

Let us  
entertain  
you

The compact DMR 40 digital media receiver lets users revel in a pseudo 5.1-channel surround sound soundstage using just two, compact bookshelf speakers, thanks to Dolby Virtual Speaker technology.

Capable of extracting dynamic music and movie performance from a variety of sources, including DVDs, CDs, MP3, WMA, MPEG-4, DivX Ultra and Xvid, this compact 2.0-channel Dolby Virtual Speaker receiver delivers a healthy 60 watts of power to each speaker. When in stand by, the DMR 40's green credentials are assured by a standby power mode consumption of less than a watt.

DVD users also get the full array of 5.1-channel processing with Dolby Digital as well as video upscaling up to 720p/1080i video resolution, enhancing standard DVD-

quality on modern flat-screens. A HDMI (High Definition Multimedia Interface) output passes digital signals to a TV or projector, while component video and S-video outputs also feed to the TV.

Thanks to Dolby headphone decoding you can even enjoy a movie accompanied by astounding surround sound effects via a pair of headphones.

To partner the DMR 40 (and allow us to do away with the subwoofer) we've come up with a new bookshelf speaker dubbed the S 404. It's a great-sounding 2-way design finished in a high gloss black and constructed from high-grade MDF. It can be wall-mounted (there's a bracket supplied) as well as positioned on a flat surface.
