Introduction

Thank you for ordering the USB 2.0 DOCK. The USB 2.0 DOCK is an intelligent expansion module, which connects to a PC or notebook via Universal Serial Bus (USB) port, providing one high-speed RS-232 serial port, one printer port, one PS/2 keyboard & mouse and 4 downstream USB ports. The USB 2.0 DOCK features easy connectivity for traditional serial devices, keyboards, mice and other USB devices and provides up to 480Mbps USB2.0 High Speed capability. By simply plugging in a USB 2.0 DOCK, you will:

- Add one high-speed serial port, one printer port, one PS/2 keyboard & mouse and 4 downstream USB ports to your PC or notebook in seconds.
- Three USB High Speed downstream ports and one USB Full/Low Speed downstream Port.
- Improve the inconvenience of configuring old PC solutions like card extension solutions, which require adjusting IRQ or jumper settings and the incompatibility of various brands of docking solutions or bus repeaters.
- Avoid the hassle of removing your PC case, or rebooting the operating system during installation.

System Requirements

- A PC with a minimum of a 75MHz Pentium, or equivalent
- A minimum of 16M bytes of RAM.
- One available USB type A downstream port. (UHCI, OHCI, or EHCI)
- Windows 98 or later.

Package Contents

The product you purchased should contain the equipment and accessories shown as follows:

- USB 2.0 DOCK
- One 6' USB AB type cable
- One 2A switching power adapter (optional)
- One USB 2.0 DOCK driver and User's manual CD

Connectors

- One DB-9 RS-232 serial interface connector supports baud rates from 1,200 to 115.2K.
- One DB-25 parallel connector supports IEEE-1284 bi-directional printer port.
- One Mini-din for PS/2 keyboard, mouse.
- Four USB receptacle type A downstream ports.
- One USB type B upstream connector.

Figure 1

USB 2.0 DOCK Functions

The available functions of USB 2.0 DOCK depend on the status of power supplied:

- Bus powered
 - 1. Connect USB cable to PC to provide bus power.
 - 2. When you provide bus power only, the PS/2 mouse & keyboard, RS232 and printer functions will be enabled. However, the USB Downstream Ports can also work under low power mode.

• Externally powered

- 1. Connect power adapter to provide external power.
- 2. When you provide external power, the USB Downstream Ports can support all USB devices, and you can use all the functions of USB 2.0 DOCK.

LED Indicator

• Power Indicator

The Power Indicator will turn **ON** when bus power is supplied.

• USB Indicators

There are four USB indicators to show if the USB Downstream Ports are ready for use.

- 1. If the USB 2.0 DOCK is not ready for use, the USB Indicators will turn **OFF**, and the USB Downstream Ports cannot be used.
- 2. If the USB 2.0 DOCK is ready for use, the USB Indicators will turn **ON**, and you can use all the functions of the USB 2.0 DOCK.
- 3. If over-current happens for certain USB Downstream Ports, the corresponding USB Indicator will turn **OFF** to indicate that this port is not working now.
- 4. When over-current situation is resolved, the USB Indicator will turn **ON** again.

Figure 2

Installing USB 2.0 DOCK

- 1. This installation guide is written in accordance with different operation systems. Including Windows 98/98SE/Me, Windows 2000, and Windows XP.
- 2. Power on your computer and make sure that the USB port is enabled and working properly.
- 3. Connect the power adapter into USB 2.0 DOCK.
- 4. Connect the USB cable into the USB 2.0 DOCK and the USB port of your PC.
- 5. Windows will start detecting USB devices. Please follow the related section to install your USB 2.0 DOCK.

Win98/98SE/Me Driver Installation

The driver installation is divided into 5 steps. For **Win98/98SE** installation should include all 5 steps (A-E). For **Win Me** installation should only need to perform Step B and D.

Please install USB 2.0 DOCK step by step by following the instructions.

Step A: USB Hub Installation (This step for Windows 98 only)

A1. Click "Next" to Continue installing the USB2.0 Hub (Ref Figure A-1)

Figure 4

Set Up the Printer Device

Follow the steps below to connect your printer to the USB 2.0 DOCK with your PC:

For Windows 98/98SE and Me:

- 1. Turn off your printer. Plug in the cable to connect USB 2.0 DOCK parallel port and printer. Turn on the printer afterwards.
- 2. Turn on your computer and plug in the USB cable to connect the USB 2.0 DOCK and the USB port of PC.
- Please click on Start, Settings, Control Panel, double click System, and click on Device Manager. Check which printer port is located by USB to parallel port. The following example is located as LPT2.

Printer Convertor had been removed. Please press Exit to continue.

Please Press **OK** to remove Serial Convertor.

Warning	
⚠	If you want to install new driver, you must re-boot Windows system now. Will you re-boot Windows system immediately?
	<u>Yes</u> <u>N</u> o

System will require to restart to complete the un-installation. Please press **Yes** to continue.

d. For <u>WIN2000/XP</u>:

Please Press OK to remove Serial Convertor.

Warning			
♪	If you want to install new driver, you must re-boot Windows system now. Will you re-boot Windows system immediately?		
	<u>Y</u> es <u>N</u> o		

System will require to restart to complete the un-installation. Please press **Yes** to continue.

APPLICATION NOTE

- 1. USB 2.0 DOCK normally derives its own power from PC Host. When system power plugged in to the USB port of PC or notebook, the Large LED will turn green, and the serial, parallel, keyboard, mouse, and 4 downstream ports can operate without the switching adapter.
- Please note that the 4 downstream ports may not function normally if no external power applied and heavy power consumption USB device connected. An external power will be highly recommended. You may use the external power by connecting an external 5 voltage, 2A DC power that is UL, CE, T-mark or locally approved. For Polarity, see the following:

3. Unknown Device:

If the installation process has been completed and some of the devices still don't work, please go to: My Computer/Property/Device Manager/USB, check COM port, printer, keyboard, mouse or Hub to see if "Unknown device" appears on the screen. You need to "Remove" and "Refresh", and start the installation processes again. After trying the processes mentioned above and your device still cannot work, please contact technical support at your local distributor.

FCC Statement

This device generates and uses radio frequency and may cause interference to radio and television reception if not installed and used properly. This has been tested and found to comply with the limits of a Class B computing device in accordance with the specifications in Part 15 of the FCC Rules. These specifications are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by plugging the device in and out, the user can try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the computer into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
