Emerson™

EM2650

6. Slots and openings in the back or bottom of this product are provided for ventilation. To protect them from overheating, these openings must not be blocked by placing the product on a soft surface such as a bed, sofa or rug. This product should never be placed near or over a radiator or heat register. This product should not be placed in any area where proper ventilation is not provided.
7. Never push objects of any kind into the ventilation slots of this product as they may touch dangerous voltage points or create a short circuit that could result in a risk of fire or electric shock. Never spill liquid of any kind on the product.
8. Use only the power cord and batteries indicated in this manual.
9. This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply in your home, consult your dealer or local power company.
10. Plug the adaptor to the socket - outlet that is closest to the equipment and which is easily accessible.
11. Do not allow anything to rest on the power cord. Do not install this product where the cord may have anyone walking on it.
12. To reduce the risk of electric shock, do not disassemble this product, but take it to an authorized service facility. Opening or removing parts of the telephone base or handset other than specified access doors may expose you to dangerous voltages or other risks. Incorrect reassembling can cause electric shock when the product is subsequently used.
13. Do not overload wall outlets and extension cords as this can result in the risk of fire or electric shock.
14. The power adapter is intended to be correctly oriented in a vertical or floor mount position. The prongs are not designed to hold the plug in place if it is plugged into a ceiling or an under-the-table/cabinet outlet.
15. Unplug this product from the wall outlet and refer servicing to an authorized service facility under the following conditions:
   A. When the power supply cord or plug is damaged or frayed.
   B. If liquid has been spilled onto the product.
   C. If the product has been exposed to rain or water.
   D. If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions, as improper adjustment of other controls may result in damage and often requires extensive work by an authorized technician to restore the product to normal operation.
   E. If the product has been dropped and damaged.
   F. If the product exhibits a distinct change in performance.
16. Avoid using a telephone (other than cordless) during an electrical storm. There is a remote risk of electric shock from lightning.
17. Do not use the telephone to report a gas leak in the vicinity of the leak.
18. Do not dispose of batteries in a fire. They may explode. Check with local codes for possible special disposal instructions.

B) "Please follow instructions for repairing if any (e.g. battery replacement section); otherwise do not alternate or repair any parts of device except specified."

CONNECTING THE TELEPHONE

DESK MOUNTING

1. Connect the coil cord to the handset and base as shown in the diagram below :

2. Plug one end of the straight line cord into the jack at the back of the phone's base, and other end into a modular wall telephone jack.

3. Pick up the handset and confirm you hear the dial tone.

WALL MOUNTING

To mount your telephone on a wall plate (not included), follow the instructions below:
1) Plug a short straight line cord (not included) into a modular wall phone jack
2) Align the holes on the base with the mounting studs on the wall plate.
3) Pull the base down onto the studs until the telephone is secure.

Setting up the Caller ID menu

IMPORTANT : Do not connect the telephone into the wall jack while setting up the CALLER ID menu because an incoming call may invalidate the information not yet saved.

1. Press and hold the [menu] button until the display shows "SET ▼ or ▲".
2. Use the [▲] or [▼] buttons to scroll through the options below, and press the [menu] button to select the desired option you wish to set.
   - DATE/TIME
   - LOCAL AREA CODE
   - REGIONAL AC'S-1
   - SELECT LANGUAGE
   - T/P DIAL MODE
   - CALL FORWARD
   - CONTRAST
   - EXIT SETUP

NOTE : Press the [FLASH] button to exit the setup menu, or the phone will exit automatically if there is no operation within 20 seconds, and return to the "NO CALLS" screen.

DATE AND TIME

The date and time is programmed automatically when the first Caller ID record is received. It is also possible to set the date and time manually if desired.
1. Press and hold the [MENU] button until the display shows "SET ▼ or ▲".
2. Use the [▲] or [▼] buttons to scroll until "DATE/TIME" appear.
3. Press [MENU] to entry the month setting, use the [▲] or [▼] buttons and select "MONTH"
4. Press [MENU] to entry the date setting, use the [▲] or [▼] buttons and select "DATE".
5. Use the same method to set the rest of the digits of Hour, Minute
6. Press the [MENU] button to confirm your selections.

LOCAL AREA CODE

The telephone uses the programmed area code to determine the number format to display when receiving Caller ID information. It is also used for the dial back feature.
1. Press and hold the [MENU] button until the display shows "SET ▼ or ▲".
2. Use the [▲] or [▼] buttons to scroll until "LOCAL AREA CODE" appear.
3. Press [MENU] to entry LOCAL AREA CODE setting.
4. Use the [▲] button to select the first digit and press [▼] button to skip to next digit .
5. Use the [remove] button to edit, and press the [MENU] button to confirm.
6. use the same method to set the rest of the digits.
NOTE : You can also use the keypad to set the area code.

REGIONAL AREA CODES

Similar to programming local area codes, programmed regional area codes allow the phone to determine the number format to display when receiving Caller ID information. Calls matching any of the programmed regional area codes are displayed as 10 digits. This is helpful for areas that have multiple or overlapping area codes that require 10 digit dialing.
1. Press and hold the [menu] button until the display shows "SET ▼ OR ▲ ".
2. Use the [▲] or [▼] buttons and select "REGIONAL AC'S-1" and press the [menu] button to enter.
3. Use the [▲] button to select the first digit and press the [▼] button to confirm and skip to the next digit.
4. Use the [remove] button to edit, and press the [menu] button to confirm.
5. Use the same method to set the rest of the digits. Up to 6 regional area codes may be programmed.
NOTE : You can also use the keypad to set the regional area codes.

SELECT LANGUAGE

This setting allows you to choose the language for the display information.
1. Press and hold the [menu] button until the display shows "SET ▼ OR ▲"
2. Use the [▲] or [▼] buttons and select "SELECT LANGUAGE" and press the [menu] button to enter.
3. Use the [▲] or [▼] buttons to select the desired language.
4. Press the [menu] button to confirm.

TONE/PULSE DIAL MODE

Choose Tone or Pulse dialing.
1. Press and hold the [menu] button until the display shows "SET ▼ OR ▲"
2. Use the [▲] or [▼] buttons and select "T/P DIAL MODE" and press the [menu] button to enter.
3. Use the [▲] or [▼] buttons to select Tone/Pulse Mode.
4. Press the [menu] button to confirm.

CONTRAST

Adjust the contrast of the display
1. Press and hold the [menu] button until the display shows "SET ▼ OR ▲",
2. Use the [▲] or [▼] buttons and select "CONTRAST" and press the [menu] button to enter.
3. Use the [▲] or [▼] buttons to select the desired contrast level.
4. Press the [menu] button to confirm

EXIT SETUP

When "EXIT SETUP" is displayed press the [menu] button exit.

Product maintenance

Follow the guidelines below to properly maintain this product:
• Avoid putting it near heating appliances and devices that generate electrical noise (for example: motors or fluorescent lamps).
• Do not expose to direct sunlight or moisture.
• Avoid dropping the unit and/or other rough treatment.
• Clean with a soft cloth.
• Never use a strong cleaning agent or abrasive powder because this will damage the finish.
• Retain the original packaging in case you need to ship it at a later date.

Troubleshooting tips

No Dial Tone
- Check all cabling and telephone jack connections.

Phone does not ring
- Make sure the ringer switch is set to the ON position.

No display
- Replace batteries.
- Make sure the batteries ar properly installed.

No information is shown after the phone rings
- In order to receive Caller ID records, you must subscribe to the standard name and number caller ID service available through your local telephone company.
- Be sure to wait until the second ring before answering

Other party can't hear you
- Check if the [MUTE] button has been accidently pressed, if so press the [MUTE] button again to deactivate the mute function.
- Make sure the handset cord is properly plugged in.
- Check that extension phones are on the hook at the same time you're using the phone. It is normal for the volume to drop when additional extension phones are used at the same time.
