## Operation Guide 4739

## Getting Acquainted

Congratulations upon your selection of this CASIO watch. To get the most out of your purchase, be sure to read this manual carefully.
Keep the watch exposed to bright light
The electricity generated by the solar cell of the watch is
stored by a built-in battery. Leaving or using the watch
where it is not exposed to light causes the battery to run
down. Make sure the watch is exposed to light as much as
possible.

- When you are not wearing the watch on your wrist,
position the face so it is pointed at a source of bright
light.
You should try to keep the watch outside of your sleeve
as much as possible. Charging is reduced significantly if
the face is only partially covered.
- The watch continues to operate, even when it is not exposed to light. Leaving the watch in the dark can cause the battery to run down, which will result in some watch unctions to be disabled. If the battery goes dead, you will have to re-configure watch exposed to light as much as possible. Battery charges in the light.

Rechargeable battery
Battery discharges in the dark.

## Some or all functions

 functionsdisabled

- The actual level at which some functions are disabled depends on the watch model. Frequent display illumination can run down the battery quickly and require charging The following guidelines give an idea of the charging time required to recover from a single illumination operation.

Approximately 5 minutes exposure to bright sunlight coming in through a window Approximately 50 minutes exposure to indoor fluorescent lighting

- Be sure to read "Power Supply" for important information you need to know when exposing the watch to bright light.
If the display of the watch is blank...
If the display of the watch is blank, it means that the watch's Power Saving function has turned off the display to conserve power
- See "Power Saving Function" for more information.

Note that CASIO COMPUTER CO., LTD. assumes no responsibility for any damage or loss suffered by you or any third party arising through the use of this product or its malfunction.

About This Manual

- Depending on the model of your watch, display text appears either as dark figures on a light background, or
light figures on a dark background. All sample displays in this manual are shown using dark figures on a light background.
- Button operations are indicated using the letters shown in the illustration.
Most of the display examples in this manual show only the digital display, without the analog hands.
Each section of this manual provides you with the information you need to perform operations in each mode. Further details and technical information can be found in the "Reference" section.

General Guide

- Press (C) to change from mode to mode
- In any mode (except when a setting screen is on the display), press (B) to illuminate the face of the watch. Battery Level Indicator Battery Level Indicator World Time Mode

Radio-controlled Atomic Timekeeping

This watch receives a time calibration signal and updates its time setting accordingly.

- (Mainflingen), England (Anthorn), United States (Fort Collins), Japan.

## Current Time Setting

This watch adjusts its time setting automatically in accordance with a time calibration signal. You can also
perform a manual procedure to set the time and date,
when necessary.

- The first thing you should do after purchasing this watch is to specify your Home City (the city where you normally will use the watch). For more information, see
"To specify your Home City".
- When using the watch outside the areas covered by the time signal transmitters, you will have to adjust the current time setting manually as required. See "Timekeeping" for more information about manual time settings.
- The U.S. time calibration signal can be picked up by the watch while in North America. The term "North America" in this manual refers to the area that consists of
The analog time of this watch is synchronized with
The analog time of this watch is synchronized with the digital time. Because of this, setting. See "Analog Timekeeping" for more information.
To specify your Home City
City code
(A) (B)

1. In the Timekeeping Mode, hold down (A) the city code (A) $\begin{array}{ll}\text { starts to flash. This is the setting screen. } \\ \text { 2. } & \text { Press (D) (east) to select the city code you want to use } \\ \text { as your Home City. }\end{array}$

- Time calibration signal reception is supported when any one of the city codes shown in the table below is selected as your Home City.

| German/U.K. Signal |  |  |  | Japan Signal |  | U.S. Signal |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| City Code | City Name | City Code | City Name | City Code | City Name | City Code | City Name | City Code | City Name |
| LIS | Lisbon | ATH | Athens | HKG | Hong Kong | HNL | Honolulu | YWG | Winnipeg |
| LON | London | MOW | Moscow | BJS | Beijing | ANC | Anchorage | CHI | Chicago |
| MAD | Madrid |  |  | TPE | Taipei | YVR | Vancouver | MIA | Miami |
| PAR | Paris |  |  | SEL | Seoul | LAX | Los Angeles | YTO | Toronto |
| ROM | Rome |  |  | TYO | Tokyo | YEA | Edmonton | NYC | New York |
| BER | Berlin |  |  |  |  | DEN | Denver | YHZ | Halifax |
| STO | Stockholm |  |  |  |  | MEX | Mexico City | YYT | St. Johns |

[^0]Important!

- Normally, your watch should show the correct time as soon as you select your Home City code. If it does not, it should adjust automatically after the next auto receive operation (in the middle of the night). You can also perform manual receive or you can set the time manually.
- The watch will receive the time calibration signal automatically from the applicable transmitter (in the middle of the night) and update its settings accordingly. For information about the relationship between city codes and transmitters, see "Home City Codes and Transmitters
- Under factory default settings, auto receive is turned off for all of the following city codes: MOW (Moscow), HKG (Hong Kong), BJS (Beijing), HNL (Honolulu), and ANC (Anchorage). For details about turning on auto receive for these city codes, see "To turn auto receive on and off"
- You can disable time signal reception, if you want. See "To turn auto receive on and off" for more information.
- See the maps under "Approximate Reception Ranges" for information about the reception ranges of the watch.
you are in an area that does not use Daylight Saving Time (summertime), turn off DST setting.
Time Calibration Signal Reception
There are two different methods you can use to receive the time calibration signal: auto receive and manual receive

## - Auto Receive

With auto receive, the watch receives the time calibration signal automatically up to six times a day. When any auto receive is successful, the remaining auto receive operations are not performed. For more information, see "About Auto Receive".

- Manual Receive

Manual receive lets you start a time calibration receive operation with the press of a button. For more information, see "To perform manual receive"
Important!

- The antenna of this watch is located on its 12 o'clock side. Position the watch with 12 o'clock facing towards a window as shown in the nearby illustration. Make sure there are no metal objects nearby.

## Operation Guide 4739

- Proper signal reception can be difficult or even impossible under the conditions listed

Inside or among
buildings

Inside a vehicle

Near
household household
appliances, office equipment, or a mobile phone

Near a
construction construction
site airport, site, airport,
or other or other
sources of
electrical electrical
noise

- Signal reception normally is better at night than during the day
- Time calibration signal reception takes from two to seven minutes, but in some cases it can take as long as 14 minutes. Take care that you do not perform any button operations or move the watch during this time.
- The time calibration signal the watch will attempt to pick up depends on its current Home City code setting as shown below. If you use the watch in Japan or Europe calibration signal from one of the transmitters in your current location. If it cannot receive the signal, it will then try to receive the time calibration signal from the other transmitter.
Home City Codes and Transmitters

| Home City Code | Transmitter | Frequency |
| :---: | :---: | :---: |
| LIS, LON, MAD, PAR, ROM, BER, STO, ATH, MOW* | Anthorn (England) Mainflingen (Germany) | $\begin{aligned} & 60.0 \mathrm{kHz} \\ & 77.5 \mathrm{kHz} \end{aligned}$ |
| $\begin{aligned} & \text { HKG*, BJS* }{ }^{*} \text { TPE, } \\ & \text { SEL, TYO } \\ & \hline \end{aligned}$ | Fukushima (Japan) Fukuoka/Saga (Japan) | $\begin{aligned} & 40.0 \mathrm{kHz} \\ & 60.0 \mathrm{kHz} \\ & \hline \end{aligned}$ |
| HNL*, ANC*, YVR, LAX, YEA, DEN, MEX, YWG, CHI, MIA, YTO, NYC, YHZ, YYT | Fort Collins, Colorado (the United States) | 60.0 kHz |

* The areas covered by the MOW, HKG, BJS, HNL, and ANC city codes are quite far from the time calibration signal transmitters, and so certain conditions may cause problems with signal reception

Approximate Reception Ranges

Signals are receivable in the Taiwan a
when reception conditions are good.

- Signal reception may not be possible at the distances noted below during certain times of the year or day. Radio interference may also cause problems with reception Mainflingen (Germany) or Anthorn (England) transmitters: 500 kilometers (310 miles)
Fort Collins (United States) transmitter: 600 miles ( 1,000 kilometers)
Fukushima or Fukuoka/Saga (Japan) transmitters: 500 kilometers ( 310 miles) - Even when the watch is within the reception range of the transmitter, signal reception will be impossible if the signal is blocked by mountains or other geological
- Signal reception is affected by weather, atmospheric conditions, and seasonal changes.
See the information under "Signal Reception Troubleshooting" if you experience problems with time calibration signal reception.
About Auto Receive
The watch receives the time calibration signal automatically up to six times a day. When any auto receive is successful, the remaining auto receive operations are no selected Home City, and whether standard time or Daylight Saving Time is selected for your Home City.

| Your Home City |  | Auto Receive Start Times |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 1 | 2 | 3 | 4 | 5 | 6 |
| LIS, LON | Standard Time | 1:00 am | 2:00 am | 3:00 am | 4:00 am | 5:00 am | Midnight next day |
|  | Daylight Saving Time | 2:00 am | 3:00 am | 4:00 am | 5:00 am | Midnight next day | $\begin{array}{\|l} \hline \text { 1:00 am } \\ \text { next day } \end{array}$ |
| MAD, PAR, ROM, BER, STO | Standard Time | 2:00 am | 3:00 am | 4:00 am | 5:00 am | Midnight next day | $\begin{aligned} & \text { 1:00 am } \\ & \text { next day } \end{aligned}$ |
|  | $\begin{array}{\|l\|} \hline \text { Daylight } \\ \text { Saving Time } \\ \hline \end{array}$ | 3:00 am | 4:00 am | 5:00 am | Midnight next day | $\begin{aligned} & 1: 00 \mathrm{am} \\ & \text { next day } \end{aligned}$ | $\begin{aligned} & \text { 2:00 am } \\ & \text { next day } \end{aligned}$ |
| ATH | Standard Time | 3:00 am | 4:00 am | 5:00 am | Midnight next day | $\begin{aligned} & \text { 1:00 am } \\ & \text { next day } \end{aligned}$ | $\begin{aligned} & \text { 2:00 am } \\ & \text { next day } \end{aligned}$ |
|  | $\begin{array}{\|l\|} \hline \text { Daylight } \\ \text { Saving Time } \\ \hline \end{array}$ | 4:00 am | 5:00 am | Midnight next day | $\begin{aligned} & \text { 1:00 am } \\ & \text { next day } \end{aligned}$ | $\begin{aligned} & \text { 2:00 am } \\ & \text { next day } \end{aligned}$ | $\begin{array}{\|l\|} \hline 3: 00 \text { am } \\ \text { next day } \end{array}$ |
| MOW | Standard Time | 4:00 am | 5:00 am | Midnight next day | $\begin{aligned} & \text { 1:00 am } \\ & \text { next day } \end{aligned}$ | $\begin{aligned} & \text { 2:00 am } \\ & \text { next day } \end{aligned}$ | $\begin{array}{\|l\|} \hline 3: 00 \mathrm{am} \\ \text { next day } \end{array}$ |
|  | Daylight Saving Time | 5:00 am | Midnight next day | $\begin{aligned} & \text { 1:00 am } \\ & \text { next day } \end{aligned}$ | $\begin{aligned} & \text { 2:00 am } \\ & \text { next day } \end{aligned}$ | $\begin{aligned} & \text { 3:00 am } \\ & \text { next day } \end{aligned}$ | $\begin{aligned} & \text { 4:00 am } \\ & \text { next day } \end{aligned}$ |
| $\begin{aligned} & \text { HKG, BJS,TPE, } \\ & \text { SEL,TYO } \end{aligned}$ | Standard Time | Midnight | 1:00 am | 2:00 am | 3:00 am | 4:00 am | 5:00 am |
| HNL, ANC, YVR, LAX, YEA, DEN, MEX,YWG, CHI, MIA,YTO, NYC, YHZ,YYT | Standard Time Daylight Saving Time | Midnight | 1:00 am | 2:00 am | 3:00 am | 4:00 am | 5:00 am |

Note

- When a calibration time is reached, the watch will receive the calibration signal only if it is in either the Timekeeping Mode or World Time Mode. Reception is not - Auto receive of the calibration signal is designed to be penformed early in the morning, while you sleep (provided that the Timekeeping Mode time is set correctly) Before going to bed for the night, remove the watch from your wrist, and put it in a
location where it can receive the signal easily.
- The watch receives the calibration signal for two to 14 minutes everyday when the time in the Timekeeping Mode reaches each of the calibration times. Avoid performing any button operation within 14 minutes before or after any one of the
Remember that reception of the calibration signal deands on the
- Remember that reception of the calibration signal depends on the current time in the Timekeeping Mode. The receive operation will be performed whenever the display time actually is the correct time.
Calibration signal reception is disabled while a countdown timer operation is in progress.
About the Receiving Indicator
The receiving indicator shows the strength of the calibration signal being received. For best reception, be sure to keep the watch in a location where signal strength is strongest.

- Use the receiving indicator as a guide for checking signal strength and for finding the best location for the watch during signal receive operations.
- Even in an area where signal strength is strong, it takes about 10 seconds for signal reception to stabilize enough for the receiving indicator to indicate signal strength.

To perform manual receive
Receiving 1 1. Enter the Timekeeping Mode.
Receiving indicator $\quad \begin{aligned} & \text { 2. Place the watch on a stable surface so its } 12 \text { o'clock } \\ & \text { side is facing towards a window. }\end{aligned}$

Receive successful
side is facing towards a window.
3. Hold down (D) for about two seconds until the receiving indicator appears on the display.
minutes. Take care that you do not perform two to 14 operations or move the watch during this time.
If the receive operation is successful, the rece. and time appear on the display, along with the GET indicator.

Receive failed

The watch will enter the Timekeeping Mode if you press (D) or if you do not perform any button operation for about one or two minutes.

If the current reception fails, the display shows the ERR indicator.
The watch will enter the Timekeeping Mode without changing the time setting if you press (D) or if you do not perform any button operation for about one or two

To turn auto receive on and off

## On/Off status

In the Timekeeping Mode, press (D) to display the Last Signal screen.
 (ON or OFF) start to flash. This is the setting screen. - Note that the setting screen will not appear if the currently selected Home City is one that does not support time calibration reception.
3. Press (D) to toggle auto receive on (ON) and off (OFF)

Fror information hout city codes tha reive see "To specify your Hes that support signal receive, see "To specify your Home City".
To check the latest signal reception results
Receive date In the Timekeeping Mode, press (D) to display the Last GEET T li, 30

Signal Reception Troubleshooting
Check the following points whenever you experience problems with signal reception.

| Problem | Probable Cause | What you should do |
| :---: | :---: | :---: |
| Cannot perform manual receive. | - The watch is not in the Timekeeping Mode. <br> - Your current Home City is not one of the following: <br> LIS, LON, MAD, PAR, ROM, BER, STO, ATH, MOW, HKG, BJS, TPE, SEL,TYO, HNL, ANC, YVR, LAX, YEA, DEN, MEX, YWG, CHI, MIA, YTO, NYC, YHZ, or YYT | - Enter the Timekeeping Mode and try again. <br> Sect LIS, LON, MAD, PAR, ROM, BER, STO, ATH, MOW, HKG, BJS, TPE, SEL,TYO, HNL, ANC, YVR, LAX,YEA, DEN, MEX, YWG, CHI, MIA, YTO, NYC, YHZ, or YYT as your Home City. |
| Time setting is incorrect following signal reception. | - If the time is one hour off, the DST setting may be incorrect. <br> - The Home City code setting is not correct for the area where you are using the watch. | - Change the DST setting to <br> Auto DST. <br> - Select the correct Home City code. |

and "Radio-controlled Atomic Timekeeping Precautions"

## Operation Guide 4739

To view the time in another city
While in the World Time Mode, press (D) to scroll through the city codes (time zones) to the east.

- For full information on city codes, see the "City Code Table".

To toggle a city code time between Standard Time and Daylight Saving Time

ST indicator 1. In the World Time Mode, use (D) to display the city cod (time zone) whose Standard Time/Daylight Saving Time setting you want to change.
2. Hold down (A) to toggle Daylight Saving Time (DST indicator displayed) and Standard Time (DST indicator not displayed).
change the DST setting of the Home City code to currently have selected in the Timekeeping Mode. See "To change the Daylight Saving Time (summer time) setting" for information about turning the Home City code DST setting on and off.

- The DST indicator will appear on the display whenever you display a city code for which Daylight Saving Time is turned on
Note that the DST/Standard Time setting affects only the currently displayed city code. Other city codes are not affected.

## Countdown Timer

You can set the countdown timer within a range of one to 60 minutes. An alarm sounds when the countdown

## reaches zero.

- Calibration signal reception (both auto and manual) is disabled while a countdown timer operation is in
progress.
operations in this section are performed in the Countdown Timer Mode, which you enter by pressing

To set the countdown start time

1. While the countdown start time is on the display in the Countdown Timer Mode, hold down (A) until the current countdown start time starts to flash, which indicates the setting screen.

- If the countdown start time is not displayed, use the procedure under "To use the countdown timer" to display it.
. While a setting is flashing, use (D) $(+)$ and (B) $(-)$ to change it

3. Press (A) to exit the setting screen.

## To use the countdown timer

Press (D) while in the Countdown Timer Mode to start the countdown timer

- When the end of the countdown is reached, the alarm sounds for 10 seconds or until you stop it by pressing any button. The countdown time is automatically reset to its starting value after the alarm stops.
- Press (D) while a countdown operation is in progress to pause it. Press (D) again to resume the countdown.
- To completely stop a countdown operation, first pause it (by pressing (D)), and then press (A). This returns the countdown time to its starting value.

## Stopwatch

The stopwatch lets you measure elapsed time, split times, and two finishes

- The display range of the stopwatch is 59 minutes, 59.99
- The stop
after it rwatch continues to run, restarting from zero - Exiting the Stops limit, until you stop it.
- Exiting the Stopwatch Mode while a split time is frozen elapsed time measurement.
- The stopwatch measurement operation continues even
if you exit the Stopwatch Mode.
All of the operations in this section are performed in the Stopwatch Mode, which you enter by pressing (C).
To measure times with the stopwatch
 minute/second screen and a $1 / 100$ second screen at two-second intervals. Split Time
$\underset{\text { Start }}{\text { Split Time }} \underset{\text { Split }}{\text { (A) }} \longrightarrow(\mathrm{A}) \longrightarrow$ Split release $\longrightarrow$ Stop $(\mathrm{D}) \longrightarrow$ Clear
- The split time screen cycles alternately through the split (SPL) indicator , a minute/ second screen, and a 1/100 second screen.

## Two Finishes

(D)

$\xrightarrow[\substack{\text { Split release } \\ \text { Display time of }}]{\text { (A) }}$ Clea Display time of
second runner.

## Alarm

When the alarm is turned on, the alarm sounds when the alarm time is reached. You can also turn on an Hourly Time Signal, which will cause the watch to beep twice every hour on the hour.

- When the alarm is turned on, the alarm screen alternates between ALON (alarm on) and the current ALOF (alarm off) remains on the alarm screen is of
Pressing (D) in the Alarm Mode toggles between
alarm screen and Hourly Time Signal screen
All of the operations in this section are perfor Alarm Mode, which you enter by pressing (C).

## $4{ }_{4}$

Hourly Time Signal Screen
To set the alarm time
Alarm time
(Hour: Minutes)

1. In the Alarm Mode, press (D) to display the alarm
2. Hold down (A) until the hour setting of the alarm time starts to flash, which indicates the setting screen. - This operation automatically turns on the alarm. 3. Press (C) to move the flashing between the hour and 4. While a setting
is flashing, use (D) (+) and (B) $(-)$ to
-When setting the alarm time using the 12 -hour format take care to set the time correctly as a.m. (no dicator) or p.m. (P indicator).
5 . Press (A) to exit the setting screen.

## Alarm Operation

The alarm sounds at the preset time for about 10 seconds, regardless of the mode the watch is in.

- To stop the alarm tone after it starts to sound, press any button.
- Alarm and Hourly Time Signal operations are performed in accordance with the Timekeeping Mode digital time.
To test the alarm
In the Alarm Mode, hold down (D) to sound the alarm.
To turn the alarm and the Hourly Time Signal on and off

Illumination

An LED (light-emitting diode) and light guide panel
illuminate the face of the watch for easy reading in the
dark.
See "lllumination Precautions" for other important information.

To turn on illumination
In any mode (except when a setting is on the display), press (B) to illuminate the face of the watch for about one second.

Timekeeping
Use the Timekeeping Mode to set and view the current time and date. This section also explains how to manually set the current date and time.

- When setting the time, you can also configure settings for the 12/24-hour format.
- Each press of (A) cycles the digital display in the sequence shown below.

- Pressing (D) in the Timekeeping Mode will display the Last Signal screen.

- All of the operations in this section are performed in the Timekeeping Mode, which you can enter by pressing ©

## Setting the Digital Time and Date Manually

Make sure you select your Home City code before you change the current time and Make sure you select your Home City code before you change the current time
date settings. World Time Mode times are all displayed in accordance with the Timekeeping Mode settings. Because of this, World Time Mode times will not be correct if you do not select the proper Home City code before setting the time and date in the Timekeeping Mode.

## Operation Guide 4739

3. When the setting you want to change is flashing, use (D) to change it as described below.

| Screen: | To do this: | Do this: |
| :---: | :---: | :---: |
| 'T'\%'\% | Change the city code | Press (D) (east). |
| C!T: | Cycle between Daylight Saving Time (ON), Standard Time (OFF), and Auto DST (AUTO) | Press (D). |
| E | Toggle between 12-hour ( $\mathbf{( 1 2 H}$ ) and 24-hour (24H) timekeeping | Press (D). |
| 3 | Reset the seconds to 00 | Press (D). |
| ${ }^{\mathrm{P}} \mathrm{P}$ [\|] | Change the hour or minutes | Press ( ${ }^{\text {( }}$ (+). |
| [1.[\|] 1] | Change the year |  |
| [9, $\square_{1}$ | Change the month or day |  |
| F\%itid | Toggle Power Saving on (PSON) and off (PSOF) | Press (D). |

- See "City Code Table" for a complete list of available city codes.
) can be seled only while LIS LON, MAD PAR ROM, BER STO, ATH, MOW, HKG, BJS, TPE, SEL, TYO, HNL, ANC, YVR, LAX, YEA DEN, MEX, YWG, CHI, MIA, YTO, NYC, YHZ, or YYT is selected as the Home City code.
For more information, see "Daylight Saving Time (DST)" below.
- For information about settings other than the time and date, see the following. Power Saving: Power Saving Function

4. Press (A) to exit the setting screen.

## Daylight Saving Time (DST)

Daylight Saving Time (summer time) advances the time setting by one hour from Standard Time. Remember that not all countries or even local areas use Daylight Saving Time
The time calibration signals transmitted from Mainflingen (Germany), Anthorn (England), or Fort Collins (the United States) include both Standard Time and DST data. When the Auto DST setting is turned on, the watch switches between Standard

- The time calibration signals transmitted from Fukushima and Fukuoka/Saga (Japan) do not include summer time data.
- The default DST setting is Auto DST (AUTO) whenever you select LIS, LON, MAD PAR, ROM, BER, STO, ATH, MOW, HKG, BJS, TPE, SEL, TYO, HNL, ANC, YVR, LAX, YEA, DEN, MEX, YWG, CHI, MIA, YTO, NYC, YHZ, or YYT as your Home City code.
If you experience problems receiving the time calibration signal in your area, it is probably best to switch between Standard Time and Daylight Saving Time (summer time) manually.

To change the Daylight Saving Time (summer time) setting

1. In the Timekeeping Mode, hold down (A) until the city code starts to flash, which indicates the setting screen
2. Press (C) once and the DST setting screen appears.
3. Use (D) to cycle through the DST settings in the sequence shown below.

4. When the setting you want is selected, press (A) to exit the setting screen 4. When the setting you want is selected, press (A) to exit the setting screen.

- The DST indicator appears on the display to indicate that Daylight Saving Time is
turned on.

## Analog Timekeeping

The analog time of this watch is synchronized with the digital time. The analog time setting is adjusted automatically whenever you change the digital time.
Note

- The hands for the analog timepiece move to adjust to a new setting whenever any of the following occurs.

When you change the digital time setting manually When you digital time setting is changed by time calibration

- If the analog time does not match the digital time for any reason, use the procedure described under "To adjust the analog time" to match the analog setting to the digita setting.
- Whenever you need to adjust both the digital and the analog time settings manually, make sure you adjust the digital setting first.
move in order to adjust to the digital time, it may take some time before they stop moving

To adjust the analog time

In the Timekeeping Mode, press (C) six times to enter the Hand Setting Mode.
. Hold down (A) until the current digital time starts to
flash, which indicates the setting screen. described below.

When you want to do this:
Move the hand setting
forward 20 seconds Move the hand setting a short way forward at high speed

- Press (D).

Move the hand setting a long way forward at high speed

- Hold down (D)
- Release (D) when the hands reach the setting you want.
- While holding down (D) to move the hands at high speed, press (B) to lock the high-speed hand movement.
- To stop the hand movement, press any button.
- Hand movement stops automatically if the hour hand makes one full (12-hour) revolution.

4. Press (A) to exit the setting screen.

- The minute hand will be adjusted slightly to match the seconds when you exit the setting screen.
- To return to the Timekeeping Mode, press (C)

## Power Supply

This watch is equipped with a solar cell and a special rechargeable battery (secondary battery) that is charged by the electrical power produced by the solar cell. The illustration shown below shows how you should position the watch for charging.

Example: Orient the watch so its face is pointing at a light source.

- The illustration shows how to position a watch with a resin band.
- Note that charging efficiency drops when any part of the solar cell is blocked by clothing, etc.

- You should try to keep the watch
outside of your sleeve as much as
possible. Charging is reduced
significantly if the face is only partially
covered.

## Important!

- Storing the watch for long periods in an area where there is no light or wearing it in such a way that it is blocked from exposure to light can cause rechargeable battery power to run down. Make sure that the watch is normally exposed to bright light whenever possible.
- This watch uses a special rechargeable battery to store power produced by the solar cell, so regular battery replacement is not required. However, after very long use, the rechargeable battery may lose its ability to achieve a full charge. If you experience battery to charge fully, contact your dealer or CASIO distributor about having it replaced
type of battery can damage the watch. special battery yourself. Use of the wrong
- The current time and all other settings return to their initial factory defaults whenever battery power drops to Level 5 and when you have the battery replaced.
- Turn on the watch's Power Saving function and keep it in an area normally exposed to bright light when storing it for long periods. This helps to keep the rechargeable battery from going dead.
To check the current battery level
In the Timekeeping Mode, press (c) to display the battery level indicator.
Battery level indicator

- The battery level indicator shows you the current power level of the rechargeable battery.

| Level | Battery Level Indicator | Function Status |
| :---: | :---: | :--- |
| 1 |  | All functions enabled. |
| 2 |  | All functions enabled. |
| 3 | Alarm, hourly time signal, illumination and <br> time calibration signal reception disabled. |  |
| 4 | (Charge Soon Alert) |  |

- The flashing Low indicator (L) at Level 3 and the flashing charge indicator (C) at

Level 4 tell you that battery power is very low, and that exposure to bright light for charging is required as soon as possible.

- At Level 5 , all functions are disabled and settings return to their initial factory
defaults. Functions are enabled once again after the rechargeable battery is
charged, but you need to set the time and date, after Lhe battery reaches Level 4 configure any of the other settings until the battery reaches Level 3 (no charge indicator) after dropping to Level 5

## Operation Guide 4739

- Leaving the watch in direct sunlight or some other very strong light source can cause the battery level indicator to show a reading that is momentarily higher than cause the battery level indicator to show a reading that is momentarily higher than
the actual battery level. The correct battery level indicator should appear after a few minutes.
- The watch's Home City code setting will change automatically to TYO (Tokyo) - The watch's Home City code setting will change automatically to TYO (Tokyo) whenever the battery drops to Level 5. With this Home City code setting, the watch is in North America or Europe, you will need to change the Home City code setting to match your location whenever the battery drops to Level 5 .
- If you use the illumination or alarms a number of times during a short period, the hands of the watch will stop. Battery level indicator will show $\mathbf{R}$ at this time. Also, the following operations will become disabled until battery power recovers.
Illumination
Time calibration signal reception
After some time, battery power will recover and the above functions will be enabled again.

## Charging Precautions

Certain charging conditions can cause the watch to become very hot. Avoid leaving the watch in the areas described below whenever charging its rechargeable battery Also note that allowing the watch to become very hot can cause its liquid crystal the watch returns to a lower temperature

Warning!
Leaving the watch in bright light to charge its rechargeable battery can cause it to become quite hot. Take care when handling the watch to avoid burn injury. The watch can become particularly hot when exposed to the following conditions for long periods.

- On the dashboard of a car parked in direct sunlight
- Too close to an incandescent lamp
- Under direct sunlight

Charging Guide
After a full charge, timekeeping remains enabled for up to about 12 months

- The following table shows the amount of time the watch needs to be exposed to light each day in order to generate enough power for normal daily operations.

| Exposure Level (Brightness) | Approximate Exposure Time |
| :--- | :--- |
| Outdoor Sunlight (50,000 lux) | 5 minutes |
| Sunlight Through a Window (10,000 lux) | 24 minutes |
| Daylight Through a Window on a Cloudy Day <br> (5,000 lux) | 48 minutes |
| Indoor Fluorescent Lighting (500 lux) | 8 hours |

- For details about the battery operating time and daily operating conditions, see the "Power Supply" section of the Specifications.
- Stable operation is promoted by frequent exposure to light.

## Recovery Times

The table below shows the amount exposure that is required to take the battery from one level to the next.

| Exposure Level <br> (Brightness) | Approximate Exposure Time |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  | Level 5 5 | Level 4 | Level 3 | Level 2 | Level 1 |
| Outdoor Sunlight (50,000 lux) | 2 hours |  |  | 32 hours | 9 hours |
| Sunlight Through a Window <br> (10,000 lux) | 7 hours | 158 hours | 44 hours |  |  |
| Daylight Through a Window on <br> a Cloudy Day (5,000 lux) | 13 hours | 321 hours | 89 hours |  |  |
| Indoor Fluorescent Lighting <br> (500 lux) | 163 hours |  |  |  |  |

- The above exposure time values are all for reference only. Actual required exposure times depend on lighting conditions.

## Reference

This section contains more detailed and technical information about watch operation. It also contains important precautions and notes about the various features and functions of this watch.
Power Saving Function
When turned on, the Power Saving function enters a sleep state automatically whenever the watch is left in an area where it is dark for a certain period. The table below shows how watch functions are affected by the Power Saving function.

Power saving indicator

| Elapsed Time <br> in Dark | Display | Operation |
| :---: | :--- | :--- |
| 60 to 70 minutes | Blank, with Power Saving <br> indicator (PS) flashing | All functions enabled, except <br> for the display |
| 6 or 7 days | Blank, with Power Saving <br> indicator (PS) not flashing | - Beeper tone, illumination, and <br> display disabled <br> - Analog timekeeping stopped <br> at 12 o'clock <br> -Auto receive disabled |

[^1] sleep state.

To recover from the sleep state
Perform any one of the following operations.

- Move the watch to a well-lit area.
- Press any button.

To turn Power Saving on and off
On/Off status 1. In the Timekeeping Mode, hold down (A) until the city

code starts to flash, which indicates the setting screen
2. Press (C) nine times until the Power Saving on/off
screen appears.
3. Press (D) to toggle Power Saving on (PSON) and of
(PSOF).
.Press (A) to exit the setting screen.
The Power Saving indicator (PS) is on the display in all modes while Power Saving is turned on.

## Auto Return Features

- If you leave the watch in the Alarm or Hand Setting Mode, or with the battery level indicator displayed for two or three minutes without performing any operation, it
automatically returns to the Timekeeping Mode.
without performing any operation, the watch automisplay for two or three minutes

## Scrolling

The (B) and (D) buttons are used in various modes and setting screens to scroll
through data on the display. In most cases, holding down these buttons during a scrol operation scrolls through the data at high speed.

## Initial Screens

When you enter the World Time Mode, the data you were viewing when you last exited the mode appears first.

## Radio-controlled Atomic Timekeeping Precautions

- Strong electrostatic charge can result in the wrong time being set.
- The time calibration signal bounces off the ionosphere. Because of this, such factors as changes in the reflectivity of the ionosphere, as well as movement of the ionosphere to higher altitudes due to seasonal atmospheric changes or the time of day may change the reception range of the signal and make reception temporarily impossible.
- Even if the time calibration signal is received properly, certain conditions can cause - The current time setting in up to one second.
over any time settings in accordance with the time calibration signal takes priority
- The watch is designed to automatically update the date and day of the week for the period January 1, 2000 to December 31, 2099. Setting of the date by the time calibration signal cannot be performed starting from January 1,2100.
- This watch can receive signals that differentiate between leap years and non-leap years.
- Though this watch is designed to receive both time data (hour, minutes, seconds) and date data (year, month, day), certain signal conditions can limit reception to time data only.
- Normally, the signal reception date shown by the Last Signal screen is the date data included in the received time calibration signal. When only time data is received, however, the Last Signal screen shows the date as kept in the Timekeeping Mode at the time of signal reception.
- If you are in an area where proper time calibration signal reception is impossible, the watch keeps time with the precision noted in "Specifications".
- If you have problems with proper time calibration signal reception or if the time setting is wrong after signal reception, check your current city code, DST (summer time), and auto receive settings.

## Timekeeping

- Resetting the seconds to $\mathbf{0 0}$ while the current count is in the range of 30 to 59 causes the minutes to be increased by 1 . In the range of 00 to 29 , the seconds are reset to $\mathbf{0 0}$ without changing the minutes
- The day of the week is automatically displayed in accordance with the date (year, month, and day) settings.
- The year can be set in the range of 2000 to 2099 .
lengths and leap years. Once totic calendar makes allowances for different month it except after you have the watch's battery replaced should be no reason to change Level 5.
- The current time for all city codes in the Timekeeping Mode and World Time Mode is calculated in accordance with the Greenwich Mean Time (GMT) differential for each city, based on your Home City time setting.
- The times for the Timekeeping Mode and all the city codes of the World Time Mode are calculated in accordance with each city's UTC differential.
- The UTC differential is a value that indicates the time difference between a
- The letters "UTC" is the abbreviation for "Universal Time where a city is located.
world-wide scientific standard of timekeeping It is based upon carefully maintained atomic (cesium) clocks that keep time accurately to within microseconds. Leap
seconds are added or subtracted as necessary to keep UTC in sync with the Earth's rotation.
12-hour/24-hour Timekeeping Formats
The 12-hour/24-hour timekeeping format you select in the Timekeeping Mode is also applied in all other modes.
With the 12 -hour format, the PM indicator $(\mathbf{P})$ appears on the display for times in the range of noon to 11:59 p.m. and no indicator appears for times in the range of
- With the 24-hour format, times are displayed in the range of 0:00 to $23: 59$, without any indicator.

## illumination Precautions

- Illumination may be hard to see when viewed under direct sunlight
- lliumination automatically turns off whenever an alarm sounds.
- Frequent use of illumination runs down the battery.

## Specifications

Accuracy at normal temperature: $\pm 30$ seconds a month (with no signal callibration) Digital Timekeeping: Hour, minutes, seconds, p.m. (P), month, day, day of the week

Time system: Switchable between 12-hour and 24 -hour formats
Calendar system: Full Auto-calendar pre-programmed from the year 2000 to 2099
Other: Home city code (can be assigned one of 48 city codes); Daylight
Time Calibration
auto receives cancelled as soon as one is successful): May (remaining
auto receives cancelled as soon as one is successful); Manual Receive;
Receivable Time Calibration Signals: Mainflingen, Germany (Call Sign: DCF77, Frequency: 77.5 kHz ); Anthorn, England (Call Sign: MSF, Frequency: 60.0
kHz ); Fort Collins, Colorado, the United States (Call Sign:WWVB,
Frequency: 60.0 kHz ); Fukushima, Japan (Call Sign: JJY, Frequency: 40.0 kHz ); Fukuoka/Saga, Japan (Call Sign: JJY, Frequency: 60.0 kHz )
Analog Timekeeping: Hour, minutes (hand moves every 20 seconds)
World Time: 48 cities ( 29 time zones)
Other: Standard Time/Daylight Saving Time (summer time)
Alarms: Daily alarm; Hourly Time Signal
Countdown Timer:
Input range: 1 to 60 minutes (1-minute increments)
Stopwatch
Measuring unit: $1 / 100$ second
Measuring capacity: 59 ' $59.99^{\prime \prime}$
Measuring modes: Elapsed time, split time, two finishes
Illumination: LED (light-emitting diode)
Other: Battery level indicator; Power Saving
Power Supply: Solar cell and a rechargeable battery
Approximate Battery Operating Time
Approximate Battery Operating Time
12 months (from full charge to Level 4 when the watch is not exposed to light)
under following conditions:

- Display on 18 hours per day, sleep state 6 hours per day
- 1 illumination operation ( 1.5 seconds) per day
- 10 minutes of signal reception per day

Frequent use of illumination can shorten battery operating time.

City Code Table

| City | City | UTC Offset/ GMT Differential |
| :---: | :---: | :---: |
| PPG | Pago Pago | -11 |
| HNL | Honolulu | -10 |
| ANC | Anchorage | -9 |
| YVR | Vancouver | -8 |
| LAX | Los Angeles | -8 |
| YEA | Edmonton | -7 |
| DEN | Denver | -7 |
| MEX | Mexico City |  |
| YWG | Winnipeg | -6 |
| CHI | Chicago |  |
| MIA | Miami |  |
| YTO | Toronto | -5 |
| NYC | New York |  |
| CCS* | Caracas |  |
| YHZ | Halifax | -4 |
| YYT | St. Johns | -3.5 |

| GUM | Guam | +10 |
| SYD <br> NOU | Sydney | +11 |
| WLG | Wellington | +12 |

- Based on data as of December 2008.
- The rules governing global times (GMT differential and UTC offset) and summer time are determined by each individual country.
Necember 2007, Venezuela changed its offset from -4.0 to -4.5. Note however, that this watch displays an offset of -4.0 (the old offset) for the CCS (Caracas, Venezuela) city code.
