CRAFTSMAN ONE YEAR LIMITED WARRANTY

FOR ONE YEAR from the date of purchase, this power tool and, if equipped, battery pack and charger are warranted against any defects in material or workmanship. With proof of purchase, a defective product will be replaced free of charge.

For warranty coverage details to obtain free replacement, visit the web site: www.craftsman.com

This warranty does not cover the sandpaper, rasps, or blades, which are expendable parts that can wear out from normal use within the warranty period.

This warranty is void if this product is ever used while providing commercial services or if rented to another person.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Sears Brands Management Corporation, Hoffman Estates, IL 60179

INTRODUCTION

SAVE THESE INSTRUCTIONS

This cordless Multi-Tool has many features for making its use more pleasant and enjoyable. Safety, performance, and dependability have been given to priority in the design of this product making it easy to maintain and operate.

WARNING: Some dust created by using power tools contains chemicals known to the state of California to cause cancer and birth defects or other reproductive harm.

SAFETY SYMBOLS

The purpose of safety symbols is to attract your attention to possible dangers. The safety symbols and the explanations with them deserve your careful attention and understanding. The symbol warnings do not, by themselves, eliminate any danger. The instructions and warnings they give are no substitutes for proper accident prevention measures.

WARNING: Be sure to read and understand all safety instructions in this manual, including all safety alert symbols such as "DANGER," "WARNING," and "CAUTION," before using this tool. Failure to following all instructions listed below may result in electric shock, fire, and/or serious personal injury.

SYMBOL SIGNAL MEANING

SAFETY ALERT SYMBOL: Indicates **DANGER, WARNING, OR CAUTION.** May be used in conjunction with other symbols or pictographs.

DANGER: Indicates a hazardous situation which, if not avoided, will result in death or serious injury. This signal word is to be limited to the most extreme situations.

WARNING: Indicates a hazardous situation which, if not avoided, could result in death or serious injury.

CAUTION: Indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

Damage Prevention and Information Messages

These inform the user of important information and/or instructions that could lead to equipment or other property damage if they are not followed. Each message is preceded by the word "NOTICE," as in the example below:

NOTICE: Equipment and/or property damage may result if these instructions are not followed.

WARNING: To ensure safety and reliability, all repairs should be performed by a qualified service technician.

WARNING: The operation of any power tool can result in foreign objects being thrown into your eyes, which can result in severe eye damage. Before beginning power tool operation, always wear safety goggles or safety glasses with side shields and a full-face shield when needed. We recommend a Wide Vision Safety Mask for use over eyeglasses or standard safety glasses with side shields. Always use eye protection which is marked to comply with ANSI Z871

SAVE THESE INSTRUCTIONS

Some of these following symbols may be used on this tool. Please study them and learn their meaning. Proper interpretation of these symbols will allow you to operate the tool better and more safely.

SYMBOL	NAME	DESIGNATION/EXPLANATION
V	Volts	Voltage
A	Ampères	Current
Hz	Hertz	Frequency (cycles per second)
W	Watt	Power
min	Minutes	Time
~	Alternating Current	Type of current
==	Direct Current	Type or a characteristic of current
n ₀	No Load Speed	Rotational speed, at no load
	Class II Construction	Double-insulated construction
.../min	Per Minute	Revolutions, strokes, surface speed, orbits, etc., per minute
	Wet Conditions Alert	Do not expose to rain or use in damp locations.
	Read The Operator's Manual	To reduce the risk of injury, user must read and understand operator's manual before using this product.
	Eye Protection	Always wear safety goggles or safety glasses with side shields and a full face shield when operating this product.
	Safety Alert	Precautions that involve your safety.
	No Hands Symbol	Failure to keep your hands away from the blade will result in serious personal injury.
	No Hands Symbol	Failure to keep your hands away from the blade will result in serious personal injury.
	No Hands Symbol	Failure to keep your hands away from the blade will result in serious personal injury.
	No Hands Symbol	Failure to keep your hands away from the blade will result in serious personal injury.
	Hot Surface	To reduce the risk of injury or damage, avoid contact with any hot surface.

SAFETY INSTRUCTIONS

GENERAL POWER TOOL SAFETY WARNINGS

⚠ WARNING: Read and understand all instructions. Failure to follow all instructions listed below may result in electric shock, fire, and/or serious personal injury. The term "power tool" in all of warnings listed below refers to corded power tools or battery-operated (cordless) power tools.

Save all warnings and instructions for future reference.

WORK AREA SAFETY

- **Keep your work area clean and well lit.** Cluttered or dark areas invite accidents
- **Do not operate power tools in explosive environments, such as in the presence of flammable liquids, gases, or dust.** Power tools create sparks, which may ignite the dust or fumes.
- **Keep children and bystanders away while operating a power tool.** Distractions may cause you to lose control.

ELECTRICAL SAFETY

- **Avoid body contact with grounded surfaces, such as pipes, radiators, ranges, and refrigerators.** There is an increased risk of electric shock if your body is grounded.
- **Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adaptor plugs with grounded power tools.** Unmodified plugs and matching outlets will reduce the risk of electric shock.
- **Do not expose power tools to rain or wet conditions.** Water entering a power tool will increase the risk of electric shock.
- **Do not abuse the cord. Never use the cord for carrying, pulling, or unplugging the power tool. Keep the cord away from heat, oil, sharp edge, or moving parts.** Damaged or entangled cords increase the risk of electric shock.
- **When operating a power tool outdoors, use an extension cord suitable for outdoor use.** Use of a cord suitable for outdoor use reduces the risk of electric shock.
- **If operating a power tool in a damp location is unavoidable, use a ground fault circuit interrupter (GFCI) protected supply.** Use of a GFCI reduces the risk of electric shock.
- Use only the battery and with the chargers listed:

BATTERY PACK	CHARGERS
320.11221	320.14300 320.29497 320.10006

PERSONAL SAFETY

- **Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while tired or under the influence of drugs, alcohol, or medication.** A moment of inattention while operating power tools may result in serious personal injury.
- **Use personal protective equipment. Always wear eye protection.** Safety equipment, such as dust mask, non-skid safety shoes, hard hat, and hearing protection, when used for appropriate conditions, will reduce personal injuries.
- **Prevent unintentional starting. Ensure that the switch is in the OFF-position before connecting to a power source and/or battery, picking up or carrying the tool.** Carrying power tools with your finger on the switch or energizing power tools that have the switch on invites accidents.
- **Remove any adjusting key or wrench before turning the power tool on.** A wrench or key left attached to a rotating part of the power tool may result in personal injury.
- **Do not overreach. Keep proper footing and balance at all times.** This enables better control of the power tool in unexpected situations.
- **Dress properly. Do not wear loose clothing or jewelry. Keep your hair, clothing, and gloves away from moving parts.** Loose clothes, jewelry, or long hair can be caught in moving parts.
- **If devices are provided for the connection of dust extraction and collection facilities, make sure that these are connected and properly used.** Use of these devices can reduce dust-related hazards.

POWER TOOL USE AND CARE

- **Do not force the power tool. Use the correct power tool for your application.** The correct power tool will do the job better and more safely at the rate for which it was designated.
- **Do not use the power tool if the switch does not turn it ON and OFF.** Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
- **Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools.** Such preventive safety measures reduce the risk of starting the power tool accidentally.
- **Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool.** Power tools are dangerous in the hands of untrained users.
- **Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use.** Many accidents are caused by poorly maintained power tools.

- **Keep cutting tools sharp and clean.** Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.
- **Use the power tool, accessories, blades, etc. in accordance with these instructions and in the manner intended for the particular type of power tool, taking into account the working conditions and the work to be performed.** Use of the power tool for operations different from those intended could result in a hazardous situation.

BATTERY TOOL USE AND CARE

- Make sure that the switch is in the OFF position before inserting the battery pack. Inserting the battery pack into power tools that have the switch ON invites accidents.
- **Recharge only with the charger specified in this manual.** A charger that is suitable for one type of battery pack may create a risk of fire when used with another battery pack.
- **Use power tools only with specifically designated battery packs.** Use of any other battery packs may create a risk of injury and fire.
- **When the battery pack is not in use, keep it away from other metal objects, such as paper clips, coins, keys, nails, screws, or other small metal objects that can make a connection from one terminal to another.** Shorting the battery terminals together may cause burns or a fire.
- **Under abusive conditions, liquid may be ejected from the battery; avoid contact. If contact accidentally occurs, flush with water. If liquid contacts eyes, additionally seek medical help.** Liquid ejected from the battery may cause irritation or burns.

SERVICE

- **Have your power tool serviced by a qualified repair person using only identical replacement parts.** This will ensure that the safety of the power tool is maintained.
- **Follow instructions in the Maintenance section of this manual.** Use of unauthorized parts or failure to follow Maintenance instructions may create a risk of shock or injury.

SPECIFIC SAFETY RULES FOR CORDLESS MULTI-TOOL

- Never use your Multi-Tool to perform sanding or separating operations in wet conditions.
- Always wear eye protection.
- Always wear ear protection during extended periods of operation.
- Always wear a dust mask if the operation is dusty.
- Wear protective gloves when changing application accessories. Application accessories become hot after prolonged usage.

DESCRIPTION

KNOW YOUR MULTI-TOOL (Fig.1)

PRODUCT SPECIFICATION

Motor	12 Volt DC
Tool Weight (without battery)	1.8 lbs
Oscillation Rate	7500-15000/min
Oscillation Angle	±1.4 degrees
Battery Type	Lithium-Ion
Battery Voltage	12 Volt DC
Charger Input	120-Volts, 60 Hz AC only
Optimum Charging Temperature	32°F (0°C) -104°F (40°C)

WARNING: The safe use of this product requires an understanding of the information on the tool and in this operator's manual, as well as knowledge of the project you are attempting. Before using this product, familiarize yourself with all operating features and safety rules.

QUICK-RELEASE LEVER

The quick-release lever allows for tool-less attachment tool exchange.

VARIABLE-SPEED ADJUSTMENT DIAL

The variable-speed dial is located on the left side of your tool for selecting the appropriate speed.

LED WORKLIGHT

The LED worklight is located in the front of the tool. This feature provides extra light for increased visibility.

FUELGAUGE

The FuelGauge indicates the battery-pack charge level.

ASSEMBLY

WARNING: If any parts are broken or missing, do not attempt to attach the battery or operate the tool until the broken or missing parts are replaced. Failure to do so could result in possible serious injury.

WARNING: Do not attempt to modify this tool or use accessories not recommended for use with this tool. Any such alteration or modification is misuse and could result in a hazardous condition leading to possibly serious injury.

WARNING: To prevent accidental starting that could cause serious personal injury, always remove the battery pack from the tool when assembling parts.

UNPACKING

This product has been shipped completely assembled.

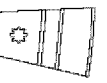

- Carefully remove the tool and accessories from the box. Make sure that all items listed in the packing list are included.
- Inspect the tool carefully to make sure that no breakage or damage occurred during shipping.
- Do not discard the packing material until you have carefully inspected and satisfactorily operated the tool.

PACKING LIST

Multi-Tool, QuickBoost charger, battery pack, straight edge flush cut blade, circular saw blade, hardened steel scraping blade, carbide circular adhesive removal blade, carbide triangular rasps, sanding plate and 9 discs sandpaper, operator's manual.

WARNING: If any part is broken or missing, do not attempt to plug in the power cord or operate the tool until the broken or missing part is replaced. Failure to do so could result in possible serious injury.

SELECTING THE APPLICATION TOOL

APPLICATION TOOL		MATERIALS
	Carbide Circular Blade	Grout, Plaster, Porous Concrete and Masonry
	Carbide Triangular Rasheed	Hardened adhesives, Thinset, Wood, Masonry
	Scraper Blade	Paint & Varnish, Bonded Carpet, Soft Adhesives, Vinyl Flooring, wood and other floor coverings.
	Circular Saw Blade	Wood, Plastic, Drywall, Non-Ferrous Metals, thin Sheet Metal and other materials
	Flush Cut Blade	Wood, Plastic, Drywall, Soft Metals and other materials
	Sanding Plate and Sander	Bare or Painted Wood, Plaster, and other surfaces, depending on sander grit

OPERATION

LOW-BATTERY INDICATOR

- If the FuelGauge shines red when the on/off switch on the multi-tool is activated, the battery pack power has run out, and the battery pack should be recharged.
- Unlike other battery-pack types, Lithium-Ion battery packs deliver fade-free power for their entire run time. The tool will not experience a slow, gradual loss of power as you work. To signal that the battery pack is at the end of its run time and needs to be charged, the power to the tool will drop quickly.

NOTICE: The LED may also flash due to an overload or high temperature (see BATTERY PROTECTION).

BATTERY PROTECTION

The battery circuitry protects the battery pack from extreme temperature, over-discharge, and over-charge. To protect the battery from damage and prolong its life, the battery pack circuitry will turn off the battery pack if it becomes overloaded or if the temperature becomes too high during use. This may happen in situations involving extremely high torque, binding, and stalling. This intelligent system will shut down your battery pack if its operating temperature exceeds 176°F (80°C) and will begin normal operation when it returns to 122°F (50°C).

The LED worklight will begin flash slowly if the battery circuitry detects a momentary overload.

NOTICE: The battery can automatically reset. If the LED continues to flash rapidly, it is indicating that the charge is substantially diminished. Place the battery into the charger for charging. (See LOW BATTERY INDICATOR, above.)

NOTICE: A significantly reduced run time after fully charging the battery pack indicates that the battery is near the end of its usable life and must be replaced.

COLD WEATHER OPERATION

This Lithium-Ion battery pack will provide optimal performance in temperatures between 32°F (0°C) and 104°F (40°C). When the battery pack is very cold, it may “pulse” for the first minute of use to warm itself. Put the battery pack on a tool and use the tool in a light application. After about a minute, the battery pack will have warmed itself and will operate normally.

WHEN TO CHARGE THE BATTERY PACK

It is not necessary to run down the battery pack charge before recharging. The Lithium-Ion battery can be charged at any time and will not develop a “memory” that reduces total charge when recharged after a partial discharge.

Remove the battery pack from the tool when convenient for you and your job. “Turn off” the battery pack charge by charging it for a time before starting a big job or long period of use.

Due to Lithium-Ion fade-free properties, the only time it is necessary to charge the Lithium-Ion battery pack is when the pack has reached the end of its charge. To signal the end of charge, power to the tool will drop quickly. Charge the battery pack as needed.

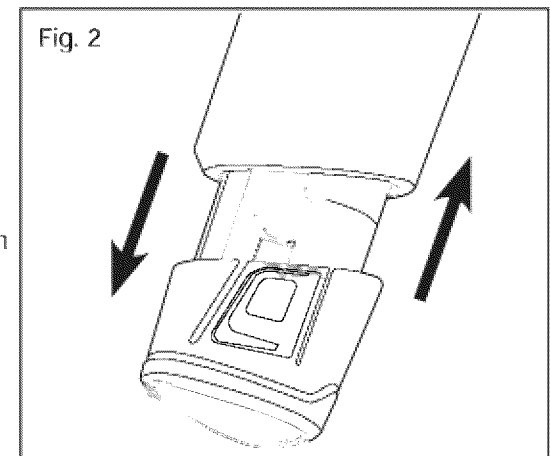

TO ATTACH BATTERY PACK (Fig. 2)

1. Make sure that the tool is “OFF.”
2. Align the raised ribs on the battery pack with the grooves in the tool, and then attach the battery pack.

NOTICE: Make sure that the latch on the battery pack snaps into place and that the battery pack is secured to the tool before beginning operation.

TO DETACH BATTERY PACK (Fig. 2)

1. Make sure that the tool is “OFF.”

2. Depress the battery-release buttons located on the both sides of the battery pack to release the battery pack.
3. Pull the battery pack out and remove it from the tool.

CAUTION: When placing the battery pack in the tool, be sure that the raised ribs on the battery pack align with the grooves inside the tool and that the latches snap into place properly. Improper assembly of the battery pack can cause damage to internal components.

WARNING: Battery tools are always in operating condition; therefore, the on/off switch should always be in the "OFF" position when not in use or carrying the tool at your side.

ON/OFF SWITCH (Fig. 3)

To turn the tool on, push the on/off switch forward. To turn it off, push the switch backward.

LED WORKLIGHT (Fig. 4)

The LED worklight, located on the front of the tool, will illuminate when the on/off switch is in the forward (ON) position. This provides additional light on the surface of the workpiece for operation in lower-light conditions. The LED worklight will turn off when the switch is slid backwards (OFF).

FUELGAUGE (Fig. 5)

This tool is equipped with a FuelGauge, which indicates the battery-pack charge level.

The green LED on the FuelGauge indicates that the battery is fully charged.

The orange LED on the FuelGauge indicates that the battery has used approximately one half of its charge.

The red LED on the FuelGauge indicates that the battery pack is depleted and needs to be charged.

ATTACHING THE APPLICATIONS KIT (Figs. 6, 7, 8, 9 and 10)

⚠ WARNING: Failure to remove the battery pack from the tool when assembling parts, making adjustments, or changing application tools could result in accidental starting and possibly cause serious injury.

⚠ CAUTION: For all work or when changing application tools, always wear protective gloves. The sharp edges of the application tools will cause personal injury. Application tools can become very hot during use.

⚠ WARNING: Check that the application tools are correctly attached. Incorrect or insecurely fastened application tools can come loose during operation and cause a hazard.

1. Remove the battery pack from the multi-tool.
2. Push the quick-release lever fully open with your palm to loosen the flange bolt. (Fig. 6) Remove the flange bolt.
3. Ensure that the inner threads and the drive shaft are clean.
4. Align the grooves on the application tool with the four raised ribs on the drive shaft. Put the application tool onto the drive shaft (Figs. 7 and 8).
5. With your gloved hand holding the application tool, insert and depress the flange bolt until you hear a click indicating that the application tool is secured (Fig. 9).
6. Press the quick-release lever with your palm to lock the application tool (Fig. 10).

NOTICE: Attach the application tool in the desired position for the task at hand. The shaft is configured so that the application tool can be attached every 45° around the shaft, from 0° to 315°, however, the circular blade, the scraper

blade, and the carbide circular blade should never be attached so that they face backwards.

⚠ WARNING: Do not attach the circular saw blade, the flush cut blade, the scraper blade or carbide circular blade facing backwards, as operation in this position may cause serious injury.

SANDPAPER KIT DESCRIPTION (Fig. 11)

- 9 pieces of sandpaper: 3 pieces each of 60, 120 and 180 grit.
- Sandpaper Kit 67655 (available separately) includes 24 pieces: 8 pieces each of 60, 120 and 180 grit.
- Always apply to the compatible sanding plate (supplied with your Nextec Multi-tool 30566).
- Sandpaper kit is also compatible with the Bosch PMF180E and GOP 10.8V-Li.

Fig. 11

TO INSTALL THE SANDPAPER (Fig. 12)

⚠ WARNING: Check that the sanding plate and sandpaper are correctly attached. An incorrect or insecurely fastened application tool can come loose during operation and cause a hazard.

1. Follow the directions for Attaching the Application Tool to attach the sanding plate to the Multi-Tool.
2. Align the sandpaper with the sanding plate and use your hand to press it firmly onto the sanding plate.
3. Press the sandpaper firmly against a smooth surface for a short period, then switch on the tool. The burr will form a non-slip bond with the outer edge of the sandpaper felt. This will avoid premature wear.
4. If one point has become worn, pull off the sandpaper, turn it 120° and place it on the sanding plate again.

SANDING (Fig. 13)

⚠ WARNING: Do not touch the motor housing after prolonged use; it could be very hot.

- The removal rate and the sanding pattern are determined by the choice of sanding sheet and the work surface.
 - Apply uniform sanding pressure to extend the life of the sanding sheets.
 - Intensifying the sanding pressure does not lead to an increase of the sanding capacity, but instead it increases wear on the machine and the sanding sheet.
 - Use only the tip or an edge of the sanding sheet for precise sanding of edges, corners and hard to reach areas.
 - When selectively sanding on one spot, the sanding sheet can heat up considerably. Remove the tool from the surface periodically to permit the sanding sheet to cool down.
 - A sanding sheet that has been used for metal should not be used for other materials.
 - Use only original Craftsman sanding accessories 67655.
1. For Rough sanding use 40-80 grit paper.
 2. For Smooth sanding use 120-180 grit.

SAWING WITH THE CIRCULAR SAW BLADE (67651)

DESCRIPTION (Fig. 14)

- High speed steel circular cutting blade.
- Designed for cutting wood, plastic, drywall, non-ferrous metals, thin sheet metal and other materials.
- The circular saw blade is also compatible with the Fein Multi-Master tool.

TO INSTALL THE CIRCULAR SAW BLADE

⚠ CAUTION: Wear protective gloves.

⚠ WARNING: Use sharp, undamaged saw blades only. Deformed, blunt saw blades or saw blades that are otherwise damaged can break.

⚠ WARNING: When sawing light building materials, observe the precautions and the recommendations of the material suppliers.

⚠ WARNING: Plunge cuts may only be applied to soft materials, such as wood, gypsum plaster boards, etc.

⚠ WARNING: The sawing teeth are very sharp. Do not touch during mounting and application.

⚠ WARNING: Do not attach the circular cutting blade facing backwards (Fig.15), which may hurt the user.

1. Remove the battery pack from your multi-tool.
2. Push the quick-release lever fully open with your palm to loosen the flange bolt. (Fig. 16) Remove the flange bolt.

Fig. 14

3. Ensure that the inner threads and the drive shaft are clean.
4. Align the grooves on the circular cutting blade with the four raised ribs on the drive shaft; put the blade onto the drive shaft (Fig. 17).
5. With your gloved hand holding the blade, insert and depress the flange bolt until you hear a click indicating that the blade is secured.
6. Press the quick-release lever with your palm to lock the driver shaft (Fig. 10).

NOTICE: The ribs on the shaft and the grooves in the application tools permit a firm connection of the application tools in increments of 45° around the shaft, from 0° to 315° (Fig. 18). Apply the application tool in the orientation appropriate to the task at hand.

CUTTING WITH THE CIRCULAR SAW BLADE (Fig. 19)

1. Insert the battery pack into the multi-tool.
2. Securely clamp the workpiece if necessary.
3. Draw cutting lines on the workpiece.
4. Turn on the tool and allow it to come to the full desired speed.
5. Apply the cutting blade to the workpiece and make the cut.

CARBIDE CIRCULAR BLADE (67650)

DESCRIPTION (Fig. 20)

The Carbide Circular Blade is designed to cut out the grout around wall tiles. It can also be used to cut plaster, porous concrete and masonry.

- Carbide-tipped, circular grout disc.
- Designed for grout, plaster, masonry or porous concrete removal around the wall tiles.
- Compatible with the Nextec Multi-Tool and Fein Multi-Master.

TO INSTALL THE CARBIDE CIRCULAR BLADE

CAUTION: Wear protective gloves.

WARNING: Do not attach the carbide circular blade facing backwards (Fig. 21), which may hurt the user.

1. Remove the battery pack from your multi-tool.
2. Push the quick-release lever fully open with your palm to loosen the flange bolt (Fig. 22). Remove the flange bolt.
3. Ensure that the inner threads and the drive shaft are clean.

- Align the grooves on the circular grout disc with the four raised ribs on the drive shaft; put the application tool onto the drive shaft (Fig. 23).
- With your gloved hand holding the blade, insert and depress the flange bolt until you hear a click indicating that the circular grout disc is secured.
- Press the quick-release lever with your palm to lock the driver shaft (Fig. 10).

NOTICE: The ribs on the shaft and the grooves in the application tools permit a firm connection of the application tools in increments of 45° around the shaft, from 0° to 315° (Fig. 24). Apply the application tool in the orientation appropriate to the task at hand.

CUTTING GROUT WITH THE CARBIDE CIRCULAR BLADE (Fig. 24)

- Insert the battery pack into the multi-tool.
- Draw the cutting lines on the workpiece.
- Turn on the tool and allow it to come to the full desired speed.
- Place the carbide circular blade against the workpiece at a 90° angle.
- Cut out the grout around the tile, then use a hand chisel to remove the tile from the wall.

NOTICE: When cutting grout, masonry and porous cement, take into consideration that the application tools/accessories wear heavily when used for longer periods of time.

SCRAPER BLADE (67652)

DESCRIPTION (Fig. 26)

- Steel scraping blade designed for paint & varnish, bonded carpet, soft adhesives, vinyl flooring, wood and other floor coverings.
- Scraper blade is also compatible with the Fein Multi-Master tool.

TO INSTALL THE SCRAPER BLADE

CAUTION: For all work or when changing application tool, always wear protective gloves. The sharp edges of the application tool will cause personal injury. Application tool can be very hot while working.

WARNING: Do not attach the scraper blade facing backwards (Fig. 27), which may hurt the user.

WARNING: Check that the application tool is correctly attached. Incorrect or insecurely fastened application tool can come loose during operation and cause a hazard.

- Remove the battery pack from your multi-tool.
- Push the quick-release lever fully open with your palm to loosen the flange bolt (Fig. 28). Remove the flange bolt.

- Ensure that the inner threads and the drive shaft are clean.

4. Align the grooves on the scraper blade with the four raised ribs on the drive shaft; put the scraper blade onto the drive shaft (Fig. 29).
5. With your gloved hand holding the blade, insert and depress the flange bolt until you hear a click indicating that the scraper blade is secured.
6. Push the quick-release lever with your palm to lock the driver shaft (Fig. 10).

NOTICE: The ribs on the shaft and the grooves in the application tools permit a firm connection of the application tools in increments of 45° around the shaft, from 0° to 315° (Fig. 30). Apply the application tool in the orientation appropriate to the task at hand.

USING THE SCRAPER BLADE (Fig. 31)

1. Insert the battery pack into the multi-tool.
2. Turn on the tool and allow it to come to the full desired speed.
3. To scrape, put the tool on the workpiece at a flat angle (not more than 20°), and apply only light pressure so as to not cut into the surface.
4. To cut and remove carpet, place the Scraper Blade vertically on the workpiece, and cut the carpet. Then place the scraper blade between the carpet and the floor to the coverings and adhesive residue off.

CARBIDE TRIANGULAR RASP (67654)

DESCRIPTION (Fig. 32)

- Carbide tipped triangular grout rasp.
- Designed for grout, masonry, thinset, wood and removal of hardened adhesives on the wall tiles.
- Triangular rasp is also compatible with the Fein Multi-Master tool.

TO INSTALL THE CARBIDE TRIANGULAR RASP

CAUTION: Wear protective gloves.

1. Remove the battery pack from your multi-tool.
2. Push the quick-release lever fully open with your palm to loosen the flange bolt (Fig. 33). Remove the flange bolt.
3. Ensure that the inner threads and the drive shaft are clean.
4. Align the grooves on the carbide triangular rasp with the four raised ribs on the drive shaft; put the rasp onto the drive shaft (Fig. 34).
5. With your gloved hand holding the blade, insert and depress the flange bolt until you hear a click indicating that the rasp is secured.
6. Push the quick-release lever with your palm to lock the driver shaft (Fig. 10).

NOTICE: The ribs on the shaft and the grooves in the application tools permit a firm connection of the accessory tools in increments of 45°, from 0° to 315° around the shaft (Fig. 35). Apply the application tool in the orientation appropriate to the task at hand.

USING THE CARBIDE TRIANGULAR RASP (Fig. 36)

1. Insert the battery pack into the multi-tool.
2. Draw the cutting lines on the workpiece.
3. Turn on the tool and allow it to come to the full desired speed.
4. Put the rasp flat against the workpiece and apply appropriate pressure.
5. Remove any hardened adhesive or grout on the surface of the wall tiles.

FLUSH CUT BLADE (67653)

DESCRIPTION (Fig. 37)

- Bi-metal, straight-edge, flush-cut blade.
- Designed for cutting wood, plastic, drywall, soft metal and other materials.
- Can plunge and saw with a slight pendulum action in wood.
- Flush Cut blade is also compatible with the Fein Multi-Master tool.

TO INSTALL THE FLUSH CUT BLADE

CAUTION: Wear protective gloves.

WARNING: Do not attach the flush-cut blade facing backwards (Fig. 38), which may hurt the user.

1. Remove the battery pack from your multi-tool.
2. Push the quick-release lever fully open with your thumb to loosen the flange bolt (Fig. 39). Remove the flange bolt.
3. Ensure that the inner threads and the drive shaft are clean.
4. Align the grooves on the flush-cut blade with the four raised ribs on the drive shaft; put the application tool onto the drive shaft (Fig. 40).
5. With your gloved hand holding the blade, insert and depress the flange bolt until you hear a click indicating that the flush cut blade is secured.
6. Push the quick-release lever with your thumb to lock the driver shaft (Fig. 10).

NOTICE: The ribs on the shaft and the grooves in the application tools permit a firm connection of the application in increments of 30°, from 0° to 315° around the shaft (Fig. 41). Apply the application tool in the orientation appropriate to the task at hand.

USING THE FLUSH CUT BLADE (Fig. 42)

1. Insert the battery pack into the multi-tool.
2. Clamp the workpiece securely.
3. Draw the cutting lines on the workpiece.
4. Turn on the tool and allow it to come to the full desired speed.
5. Cut the workpiece along the line and apply with appropriate pressure until the blade cuts to the depth needed according to the scale on the blade.

NOTICE: The multi-tool can also be used with other Craftsman accessories (sold separately) listed below:

MODEL	DESCRIPTION
30753	Multi-tool sanding plate for replacement
17374	Sanding Paper (220, 280, 320 grit)
17375	Detail cut blade
17376	Rough cut blade
30858	Multi-tool Caulk Removal blade
31021	Diamond Coated Semicircle Saw Blade
31020	Circular Cutting Blade
3102	Stainless Steel Felt Polisher
31022	Finger Sanding Pad
31023	Finger Sanding Sheet Coarse

MAINTENANCE

⚠ WARNING: To avoid serious personal injury, always remove the battery pack from the tool when cleaning or performing any maintenance.

⚠ WARNING: When servicing, use only identical replacement parts. Use of any other parts may create a hazard or cause product damage.

⚠ WARNING: It is not recommended to use compressed dry air as cleaning method of the tool. If cleaning with compressed air is the only method to apply, always wear safety goggles or safety glasses with side shields when using compressed air to clean the tool. If the operation is dusty, also wear a dust mask.

GENERAL MAINTENANCE

Avoid using solvents when cleaning plastic parts. Most plastics are susceptible to damage from various types of commercial solvents and may be damaged by their use. Use clean cloths to remove dirt, dust, oil, grease, etc.

⚠ WARNING: Do not at any time let brake fluids, gasoline, petroleum-based products, penetrating oils, etc. to come in contact with plastic parts. Chemicals can damage, weaken or destroy plastic which may result in serious personal injury.

⚠ WARNING: When servicing, use only identical replacement parts. Use of any other parts may create a hazard or cause product damage. To ensure safety and reliability, all repairs should be performed by a qualified service technician.

BATTERIES:

The battery pack is equipped with Lithium-Ion rechargeable batteries. The duration of use from each charge will depend on the type of work performed.

The batteries in this tool have been designed to provide maximum trouble-free life. Like all batteries, they will eventually wear out. Do not disassemble the battery pack or attempt to replace the batteries. Handling of the batteries, especially when wearing rings and jewelry, could result in a serious burn.

To obtain the longest possible battery life, read and understand the operator's manual.

- When not in use, it is good practice to unplug the QuickBoost charger and to remove the Lithium-ion battery pack from the tool.

For Lithium-Ion battery pack storage longer than 30 days:

- Store the Lithium-Ion battery pack where the temperature is below 80°F (26°C) and free of moisture.

- Store Lithium-Ion battery packs in a 30%-50% charged condition.
- Every six months of storage, fully charge the Lithium-Ion battery pack.
- Exterior may be cleaned with a cloth or soft non-metallic brush.

BATTERY PACK REMOVAL AND PREPARATION FOR RECYCLING

To preserve natural resources, please recycle or dispose of batteries properly. This product contains lithium-ion batteries. Local, state, or federal laws may prohibit disposal of lithium-ion batteries in ordinary trash. Consult your local waste authority for information regarding available recycling and/or disposal options.

⚠ WARNING: Upon removal of the battery pack for disposal or recycling, cover the battery pack's terminals with heavy-duty adhesive tape. Do not attempt to destroy or disassemble battery pack or remove any of its components. Lithium-ion batteries must be recycled or disposed of properly. Also, never touch both terminals with metal objects and/or body parts as short circuit may result. Keep away from children. Failure to comply with these warnings could result in fire and/or serious injury.

TROUBLESHOOTING

PROBLEM	CAUSE	SOLUTION
The tool does not work	Battery is depleted	Charge the battery
Motor overheating	Be sure cooling vents are free from dust and obstacles	Clean and clear vents. Do not cover with hand during operation

PARTS LIST

12 VOLT LITHIUM-ION CORDLESS MULTI-TOOL MODEL NUMBER 320.30566

The Model Number will be found on the Nameplate attached to the handle of the Multi-Tool. Always mention the Model Number when ordering parts for this tool. To order parts, call 1-800-469-4663.
