2 Getting Started

We recommend that you:

- Unpack the equipment carefully and save the original box and packaging materials for possible future shipment
- Review the contents of this user manual
- Use Kramer high-performance high-resolution cables

Go to <http://www.kramerelectronics.com> to check for up-to-date user manuals, application programs, and to check if firmware upgrades are available (where appropriate).

2.1 Achieving the Best Performance

To achieve the best performance:

- Use only good quality connection cables (such as the Kramer BC-2S) to avoid interference, deterioration in signal quality due to poor matching, and elevated noise levels (often associated with low quality cables)
- Do not secure the cables in tight bundles or roll the slack into tight coils
- Avoid interference from neighboring electrical appliances that may adversely influence signal quality
- Position your Kramer **SPK-WA511** away from moisture, excessive sunlight and dust

To ensure that you obtain the best sound results, do not open the housing of the passive speaker or the active speaker.

3 Overview

The **SPK-WA511** is a powered two-way speaker system designed for indoor wall mounting. The system accepts a line level stereo input and amplifies it using a built-in amplifier and outputs a speaker signal to the passive speaker.

The **SPK-WA511** speaker system features:

- Three available inputs (that can either be connected separately or connected simultaneously to form a mix of the inputs) that consist of:
 - A Line level unbalanced stereo audio input on a 3.5mm mini jack connector
 - A balanced stereo audio input on a 5-pin terminal block connector
 - An unbalanced stereo audio input on two RCA connectors
- An output to external amplified or non-amplified speakers
- An output to an external sub-woofer
- A unique looping output, letting you chain additional pairs of active and passive speakers
- TREBLE, BASS and VOLUME control knobs
- A control panel on the back of the active speaker that controls all the functions of both speakers
- A magnetic shield
- Enhanced bass reflex design
- An integrated 2x30W stereo amplifier (no external amplifier required)
- A self adjusting power range of 90 to 240V AC
- Auto-power shutoff

The **SPK-WA511** is enclosed in an ABS cabinet and can be mounted indoors on the wall, vertically or horizontally. The mounting brackets are made of hardened steel that attach to each speaker, letting you rotate each speaker to the left or right.

[Figure 1](#) and [Figure 2](#) show examples of how the speakers can be installed in conference room and home theater setups, respectively.

- Install the speaker wires (see [Section 5.2](#))

5.1 Choosing the Best Location

Before installing the speakers:

- Experiment by placing the speakers in different locations before finally deciding on the most suitable location
- Be sure that the wall type is appropriate for the mounting brackets, that is, either solid wood, bricks, concrete, hollow building blocks, or wood studs. You cannot mount the brackets on gypsum walls
- Check that the mounting location is free of obstructions, such as electrical piping, AC ducts or water lines, and so on

5.2 Installing the Speaker Wires

To install the speakers, do the following:

1. Connect the + and - stereo sockets of the active speaker to the + and - stereo sockets of the passive speaker using the cable supplied, as follows:

Passive Speaker (R)

Active Speaker (L)

3. Connect the power.
4. Adjust the volume on the input source.
5. Adjust the volume control on the rear side control panel.
6. Adjust the bass and treble control on the rear side control panel.
7. If required, connect an additional set of speakers by connecting the LOOP OUTPUT connector to the input of a second active speaker.
8. If required, mount the speaker on the wall via the removable mounting brackets. To do so:
 - Mark the location of the mounting holes
 - Screw the mounting screws (not included in the package) into the mounting holes
 - Slide the mounting bracket over the mounting screws so that the mounting bracket is secured to the surface
