

Scanning Guide for Colour Machines

This guide covers the following machines:

- **C250/C252/C300/C351/C352/C450**
- Emperon and Fiery Controllers IC-402 & IC-406
- **C200/C203/C253/C353/C451/C550/C650**
- Emperon and Fiery Controller IC-409
- **C350 - Embedded Controller and the Fiery IC-401**
- **Bizhub C10**

Scanning – Tips & Tricks

FTP

- PageScope Cabinet and the FTP Utility will not run on Windows 2003 , Vista or Server 2008, use the IIS service within these Operating Systems-
PageScope Cabinet needs to be open before scanning, or the FTP Service placed in the Startup folder of the PC. (see the Konica Minolta FTP & SMB Setup Guide for Windows)

SMB

* - On Windows 2003 Domain Controller Server, you may find that you need to change the Domain Security Setting

Security Options\Microsoft Network Security\Digitally Sign Communications=(Always) should be changed to "Disable"

The Server must then be rebooted for the modified policy to take effect

*** This should only be changed by the I.T dept of the customer**

- Scanning to 1st folder ensure all permissions are set for everyone, scanning to nested folders no other permissions are required – directory set on copier= eg: "1stfoldername\scan**" etc - Scanning to a mapped drive – make sure you place a / before the share name of the folder within that mapped drive. Folder names etc are case sensitive.

E-mail

- If you are connecting to an Exchange Server, Relay must be enabled for the Konica Minolta device on the server itself.

- Alternatively a new account needs to be created on the SMTP server, and 'SMTP Authentication' needs to be enabled under the 'E-mail Transmission' settings on the MFP.

(Please note that 'SMTP Authentication' is not available on all machines)

- In order for ANY Fiery print controller to scan to e-mail, an e-mail account needs to be set up on the e-mail server as if the machine were a new employee.

- Remember to make sure Binary Division is disabled under the E-mail SMTP Settings.

HDD

- If using the PageScope Box Operator or the HDD TWAIN Driver to retrieve scans, please make sure you are using the correct version for the version of firmware the machine is running on.

Version 3.1.0.2 Box Operator should be backwardly compatible with all versions of firmware, but will not be compatible with newer versions.

- Older versions of Box Operator will not connect to newer versions of firmware and need to be upgraded at the same time as the firmware.

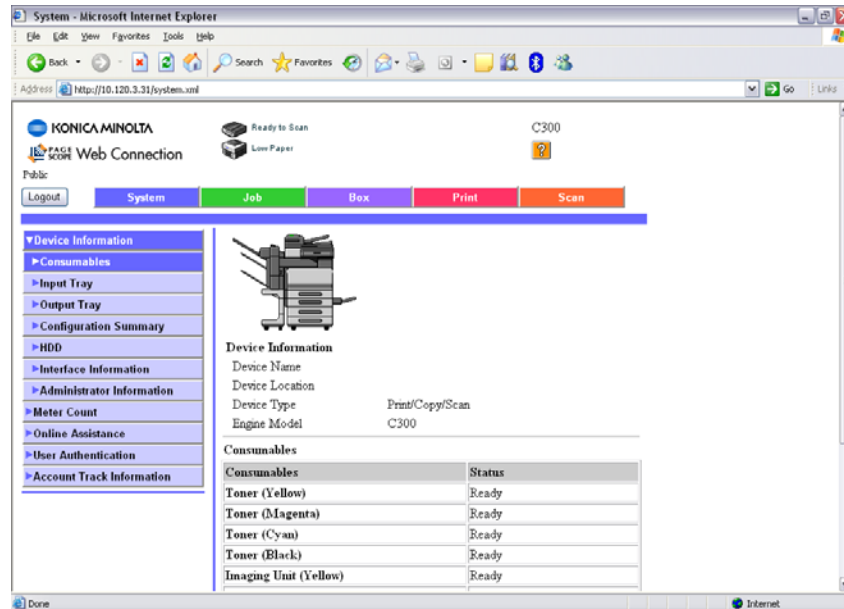

The latest version of Box Operator can be downloaded from our website:

www.konicaminolta.eu

Konica Minolta C250/C252/C300/C351/C352/C450 with Emperon Controller

SCAN TO HDD

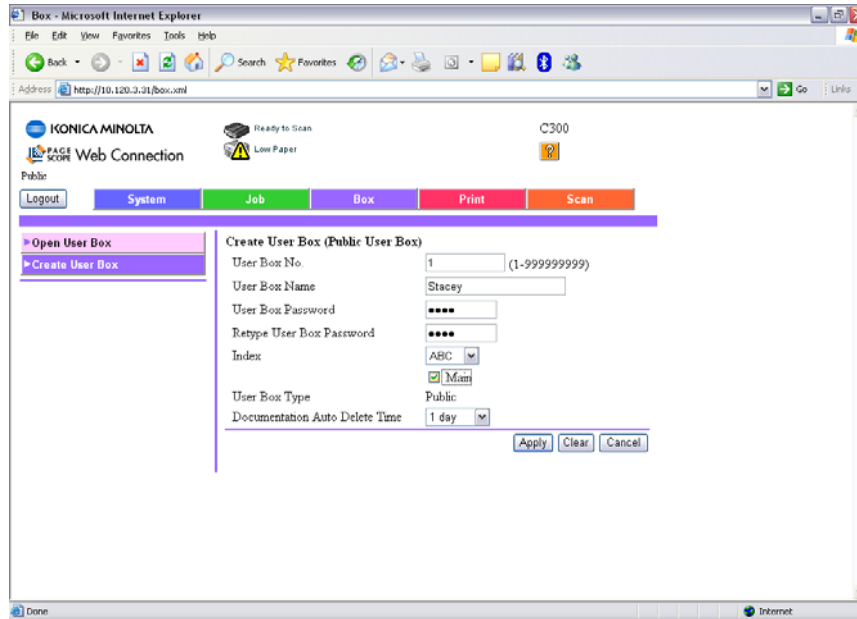

- 1) Using Internet Explorer, type the IP address of the Konica Minolta machine into the address bar and press Go
- 2) Click on 'Box' at the top of the screen

- 3) Click on 'Create User Box'

4) Click Next

5) Type in your User Box Number, Name and Password.

6) Click Apply

7) A message saying 'Completed' will be displayed. Click OK.

CREATING A ONE TOUCH BUTTON

1) Click on SCAN at the top of the screen

2) Click on New Registration

3) Choose the type of button you wish to create. I.E. User Box

4) Click Next

5) Fill out the details for your box. The Name is the name of the button that will appear on the machine. The User Box No. must relate to the User Box you created previously. The Index is the index the button will appear under on the machine.

SCAN TO E-MAIL

- 1) Using Internet Explorer, type the IP address of the Konica Minolta machine into the address bar and press Go
- 2) Click on Logout to logout of Public Mode. You will need to confirm you want to logout.
- 3) Login to the Admin Mode by typing in the admin code of 12345678
- 4) Click on the orange Network tab
- 5) Click on E-mail Setting down the left hand side of the page
- 6) Click on E-mail TX (SMTP)
- 7) Ensure that 'E-mail TX Setting' and 'Scan to E-mail' are turned 'ON'
- 8) Enter in the IP address or Host Name of the E-mail server
- 9) Enter an 'Admin. Email Address' & 'Device Mail Address'. Neither of these addresses need to be real.
- 10) If required, turn on 'SMTP Authentication' and enter a user name and password of a user set up on the e-mail server. [It is recommended that if you need to use this setting, that a new e-mail account for the Konica Minolta device is created on the e-mail server.](#)

The screenshot shows the 'E-Mail TX (SMTP)' configuration page in the Konica Minolta Admin Mode. The left sidebar contains a navigation menu with 'E-Mail TX (SMTP)' selected. The main content area displays various settings for SMTP, including 'E-Mail TX Setting' (ON), 'Scan to E-Mail' (ON), 'E-Mail Notification' (ON), and 'Meter Count Notification' (ON). The 'SMTP Server Address' is set to '150.16.85.11' and the 'Port No.' is '25'. The 'Admin. E-Mail Address' is 'hotline@bs.konicaminolta.co.uk' and the 'Device Mail Address' is 'hot_C300@bs.konicaminolta.co.uk'. The 'Binary Division' dropdown menu is circled in red and is currently set to 'OFF'. Other settings include 'POP Before SMTP' (OFF), 'SMTP Authentication' (OFF), and 'Divided Mail Size' (100-15000, Step 100). 'Apply' and 'Clear' buttons are located at the bottom right of the settings area.

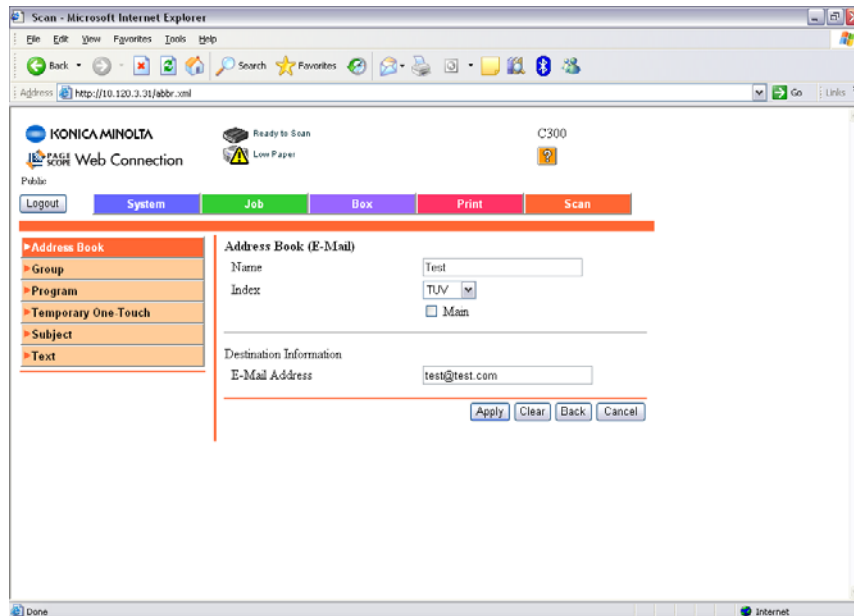

11) Binary division by default is turned off. If enabled, the machine will send separate scanned images. [For example, if you scan in a 10 page document, you may end up receiving 10 separate e-mails or you may received a .dat file.](#)

12) Click Apply and then OK

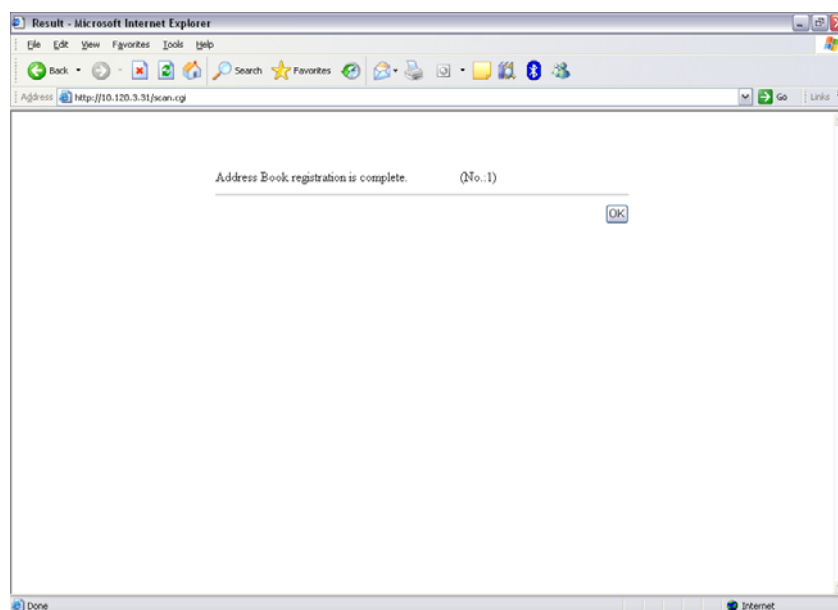

13) Log out of Administrator mode and confirm that you wish to log out

CREATING A ONE TOUCH BUTTON

- 1) Following on from the instructions on page 6, log back in as a **Public User**
- 2) Click on SCAN at the top of the screen
- 3) Click on New Registration
- 4) Choose the type of button you wish to create. I.E. E-mail
- 5) Click Next
- 6) Enter in the Name of the button you wish to appear on the machine, the Index in which it is to appear under, and the E-mail Address you require your e-mails sending to.

- 7) Click Apply and it should display the following screen. Click OK

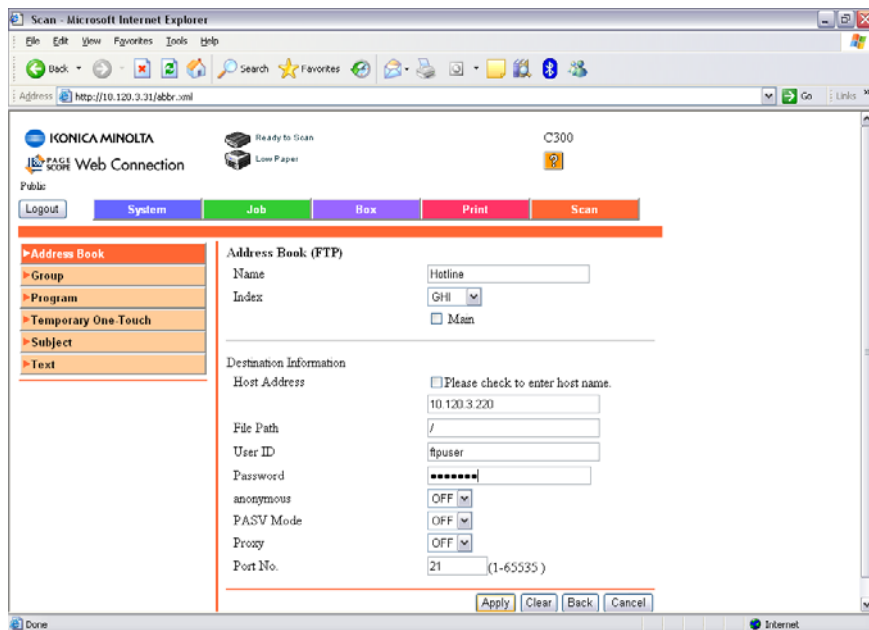

SCAN TO FTP

For information on configuring either PageScope Cabinet or IIS, please refer to the [Konica Minolta FTP & SMB Setup Guide for Windows](#).

PageScope Cabinet	-	Page 4
IIS – XP	-	Page 5
IIS – Vista	-	Page 6
IIS – Server 2008	-	Page 12

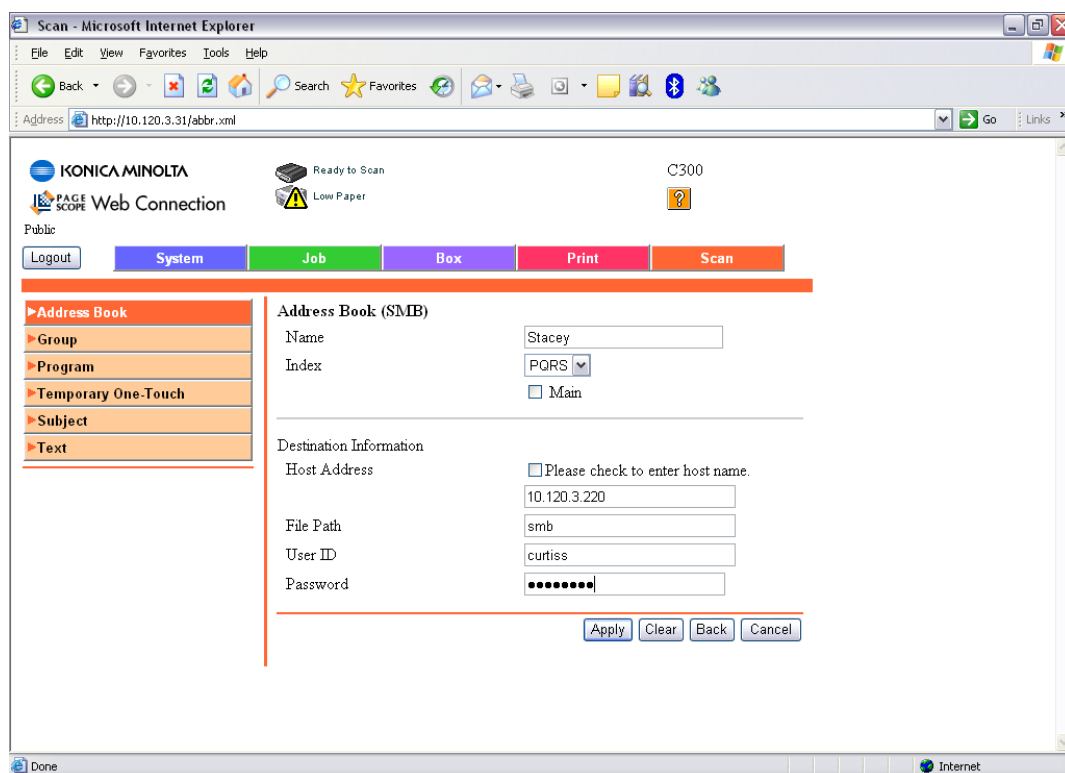

- 1) Using Internet Explorer, type the IP address of the Konica Minolta machine into the address bar and press Go
- 2) Click on the 'Scan' tab at the top of the screen
- 3) Click on 'New Registration' and then choose 'FTP' from the list
- 4) Enter a 'Name' for your one touch button. (This is the name of the button that will appear on the machine).
 - * Specify the 'Index' under which your one touch button is to appear on the machine
 - * Enter the IP address or Host Name of the PC running the FTP service
 - * If in PageScope Cabinet/IIS you have set the FTP Root Folder to the actual folder on the PC where you wish the scans to be placed ("PC Root Folder"), the 'File Path' on the machine only needs to have a / (forward slash) typed into the box. The / means "root folder". If however you wants the scans to be placed in a folder which is inside the "PC Root Folder", lets say called Hotline you would need to put /Hotline
 - * Enter a user name or password that is either configured within PageScope Cabinet, or if you are using IIS, that of a user on the PC

- 5) Click Apply and OK.

SCAN TO SMB

- 1) Create and configure shared folder on your C drive as on pages 20-26 of the **Konica Minolta FTP & SMB Setup Guide for Windows**.
- 2) Using Internet Explorer, type the IP address of the Konica Minolta machine into the address bar and press Go
- 3) Click on the SCAN tab at the top
- 4) Click on New Registration and choose SMB
- 5) Enter in the Name of the button to appear on the machine and select the Index in which it is to appear under.
- 6) Type in the IP Address of the computer as the 'Host Address'. You can also use the Computer Name found under the Properties of My Computer by putting a tick in the box 'Please check to enter host name'. **This must be typed in using upper case.**
- 7) Type in the **SHARE NAME** of the folder you created in step 1

- 8) Type in the User Name and Password the customer uses when they log into their computer first thing in the morning. If this does not work, a new user must be set up on the PC just for SMB scanning.
- 9) Click Apply and then OK

Konica Minolta – C300/C351/C352/C450 With the Fiery Controllers (IC-402 & IC-406)

SCAN TO HDD

- 1) Using Internet Explorer, type the IP address of the Konica Minolta machine into the address bar and press Go
- 2) Click on Login (Fiery) and type in the Administrator password for the Fiery which is: **Fiery.1**
- 3) Click on the 'Box' tab at the top of the screen and click 'Create'

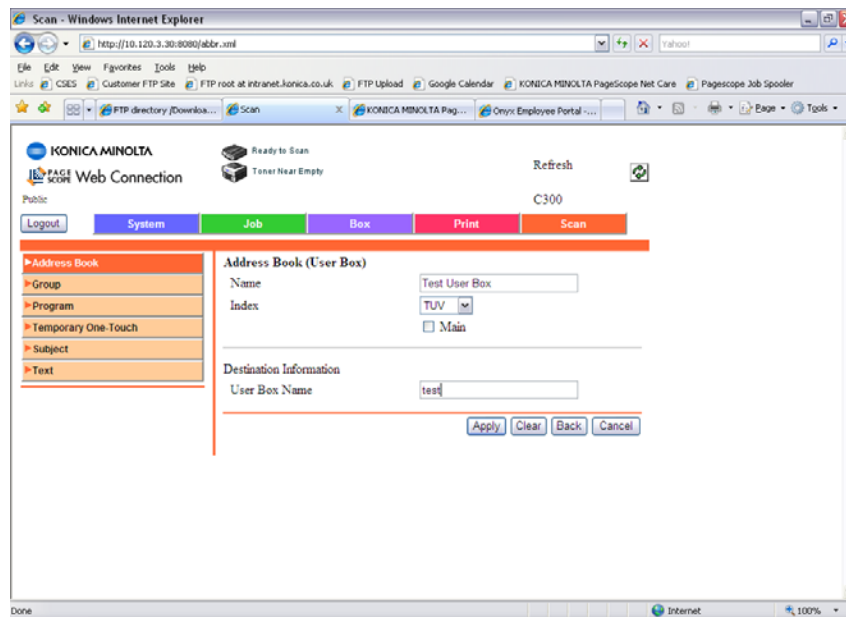

- 4) Type in the Mailbox Name and password you require for your box. **This is case sensitive**. This is the information you will need to type into either Web Scan or Fiery Remote Scan 5 to retrieve the scanned images. Click Apply

- 5) Logout of the Fiery Screen

CREATING A ONE TOUCH BUTTON

- 1) Click on SCAN at the top of the screen
- 2) Click on New Registration
- 3) Choose the type of button you wish to create. I.E. User Box (Scan)/(Store Scanner)
- 4) Click Next
- 5) Enter in the Name of the button you wish to appear on the machine and the Index which it should appear under. The 'User Box Name.' is the name of the box you created when you logged in to the Fiery screen.

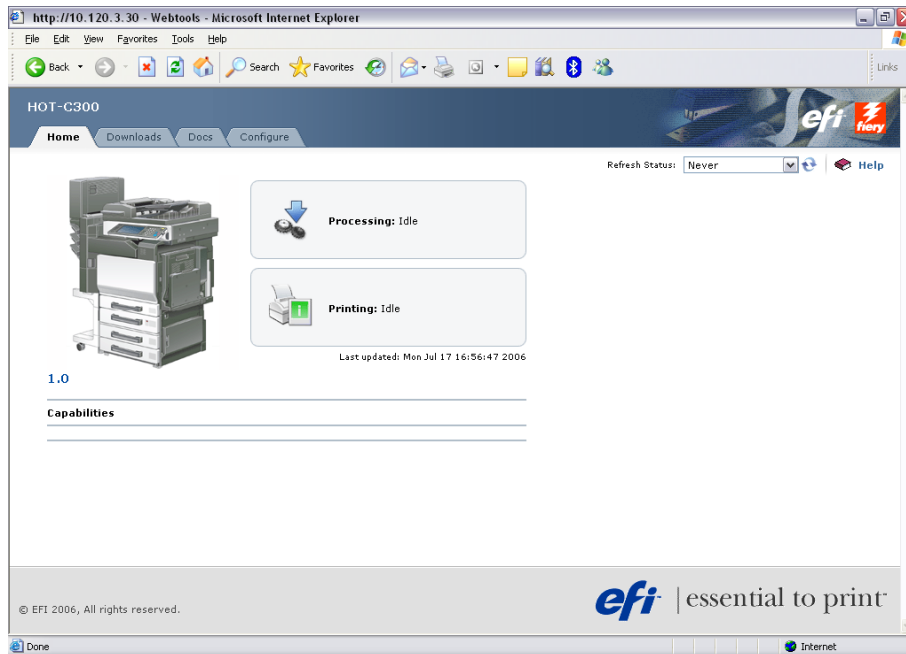

- 6) Click Apply

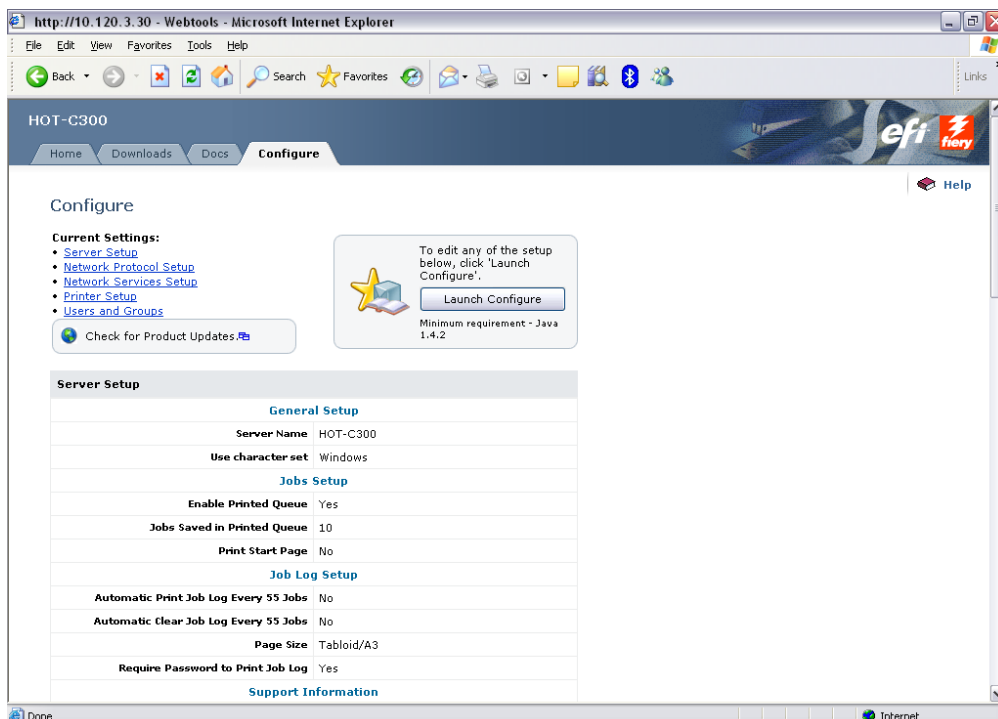

SCAN TO E-MAIL

PLEASE NOTE THAT AN E-MAIL ACCOUNT MUST BE SET UP ON THE E-MAIL SERVER PRIOR TO SETTING UP THE MACHINE

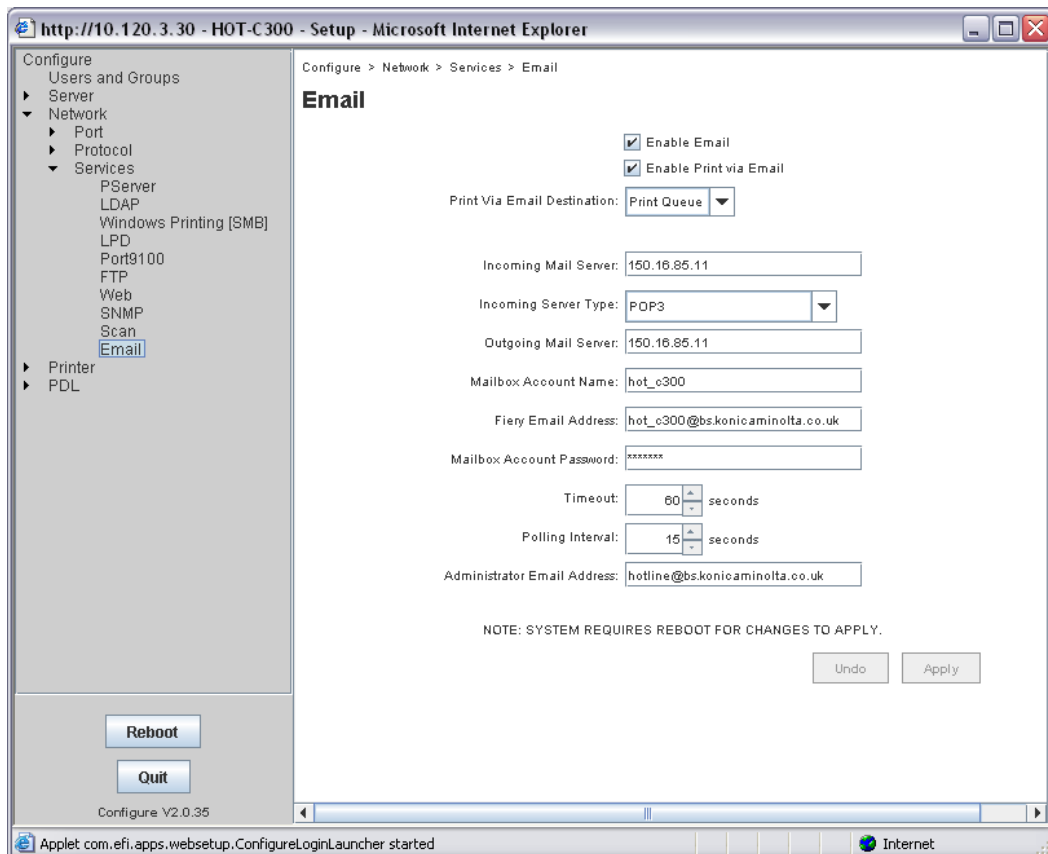

- 1) Using Internet Explorer, type the IP address of the Fiery/machine into the address bar and press Go
- 2) Click on Fiery Web Tools and the new look Web Tools will be displayed

- 3) Click on Configure, which will give you a summary of the current settings

- 4) Click on 'Launch Configure' and you will be prompted for a password. The password is the same as all new Fiery's: **Fiery.1**
- 5) Click OK
- 6) Click on Network\Services\E-mail and the following screen will be displayed.
- 7) Enter in the required details.

- 8) Click Apply and reboot the Fiery by clicking 'Reboot' in the bottom left hand corner of the screen.

[CREATING A ONE TOUCH BUTTON](#)

- 1) Click on SCAN at the top of the screen
- 2) Click on New Registration
- 3) Choose the type of button you wish to create. I.E. E-mail
- 4) Click Next
- 5) Enter in the Name of the button you wish to appear on the machine, the Index in which it is to appear under, and the E-mail Address you require your e-mails sending to.

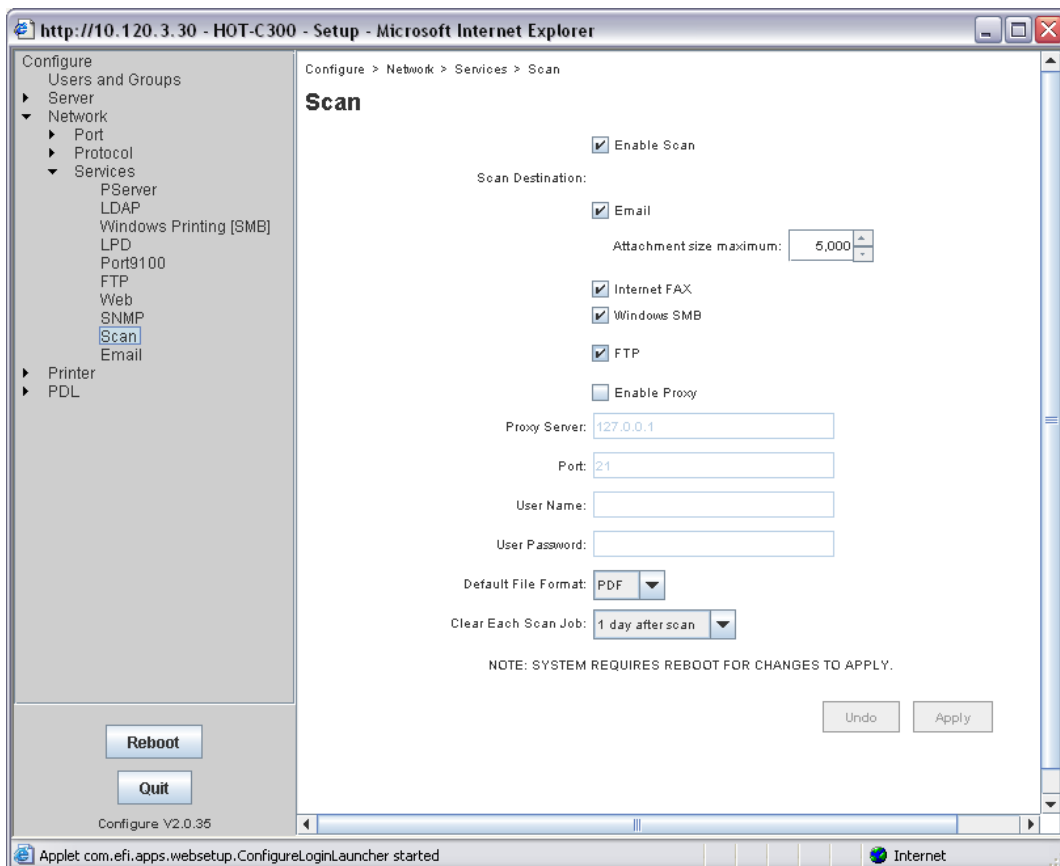

SCAN TO FTP

This setup for FTP scanning is the same as the Emperon controller. Please refer to Page 22 for machine configuration, and for information on configuring either PageScope Cabinet or IIS, please refer to the following pages of the **Konica Minolta FTP & SMB Setup Guide for Windows**.

PageScope Cabinet	-	Page 4
IIS – XP	-	Page 5
IIS – Vista	-	Pages 6
IIS – Server 2008	-	Page 12

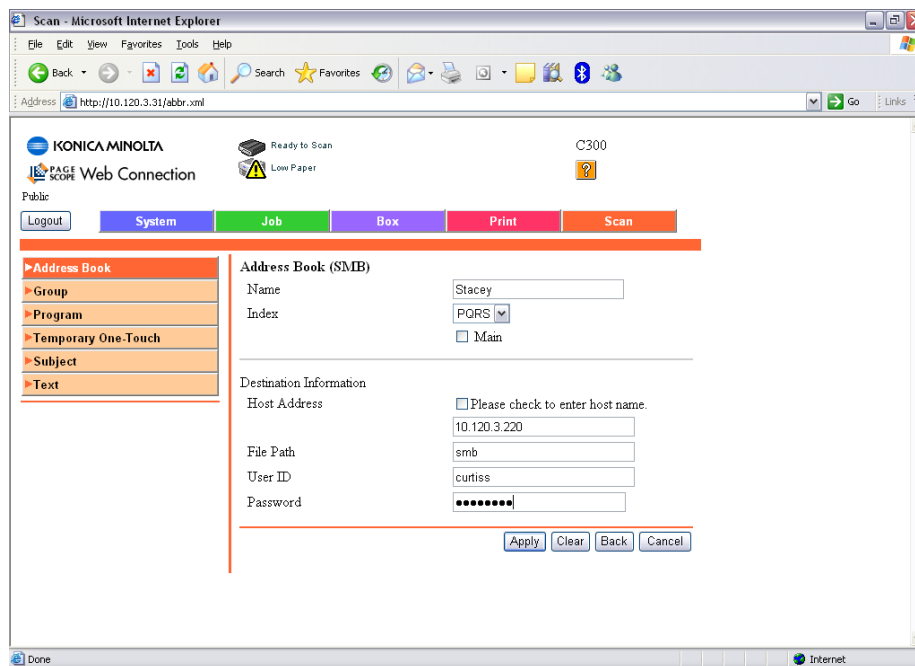

However, you do need to enable FTP by opening up Web Tools from the web interface of the machine.

- 1) Click on Configure then Launch Configuration.
- 2) Click on Network\Services\Scan and put a tick in the FTP box.
- 3) Reboot the Fiery by clicking the Reboot button in the bottom left hand corner of the screen.

SCAN TO SMB

- 1) Create a shared folder on your C drive as on pages 20-26 of the **Konica Minolta FTP & SMB Setup Guide for Windows**.
- 2) Using Internet Explorer, type the IP address of the Konica Minolta machine into the address bar and press Go
- 3) Click on the SCAN tab at the top
- 4) Click on New Registration and choose SMB
- 5) Enter in the Name of the button to appear on the machine and select the Index in which it is to appear under.
- 6) Type in the IP Address of the computer as the 'Host Address'. You can also use the Computer Name found under the Properties of My Computer by putting a tick in the box 'Please check to enter host name'. **This must be typed in using upper case.**
- 7) Type in the **SHARE NAME** of the folder you created in step 1

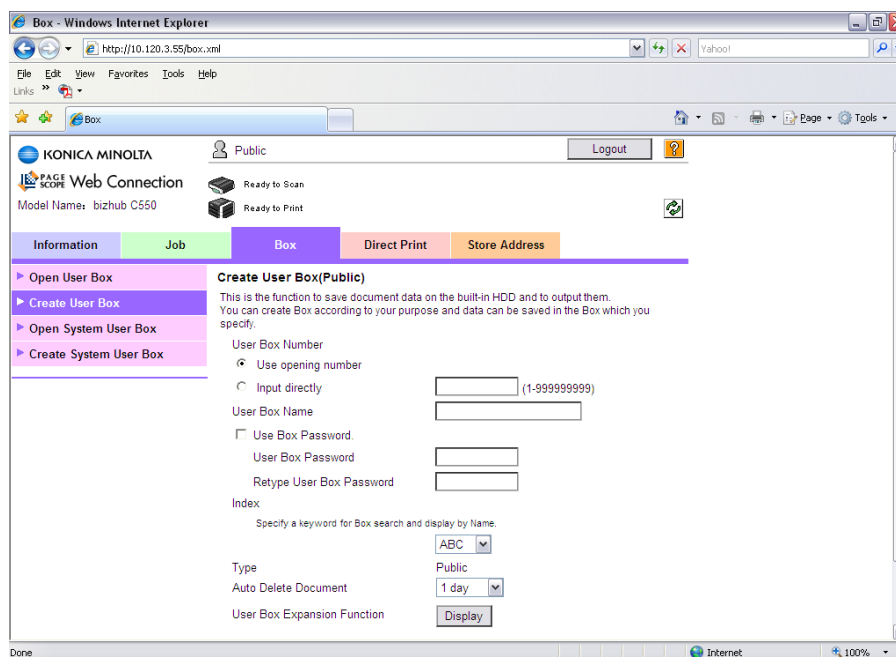

- 8) Type in the User Name and Password the customer uses when they log into their computer first thing in the morning. If this does not work, a new user must be set up on the PC just for SMB scanning.
- 9) Click Apply and then OK

C203/C253/C353/C451/C550/C650 with the Emperon Controller

SCAN TO HDD

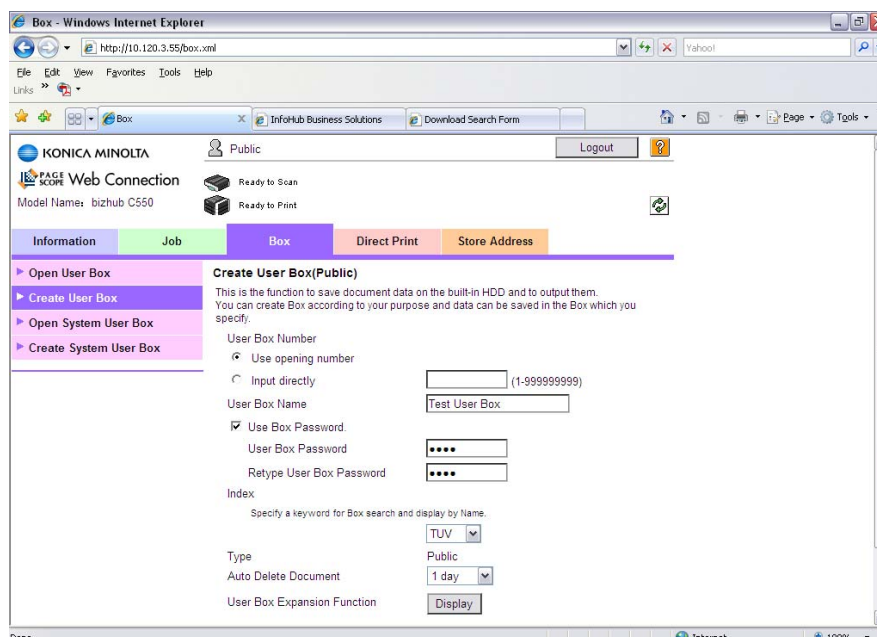

- 1) Using Internet Explorer, type the IP address of the machine into the address bar and press Go
- 2) Click on the 'Box' tab at the top of the screen
- 3) Click on 'Create User Box'

The screenshot shows the 'Box' tab selected in the Konica Minolta web interface. The 'Create User Box(Public)' form is displayed with the following fields and options:

- User Box Number:** Radio buttons for 'Use opening number' (selected) and 'Input directly' (with a text input field containing '(1-99999999)').
- User Box Name:** A text input field.
- Use Box Password:** A checkbox (unchecked) with associated 'User Box Password' and 'Retype User Box Password' text input fields.
- Index:** A dropdown menu set to 'ABC' with the instruction 'Specify a keyword for Box search and display by Name.'
- Type:** A dropdown menu set to 'Public'.
- Auto Delete Document:** A dropdown menu set to '1 day'.
- User Box Expansion Function:** A 'Display' button.

- 4) Enter a 'User Box Name', 'Password' if required and 'Index' under which the machine will place the box.

The screenshot shows the 'Create User Box(Public)' form with the following fields filled out:

- User Box Number:** 'Use opening number' is selected.
- User Box Name:** 'Test User Box' is entered in the text input field.
- Use Box Password:** The checkbox is checked, and both 'User Box Password' and 'Retype User Box Password' fields contain masked characters (dots).
- Index:** The dropdown menu is set to 'TUV'.
- Type:** The dropdown menu is set to 'Public'.
- Auto Delete Document:** The dropdown menu is set to '1 day'.
- User Box Expansion Function:** The 'Display' button is visible.

5) Click 'OK' and 'OK' again to the 'Completed' message

CREATING A ONE TOUCH BUTTON

1) Click on the 'Store Address' tab

2) Click on 'New Registration'

3) Choose 'User Box' from the next screen and click 'OK'

4) Leave the 'Use Opening Number' option selected.

- * Give your scan button a name. (This is the name of the button that will appear on the machine).
- * Select the 'Index' under which that button is to appear.
- * Enter the number for the box you created previously. If you are unsure what this box number was, click 'Search from List'. You can then select the box and click 'OK'

The screenshot shows the 'Store Address' web interface in Internet Explorer. The 'Address Book (User Box)' section is active, with the 'Name' field set to 'Test Box' and the 'Index' dropdown set to 'TUV'. A 'Search from List' button is highlighted with a red arrow pointing to the 'PublicUser Box List' dialog box. The dialog box displays a table with one entry:

No.	User Box Name
1	Test User Box

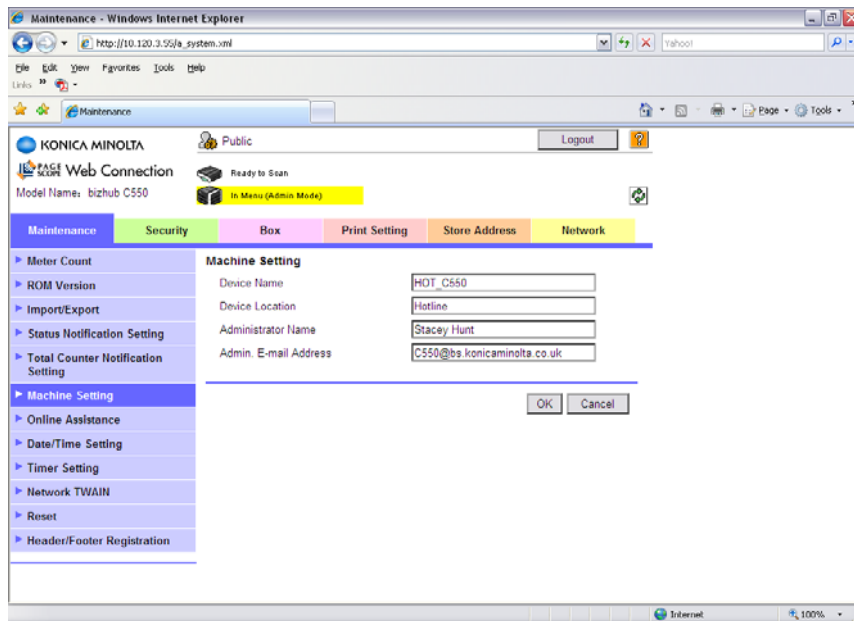

The dialog box also includes 'OK' and 'Cancel' buttons.

5) Click 'OK' and then 'OK' again

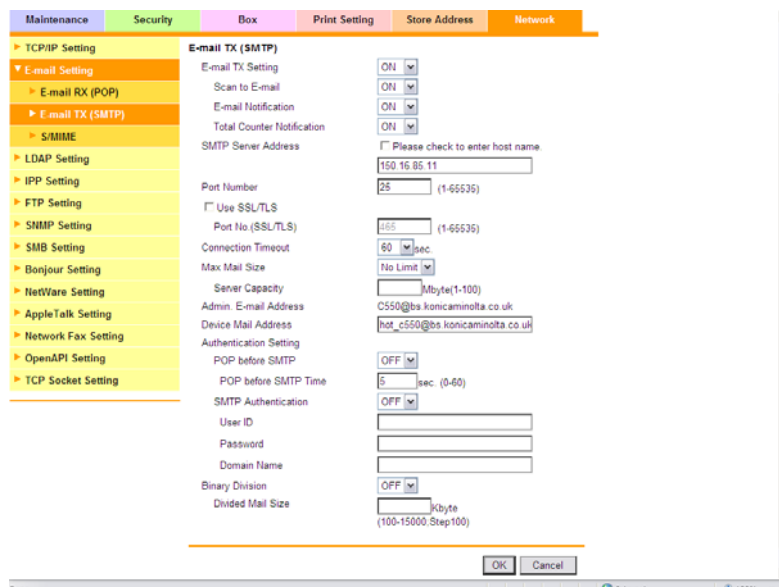

Your box is now registered.

SCAN TO E-MAIL

- 1) Using Internet Explorer, type the IP address of the Konica Minolta machine into the address bar and press Go
- 2) Log in to Administrator Mode using the default password of: 12345678
- 3) Under the 'Maintenance' screen, click on 'Machine Setting'
- 4) Enter an 'Administrator Name' and 'Admin E-mail Address'

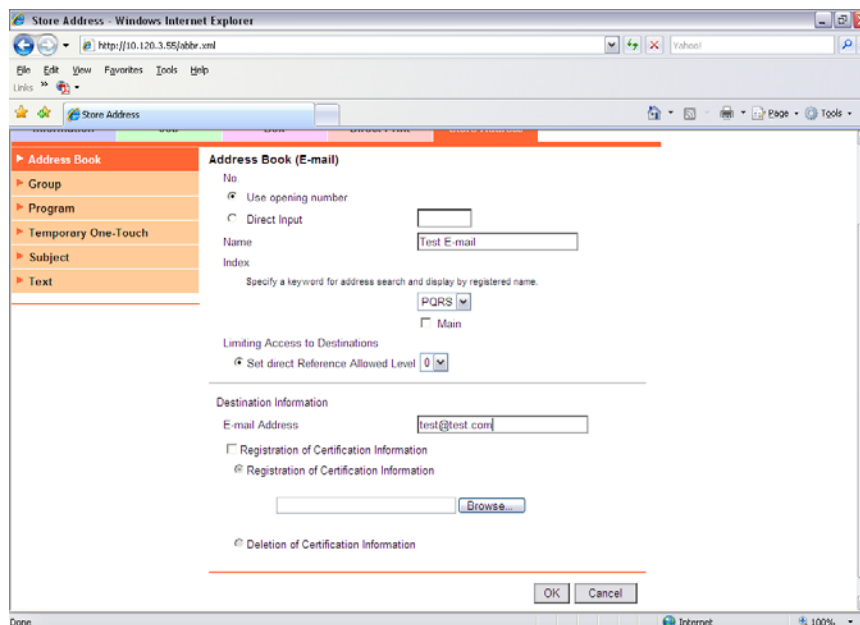

- 5) Click 'OK' and 'OK' again.
- 6) Click on the 'Network' tab at the top of the screen
- 7) Down the left hand side of the screen, click 'Email Setting', then 'E-mail TX (SMTP)'

- 8) Ensure that 'E-mail TX Setting' and 'Scan to E-mail' are turned 'ON'
- 9) Enter in the IP address or Host Name of the E-mail server
- 10) Enter a 'Device Mail Address'
- 11) If required, turn on 'SMTP Authentication' and enter a user name and password of a user set up on the e-mail server. **It is recommended that if you need to use this setting, that a new e-mail account for the Konica Minolta device is created on the e-mail server.**
- 12) Ensure that 'Binary Division' is turned 'OFF'
- 13) Click 'OK' and log out of Administrator Mode

CREATING A ONE TOUCH BUTTON

- 1) Log in to the web interface as a 'Public User'
- 2) Click on the 'Store Address' tab
- 3) Click on 'New Registration' and choose 'E-mail' from the next screen.
- 4) Enter a 'Name' for your button. (This is the name of the button that will appear on the machine.)
 - * Choose the 'Index' under which this button will appear
 - * Enter the e-mail address of the recipient

- 5) Click 'OK' and then 'OK' again

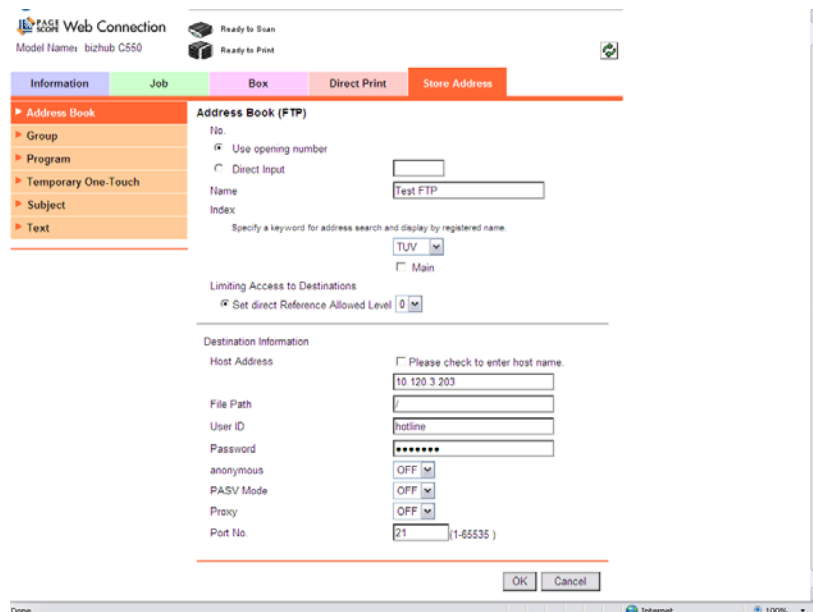

Your button is now configured.

SCAN TO FTP

For information on configuring either PageScope Cabinet or IIS, please refer to the following pages of the **Konica Minolta FTP & SMB Setup Guide for Windows**.

PageScope Cabinet	-	Page 4
IIS – XP	-	Page 5
IIS – Vista	-	Pages 6
IIS – Server 2008	-	Page 12

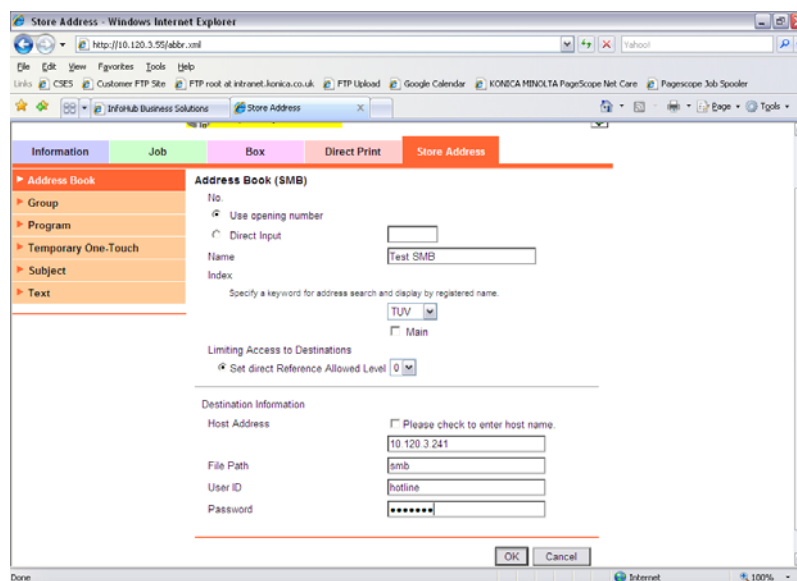

- 1) Using Internet Explorer, type the IP address of the Konica Minolta machine into the address bar and press Go
- 2) Click on the 'Store Address' tab at the top of the screen
- 3) Click on 'New Registration' and then choose 'FTP' from the list
- 4) Leave the 'Use Opening Number' option selected.
 - * Enter a name for your one touch button. (This is the name of the button that will appear on the machine).
 - * Specify the 'Index' under which your one touch button is to appear on the machine
 - * Enter the IP address or Host Name of the PC running the FTP service
 - * If in PageScope Cabinet/IIS you have set the FTP Root Folder to the actual folder on the PC where you wish the scans to be placed ("PC Root Folder"), the Directory on the machine only needs to have a / (forward slash) typed into the box. The / means "root folder". If however you wants the scans to be placed in a folder which is inside the "PC Root Folder", lets say called Hotline you would need to put /Hotline
 - * Enter a user name or password that is either configured within PageScope Cabinet, or if you are using IIS, that of a user on the PC.

- 5) Click 'OK' and then 'OK' again.
Your button is now configured.

SCAN TO SMB

- 1) Create a shared folder on your C drive as on pages 20-26 of the **Konica Minolta FTP & SMB Setup Guide for Windows**.
- 2) Using Internet Explorer, type the IP address of the Konica Minolta machine into the address bar and press Go
- 3) Click on the 'Store Address' tab at the top of the screen
- 4) Click on 'New Registration' and then choose 'SMB' from the list
- 5) Enter in the 'Name' of the button to appear on the machine and select the 'Index' in which it is to appear under.
- 6) Type in the IP Address of the computer as the 'Host Address'. You can also use the Computer Name (found under the Properties of My Computer) by putting a tick in the box 'Please check to enter host name'. **This must be typed in using upper case.**
- 7) Type in the SHARE NAME of the folder you created in step 1

- 8) Type in the User Name and Password the customer uses when they log into their computer first thing in the morning. If this does not work, a new user must be set up on the PC just for SMB scanning.
 - 9) Click 'Apply', 'OK', and then 'OK' again
- Your button is now configured.

C253/C353/C451/C550/C650 with the Fiery IC-409

There are 2 ways of configuring the C253/C353/C451/C550/C650 with the IC-409 attached. **Please make sure you check which configuration you have before you commence setup of scanning.**

Configuration 1

Figure 1

Figure 2

* There will be a short black crossover cable connected from the top LAN connection of the copier (Figure 1), to the COPIER connection on the Fiery (Figure 2).

* The LAN cable for the network will be plugged in to the LAN port on the Fiery.

The machine will have two IP addresses. One for the Fiery and one for the main body. When browsing the web interface, you need to use the correct IP address for what you want to browse.

The IP address of the Main Body can be found by printing a Configuration Page from the Fiery. It cannot be found under the Network Settings on the main body of the machine. At the machine, follow the steps below:

- 1) Press the Utility\Counter button
- 2) Press Controller Details on the touch screen
- 3) Press Menu
- 4) Press the button next to Print Pages and then the button next to Configuration

The machine will then print 2 pages. The IP address of the machine can be found at the end of the second page.

Scan to E-mail

With this configuration, the machine will first look to the main body for scan settings. If the main body of the machine and the Fiery both have SMTP settings entered, the machine will send e-mails from the main body. If only the Fiery is configured, the Fiery will send the e-mail instead.

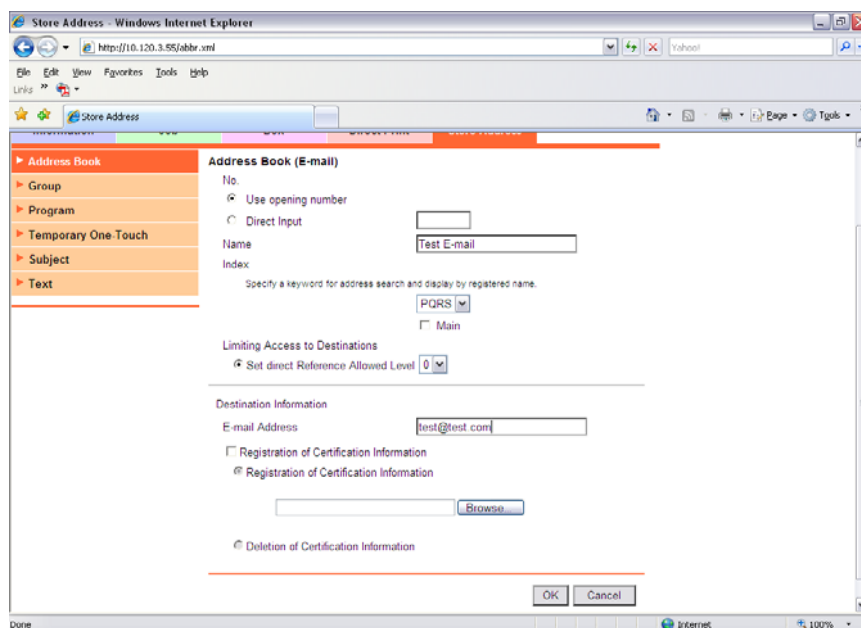

Scan to HDD/FTP/SMB - these are all handled by the Emperon controller. Please refer to the relevant pages - HDD 16-17, FTP 20 & SMB 21 for details.

Scan to E-mail through the Emperon controller, please refer to pages 18 - 19

Scan to E-mail through the Fiery IC-409 – please refer to pages 12 - 13 for configuration

CREATING A ONE TOUCH BUTTON

- 1) Log in to the web interface as a 'Public User'
- 2) Click on the 'Store Address' tab
- 3) Click on 'New Registration' and choose 'E-mail' from the next screen.
- 4) Enter a 'Name' for your button. (This is the name of the button that will appear on the machine.
 - * Choose the 'Index' under which this button will appear
 - * Enter the e-mail address of the recipient

- 5) Click 'OK' and then 'OK' again

Your button is now configured.

Configuration 2

Figure 1

Figure 2

Figure 1: A network cable must be plugged into the main body LAN port

Figure 2: A network cable must be plugged into the LAN port on the Fiery

The machine now has two IP addresses. One for the Fiery, one for the main body. When browsing the web interface, you need to use the correct IP address for what you want to browse.

**All scanning is handled by the main body only.
Please refer to pages 16 - 21.**

--When connecting via supplied crossover cable--

If the Fiery is assigned an IP from the LAN, which has addresses above then the Fiery will assign the Copier Engine with an IP above the one it has been given from the LAN, This is a Pseudo address and will not affect the LAN side of the Fiery.

eg: Fiery=192.168.0.100, Copier Engine=192.168.0.101.

(It is still advisable not to use two IP addresses either side of the one allocated to the Fiery)

From the Copier main Body it will show an IP in the 172.???.?? range which will be the Copiers' true IP address as given by the DHCP function of the Fiery.

ALL of the Emperon functions are available via the Pseudo IP address

Bizhub C10

Scan to E-mail

- 1) Using Internet Explorer, type the IP address of the Konica Minolta machine into the address bar and press Go
- 2) Login to the web interface using the password of: MagiMFP
- 3) Click on the yellow Network tab at the top of the screen and down the left hand side, select 'Email'.

The screenshot shows the Konica Minolta Bizhub C10 web interface. At the top, there is a navigation bar with tabs for 'System', 'Fax/Email', and 'Network'. The 'Network' tab is selected. On the left side, there is a sidebar with a tree view containing 'Summary', 'TCP/IP', 'IP Address Filtering', 'Bonjour', 'IPP', 'SNMP', and 'E-mail'. The 'E-mail' tab is selected. The main content area is titled 'E-mail' and contains the following configuration fields:

Send	Enable
Sender Name	bizhub C10
E-mail Address	hot-c10@konicaminolta.co.uk
Default Subject	From bizhub C10
SMTP Server Address	150.16.85.11
Port Number	25
Connection Timeout	60 sec. (30-300)
Text Insert	<input type="checkbox"/>
Authentication	
POP Before SMTP	Disable
POP Before SMTP Time	1 sec. (0-60)
POP Server Address	0.0.0.0
Login Name	
Password	
SMTP Authentication	Disable
User Name	
Password	
Realm	

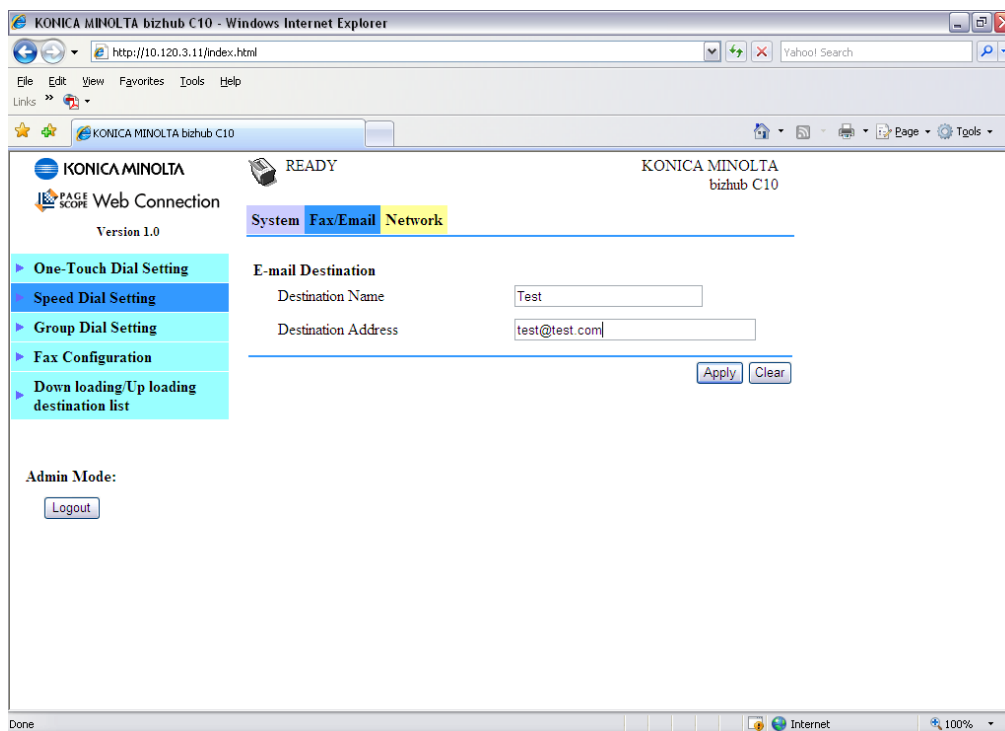

At the bottom left, there is an 'Admin Mode:' section with a 'Logout' button. The browser's status bar at the bottom shows 'Done' and 'Internet'.

- 4) * Make sure that 'Send' is enabled.
 - * Enter in a Sender Name
 - * Enter in an E-mail address (this does not have to be a real address but it is what will appear in your Inbox)
 - * Enter a Default Subject
 - * Enter the IP address of the e-mail server in to 'SMTP Server Address'
 - * If the e-mail server requires authentication, enable the Authentication settings and enter the details provided by your Network Administrator.
- 5) When all of these details have been entered, click 'Apply'.

You now need to create a Speed Dial button for all users that require scan to e-mail. Please continue to the next page for instructions.

TO CREATE A SPEED DIAL BUTTON

- 1) Following on from the instructions on page 25
- 2) Click on the Fax\E-mail tab at the top of the screen
- 3) On the left of the screen, click on Speed Dial Setting
- 4) Click on the Speed Dial number you wish to register. This can range from 001 to 100.
- 5) Choose E-mail from the drop down list and click 'Apply'
- 6) On the next screen that appears, enter in a 'Destination Name' (this is the name of the user) and a 'Destination Address' (this is the users e-mail address)
- 7) Click 'Apply' and log out of Admin Mode

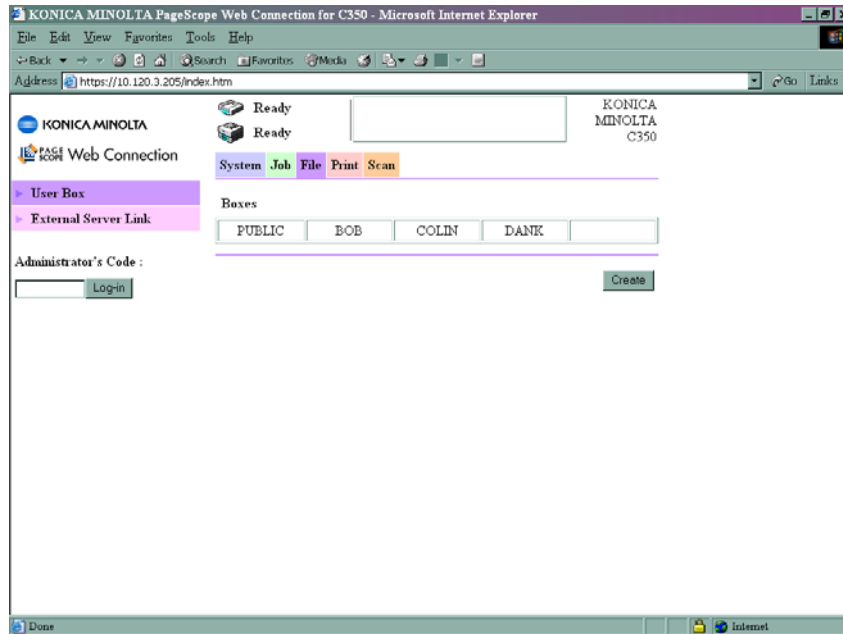

You Speed Dial button is now configured and ready for use.

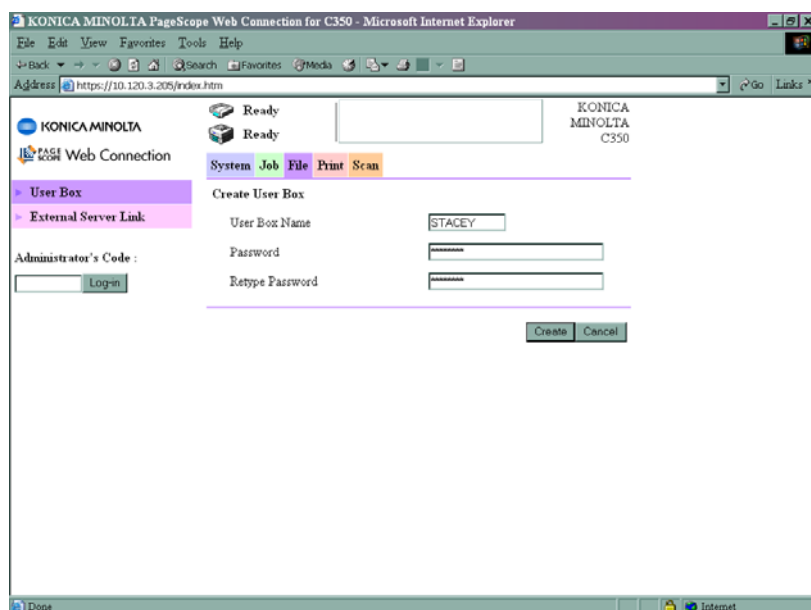

C350 with the Embedded Controller

SCAN TO HDD – remember to permit the Box Function under Utility - Admin Mode - 2/4

- 1) Using Internet Explorer, type the IP address of the Konica Minolta machine into the address bar and press Go
- 2) Click on File at the top of the screen and then Create

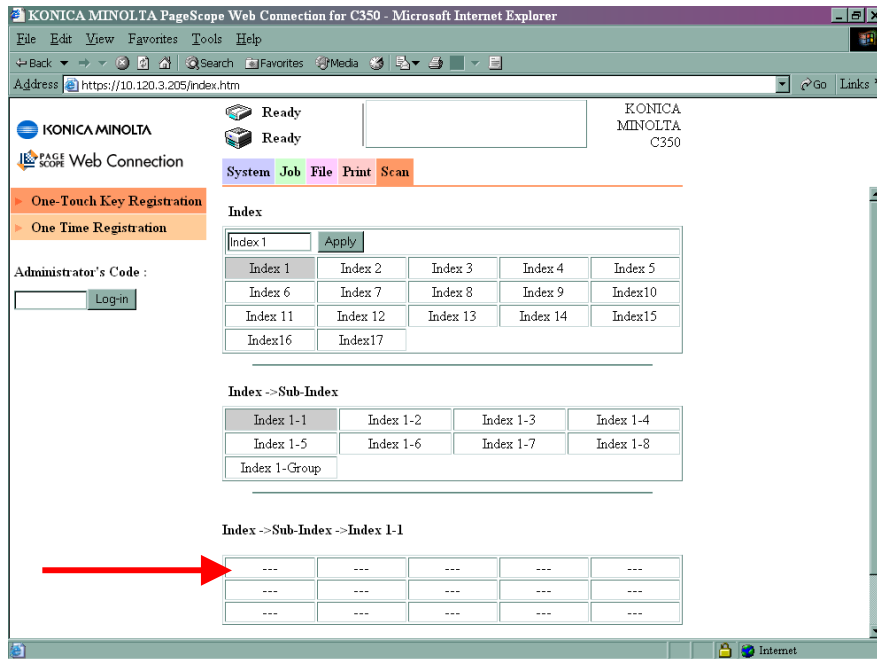

- 3) Enter a User Box Name and Password. Remember that this is case sensitive and the User Box Name must be entered in CAPITAL LETTERS. These will be the details you will use to retrieve your scans through the web interface or the Box Utility.

- 4) Click Create
- 5) Click on Scan at the top of the page
- 6) Click on Index 1

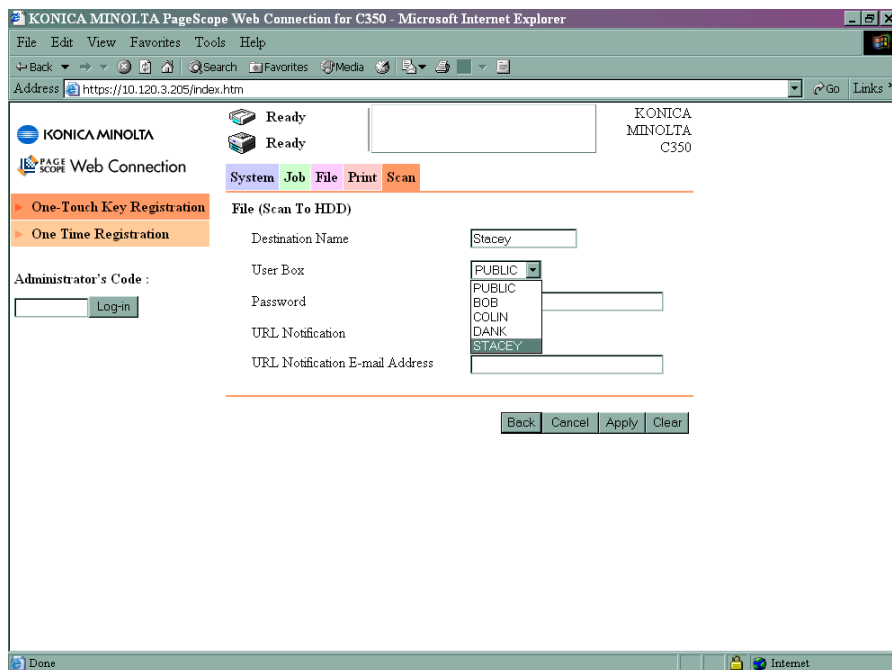

7) Click on the first set of available 3 dots under Index 1, Sub-Index, Index 1-1

(You can rename the Index's by typing a new name into the box and clicking Apply)

8) Choose File (Scan to HDD) and click Next

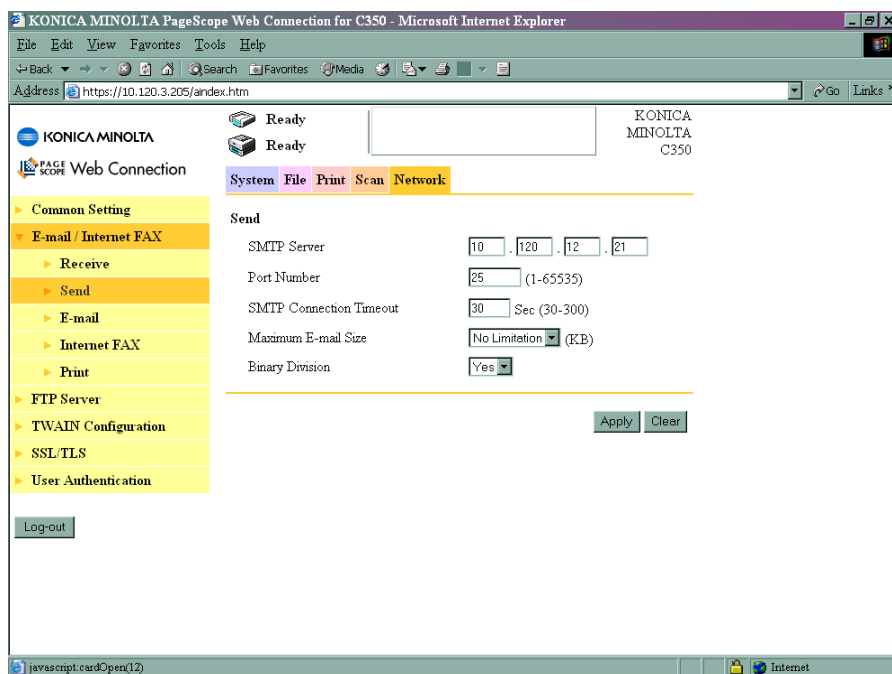

9) Fill in the Destination Name button (this is the name of the button you wish to appear on the machine), the User Box (drop this box down and choose the User Box you created earlier), and give the box a password.

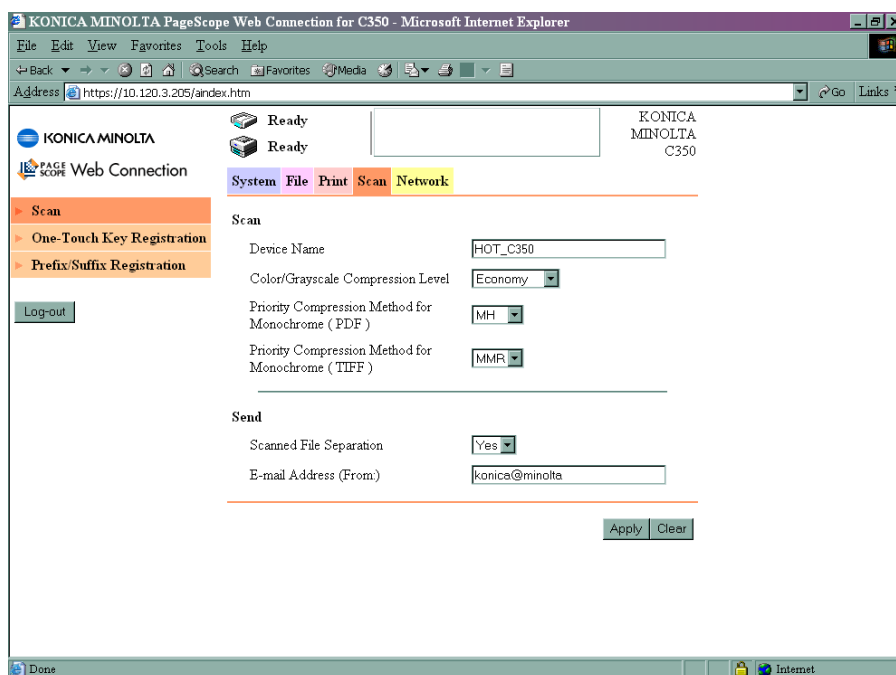

10) Click Apply

SCAN TO E-MAIL

- 1) Using Internet Explorer, type the IP address of the machine into the address bar and press Go
- 2) Log in the Administrator Mode by typing the Administrator's Code of eight zeros in to the Log-in box. Click Log-in with your mouse
- 3) Click on Network at the top and then E-mail/Internet Fax – Send

- 4) Enter the IP address of the SMTP server and click Apply
- 5) Click on Scan at the top of the screen
- 6) Enter a Device Name and E-Mail Address (From). The e-mail address does not have to be a real e-mail address.

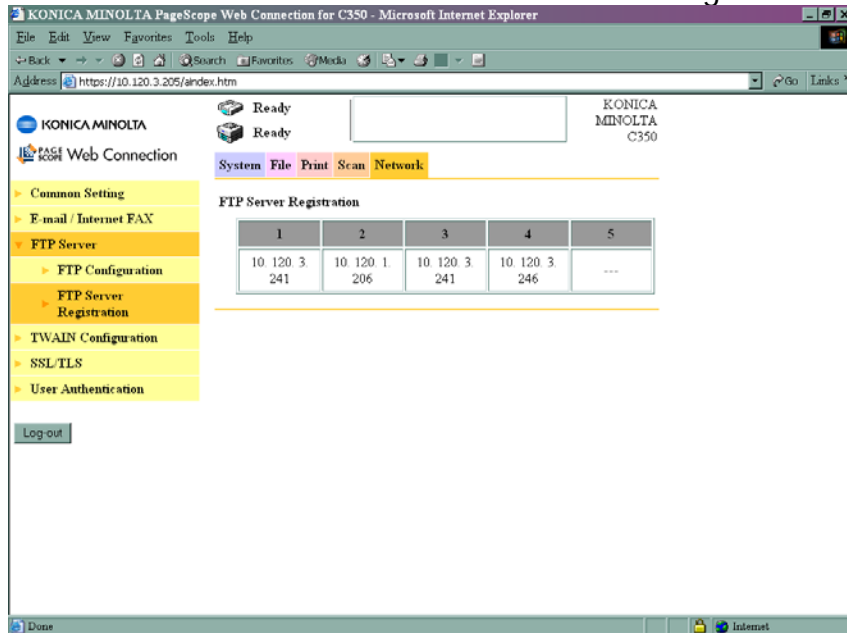

7) Log-out

CREATING A ONE TOUCH BUTTON

- 11) Type the Name of the button that you wish to appear on the machine and the mailbox details they require.

- 12) Click Create

SCAN TO E-MAIL ***PLEASE NOTE*** In order for ANY Fiery print controller to scan to e-mail, an e-mail account needs to be set up on the e-mail server as if the machine were a new employee. These details must then be input into the Fiery as below

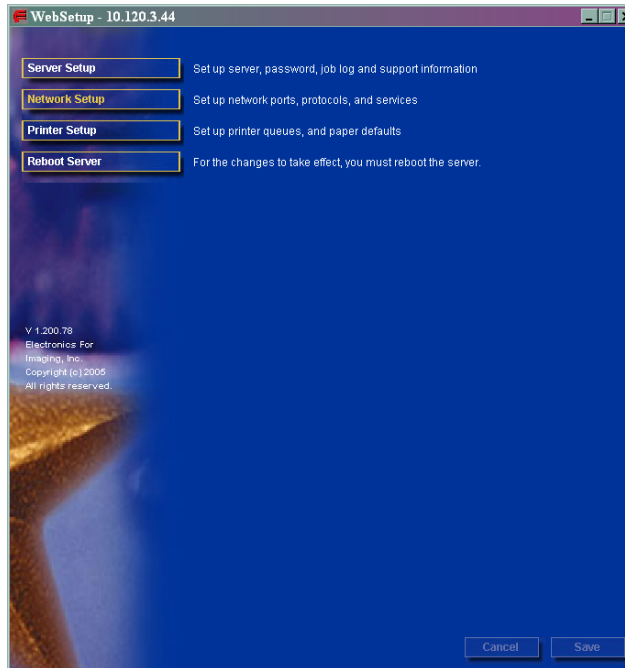

- 1) Using Internet Explorer, type the IP address of the machine into the address bar and press Go
- 2) Click on the Fiery WebTools link

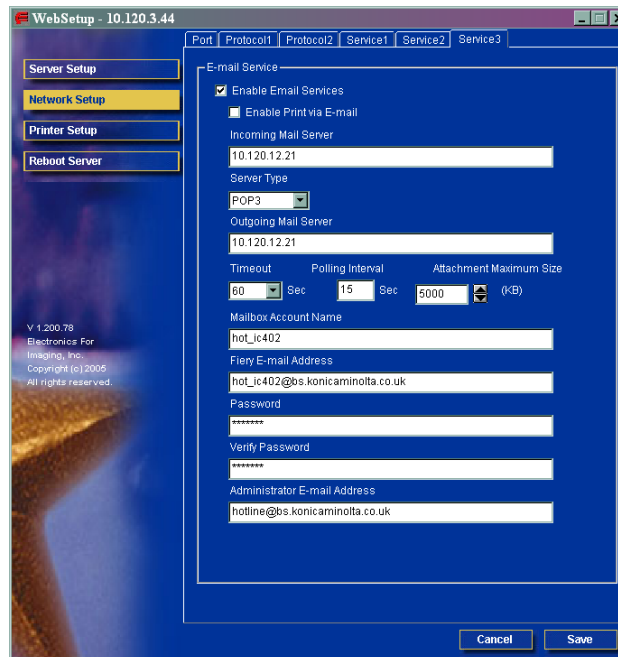

- 3) Login into the Fiery as an Administrator using the password: **Fiery.1**
- 4) Click on Web Setup

5) Click on Network Setup

6) Click on 'Service 3' at the top of the page and enter in the details of the customers e-mail server.

CREATING A ONE TOUCH BUTTON

- 1) Click on SCAN at the top of the screen
- 2) Click on the first set of available 3 dots under one of the Indexes
- 3) Choose the type of button you wish to create. I.E. Scan to E-mail
- 4) Click Next
- 5) Enter in the Name of the button that will appear on the machine and the e-mail address of the user

SCAN TO FTP

For information on configuring either PageScope Cabinet or IIS, please refer to the following pages of the **Konica Minolta FTP & SMB Setup Guide for Windows**.

PageScope Cabinet	-	Page 4
IIS – XP	-	Page 5
IIS – Vista	-	Pages 6
IIS – Server 2008	-	Page 12

- 1) Using Internet Explorer, type the IP address of the Konica Minolta machine into the address bar and press Go
- 2) Click on the SCAN tab at the top
- 3) Under one of the Indexes click on the first set of available 3 dots
- 4) Choose Scan to FTP and click Next
- 5) The Destination Name is as you want the button to appear on the machine
- 6) The Host Address is the IP address of the PC with Pagescope Cabinet installed
- 7) The User Name and Password is what has been set up under either PageScope Cabinet or IIS.

If in Pagescope Cabinet/IIS you have set the FTP Root Folder to the actual folder on the PC where you wish the scans to be placed ("PC Root Folder"), the Directory on the machine only needs to have a / (forward slash) typed into the box. The / means "root folder". If however you want the scans to be placed in a folder which is inside the "PC Root Folder", let's say called Hotline you would need to put /Hotline

The screenshot shows a web browser window titled "http://10.120.3.206/psl/cgi-bin/index.cgi?mode - Microsoft Internet Explorer". The address bar contains "http://10.120.3.206/psl/cgi-bin/index.cgi?mode". The page content includes a navigation bar with "System", "File", "Print", and "Scan" tabs. Below this is a "Scan to FTP Server" configuration form with the following fields:

- Destination Name:
- IP Address: 0 0 0 0
- User Name:
- Password:
- Directory:
- Use Proxy:
- Notification Address:

At the bottom of the form are buttons for "Create", "< Back", "Cancel", and "Clear".

- 8) Click Create

Bizhub C200 lite

SCAN TO E-MAIL

These Settings can only be configured at the Machine.

1. Press “Utility/Counter”
2. Press “Admin”

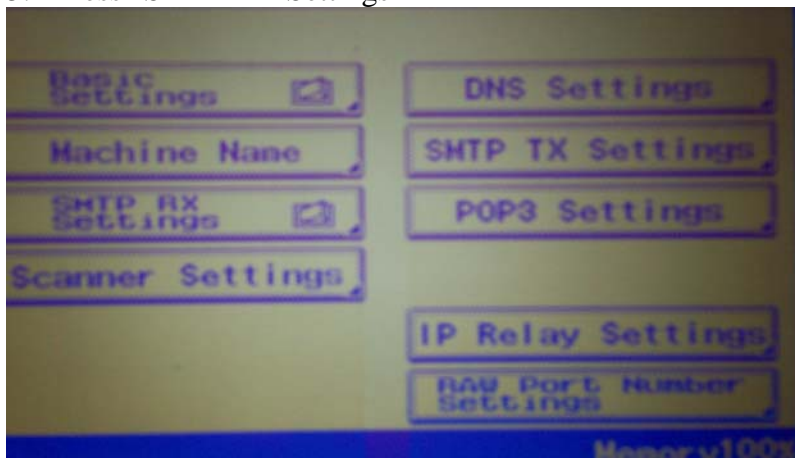

3. Enter Admin Code, Default =12345678

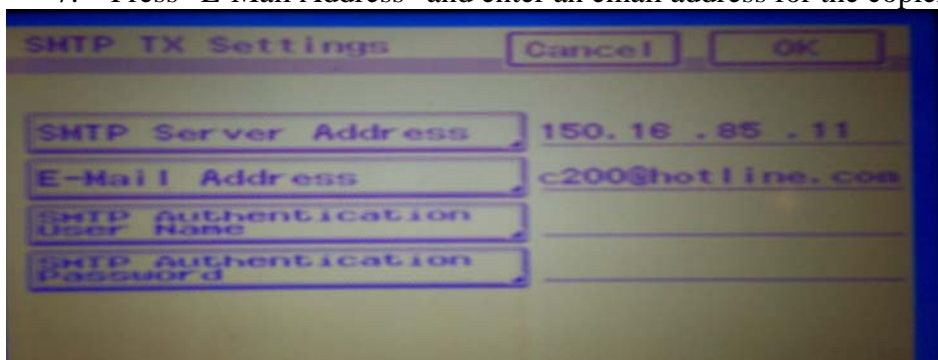

4. Scroll to Screen 2/2 and Press “Network Settings”

5. Press “SMTP TX Settings”

6. Press “SMTP Server Address” enter your email server IP address. Note: if your machine does not show the Screen as below and the Network uses Authentication please contact your Service Centre.
7. Press “E-Mail Address” and enter an email address for the copier

8. Press all buttons marked “OK” and “Close” until back to main screen. Note: You may need to restart the copier from the mains power socket.

Steps 4-6 above will require knowledge of your Network

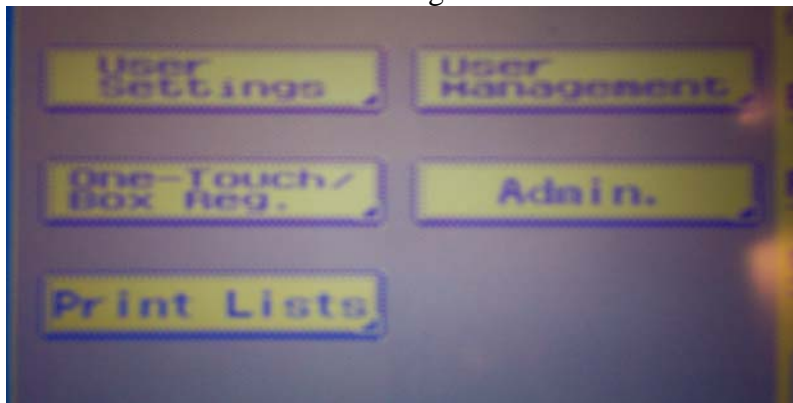

NB: The document(s) must be inserted into the ADF head first (landscape) in order for them to be the correct orientation for the recipient
Document(s) will be sent as PDF format as factory default, and can be changed within the user Settings, please refer to the manual.

Adding E-Mail Addresses via the Copier Panel

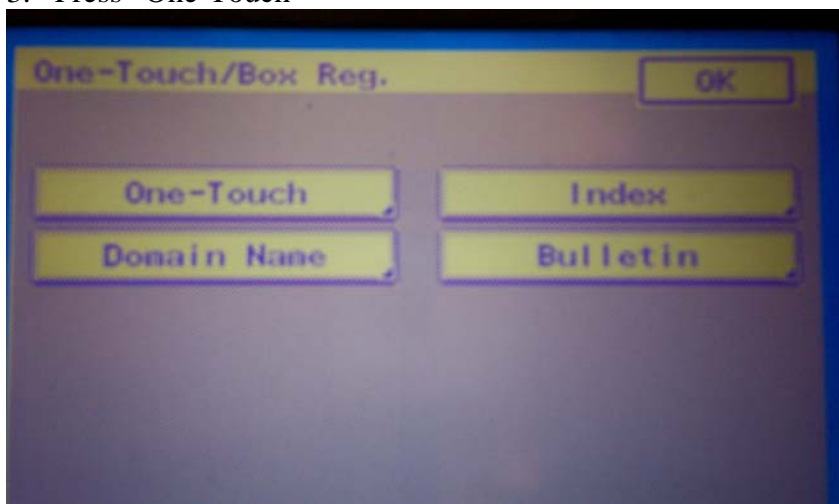

1. Press Utility/Counter

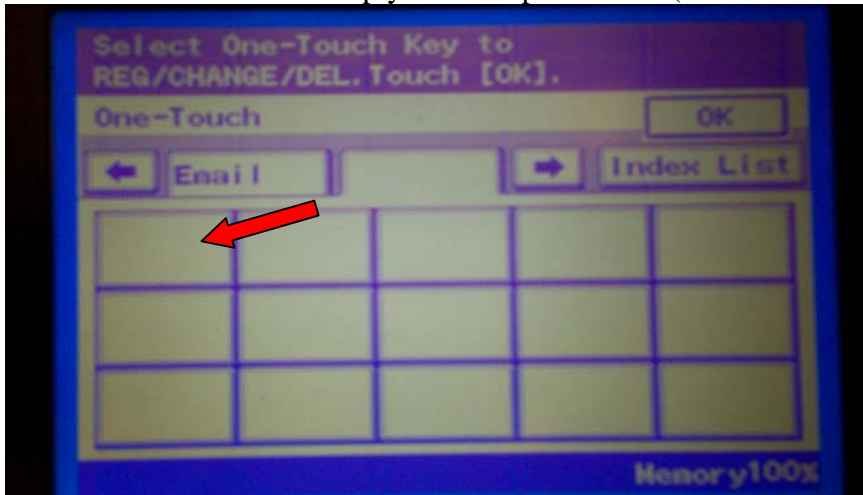

2. Press "One-Touch/Box Reg"

3. Press "One-Touch"

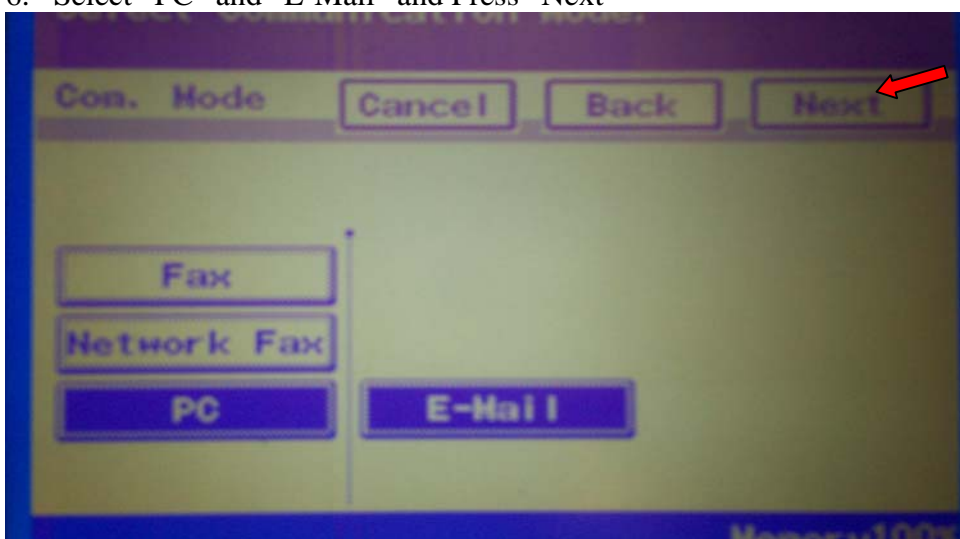

4. Select first available empty box and press “OK”(to rename Tabs refer to manual)

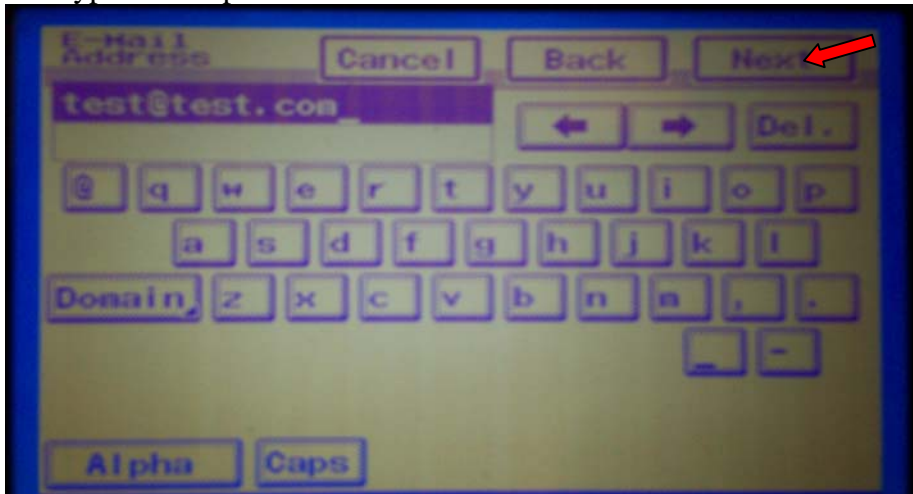

5. Type a name for the button and Press “Next”

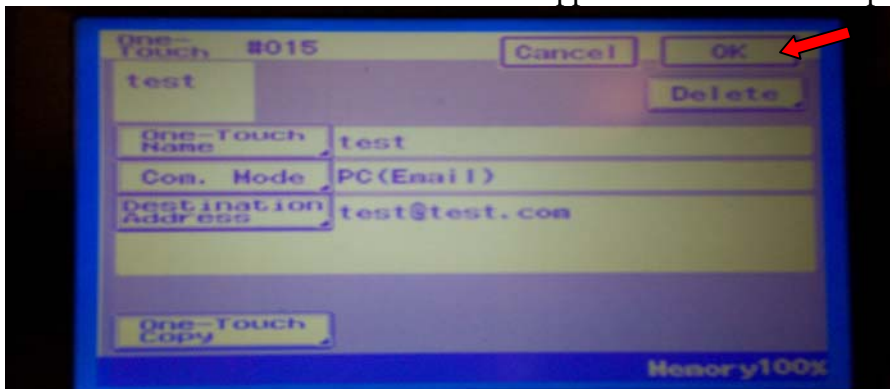

6. Select “PC” and “E-Mail” and Press “Next”

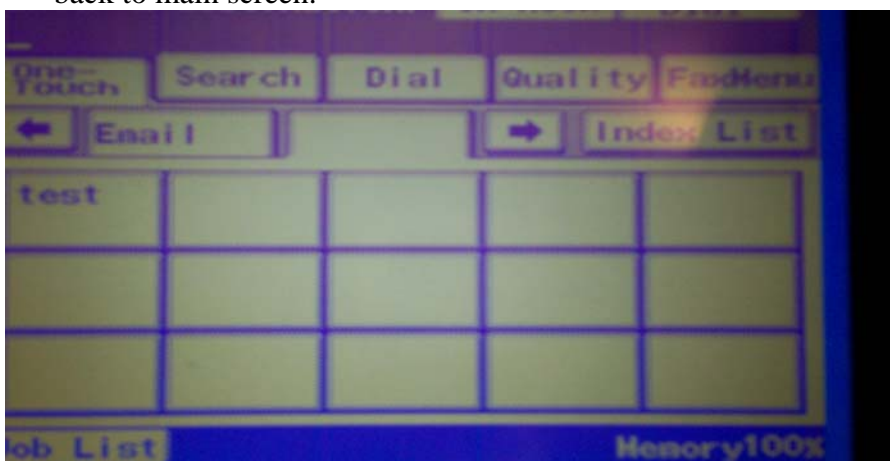

7. Type the recipient's Email address and Press "Next"

8. Confirmation Screen as shown below appears and if all correct press "OK"

9. Screen appears showing newly created one-touch button. Press "OK/Close" until back to main screen.

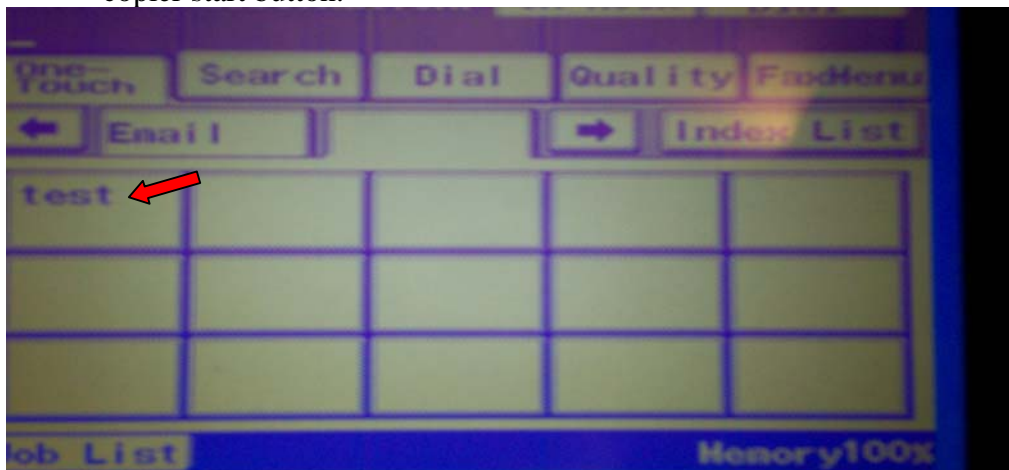

Selecting Address when sending

1. Press "Fax/Scan"

2. Place documents in feeder and press recipient one-touch button then press the copier start button.

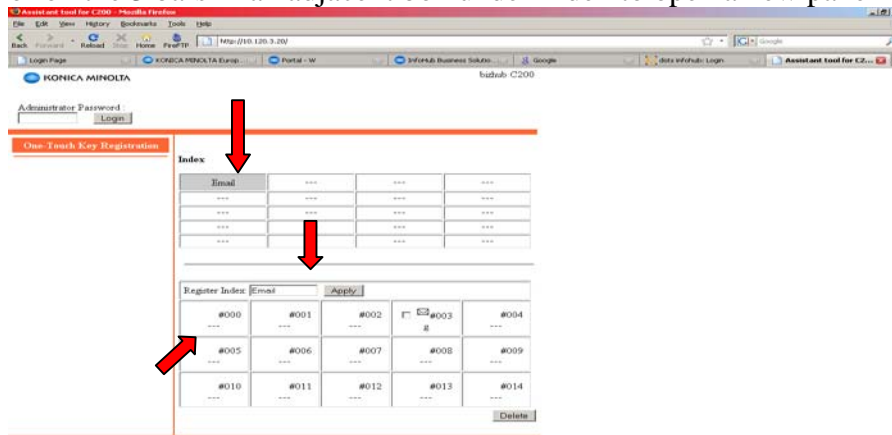

Adding E-mail Addresses via the Web Interface

In your Web Browser Address Bar Type the Copier's Network IP Address;
Eg:10.120.3.20

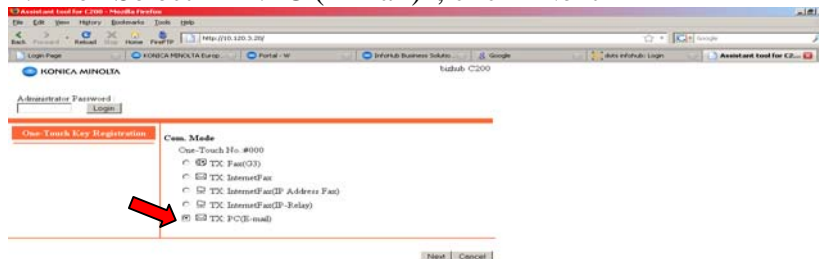

The Copiers Web Interface will then be displayed if your Browser is configure to connect via a proxy server you may have problems connecting in this instance consult your IT dept.

By typing in the “Register Index” Box and clicking “Apply” you can assign meaningful names to the copier address index as shown

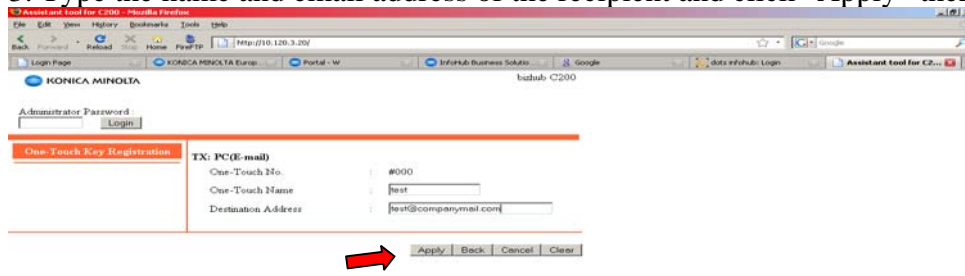

1. Click on any available or existing index (eg:#000) to add new recipient Email Address, or on the 3 bars in an adjacent box under Index to open a new panel

2. Then Select “TX:PC (E-mail)”, click “Next”

3. Type the name and email address of the recipient and click “Apply” then “OK”

The screenshot shows a web browser window displaying the Konica Minolta Administrator tool for C200. The browser's address bar shows the URL "http://10.120.3.201". The page title is "Administrator Tool for C200". Below the browser window, there is a "Login" button. The main content area is titled "One-Touch Key Registration" and contains a form for "TX: PC(E-mail)". The form has three fields: "One-Touch No." with the value "#000", "One-Touch Name" with the value "test", and "Destination Address" with the value "test@companymail.com". Below the form, there are four buttons: "Apply", "Back", "Cancel", and "Clear". A red arrow points to the "Apply" button.

Done

You have now completed the creation of a new Email recipient; repeat the above steps to add more recipients.
