• In FM mode, press the **ST/MONO** button to toggle between stereo and mono modes.

  FM stereo broadcasts are typically received in stereo (the "ST" indicator lights in the display). However, if the sound is distorted and the "ST" indicator does not light, the signal is not strong enough for good stereo reception. In that case, change to MONO mode.

Mono

To compensate for weak FM stereo reception, select this mode. Reception is forced to monaural, reducing unwanted noise.
