• The figures in this manual have the following meanings.

### **A**Danger

If liquid that leaked from a battery gets in your eye, on your skin or clothes, deal with it immediately as follows.

- 1. Immediately rinse it off with lots of water.
- Immediately get medical treatment.Failing to act may result in a rash or loss of sight.

### **!** Warning

#### Handling the register

 Should the register malfunction, start to emit smoke or a strange odor, or otherwise behave abnormally, immediately shut down the power and unplug the AC plug from the power outlet. Continued use creates the danger of fire and electric shock. Contact CASIO service representative.

### To use the cash register safely

### **Marning**

 Do not place containers of liquids near the register and do not allow any foreign matter to get into it. Should water or other foreign matter get into the register, immediately shut down the power and unplug the AC plug from the power outlet. Continued use creates the danger of short circuit, fire and electric shock. Contact CASIO service representative.

Should you drop the register and damage it, immediately shut down the
power and unplug the AC plug from the power outlet. Continued use
creates the danger of short circuit, fire and electric shock.
Attempting to repair the register yourself is extremely dangerous.
Contact CASIO service representative.

 Never try to take the register apart or modify it in any way. High-voltage components inside the register create the danger of fire and electric shock. Contact CASIO service representative for all repair and maintenance.

#### Power plug and AC outlet

 Use only a proper AC electric outlet. Use of an outlet with a different voltage from the rating creates the danger of malfunction, fire, and electric shock. Overloading an electric outlet creates the danger of overheating and fire.

 Make sure the power plug is inserted as far as it will go. Loose plugs create the danger of electric shock, overheating, and fire.
 Do not use the register if the plug is damaged. Never connect to a power outlet that is loose.

 Use a dry cloth to periodically wipe off any dust built up on the prongs of the plug. Humidity can cause poor insulation and create the danger of electric shock and fire if dust stays on the prongs.

Do not allow the power cord or plug to become damaged, and never try
to modify them in any way. Continued use of a damaged power cord
can cause deterioration of the insulation, exposure of internal wiring,
and short circuit, which creates the danger of electric shock and fire.
Contact CASIO service representative whenever the power cord or
plug requires repair or maintenance.

### **!**Caution

 Do not place the register on an unstable or uneven surface. Doing so can cause the register - especially when the drawer is open - to fall, creating the danger of malfunction, fire, and electric shock.

### To use the cash register safely

### **!**Caution

#### Do not place the register in the following areas.

- Areas where the register will be subject to large amounts of humidity or dust, or directly exposed to hot or cold air.
- Areas exposed to direct sunlight, in a close motor vehicle, or any other area subject to very high temperatures.

The above conditions can cause malfunction, which creates the danger of fire.

 Do not overlay bend the power cord, do not allow it to be caught between desks or other furniture, and never place heavy objects on top of the power cord. Doing so can cause short circuit or breaking of the power cord, creating the danger of fire and electric shock.

 Be sure to grasp the plug when unplugging the power cord from the wall outlet. Pulling on the cord can damage it, break the wiring, or cause short, creating the danger of fire and electric shock.

 Never touch the plug while your hands are wet. Doing so creates the danger of electric shock. Pulling on the cord can damage it, break the wiring, or cause short, creating the danger of fire and electric shock.

 At least once a year, unplug the power plug and use a dry cloth or vacuum cleaner to clear dust from the area around the prongs of the power plug.

Never use detergent to clean the power cord, especially power plug.

 Keep small parts out of the reach of small children to make sure it is not swallowed accidentally.

#### Only use the specified batteries.

- Do not disassemble, modify or short-circuit them.
- Do not put them in fire or water or heat them.
- Do not mix new and old batteries or different types of batteries.
- · Orient the terminals +- correctly.
- Remove the batteries if the system will not be used for a long time.
- After batteries are spent, dispose of them as per local regulations.
- Do not try to recharge dry cell batteries.

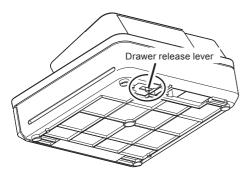

#### Disposing of batteries:

 Make sure that you dispose of used batteries in accordance with the rules and regulations in your local area.

### **Precautions for Use**

#### When the cash drawer does not open!

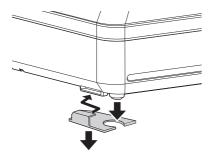

In case of power failure or the machine is in malfunction, the cash drawer does not open automatically. Even in these cases, you can open the cash drawer by pulling drawer release lever (see below).

#### Important!

The drawer will not open, if it is locked with a drawer lock key.

#### **About drawer hook**

Drawer hook prevents the cash register from falling caused by weight of coins.

Insert the drawer hook in the ditch of the drawer. Peel the release paper from the drawer hook and stick the drawer on the place where the register is installed.

As it may cause a malfunction of the drawer, please do not put coins and bills in the drawer excessively.

You can preset unit prices in department keys so that you don't have to input a unit price before registering it in a department.

The following example is for presetting \$2.00 in Dept. 1, \$5.50 in Dept. 2, and \$15.00 in Dept. 3.

#### **Sample Operation**

Unit Price	\$2.00	\$5.50	\$15.00
Dept.	1	2	3

#### Step

#### Operation

- **1** Press **1** weys. The register is ready to set unit prices in departments.
- 1 SUB TOTAL
- **2** Input the unit price then press corresponding Dept. key. \$2.00 has been preset in Dept. 1.
- 2 0 0 + 1
- **3** You don't have to input the decimal point key. \$5.50 has been preset in Dept. 2
- 5 5 0 -2
- **4** \$15.00 has been preset in Dept. 3 by the operation on the right.
- 1 5 0 0 × 3
- **5** Press SUB to complete the settings.

#### Further operations:

• "To register items with preset unit price set in a department" on page E-53.

#### ■To set a rate on the percent key

You can preset a percent rate on key so that you don't have to input percent rate for discount sales. The following example is for setting 2.5% on the key.

#### **Sample Operation**

Discount rate 2.5%
--------------------

#### Step Operation

- 1 Press 1 SUB to set the register in the program mode.
- 2 Input a percent rate you wish to set then press % key.
- **3** Press SUB to complete the setting.

· | 5 | %<sub>LK#</sub>

#### **Further operations:**

• "To give discount or premium" on page E-67.

#### ■To set a rounding calculation method and discount/ premium settings on the percent key

You can program rounding method on the percent key. Also you can assign the percent key to be used as discount or premium calculations. The following example sets the percent key to perform premium calculation with cutting off.

#### Step

- 1 Press 3 SUB to set the register in the program mode.
- **2** Referring the following table, choose the rounding method (A) and function (B) of the percent key then press % ... .
- **3** Press SUB to complete the setting.

## ■To set PLU unit price

Other than departments, you can preset unit prices by using PLU (Price Look Up) feature. You can call the preset unit price by inputting a PLU number. Your cash register is able to store up to 999 PLUs.

## **Sample Operation**

PLU Number	1	2
Unit Price	\$1.00	\$3.00

#### Step

- **1** Press **1** SuB to set the register in the program mode.
- **2** Enter a number you wish to use as a PLU number then press the PLU key.
- **3** Enter the unit price you wish to preset then press = CA/ANT / TEND.
- **4** Enter the next PLU number then press PLU key.
- **5** Input the unit price and press = CA/AMT key. Repeat the steps 4 and 5 for other PLUs.

- If unit price is not preset in the PLU, an error occurs.

## ■To set tax tables and rounding system

The cash register is able to set four kinds of tax tables and you can set tax rates, rounding, and add-in or add-on tax systems on each table. These tables can be applied to departments, percent key and minus key. Therefore, you have to set the conditions of the tables first.

If you wish to set flat tax rate, please use this program.

## Sample Operation

For settings 7.0000 % in tax table 1, rounding up, and add-on tax.

#### Step

- **1** Press **3** SUB TOTAL. The register becomes ready for programming.
- **2** Enter tax table number. See the following table for the four tables. The example on the right is for the tax table 1.
- **3** Enter the tax rate in the range of 0.0001 to 99.9999 %. Then press = CAMANT key. The example on the right is for setting 7.0%.

When unit prices are preset in departments, you can register items quickly. Please see "To set a unit price in a department key" on page E-31 to preset unit prices on departments.

## **Sample Operation**

Preset Unit Price	\$1.00	\$2.20	\$11.00
Quantity	1	2	4
Dept.	1	2	3
Tendered Amount		\$50.00	

#### Step

- Operation
- 1 Press the Dept. key once if purchased quantity is one.
- + 1
- **2** Press the Dept. key repeatedly for the number of purchased quantity.

**3** When you use the multiplication key, enter the quantity first.

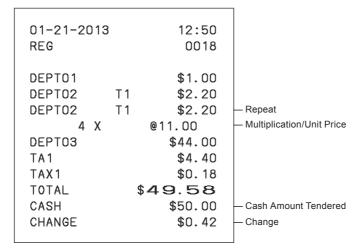

**4** Pressing [SUB] key shows the total purchase amount on the display.

5 Enter the tendered amount. The change amount will be displayed. Then press = CA/ABNT (TEND) key to complete the transaction.

Continues to the next page. →

## ■To register single item sales

Single item sales is useful to sell one item quickly. You just press a Dept. key and you don't have to press  $\frac{\text{SUB}}{\text{TOTAL}}$  or  $\frac{\text{CA}/\text{AMT}}{\text{END}}$  keys. The Dept. key must be programmed to allow single item sales. See "To change the settings on departments" on page E-33 for the programming.

#### **Sample Operation**

Unit price	\$0.50
Quantity	1
Dept.	3 ( Programmed as allowing single item sales)

Step Operation

**1** Enter the unit price then press the Dept. key.

## ■To transact by check

If a customer pays by check, use  $\boxed{\text{CHK}}$  instead of  $\boxed{=}$   $\frac{\text{CA/AMT}}{\text{TEND}}$  key.

# When you consider it as a problem

# **■**Troubleshooting

Symptom/Problem	Most common causes	Solutions
E01 appears on the display.	Changing modes without completing transaction.	Return mode switch to where it stops buzzing and press = ch/ABIT .
E08 appears on the display.	Sign on operation is not performed.	Prior to starting registration of any other operation, press 1 ~ 8 and then
E10 appears on the display.	Printer error	Turn the register off then remove the paper and turn it on.
No date on receipt. Paper does not feed enough.	Printer is programmed as a journal.	Program printer to print receipts.
Drawer opens after ringing once.	Department is programmed as a single item dept.	Program the dept. as a normal dept.
Not clearing totals at end of day after taking report.	Using X mode to print reports.	Use Z mode to print reports.
Programming is lost whenever register is unplugged or at power failure.	Poor or no batteries.	Put in new batteries and program again.
Register does not work at all. Can't get money out of drawer.	No power.	Pull lever underneath the drawer.

## ■In case of power failure

If the power supply to the cash register is cut by a power failure or any other reason, simply wait for power to be restored. The details of any ongoing transaction as well as all sales data in memory are protected by the memory backup batteries.

Power failure during a registration

• The subtotal for items registered up to the power failure is retained in memory. You will be able to continue with the registration when power is restored.

Power failure during printing a read/reset report

 The data already printed before the power failure is retained in memory. You will be able to issue a report when power is recovered.

Power failure during printing of a receipt and the journal.

- Printing will resume after power is recovered. A line that was being printed when the power failure occurred will be printed in full.
- The power failure symbol is printed and any item that was being printed when the power failure occurred is reprinted in full.

## ■When the L sign appears on the display

About the low battery indicator...

The following shows the low battery indicator.

If this indicator appears when you switch the cash register on, it can mean one of three things:

- No memory backup batteries are loaded in the cash register.
- The power of the batteries loaded in the unit is below a certain level.
- The batteries loaded in the unit are dead.

To clear this sign, press [AC C] key.

#### Important!

Whenever the low battery indicator appears on the display, load a set of 2 new batteries as soon as possible. If there is a power failure or you unplug the cash register when this indicator appears, you will lose all of your sales data and settings.

BE SURE TO KEEP THE POWER CORD OF THE CASH REGISTER PLUGGED IN WHENEVER YOU REPLACE THE BATTERIES.
