Cassia S1000/S1100/X1000 Quick Start Guide

Step One – Associate your Bluetooth router with the Cassia IoT Access Controller (AC)

- Connect your router and your PC to the same local network
- Install a port scanner like "Advanced IP Scanner" on your PC to find the IP address of your router, see Figure 1.

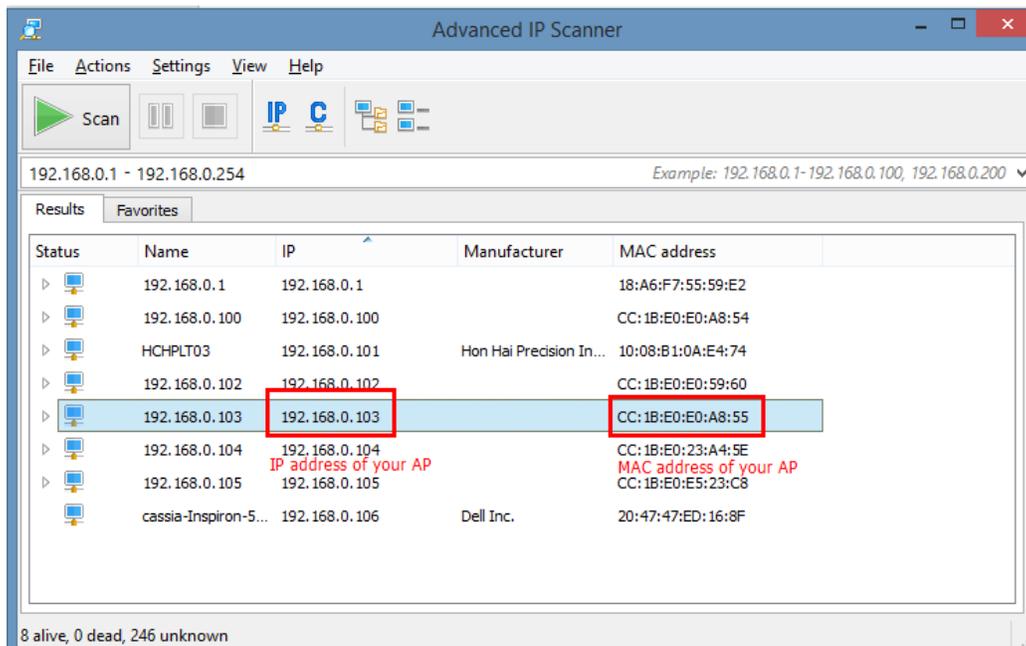

Figure 1 - Find the IP address of your router

- Access your Bluetooth router (AP) by entering its IP address in a web browser, see Figure 2.
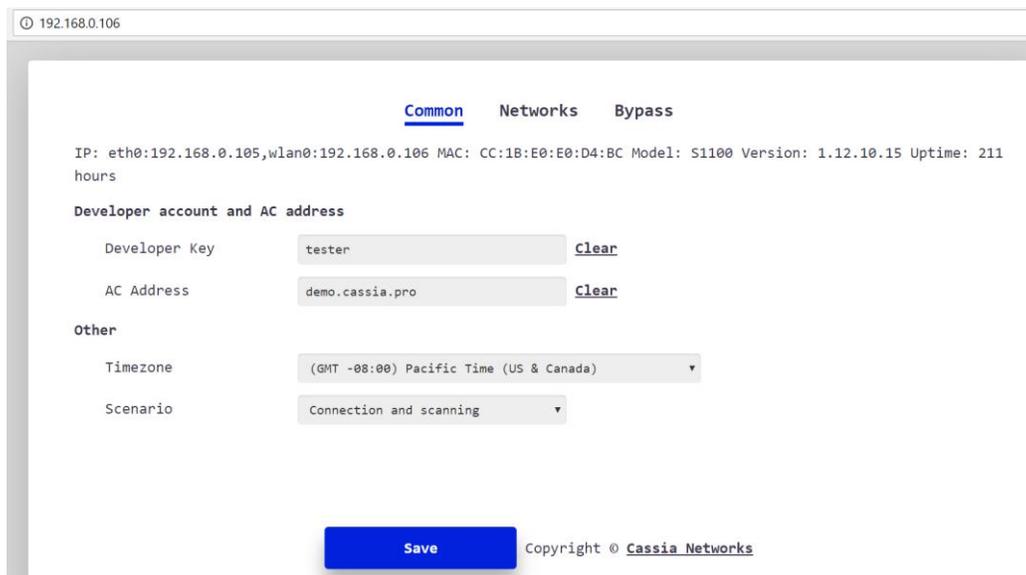

Figure 2 Access the router's configuration page

- In Common section, please enter your Developer Key and AC Address.

Step Two – Access the Cassia IoT Access Controller (AC)

- Enter the IP address or domain name of your AC into the address bar. For example, http://demo.cassia.pro

- Input user name and password, then click Login. See Figure 3 below.

Figure 3 - Cassia AC login page

Step Three – Change the settings of Cassia IoT Access Controller (AC)

- Input your Developer Key, Developer Secret, and License as indicated in Figure 4 below.
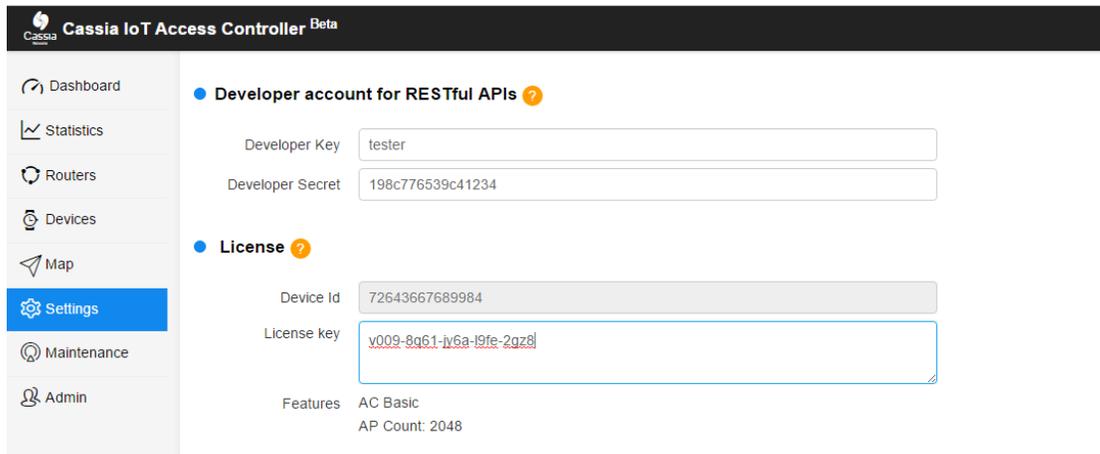

Figure 4: Input your developer key, secret, and license

Step Four – Add Bluetooth router (AP) to AC routers list

- Navigate to the Routers page, as shown in Figure 5 below.

Figure 5: Add Bluetooth router to AC routers list

- Click "Routers -> Discover AP", AC will identify all Bluetooth routers in its network and display them in the table.

- Check the routers you want to add, then click "Add" button.
  Note: You can select multiple routers and add all of them to be managed under the AC, see Figure 6.
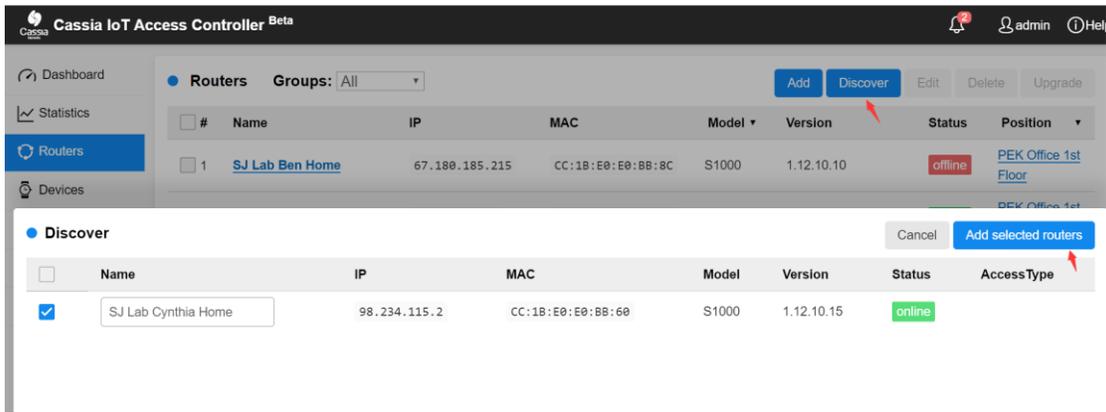

2015-2017 Cassia Networks®

Figure 6: Discover your router and add it into the AC

- User your router's MAC address to identify it on the list of discovered devices.

  Note: Your router's MAC address is located on the bottom of the router, as noted in Figure 7 below.

Figure 7: Cassia S1000 router's MAC address

Step Five – Configure the Bluetooth Router (AP)

- To configure a router, check the checkbox next to the desired router and click the Edit button as seen on Figure 8.

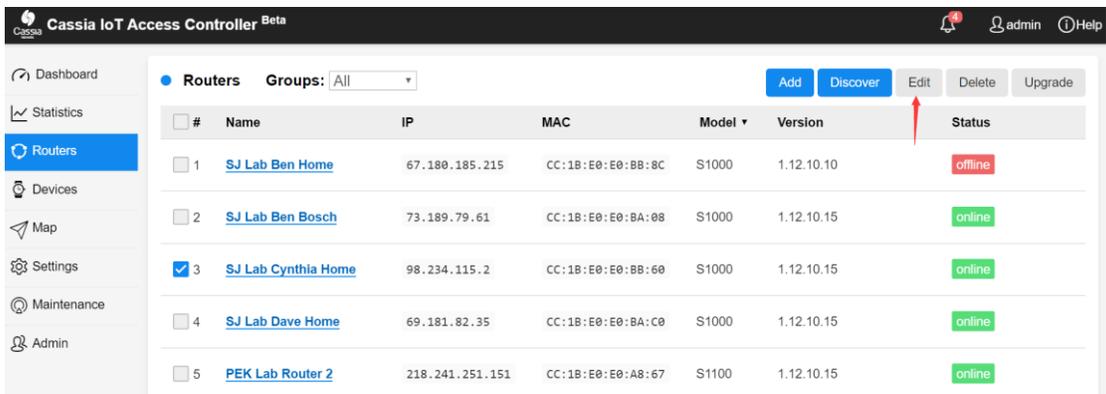

2015-2017 Cassia Networks®

- Locate the Common Settings tab as shown in Figure 9 below to set Developer key.

Figure 9: Set Developer Key on your Router

- Make sure to enter the same Developer Key as your AC. If the AC Address field is empty, please enter your AC domain name or IP address, for example, demo.cassia.pro.

- Configure network settings from Networks tab

  CONNECTION OPTIONS – The Cassia Bluetooth Router supports the following networking uplinks:

  - Wired (Ethernet) **–** you can set router to use a static IP address or DHCP
  - Wireless (Wi-Fi) **–** enter your Wi-Fi SSID and password, then click Save. The router will go offline briefly and then come back online.
  - 3G/4G dongle **–** Cassia currently supports two cellular dongles: ZTE MF823 in China and AT&T AirCard 313U in the US

  Important: When two or more network connections are activated, you can set priority levels for the networks. By default, the priority is Wired > Wireless > Cellular (3G/4G).

Step Six – Upgrade the router

- Upload firmware image to AC

  - Navigate to Firmware on side navigation menu and click "Add from Local" button. See Figure 10 below.
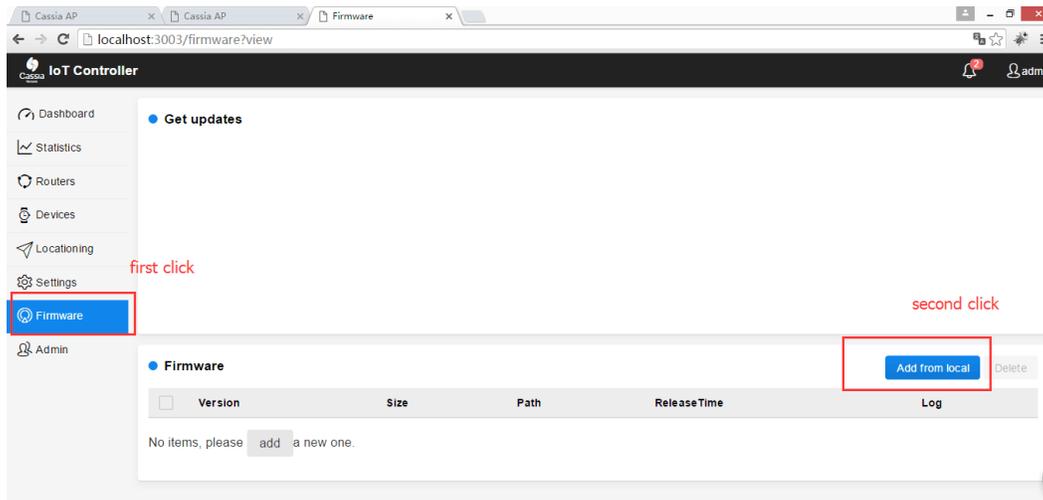

Figure 10: Upload firmware to AC

- From there, select a firmware image from your PC and upload it to the AC.

- Use AC to upgrade router(s)

    - Navigate to Routers on side navigation menu, select the router(s) that need to be upgraded, and click the Upgrade button. See Figure 11.

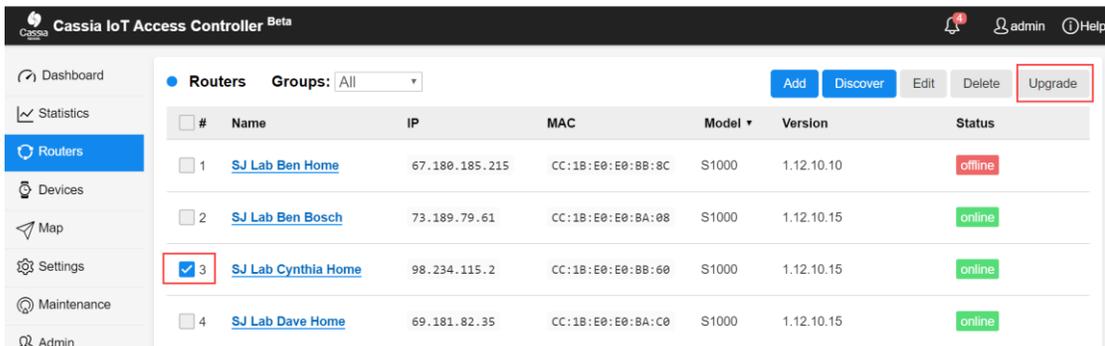

Figure 11: Upgrade a router

    - From the text box, choose a Firmware version you want to upgrade to, then click OK. See figure 12 below.

Please select a firmware to upgrade

Firmware

S1000 1.11.10.49
S1000 1.11.10.70
S1000 1.11.10.97
S1000 1.12.10.10
S1000 1.12.10.15
X1000 1.0.3.201707221641

Add a new firmware

Cancel   OK

Figure 12: Select a firmware version and upgrade the router

- The AC will finish the upgrade for all of the routers you have selected.
