intel Pentium M 2.13-GHz processor, includes thermal paste
379799-001	Heat sink (includes thermal paste)
379807-001	Trusted Platform Module (TPM) security module
379808-001	5400-rpm, 40-GB hard drive (includes frame and connector)
379809-001	5400-rpm, 60-GB hard drive (includes frame and connector)
379810-001	5400-rpm, 80-GB hard drive (includes frame and connector)
380045-001	Docking Station Miscellaneous Plastics Kit
380950-001	7200-rpm, 60-GB hard drive (includes frame and connector)
381582-001	802.11b/g WLAN Mini PCI communications module for use in most of the world
381583-001	802.11b/g WLAN Mini PCI communications module for use in the rest of the world
382674-001	Thermal plate (includes fan and thermal paste)
382675-001	TouchPad with TouchPad buttons and pointing stick buttons (includes TouchPad cable)
382676-001	TouchPad with TouchPad buttons (includes TouchPad cable)

**Table 4-6**  
**Sequential Part Number Listing (*Continued*)**

<b>Spare Part Number</b>	<b>Description</b>
382677-001	Audio board (includes audio board cable and USB board cable)
382678-001	Top cover for use only with HP Compaq nc8230 and nc8220 models (includes speakers)
382679-001	Top cover for use only with HP Compaq nw8240 models (includes speakers)
382680-001	Switch cover for use only with HP Compaq nw8240 and nc8230 models (include LED board and LED board cable)
382681-001	Base enclosure for use only with HP Compaq and nc8230 and nc8220 models
382682-001	Display assembly, 15.4-inch, WXGA, TFT (includes wireless antenna boards and cables)
382683-001	Display assembly, 15.4-inch, UXGA, TFT (includes wireless antenna boards and cables)
382684-001	Display assembly, 15.4-inch, WSXGA, TFT (includes wireless antenna boards and cables)
382686-001	System board with 128-MB video memory, for use only with HP Compaq nw8240 models
382687-001	System board with 128-MB video memory, for use only with HP Compaq nc8230 and nc8220 models
382688-001	System board with 64-MB video memory, for use only with HP Compaq nc8230 and nc8220 models
382689-001	System board frame (includes RJ-11 connector module and cable)
382690-001	Serial connector module (includes serial connector module cable)
382691-001	Miscellaneous Plastics Kit

**Table 4-6**  
**Sequential Part Number Listing (*Continued*)**

<b>Spare Part Number</b>	<b>Description</b>
382692-001	Miscellaneous Screw Kit
382693-001	Push button module
384132-001	Base enclosure for use only with HP Compaq nw8240 models
384133-001	Switch cover for use only with HP Compaq nc8220 models (include LED board and LED board cable)
385548-001	Keyboard, without pointing stick for use in the United States
385548-002	Keyboard, without pointing stick for use internationally
385548-031	Keyboard, without pointing stick for use in the United Kingdom
385548-041	Keyboard, without pointing stick for use in Germany
385548-051	Keyboard, without pointing stick for use in France
385548-061	Keyboard, without pointing stick for use in Italy
385548-071	Keyboard, without pointing stick for use in Spain
385548-081	Keyboard, without pointing stick for use in Denmark
385548-091	Keyboard, without pointing stick for use in Norway
385548-101	Keyboard, without pointing stick for use in Sweden
385548-111	Keyboard, without pointing stick for use in Switzerland
385548-121	Keyboard, without pointing stick for use in French Canada
385548-131	Keyboard, without pointing stick for use in Portugal
385548-141	Keyboard, without pointing stick for use in Turkey
385548-151	Keyboard, without pointing stick for use in Greece
385548-161	Keyboard, without pointing stick for use in Latin America
385548-171	Keyboard, without pointing stick for use in Saudi Arabia
385548-181	Keyboard, without pointing stick for use in Belgium

390120-001	512-MB memory module (DDR2, PC2-3200, CL3, 400 MHz)
390121-001	1024-MB memory module (DDR2, PC2-3200, CL3, 400 MHz)

---

---

## Removal and Replacement Preliminaries

This chapter provides essential information for proper and safe removal and replacement service.

### 5.1 Tools Required

You will need the following tools to complete the removal and replacement procedures:

- Magnetic screwdriver
- Phillips P0 screwdriver
- Torx T8 screwdriver
- 5.0-mm socket for system board locks
- Flat-bladed screwdriver
- Tool kit—includes connector removal tool, loopback plugs, and case utility tool

## 5.2 Service Considerations

The following sections include some of the considerations that you should keep in mind during disassembly and assembly procedures.

---

As you remove each subassembly from the computer, place the subassembly (and all accompanying screws) away from the work area to prevent damage.

---

### Plastic Parts

Using excessive force during disassembly and reassembly can damage plastic parts. Use care when handling the plastic parts. Apply pressure only at the points designated in the maintenance instructions.

### Cables and Connectors

---

**CAUTION:** When servicing the computer, ensure that cables are placed in their proper locations during the reassembly process. Improper cable placement can damage the computer.

---

Cables must be handled with extreme care to avoid damage. Apply only the tension required to unseat or seat the cables during removal and insertion. Handle cables by the connector whenever possible. In all cases, avoid bending, twisting, or tearing cables. Ensure that cables are routed in such a way that they cannot be caught or snagged by parts being removed or replaced. Handle flex cables with extreme care; these cables tear easily.

## 5.3 Preventing Damage to Removable Drives

Removable drives are fragile components that must be handled with care. To prevent damage to the computer, damage to a removable drive, or loss of information, observe the following precautions:

- Before removing or inserting a hard drive, shut down the computer. If you are unsure whether the computer is off or in hibernation, turn the computer on, and then shut it down through the operating system.
- Before removing a diskette drive or optical drive, ensure that a diskette or disc is not in the drive and ensure that the optical drive tray is closed.
- Before handling a drive, ensure that you are discharged of static electricity. While handling a drive, avoid touching the connector.
- Handle drives on surfaces covered with at least one inch of shock-proof foam.
- Avoid dropping drives from any height onto any surface.
- After removing a hard drive, an optical drive, or a diskette drive, place it in a static-proof bag.
- Avoid exposing a hard drive to products that have magnetic fields, such as monitors or speakers.
- Avoid exposing a drive to temperature extremes or liquids.
- If a drive must be mailed, place the drive in a bubble pack mailer or other suitable form of protective packaging and label the package “FRAGILE: Handle With Care.”

## **5.4 Preventing Electrostatic Damage**

Many electronic components are sensitive to electrostatic discharge (ESD). Circuitry design and structure determine the degree of sensitivity. Networks built into many integrated circuits provide some protection, but in many cases, the discharge contains enough power to alter device parameters or melt silicon junctions.

A sudden discharge of static electricity from a finger or other conductor can destroy static-sensitive devices or microcircuitry. Often the spark is neither felt nor heard, but damage occurs.

An electronic device exposed to electrostatic discharge may not be affected at all and can work perfectly throughout a normal cycle. Or the device may function normally for a while, then degrade in the internal layers, reducing its life expectancy.

## 5.5 Packaging and Transporting Precautions

Use the following grounding precautions when packaging and transporting equipment:

- To avoid hand contact, transport products in static-safe containers, such as tubes, bags, or boxes.
- Protect all electrostatic-sensitive parts and assemblies with conductive or approved containers or packaging.
- Keep electrostatic-sensitive parts in their containers until the parts arrive at static-free workstations.
- Place items on a grounded surface before removing items from their containers.
- Always be properly grounded when touching a sensitive component or assembly.
- Store reusable electrostatic-sensitive parts from assemblies in protective packaging or nonconductive foam.
- Use transporters and conveyors made of antistatic belts and roller bushings. Ensure that mechanized equipment used for moving materials is wired to ground and that proper materials are selected to avoid static charging. When grounding is not possible, use an ionizer to dissipate electric charges.

## 5.6 Workstation Precautions

Use the following grounding precautions at workstations:

- Cover the workstation with approved static-shielding material (refer to [Table 4-2, “Static-Shielding Materials”](#)).
- Use a wrist strap connected to a properly grounded work surface and use properly grounded tools and equipment.
- Use conductive field service tools such as cutters, screwdrivers, and vacuums.
- When fixtures must directly contact dissipative surfaces, use fixtures made only of static-safe materials.
- Keep the work area free of nonconductive materials such as ordinary plastic assembly aids and Styrofoam.
- Handle electrostatic-sensitive components, parts, and assemblies by the case or PCM laminate. Handle these items only at static-free workstations.
- Avoid contact with pins, leads, or circuitry.
- Turn off power and input signals before inserting or removing connectors or test equipment.

## 5.7 Grounding Equipment and Methods

Grounding equipment must include either a wrist strap or a foot strap at a grounded workstation.

- When seated, wear a wrist strap connected to a grounded system. Wrist straps are flexible straps with a minimum of one megohm  $\pm 10\%$  resistance in the ground cords. To provide proper ground, wear a strap snugly against the skin at all times. On grounded mats with banana-plug connectors, use alligator clips to connect a wrist strap.
- When standing, use foot straps and a grounded floor mat. Foot straps (heel, toe, or boot straps) can be used at standing workstations and are compatible with most types of shoes or boots. On conductive floors or dissipative floor mats, use foot straps on both feet with a minimum of one megohm resistance between the operator and ground. To be effective, the conductive strips must be worn in contact with the skin.

Other grounding equipment recommended for use in preventing electrostatic damage includes:

- Antistatic tape
- Antistatic smocks, aprons, and sleeve protectors
- Conductive bins and other assembly or soldering aids
- Nonconductive foam
- Conductive tabletop workstations with ground cords of one megohm resistance
- Static-dissipative tables or floor mats with hard ties to the ground
- Field service kits
- Static awareness labels
- Material-handling packages
- Nonconductive plastic bags, tubes, or boxes
- Metal tote boxes
- Electrostatic voltage levels and protective materials

Table 5-1 shows how humidity affects the electrostatic voltage levels generated by different activities.

---

**Table 5-1**  
**Typical Electrostatic Voltage Levels**

Event	Relative Humidity		
	10%	40%	55%
Walking across carpet	35,000 V	15,000 V	7,500 V
Walking across vinyl floor	12,000 V	5,000 V	3,000 V
Motions of bench worker	6,000 V	800 V	400 V
Removing DIPS from plastic tube	2,000 V	700 V	400 V
Removing DIPS from vinyl tray	11,500 V	4,000 V	2,000 V
Removing DIPS from Styrofoam	14,500 V	5,000 V	3,500 V
Removing bubble pack from PCB	26,500 V	20,000 V	7,000 V
Packing PCBs in foam-lined box	21,000 V	11,000 V	5,000 V

A product can be degraded by as little as 700 V.

---

Table 5-2 lists the shielding protection provided by antistatic bags and floor mats.

---

**Table 5-2**  
**Static-Shielding Materials**

Material	Use	Voltage Protection Level
Antistatic plastic	Bags	1,500 V
Carbon-loaded plastic	Floor mats	7,500 V
Metallized laminate	Floor mats	5,000 V

---

# 6

---

## Removal and Replacement Procedures

This chapter provides removal and replacement procedures.

There are as many as 78 screws and screw locks, in 15 different sizes and types, that may have to be removed, replaced, or loosened when servicing the computer. Make special note of each screw and screw lock size and location during removal and replacement.

Refer to [Appendix C, “Screw Listing,”](#) for detailed information on screw and screw lock sizes, locations, and usage.

## 6.1 Serial Number

Report the computer serial number to HP when requesting information or ordering spare parts. The serial number is located on the bottom of the computer.

*Serial Number Location*

## 6.2 Disassembly Sequence Chart

Use the chart below to determine the section number to be referenced when removing computer components.

Disassembly Sequence Chart		
Section	Description	# of Screws Removed
6.3	Preparing the Computer for Disassembly Battery pack	0
6.4	Hard Drive	2 loosened to remove the hard drive cover 1 loosened to remove the hard drive 6 to disassemble hard drive
6.5	Computer Feet	0
6.6	MultiBay II Device	1
6.7	External Memory Module	1 loosened to remove the memory module compartment cover
6.8	Bluetooth Board	1 loosened to remove the Bluetooth board cover 2 removed to remove Bluetooth board
6.9	Keyboard	2
6.10	Switch Cover	3 to remove the switch cover 6 to remove the LED board
6.11	RTC Battery	0
6.12	Thermal Plate	4 loosened 4 removed

### Disassembly Sequence Chart (*Continued*)

Section	Description	# of Screws Removed
6.13	Heat Sink	4 loosened
6.14	Processor	1 loosened
6.15	TPM Security Module	1
6.16	Internal Memory Module	0
6.17	TouchPad	1
6.18	Mini PCI Communications Module	0
	 To prevent an unresponsive system and the display of a warning message, install only a Mini PCI device authorized for use in your computer by the governmental agency that regulates wireless devices in your country. If you install a device and then receive a warning message, remove the device to restore computer functionality. Then contact Customer Care.	
6.19	Display Assembly	8
6.20	Top Cover	2 rubber screw covers 16 screws
6.21	Modem Board	2
6.22	System Board	7 screws 2 screw locks
6.23	System Board Frame	2
6.24	Push Button Module	1
6.25	Serial Connector Module	2 screw locks
6.26	Audio Board	2

## 6.3 Preparing the Computer for Disassembly

Before you begin any removal or installation procedures:

1. Shut down the computer. If you are unsure whether the computer is off or in hibernation, turn the computer on, and then shut it down through the operating system.
2. Disconnect all external devices connected to the computer.
3. Disconnect the power cord.

---

### Battery Pack Spare Part Number Information

---

8-cell, 4.8-AHr

372771-001

---

4. Remove the battery pack by following these steps:
  - a. Turn the computer upside down with the rear panel toward you.
  - b. Slide and release the battery pack lock latch ❶ to the right. (The battery pack partially disengages from the computer.)
  - c. Slide and hold the battery pack release latch ❷ to the right.
  - d. Slide the battery pack ❸ straight back and remove it.

*Removing the Battery Pack*

Reverse the above procedure to install the battery pack.

## 6.4 Hard Drive

---

### Hard Drive Spare Part Number Information

---

7200-rpm		5400-rpm	
60-GB	380950-001	80-GB	379810-001
		60-GB	379809-001
		40-GB	379808-001

---

1. Prepare the computer for disassembly ([Section 6.3](#)).
2. Loosen the two PM2.0×4.0 screws **1** that secure the hard drive cover to the computer.
3. Lift the left side of the hard drive cover **2** and swing it to the right.
4. Remove the hard drive cover.

---

The hard drive cover is included in the Miscellaneous Plastics Kit, spare part number 382691-001.

---

*Removing the Hard Drive Cover*

5. Loosen the PM2.5×13.0 spring-loaded hard drive retention screw ❶.
6. Grasp the mylar tab ❷ on the left side of the hard drive and slide the hard drive to the right ❸ to disconnect it from the system board.
7. Remove the hard drive ❹ from the hard drive bay.

*Removing the Hard Drive*

8. Remove the following:

- ❶ Two PM3.0×5.0 screws
- ❷ Two PM3.0×4.0 screws
- ❸ Two PM1.5×4.0 screws

9. Lift the frame ❹ straight up to remove it from the hard drive.

10. Remove the hard drive connector ❺ from the hard drive.

*Removing the Hard Drive Frame and Connector*

Reverse the above procedure to reassemble and install the hard drive.

## 6.5 Computer Feet

The computer feet are adhesive-backed rubber pads. The feet are included in the Miscellaneous Plastics Kit, spare part number 382691-001.

*Replacing the Computer Feet*

## 6.6 MultiBay II Device

### MultiBay II Device Spare Part Number Information

DVD-ROM drive	373314-001
DVD+RW/R and CD-RW Combo Drive	375557-001
DVD/CD-RW Combo Drive	373315-001

1. Prepare the computer for disassembly ([Section 6.3](#)).
2. Position the computer with the left side toward you.
3. If it is installed, remove the T8M2.0x4.0 screw **1** that secures the MultiBay II device to the computer.
4. Gently press in on the left side of the device **2** to unlock it.
5. Slide the device **3** from the computer.

*Removing the MultiBay II Device*

Reverse the above procedure to install a MultiBay II device.

## 6.7 External Memory Module

---

### Memory Module Spare Part Number Information

---

DDR2, PC2-4200, CL3, 533 MHz

1024 MB	373121-001
512 MB	373120-001
256 MB	373119-001

---

DDR2, PC2-3200, CL3, 400 MHz

1024 MB	391021-001
512 MB	391020-001
256 MB	391019-001

---

1. Prepare the computer for disassembly (refer to [Section 6.3](#)).
2. Position the computer with the front toward you.

3. Loosen the PM2.0×4.0 screw **1** that secures the memory module compartment cover to the computer.
4. Lift the right side of the cover **2** up and swing it to the left.
5. Remove the memory module compartment cover.

The memory module compartment cover is included in the Miscellaneous Plastics Kit, spare part number 382691-001.

---

*Removing the Memory Module Compartment Cover*

6. Spread the retaining tabs **1** on each side of the memory module socket to release the memory module. (The side of the module opposite the socket rises away from the computer.)
7. Slide the module **2** away from the socket at an angle.
8. Remove the memory module board.

Memory modules are designed with a notch **3** to prevent incorrect installation into the memory module socket.

---

### *Removing the External Memory Module*

Reverse the above procedure to install an external memory module.

## 6.8 Bluetooth Board

### Bluetooth Board Spare Part Number Information

Broadcomm Bluetooth wireless board (includes Bluetooth board cable)	367871-001
---	------------

1. Prepare the computer for disassembly (refer to [Section 6.3](#)).
2. Position the computer with the right side toward you.
3. Loosen the PM1.5×3.0 screw **1** that secures the Bluetooth cover to the computer.
4. Remove the Bluetooth cover **2** from the computer.

The Bluetooth cover is included in the Miscellaneous Plastics Kit, spare part number 382691-001.

5. Disconnect the Bluetooth cable **3** from the system board.

*Removing the Bluetooth Board*

6. Remove the two PM1.5×3.0 screws ❶ that secure the Bluetooth board to the Bluetooth cover.
7. Remove the Bluetooth board ❷ from the cover.

*Removing the Bluetooth Board Cover*

Reverse the above procedure to install a Bluetooth board.

## 6.9 Keyboard

---

### Keyboard Spare Part Number Information

---

With pointing stick

Belgium	378203-181	Latin America	378203-161
Brazil	378203-201	Norway	378203-091
Czech Republic	378203-221	Portugal	378203-131
Denmark	378203-081	Russia	378203-251
France	378203-051	Saudi Arabia	378203-171

Italy	385548-061	Turkey	385548-141
Japan	385548-291	United Kingdom	385548-031
Korea	385548-AD1	United States	385548-001

---

1. Prepare the computer for disassembly ([Section 6.3](#)).
2. Position the computer with the front panel toward you.

3. Remove the two T8M2.0×9.5 screws that secure the keyboard to the computer.

*Removing the Keyboard Screws*

4. Turn the computer display-side up with the front panel toward you.
5. Open the computer as far as possible.
6. Slide the four keyboard retention tabs ❶ toward you. The tabs are located between the **esc** and **f1** keys, between the **f4** and **f5** keys, between the **f8** and **f9** keys, and between the **f12** and **delete** keys.
7. Lift the rear edge of the keyboard ❷ and swing it toward you until it rests on the palm rest.

*Releasing the Keyboard*

8. Release the zero insertion force (ZIF) connector **1** to which the keyboard cable is connected and disconnect the keyboard cable **2** from the system board.

Step 9 applies to models with keyboards with pointing sticks.

---

9. Release the ZIF connector **3** to which the pointing stick cable is connected and disconnect the pointing stick cable **4** from the system board.

#### *Disconnecting the Keyboard and Pointing Stick Cables*

10. Remove the keyboard.

Reverse the above procedure to install the keyboard.

## 6.10 Switch Cover

---

### Switch Cover Spare Part Number Information

---

For use only with HP Compaq nw8240 and nc8230 models	382680-001
For use only with HP Compaq nc8220 models	384133-001

---

Both switch cover spare part kits include the LED board and LED board cable.

---

1. Prepare the computer for disassembly ([Section 6.3](#)).
2. Remove the keyboard ([Section 6.9](#)).
3. Turn the computer upside down with the rear panel toward you.
4. Remove the three PM2.0×2.0 screws that secure the switch cover to the computer.

*Removing the Switch Cover Screws*

5. Turn the computer display-side up with the front panel toward you.
6. Open the computer as far as possible.
7. Use a flat-blade screwdriver to lift up the left and right hinge cover sections of the switch cover ❶ to detach it from the computer.
8. Swing the rear edge of the switch cover ❷ up and toward you.

*Releasing the Switch Cover*

9. Disconnect the LED board cable ❶ from the system board.
10. Remove the switch cover ❷.

*Removing the Switch Cover*

If necessary, perform the following steps to remove the LED board from the switch cover.

---

11. Turn the switch cover upside down.
12. Remove the six PM1.5×3.0 screws **1** that secure the LED board to the switch cover.
13. Remove the LED board **2**.

### *Removing the LED Board*

Reverse the above procedure to install the switch cover and LED board.

## 6.11 RTC Battery

---

The RTC battery is included in the Miscellaneous Plastics Kit, spare part number 382691-001.

---

1. Prepare the computer for disassembly ([Section 6.3](#)).
2. Release the keyboard ([Section 6.9](#)).
3. Disconnect the RTC battery cable ❶ from the system board.
4. Remove the RTC battery ❷ from the clip in the top cover.

*Removing the RTC Battery*

Reverse the above procedure to install an RTC battery.

## 6.12 Thermal Plate

---

### Thermal Plate Spare Part Number Information

---

Thermal plate (includes fan and thermal paste)	382674-001
--	------------

---

1. Prepare the computer for disassembly ([Section 6.3](#)).
2. Release the keyboard ([Section 6.9](#)).

3. Disconnect the fan cable **1** from the system board.

The following screws should be loosened and removed, then installed, in the 1, 2, 3, 4, 5, 6, 7, 8 sequence stamped on the thermal plate.

---

4. Loosen the four PM2.0×10.0 spring-loaded screws **2** that secure the thermal plate to the computer.
5. Remove the four T8M2.0×4.0 screws **3** that secure the thermal plate to the computer.
6. Remove the thermal plate **4**.

*Removing the Thermal Plate*

Reverse the above procedure to install the thermal plate.

## 6.13 Heat Sink

---

### Heat Sink Spare Part Number Information

---

Heat sink (includes thermal paste)

379799-001

---

1. Prepare the computer for disassembly ([Section 6.3](#)).
2. Release the keyboard ([Section 6.9](#)).
3. Remove the thermal plate ([Section 6.12](#)).

The following screws should be loosened and installed in the 1, 2, 3, 4 sequence stamped on the heat sink.

---

4. Loosen the four PM2.0x8.0 shoulder screws **1** that secure the heat sink to the computer.
- 

Due to the adhesive quality of the thermal paste located between the heat sink and processor, it may be necessary to move the heat sink from side to side to detach the heat sink from the processor.

---

5. Lift the right side of the heat sink **2** until it disengages from the processor.
6. Slide the heat sink **3** to the right and remove it.

*Removing the Heat Sink*

The thermal paste should be thoroughly cleaned from the surfaces of the heat sink **1** and processor **2** each time the heat sink is removed. Thermal paste is included with all heat sink and processor spare part kits.

---

### *Replacing the Thermal Paste*

Reverse the above procedure to install the heat sink.

## 6.14 Processor

---

### Processor Spare Part Number Information

---

Intel Pentium M 770 (2.13-GHz)	378224-001
Intel Pentium M 760 (2.00-GHz)	378223-001
Intel Pentium M 750 (1.86-GHz)	378222-001
Intel Pentium M 740 (1.73-GHz)	378221-001
Intel Pentium M 730 (1.60-GHz)	378220-001

---

1. Prepare the computer for disassembly ([Section 6.3](#)).
2. Release the keyboard ([Section 6.9](#)).
3. Remove the thermal plate ([Section 6.12](#)).
4. Remove the heat sink ([Section 6.13](#)).

5. Use a flat-blade screwdriver to turn the processor locking screw **1** one-quarter turn counterclockwise until you hear a click.
6. Lift the processor **2** straight up and remove it .

The gold triangle **3** on the processor should be aligned in the rear right corner when you install the processor.

---

### *Removing the Processor*

Reverse the above procedure to install the processor.

## 6.15 TPM Security Module

---

### TPM Security Module Spare Part Number Information

---

TPM security module

379807-001

---

1. Prepare the computer for disassembly ([Section 6.3](#)).
2. Release the keyboard ([Section 6.9](#)).
3. Remove the PM1.5×3.0 screw **1** that secures the TPM security module to the computer.
4. Lift up on the right side of the module to disconnect it from the system board and remove the module **2**.

*Removing the TPM Security Module*

Reverse the above procedure to install the TPM security module.

## 6.16 Internal Memory Module

---

### Memory Module Spare Part Number Information

---

1024 MB	373121-001
512 MB	373120-001
256 MB	373119-001

---

1. Prepare the computer for disassembly ([Section 6.3](#)).
2. Release the keyboard ([Section 6.9](#)).
3. Remove the thermal plate ([Section 6.12](#)).

4. Spread the retaining tabs **1** on each side of the memory module socket to release the memory module board. (The side of the module opposite the socket rises away from the computer.)
5. Slide the module away from the socket at an angle **2**.
6. Remove the memory module board.

Memory modules are designed with a notch **3** to prevent incorrect installation into the memory module socket.

---

#### *Removing the Internal Memory Module*

Reverse the above procedure to install an internal memory module.

## 6.17 TouchPad

---

### TouchPad Spare Part Number Information

---

For use only with HP Compaq nw8240 models	382679-001
For use only with HP Compaq nc8230 and nc8220 models	382678-001

---

1. Prepare the computer for disassembly ([Section 6.3](#)).
2. Remove the keyboard ([Section 6.9](#)).
3. Turn the computer upside down with the front toward you.
4. Remove the T8M2.0×9.5 screw that secures the TouchPad to the computer.

*Removing the TouchPad Screw*

5. Turn the computer display-side up with the front toward you.
6. Open the computer as far as possible.
7. Lift up on the front edge of the TouchPad **1** until it disengages from the computer.
8. Slide the TouchPad back **2** until it rests on the computer.

*Releasing the TouchPad*

9. Disconnect the TouchPad cable ❶ from the system board.
10. Remove the TouchPad ❷.

*Removing the TouchPad*

Reverse the above procedure to install the TouchPad.

## 6.18 Mini PCI Communications Module

---

### Mini PCI Communications Module Spare Part Number Information

---

802.11b/g Mini PCI modem, for use in most of the world	381582-001
802.11b/g Mini PCI modem, for use in the rest of the world	381583-001
802.11b/g combination wireless local access network (WLAN) module, for use internationally	373032-002
802.11b/g combination WLAN module, for use in Japan	373032-291
802.11b/g combination WLAN module, for use in the United States	373032-001
802.11a/b/g combination WLAN communications module, for use internationally	373033-002
802.11a/b/g combination WLAN communications module, for use in Japan	373033-291
802.11a/b/g combination WLAN communications module, for use in the United States	373033-001
802.11a/b/g Mini PCI WLAN communications module, for use in Europe, the Middle East, and Africa	373900-021
802.11a/b/g Mini PCI WLAN communications module, for use in Japan	373900-291
802.11a/b/g Mini PCI WLAN communications module, for use in most of the world	373900-001
802.11a/b/g Mini PCI WLAN communications module, for use in the rest of the world	373901-001

---

1. Prepare the computer for disassembly ([Section 6.3](#)).
2. Remove the keyboard ([Section 6.9](#)).
3. Remove the TouchPad ([Section 6.17](#)).

Make note of which antenna cable is attached to which antenna clip on the Mini PCI communications module before disconnecting the cables.

---

4. Disconnect the auxiliary and main antenna cables ❶ from the Mini PCI communications module.
  5. Spread the two retaining tabs ❷ on each side of the Mini PCI socket to release the Mini PCI communications module. (The edge of the module opposite the socket rises away from the computer.)
  6. Remove the Mini PCI communications module by pulling the module ❸ away from the socket at a 45-degree angle.
- 

Mini PCI communications modules are designed with a notch ❹ to prevent incorrect installation.

---

#### *Removing a Mini PCI Communications Module*

Reverse the above procedure to install a Mini PCI communications module.

## 6.19 Display Assembly

---

### Display Assembly Spare Part Number Information

---

15.4-inch, SWXGA, TFT	382684-001
15.4-inch, WXGA, TFT	382682-001
15.4-inch, UXGA, TFT	382683-001

---

1. Prepare the computer for disassembly ([Section 6.3](#)) and remove the following components:
  - a. Keyboard ([Section 6.9](#))
  - b. Switch cover ([Section 6.10](#))
  - c. TouchPad ([Section 6.17](#))

Make note of which antenna cable is attached to which antenna clip on the Mini PCI communications module before disconnecting the cables.

2. Disconnect the wireless antenna cables **1** from the Mini PCI communications module.
3. Remove the wireless antenna cables from the top cover clips **2** and **3** through which they are routed.
4. Disconnect the display cable **4** from the system board.

*Disconnecting the Wireless Antenna and Display Cables*

5. Remove the two T8M2.0×9.5 screws ❶ and the two PM2.0×2.0 screws ❷ that secure the display assembly to the computer.

*Removing the Display Screws*

6. Position the computer with the rear panel toward you.
7. Remove the four T8M2.0×9.5 screws **1** that secure the display assembly to the computer.
8. Lift the display assembly **2** straight up to remove it.

### *Removing the Display*

Reverse the above procedure to install the display assembly.

## 6.20 Top Cover

---

### Top Cover Spare Part Number Information

---

For use only with HP Compaq nw8240 models	382679-001
For use only with HP Compaq nc8230 and nc8220 models	382678-001

---

1. Prepare the computer for disassembly ([Section 6.3](#)) and remove the following components:
  - a. Hard drive ([Section 6.4](#))
  - b. Keyboard ([Section 6.9](#))
  - c. Switch cover ([Section 6.10](#))
  - d. TouchPad ([Section 6.17](#))
  - e. Display assembly ([Section 6.19](#))
2. Turn the computer upside down with the front panel toward you.

3. Remove the two rubber screw covers ❶ and the eleven T8M2.0×9.5 screws ❷ that secure the top cover to the computer.

*Removing the Top Cover Screws, Part 1*

4. Turn the computer right-side up with the front panel toward you.
5. Disconnect the speaker cable **1** from the system board.
6. Remove the five T8M2.0×4.0 screws **2** that secure the top cover to the computer.

*Removing the Top Cover Screws, Part 2*

7. Lift the front edge of the top cover ❶ until it disengages from the base enclosure.
8. Lift the top cover ❷ straight up and remove it.

### *Removing the Top Cover*

Reverse the above procedure to install the top cover.

## 6.21 Modem Board

---

### Modem Board Spare Part Number Information

---

Modem board (high-speed 56K)

325521-001

---

1. Prepare the computer for disassembly ([Section 6.3](#)) and remove the following components:
  - a. Hard drive ([Section 6.4](#))
  - b. Keyboard ([Section 6.9](#))
  - c. Switch cover ([Section 6.10](#))
  - d. TouchPad ([Section 6.17](#))
  - e. Display assembly ([Section 6.19](#))
  - f. Top cover ([Section 6.20](#))

2. Remove the two T8M2.0×4.0 screws **1** that secure the modem board to the system board.
3. Lift the right side of the modem board **2** to disconnect it from the system board.
4. Disconnect the modem cable **3** from the modem board.
5. Remove the modem board.

### *Removing the Modem Board*

Reverse the above procedure to install the modem board.

## 6.22 System Board

---

### System Board Spare Part Number Information

---

With 128-MB video memory, for use only with HP Compaq nw8240 models	382686-001
With 128-MB video memory, for use only with HP Compaq nc8230 and nc8220 models	382687-001
With 64-MB video memory, for use only with HP Compaq nc8230 and nc8220 models	382688-001

---

When replacing the system board, ensure that the following components are removed from the defective system board and installed on the replacement system board:

- Memory modules ([Section 6.7](#) and [Section 6.16](#))
  - Processor ([Section 6.14](#))
  - TPM security module ([Section 6.15](#))
  - Mini PCI communications module ([Section 6.18](#))
  - Modem board ([Section 6.21](#))
-

1. Prepare the computer for disassembly ([Section 6.3](#)) and remove the following components:
  - a. Hard drive ([Section 6.4](#))
  - b. MultiBay II device ([Section 6.6](#))
  - c. Bluetooth board ([Section 6.8](#))
  - d. Keyboard ([Section 6.9](#))
  - e. Switch cover ([Section 6.10](#))
  - f. Thermal plate ([Section 6.12](#))
  - g. Heat sink ([Section 6.13](#))
  - h. TouchPad ([Section 6.17](#))
  - i. Display assembly ([Section 6.19](#))
  - j. Top cover ([Section 6.20](#))

2. Disconnect the RTC battery cable from the system board ([Section 6.11](#)).
3. Position the computer with the front panel toward you.
4. Disconnect the audio board cables **1** and **2** from the audio board.

*Disconnecting the Audio Board Cables*

5. Position the computer with the rear panel toward you.
6. Remove the following:
  - ❶ Two HM5.0×10.0 screw locks on each side of the external monitor connector
  - ❷ Seven T8M2.0×6.0 screws

*Removing the System Board Screws and Screw Locks*

7. Flex the left side of the base enclosure **1** until the serial connector **2** is clear of the base enclosure.
8. Lift the left side of the system board **3** until it rests at an angle.

*Releasing the System Board, Part 1*

9. Flex the right side of the base enclosure **1** until the USB **2**, 1394 **3**, S-Video **4**, and RJ-45 connectors **5** are clear of the base enclosure.
10. Lift the right side of the system board **6** until it rests at an angle.

*Releasing the System Board, Part 2*

11. Lift the system board straight up and remove it.

*Removing the System Board*

Reverse the above procedure to install the system board.

## 6.23 System Board Frame

---

### System Board Frame Spare Part Number Information

---

System board frame (includes RJ-11 modem cable)	382689-001
---	------------

---

1. Prepare the computer for disassembly ([Section 6.3](#)) and remove the following components:
  - a. Hard drive ([Section 6.4](#))
  - b. MultiBay II device ([Section 6.6](#))
  - c. Bluetooth board ([Section 6.8](#))
  - d. Switch cover ([Section 6.10](#))
  - e. Keyboard ([Section 6.9](#))
  - f. Thermal plate ([Section 6.12](#))
  - g. Heat sink ([Section 6.13](#))
  - h. TouchPad ([Section 6.17](#))
  - i. Display assembly ([Section 6.19](#))
  - j. Top cover ([Section 6.20](#))
  - k. System board ([Section 6.22](#))

2. Disconnect the following cables from the system board:
  - ❶ Audio connector board cable
  - ❷ USB connector board cable
  - ❸ Serial connector board cable
  - ❹ Modem cable
3. Remove the two T8M2.0×4.0 screws ❺ that secure the system board to the system board frame.

*Disconnecting the System Board Cables*

4. Lift the rear edge of the system board **1** until it rests at an angle.
5. Slide the system board **2** back until the front-right section of the system board **3** is clear of the screw boss **4** on the system board frame.
6. Remove the system board **5** from the system board frame.

*Removing the System Board from the System Board Frame*

7. If necessary, remove the RJ-11 connector module and cable ❶ from the clips ❷ in the system board frame.

*Removing the RJ-11 Connector Module and Cable*

Reverse the above procedures to install the system board frame.

## 6.24 Push Button Module

---

### Push Button Module Spare Part Number Information

---

Push button module

382693-001

---

1. Prepare the computer for disassembly ([Section 6.3](#)) and remove the following components:
  - a. Hard drive ([Section 6.4](#))
  - b. MultiBay II device ([Section 6.6](#))
  - c. Bluetooth board ([Section 6.8](#))
  - d. Switch cover ([Section 6.10](#))
  - e. Keyboard ([Section 6.9](#))
  - f. Thermal plate ([Section 6.12](#))
  - g. Heat sink ([Section 6.13](#))
  - h. TouchPad ([Section 6.17](#))
  - i. Display assembly ([Section 6.19](#))
  - j. Top cover ([Section 6.20](#))
  - k. System board ([Section 6.22](#))

2. Remove the PM2.0×6.0 screw ❶ that secures the push button module to the base enclosure.
3. Remove the push button module ❷.

*Removing the Push Button Module*

Reverse the above procedures to install the push button module.

## 6.25 Serial Connector Module

---

### Serial Connector Module Spare Part Number Information

---

Serial connector module

382690-001

---

1. Prepare the computer for disassembly ([Section 6.3](#)) and remove the following components:
  - a. Hard drive ([Section 6.4](#))
  - b. MultiBay II device ([Section 6.6](#))
  - c. Bluetooth board ([Section 6.8](#))
  - d. Switch cover ([Section 6.10](#))
  - e. Keyboard ([Section 6.9](#))
  - f. Thermal plate ([Section 6.12](#))
  - g. Heat sink ([Section 6.13](#))
  - h. TouchPad ([Section 6.17](#))
  - i. Display assembly ([Section 6.19](#))
  - j. Top cover ([Section 6.20](#))
  - k. System board ([Section 6.22](#))

2. Remove the two HM5.0×10.0 screw locks ❶ that secure the serial connector module to the system board frame.
3. Remove the serial connector module ❷ from the system board frame.

*Removing the Serial Connector Module and Cable*

Reverse the above procedure to install the serial connector module.

## 6.26 Audio Board

---

### Audio Board Spare Part Number Information

---

Audio board (includes audio board cable)	382677-001
--	------------

---

1. Prepare the computer for disassembly ([Section 6.3](#)) and remove the following components:
  - a. Hard drive ([Section 6.4](#))
  - b. MultiBay II device ([Section 6.6](#))
  - c. Bluetooth board ([Section 6.8](#))
  - d. Switch cover ([Section 6.10](#))
  - e. Keyboard ([Section 6.9](#))
  - f. Thermal plate ([Section 6.12](#))
  - g. Heat sink ([Section 6.13](#))
  - h. TouchPad ([Section 6.17](#))
  - i. Display assembly ([Section 6.19](#))
  - j. Top cover ([Section 6.20](#))
  - k. System board ([Section 6.22](#))

2. Remove the two T8M2.0×4.0 screws ❶ that secure the audio board to the base enclosure.
3. Lift the left side of the audio board ❷ to disengage it from the base enclosure.

*Removing the Audio Board*

Reverse the above procedure to install the audio board.

---

## Specifications

This chapter provides physical and performance specifications.

---

**Table 7-1**  
**Computer**

<b>Dimensions</b>	<b>Metric</b>	<b>U.S.</b>
Height	35.6 cm	14.02 in
Width	26.0 cm	10.24 in
Depth (front to back)	2.8 to 3.4 cm	1.1 to 1.34 in
<b>Weight</b>		
Full-featured model with optical drive and 8-cell battery pack	2.85 kg	6.25 lbs
Defeatured model with 8-cell battery pack	2.60 kg	5.73 lbs
<b>Input Power</b>		
Operating voltage	18.5 V dc @ 3.5 A - 90 W	
Operating current	3.5 A	
<b>Temperature</b>		
Operating (not writing to optical disc)	0°C to 35°C	32°F to 95°F
Operating (writing to optical disc)	5°C to 35°C	41°F to 95°F
Nonoperating	-20°C to 60°C	-4°F to 140°F

---

**Table 7-1**  
**Computer (Continued)**

<b>Relative humidity</b> (noncondensing)		
Operating	10% to 90%	10% to 90%
Nonoperating	5% to 95%	5% to 95%
<b>Maximum altitude</b> (unpressurized)		
Operating (14.7 to 10.1 psia)	-15 m to 3,048 m	-50 ft to 10,000 ft
Nonoperating (14.7 to 4.4 psia)	-15 m to 12,192 m	-50 ft to 40,000 ft
<b>Shock</b>		
Operating	125 g, 2 ms, half-sine	
Nonoperating	200 g, 2 ms, half-sine	
<b>Random Vibration</b>		
Operating	0.75 g zero-to-peak, 10 Hz to 500 Hz, 0.25 oct/min sweep rate	
Nonoperating	1.50 g zero-to-peak, 10 Hz to 500 Hz, 0.5 oct/min sweep rate	

Applicable product safety standards specify thermal limits for plastic surfaces. The computer operates well within this range of temperatures.

## Power Cord Set Requirements

### 3-Conductor Power Cord Set

The wide range input feature of the computer permits it to operate from any line voltage from 100 to 120 or 220 to 240 volts AC.

The power cord set included with the computer meets the requirements for use in the country where the equipment is purchased.

Power cord sets for use in other countries must meet the requirements of the country where the computer is used.

## General Requirements

The requirements listed below are applicable to all countries.

- The length of the power cord set must be at least 1.5 m (5.0 ft) and a maximum of 2.0 m (6.5 ft).
- All power cord sets must be approved by an acceptable accredited agency responsible for evaluation in the country where the power cord set will be used.
- The power cord sets must have a minimum current capacity of 10 amps and a nominal voltage rating of 125 or 250 V AC, as required by each country's power system.
- The appliance coupler must meet the mechanical configuration of an EN 60 320/IEC 320 Standard Sheet C13 connector for mating with the appliance inlet on the back of the computer.

## Country-Specific Requirements

### 3-Conductor Power Cord Set Requirements

Country/Region	Accredited Agency	Applicable Note Number
Australia	EANSW	1
Austria	OVE	1
Belgium	CEBC	1
Canada	CSA	2
Denmark	DEMKO	1
Finland	FIMKO	1
France	UTE	1
Germany	VDE	1
Italy	IMQ	1
Japan	METI	3

#### NOTES:

1. The flexible cord must be <HAR> Type HO5VV-F, 3-conductor, 1.0 mm<sup>2</sup> conductor size. Power cord set fittings (appliance coupler and wall plug) must bear the certification mark of the agency responsible for evaluation in the country where it will be used.
2. The flexible cord must be Type SPT-3 or equivalent, No. 18 AWG, 3-conductor. The wall plug must be a two-pole grounding type with a NEMA 5-15P (15 A, 125 V) or NEMA 6-15P (15 A, 250 V) configuration.
3. The appliance coupler, flexible cord, and wall plug must bear a “T” mark and registration number in accordance with the Japanese Dentori Law. The flexible cord must be Type VCT or VCTF, 3-conductor, 1.00 mm<sup>2</sup> conductor size. The wall plug must be a two-pole grounding type with a Japanese Industrial Standard C8303 (7 A, 125 V) configuration.

---

### 3-Conductor Power Cord Set Requirements (*Continued*)

---

Country/Region	Accredited Agency	Applicable Note Number
Korea	EK	4
The Netherlands	KE A	1
Norway	NEMKO	1
People's Republic of China	CCC	5
Sweden	SEMKO	1
Switzerland	SEV	1
Taiwan	BSMI	4
United Kingdom	BSI	1
United States	UL	2

---

**NOTES:**

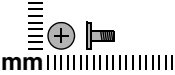

1. The flexible cord must be <HAR> Type HO5VV-F, 3-conductor, 1.0 mm<sup>2</sup> conductor size. Power cord set fittings (appliance coupler and wall plug) must bear the certification mark of the agency responsible for evaluation in the country where it will be used.
  2. The flexible cord must be Type SPT-3 or equivalent, No. 18 AWG, 3-conductor. The wall plug must be a two-pole grounding type with a NEMA 5-15P (15 A, 125 V) or NEMA 6-15P (15 A, 250 V) configuration.
  3. The appliance coupler, flexible cord, and wall plug must bear a “T” mark and registration number in accordance with the Japanese Dentori Law. The flexible cord must be Type VCT or VCTF, 3-conductor, 1.00 mm<sup>2</sup> conductor size. The wall plug must be a two-pole grounding type with a Japanese Industrial Standard C8303 (7 A, 125 V) configuration.
  4. The flexible cord must be Type RVV, 3-conductor, 0.75 mm<sup>2</sup> conductor size. Power cord set fittings (appliance coupler and wall plug) must bear the certification mark of the agency responsible for evaluation in the country where it will be used.
  5. The flexible cord must be Type VCTF, 3-conductor, 0.75 mm<sup>2</sup> conductor size. Power cord set fittings (appliance coupler and wall plug) must bear the certification mark of the agency responsible for evaluation in the country where it will be used.

## Screw Listing

This appendix provides specification and reference information for the screws and screw locks used in the computer. All screws and screw locks listed in this appendix are available in the Screw Kit, spare part number 382692-001.

**Table C-1**  
**Phillips PM2.0×4.0 Screw**

 mm	Color	Qty.	Length	Thread	Head Width
	Black	3	4.0 mm	2.0 mm	4.0 mm

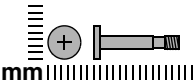

**Where used:**

- ① Two screws that secure the hard drive cover to the computer (screws are captured on the cover by C clips; documented in [Section 6.4](#))
- ② One screw that secures the memory module compartment cover to the computer (screw is captured on the cover by C clips; documented in [Section 6.7](#))

---

## Display Component Recycling

---

**WARNING:** The backlight contains mercury. Caution should be exercised when removing and handling the backlight to avoid damaging this component and causing exposure to the mercury.

---

**CAUTION:** The procedures in this appendix can result in damage to display components. The only components intended for recycling purposes are the liquid crystal display (LCD) panel and the backlight. Careful handling should be exercised when removing these components.

---

### Materials Disposal

This HP product contains mercury in the backlight of the display assembly and may require special handling at end of life.

Disposal of mercury may be regulated because of environmental considerations. For disposal or recycling information, contact your local authorities or visit the Electronic Industries Alliance (EIA) at <http://www.eiae.org>.

---

This appendix provides disassembly instructions for the display assembly. The display assembly must be disassembled to gain access to the backlight **1** and the liquid crystal display (LCD) panel **2**.

Disassembly procedures differ from one display assembly to another. The procedures provided in this appendix are general disassembly instructions. Specific details, such as screw sizes, quantities, and locations, and component shapes and sizes, can vary from one computer model to another.

---

Perform the following steps to disassemble the display assembly:

1. Remove all screw covers **1** and screws **2** that secure the display bezel to the display assembly.

*Removing the Display Bezel Screw Covers and Screws*

- 
2. Lift up and out on the left and right inside edges ① and the top and bottom inside edges ② of the display bezel until the bezel disengages from the display assembly.
3. Remove the display bezel ③.

*Removing the Display Bezel*

4. Disconnect all display panel cables ① from the display inverter and remove the inverter ②.

*Removing the Display Inverter*

5. Remove all screws **1** that secure the display panel assembly to the display enclosure.
6. Remove the display panel assembly **2** from the display enclosure.

*Removing the Display Panel Assembly*

7. Turn the display panel assembly upside down.
8. Remove all screws that secure the display panel frame to the display panel.

*Removing the Display Panel Frame Screws*

9. Use a sharp-edged tool to cut the tape ❶ that secures the side of the display panel to the display panel frame.
10. Remove the display panel frame ❷ from the display panel.

*Removing the Display Frame*

11. Remove the screws ❶ that secure the backlight cover to the display panel.
12. Lift the top edge of the backlight cover ❷ and swing it forward.
13. Remove the backlight cover.

*Removing the Backlight Cover*

14. Turn the display panel right-side up.
15. Remove the backlight cables **1** from the clip **2** in the display panel.

*Releasing the Backlight Cables*

16. Turn the display panel upside down.
17. Remove the backlight frame from the display panel.

*Removing the Backlight Frame*

**WARNING:** The backlight contains mercury. Caution should be exercised when removing and handling the backlight to avoid damaging this component and causing exposure to the mercury.

---

18. Slide the backlight out of the backlight frame.

*Removing the Backlight*

19. Disconnect the display cable ❶ from the LCD panel.
20. Remove the screws ❷ that secure the LCD panel to the display rear panel.
21. Release the LCD panel ❸ from the display rear panel.
22. Remove the tape ❹ that secures the LCD panel to the display rear panel.

*Releasing the LCD Panel*

23. Remove the LCD panel.

*Removing the LCD Panel*

24. Recycle the display backlight and LCD panel.

---
