INFORMATION (For U.S.A.)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

– Reorient or relocate the receiving antenna.
– Increase the separation between the equipment and receiver.
– Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
– Consult the dealer or an experienced radio/TV technician for help.

IMPORTANT FOR LASER PRODUCTS

Precautions:
1. CLASS 1 LASER PRODUCT
2. **DANGER:** Invisible laser radiation when open and interlock failed or defeated. Avoid direct exposure to beam.
3. **CAUTION:** Do not open the top cover. There are no user-serviceable parts inside. Leave all servicing to qualified service personnel.
4. **CAUTION:** This DVD/CD player uses invisible laser radiation, however, is equipped with safety switches to prevent radiation emission when unloading discs. It is dangerous to defeat the safety switches.
5. **CAUTION:** Use of controls, adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

CAUTION: DO NOT insert a disc while the disc loading lamp is flashing or is not lit. (See page 6.)

WARNINGS

- **DO NOT install any unit in locations where;**
  - **it may obstruct the steering wheel and gearshift lever operations, as this may result in a traffic accident.**
  - **it may obstruct the operation of safety devices such as air bags, as this may result in a fatal accident.**
  - **it may obstruct visibility.**
- **DO NOT operate any unit while manipulating the steering wheel, as this may result in a traffic accident.**
- **The driver must not watch the monitor while driving.**
  If the driver watches the monitor while driving, it may lead to carelessness and cause an accident.
- **DO NOT use the headphones while driving. It is dangerous to shut off the outside sounds while driving.**
- **If you need to operate the unit while driving, be sure to look ahead carefully or you may be involved in a traffic accident.**
How to reset your unit

Press the reset button on the front panel using a ball-point pen or a similar tool. This will reset the built-in microcomputer.

NOTE:
If you reset the unit during play, the playback mode selections (e.g. repeat play mode setting), you have selected for the current disc will be reset to the initial settings.
- *During DVD playback, the disc menu selection will be also reset to the initial disc settings.*

2

Thank you for purchasing a JVC product. Please read all instructions carefully before operation, to ensure your complete understanding and to obtain the best possible performance from the unit.

CONTENTS

CAUTION on Volume Setting

Discs produce very little noise compared with other sources. If the volume level is adjusted for the tuner, for example, the speakers may be damaged by the sudden increase in the output level. Therefore, lower the volume before playing a disc and adjust it as required during playback.

BEFORE USE

* For safety....
- *Do not raise the volume level too much, as this will block outside sounds, making driving dangerous.*
- *Stop the car before performing any complicated operations.*

* Temperature inside the car....
If you have parked the car for a long time in hot or cold weather, wait until the temperature in the car becomes normal before operating the unit.

3

◀◀ INTRODUCTION

About this manual

This manual mainly explains operations using the buttons on the remote control. You can also use the buttons on the control panel for the same operations if they have the similar or same marks.

Discs you can play:

Disc Type	Mark (Logo)	Video Format	Region Code Number*
DVD Video	**DVD** VIDEO ™ / **DVD** VIDEO ™	NTSC	1 ALL
Video CD	COMPACT disc DIGITAL VIDEO / Video CD		———
Audio CD	COMPACT disc DIGITAL AUDIO	———	———

- On some discs, their actual operations may be different from what is explained in this manual.
- The following discs cannot be played back;
  – DVD-Audio, DVD-ROM, DVD-RAM, DVD-R, DVD-RW, CD-ROM, CD-R, CD-RW, CD-I (CD-I Ready), Photo CD, etc.
  Playing back these discs will generate noise and damage the speakers.

*** Note on Region Code**
DVD players and DVD Video discs have their own Region Code numbers. This unit only can play back DVD discs whose Region Code numbers include "1."
Examples:

ALL   1   1 2   1 2 3 4

Disc structure – DVD, Video CD (VCD) and Audio CD (CD)

A DVD disc consists of **Titles**, and each title may be divided into some **Chapters**. (See Example 1.) For example, if a DVD disc contains some movies, each movie may have its own title number, and it may be further divided into some chapters.

On the other hand, a VCD or CD consists of **Tracks**. (See Example 2.)
In general, each song has its own track number. (On some discs, each track may also be divided by **Indexes**.)
When playing back a VCD with Playback Control (PBC) function, you can select what to view using the menu shown on the monitor. (While operating a Video CD using the menu, some of the functions such as Repeat and Track Search may not work.)

Example 1: DVD disc

Title 1			Title 2	
Chapter 1	Chapter 2	Chapter 3	Chapter 1	Chapter 2

Example 2 : Video CD/Audio CD

Track 1	Track 2	Track 3	Track 4	Track 5

4

Before using the remote controller:
- Aim the remote controller directly at the remote sensor on the main unit. Make sure there is no obstacle in between.
- The remote signal reception lamp flashes when the unit receives a remote control signal from the remote controller.

Remote signal reception lamp
Remote sensor

- Do not expose the remote sensor to strong light (direct sunlight or artificial lighting).

WARNING:
- *Store the batteries in a place which children cannot reach.*
  If a child accidentally swallows the batteries, immediately consult a doctor.
- *Do not recharge, short, disassemble or heat the batteries or dispose of in a fire.*
  Doing any of these things may cause the batteries to give off heat, crack or start a fire.
- *Do not leave the batteries with other metallic materials.*
  Doing this may cause the batteries to give off heat, crack or start a fire.
- *When throwing away or saving batteries, wrap in tape and insulate; otherwise, it may cause the batteries to give off heat, crack or start a fire.*
- *Do not poke the batteries with tweezers or similar tools.*
  Doing this may cause the batteries to give off heat, crack or start a fire.

Installing the battery

When the controllable range or effectiveness of the remote controller decreases, replace the battery.

1. Remove the battery holder.
  1) Push out the battery holder in the direction indicated by the arrow using a ball-point pen or a similar tool.
 2) Remove the battery holder.

(back side)
2. Place the battery.
Slide the battery into the holder with the + side facing upwards so that the battery is fixed in the holder.

Lithium coin battery (product number: CR2025)
3. Return the battery holder.
Insert again the battery holder pushing it until you hear a clicking sound.

(back side)

5

ENGLISH

The following marks used in this manual indicate the discs to be used.

DVD	**VCD**	**CD**
DVD Video	Video CD	Audio CD

Before performing any operations, make sure the following....
- Check the connection with the TV and with the car receiver.
- Turn on the TV and the receiver.
- Select this unit (auxiliary or external input) as the playback source on the receiver.
- Select the correct input where this unit is connected.
- **For DVD playback, you can change the Setup Menu setting to your preference. (See pages 20 – 28.)**

If " ⊘ "appears on the screen when pressing a button, the disc cannot accept an operation you have tried to do.
Starting playback

DVD VCD CD

1 Press POWER ⏻ to turn on the power.

POWER ⏻

The lamps on the buttons on the unit light up.

2 Press OPEN on the unit.
The loading slot cover opens.

OPEN

Disc loading lamp

DO NOT force the cover open by hand.

3 Insert a disc into the loading slot.
The unit draws in the disc automatically.
- When the power is off, you cannot insert a disc.

DO NOT insert a disc while the disc loading lamp is flashing* or is not lit**.
* Flashing: while loading or ejecting a disc
** Not lit: when a disc has been loaded.

### 4 Close the slot cover by hand.
The disc type is automatically detected and the detected disc lamp (DVD, VCD/CD) lights up, and playback starts automatically.
- It takes a while to detect the disc type.

Disc lamps

If a menu appears while playing a DVD or VCD with PBC function, see "MENU-DRIVEN PLAYBACK" on page 12.

6

To stop playback temporarily

Press **II** (**STEP**). A still picture appears while playing a DVD or VCD.
• You can advance the still picture frame by frame by pressing the button repeatedly. (See page 18.)

To resume playback, press ►.

To stop playback

Press ■.
If you are playing back a DVD or VCD, this unit can memorize the end point ("■" appears for a while on the screen), and when you start playback again, playback begins from where it has been stopped. (Resume play)

To eject a disc

1 Press **OPEN** on the unit to open the slot cover.
2 Press ▲ on the unit (inside the slot cover). The disc automatically comes out of the loading slot.

To locate a particular chapter or track

You can move to another chapter or track while playing a disc.
• Press ►►I to go ahead to the beginning of the next track.
  Each time you press the button consecutively, the beginning of the next tracks is located and played back.

• Press I◄◄ to go back to the beginning of the current track.
  Each time you press the button consecutively, the beginning of the previous tracks is located and played back.

If you press and hold the button, you can fast-forward (by holding ►►I) or fast-reverse the play (by holding I◄◄).

Listening with headphones

1 Connect the headphones to the PHONES jack on the unit.
2 While holding **SHIFT** (**S**), then press **H/P VOL** ▲ or **H/P VOL** ▼ to adjust the headphones volume.

DO NOT use the headphones while driving. It is dangerous to shut off the outside sounds while driving.

About sounds reproduced through the rear terminals
• **Through AUDIO (L/R):**
  Analog stereo signals are output.
  When playing a source encoded with Dolby Digital* ( ) , multichannel signals are mixed to the left and right front channel signals, then output.
 – You cannot reproduce the sound encoded with DTS Digital Surround** ( ).
• **Through DIGITAL OUT:**
  Digital signals (Linear PCM, Dolby Digital, DTS Digital Surround) are output through this terminal. (For more details, see page 35.)
  To reproduce the multichannel sounds such as Dolby Digital and DTS Digital Surround, connect an amplifier or a decoder compatible with these multichannel sources to this terminal, and set "DIGITAL OUT" correctly. (See page 22.)

Menu operations

DVD VCD

Menu-driven playback is possible while playing back a DVD with menu-driven features or a VCD with the PBC function.

While playing a DVD:

DVD discs generally have their own menus or title lists. A Menu usually contains various information about the disc and playback selections. On the other hand, a title list usually contains titles of movies and songs recorded.

1 Press MENU/SETUP or TITLE.
A menu or title list will appear on the screen.
MENU
SETUP or TITLE

2 Select a desired item on the menu or on the title list, using Cursor buttons (▲/▼/►/◄) and ENTER.
The unit starts playback of the selected item.

H/P VOL

◄ ENTER ►

H/P VOL
• On some discs, you can also select items by pressing the **Number** buttons corresponding to the item numbers listed.

To erase the menu or title list

Press **RETURN** ↩ until it goes off from the screen.

- **If " ⊘ "appears on the screen when pressing MENU in step 1,** the disc does not have a menu.
- **If " ⊘ "appears on the screen when pressing TITLE in step 1,** the disc does not have a title list.
While playing a VCD:

The Playback Control function (PBC) allows you to operate the VCD using menus.
When you start playback, a menu will automatically appear on the screen.
• A menu may be a list of items, divided screens, or some moving pictures. (See "PBC operation concept" to the right.)

Select a desired item on the menu.
• When a list of items is displayed on the screen, press the **Number** buttons to select an item.
• When "►" or "SELECT" is displayed on the screen, press ► (or **ENTER** if pressing ► does not work) to start playback.

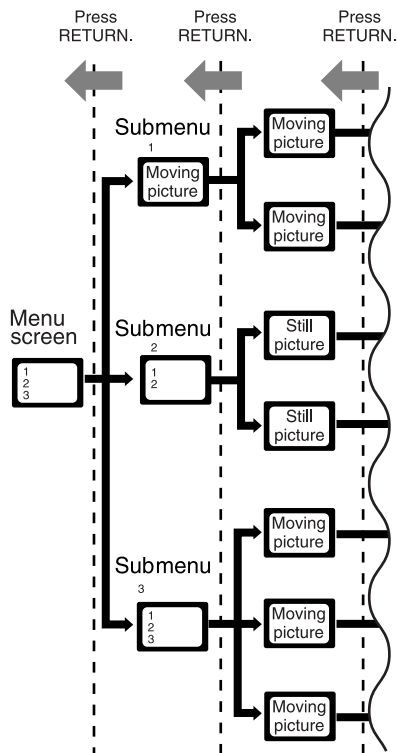

How to select items using the Number buttons
• To select number 5, press **5**, then **ENTER**.
• To select number 10, press **1**, **0**, then **ENTER**.
• To select number 23, press **2**, **3**, then **ENTER**.

① ② ③
④ ⑤ ⑥ ➙ ENTER
⑦ ⑧ ⑨
⓪
• To cancel a mis-entry, press **CLEAR** (**C**). Each time you press the button, the last entry will be erased.

To return to the previous menu

Press **RETURN** ↰.

To cancel the PBC playback

You can cancel the menu-driven operations (PBC function):
1 Press ■ to stop playback.
2 Press the **Number** buttons to select a track, then press **ENTER**.
Normal playback starts from the selected track.
• You can also turn on and off the PBC playback by pressing **MENU/SETUP** repeatedly.

How to input the title, chapter, and track number
Press the **Number** buttons corresponding to the number, then press **ENTER** to start its playback.
• To select number 5, press **5**, then **ENTER**.
• To select number 10, press **1**, **0**, then **ENTER**.
• To select number 23, press **2**, **3**, then **ENTER**.

How to input the playing time
Press the **Number** buttons to input the playing time, then press **ENTER** to start playback at the selected elapsed playing time.
• To input time "00:45:23," press **4**, **5**, **2**, **3**, then **ENTER**.
• To input time "01:23:45," press **1**, **2**, **3**, **4**, **5**, then **ENTER**.

• To cancel a mis-entry, press **CLEAR** (**C**). Each time you press the button, the last entry will be erased.

To erase the on-screen bar, press **DISPLAY** (**D**)/**TIME**.
Playing Repeatedly

DVD VCD CD

Repeat Play
You can repeat a chapter, track, or disc.

To repeat playback, press **REPEAT** (↻)/**A-B RPT** while playing or pausing.

REPEAT

A-B RPT

The on-screen bar appears. Each time you press the button, the repeat mode indication on the on-screen bar changes as follows:

| **When a DVD is playing:**	
Chapter repeat → Title repeat ↓ Repeat OFF	
• Chapter repeat:	Current chapter will be repeated.
• Title repeat:	Current title will be repeated.
• Repeat OFF:	Repeat play is canceled.

* On some DVDs, repeat play may be canceled by the disc itself.

When a VCD is playing:	
Track repeat → Disc repeat ↓ Repeat OFF	
• Track repeat:	Current track will be repeated.
• Disc repeat:	All the tracks in the disc will be repeated.
• Repeat OFF:	Repeat play is canceled.

* While playing back a VCD using the PBC function, Repeat play cannot be used.

Each time you press the button, the picture advances frame by frame.
To resume normal play

Press ▶.

18

Zoom

DVD VCD

You can zoom up a particular portion of the picture while playing a DVD and VCD.
• You can select the start point of zoom and adjust how precisely the zoomed-up portion is moved. (See page 27.)
1 Press ZOOM to zoom in to the picture.

ZOOM

Each time you press the button, the picture is enlarged as follows:

→ 2x Zoom ⟶ 4x Zoom ─┐
└─ Canceled ◄──────────┘

2x Zoom

4x Zoom

Ex.: When 2x Zoom is selected

When playing a VCD
You can only select 2x Zoom.

2 Move the enlarged portion on the screen, using Cursor buttons (▲/▼/ ►/◄).

To cancel Zoom, press **ZOOM** repeatedly until normal size screen appears.

ENGLISH
DVD SETUP MENU

You can store the initial selection for subtitle languages, audio languages (sound), and other settings using the Setup Menu.
• DVD Setup menu can only be displayed while a disc is not playing.

Setting initial audio language

You can select the initial language for audio sound.
However, in the following cases, the original language will be selected as the initial language regardless of your setting.
– If the language you have selected is not recorded on the disc.
– If the disc is programed to be played back in the original language.

To go back to the previous screen during the procedure, press **RETURN** ↰.

1 While holding SHIFT (S), press MENU/SETUP.
Setup Menu appears on the screen. ("LANGUAGES" must be selected – highlighted.)

SHIFT

 CLOSE  CAPTION:      OFF
 COLOR  SCHEME:  YELLOW
 ZOOM  SETUP

 RETURN   SELECT   ENTER OK
```
3 Press ENTER.

Monitor type selecting screen appears.

```
       MONITOR  TYPE
    4:3  LETTERBOX
    4:3  PAN-SCAN
   16:9  WIDE

 RETURN   SELECT   ENTER OK
```

4 Press Cursor ▼ (or ▲) to select a desired setting, then press ENTER.
• **4:3 LETTERBOX**: Select this when viewing on TV whose aspect ratio is 4:3. While viewing a wide screen picture, the black bars appear on the top and the bottom of the screen.
• **4:3 PAN-SCAN**: Select this when viewing on TV whose aspect ratio is 4:3. While viewing a wide screen picture, the black bars do not appear, however, the left and right edge sides of the pictures will not be shown on the screen.
• **16:9 WIDE**: Select this when viewing on TV whose aspect ratio is 16:9.
• **Even if "4:3 PAN-SCAN" is selected,** the screen size may become "4:3 LETTERBOX" while playing some DVDs. This depends on how the DVD is programed and recorded.
• **If a disc (or some portions of the disc) is recorded with the video signals of 4:3 aspect ratio,** this setting does not take effect. The pictures are displayed with full 4:3 aspect ratio or with 4:3 Letter box.

To erase the Setup Menu screen, press **MENU/ SETUP** while holding **SHIFT** (**S**).

Setting closed caption

Some discs have closed captions.
You can set whether you will display the close captions or not.
• **To show the closed captions on the TV, you have to use a TV with a built-in closed-caption decoder, or to connect a closed-caption decoder in between this unit and a TV.**

To go back to the previous screen during the procedure, press **RETURN** ↰.

1 While holding SHIFT (S), press MENU/SETUP.
Setup Menu appears on the screen.

SHIFT

4 Press ENTER again.

Start Point selecting screen appears.

```
ZOOM  START  POINT

        UPPER  LEFT
           CENTER
        LAST  POINT

⏎RETURN    ▼▲SELECT    ENTER OK
```
5 Press Cursor ▼ (or ▲) to select a desired setting, then press ENTER.

You can select the start point of zoom.
- **UPPER LEFT**: When you press ZOOM, the upper left portion of the picture is zoomed up first.
- **CENTER**: When you press ZOOM, the center portion of the picture is zoomed up first.
- **LAST POINT**: When you press ZOOM, the last zoomed-up portion of the picture is zoomed up.

6 Press Cursor ▼ (or ▲) to select "PAN SCALE," then press ENTER.

Pan Scale selecting screen appears.

```
ZOOM  PAN  SCALE

          NORMAL
          ROUGH
          FINE

⏎RETURN    ▼▲SELECT    ENTER OK
```

7 Press Cursor ▼ (or ▲) to select a desired setting, then press ENTER.

You can select the movement amount (speed) of the zoomed-up portion.
- **NORMAL**: Select this to move at normal speed to another portion of the picture.
- **ROUGH**: Select this to move faster to another portion of the picture. (Rough movement)
- **FINE**: Select this to move slower to another portion of the picture. (Fine movement)

To erase the Setup Menu screen, press **MENU/SETUP** while holding **SHIFT** (**S**).

Handling discs

How to handle discs

When removing a disc from its case, press down the center holder of the case and lift the disc out, holding it by the edges.

• Always hold the disc by the edges. Do not touch its recording surface.

When storing a disc into its case, gently insert the disc around the center holder (with the printed surface facing up).

Center holder

• Make sure to store discs into the cases after use.
To keep discs clean

A dirty disc may not play correctly. If a disc does become dirty, wipe it with a soft cloth in a straight line from center to edge.

To play new discs

New discs may have some rough spots around the inner and outer edges. If such a disc is used, this unit may reject the disc. To remove these rough spots, rub the edges with a pencil or ball-point pen, etc.
About mistracking:
Mistracking may result from driving on extremely rough roads. This does not damage the unit and the disc, but will be annoying.
We recommend that you stop disc play while driving on such rough roads.

Moisture condensation

Moisture may condense on the lens inside the unit in the following cases:
• After starting the heater in the car.
• If it becomes very humid inside the car.
Should this occur, the unit may malfunction. In this case, eject the disc and leave the unit turned on for a few hours until the moisture evaporates.

ENGLISH

CAUTIONS:
• *Do not insert 8 cm discs (single discs) into the loading slot. (Such discs cannot be ejected.)*
• *Do not insert any disc of unusual shape — like a heart or flower; otherwise, it will cause a malfunction.*
• *Do not expose discs to direct sunlight or any heat source or place them in a place subject to high temperature and humidity. Do not leave them in a car.*
• *Do not use any solvent (for example, conventional record cleaner, spray, thinner, benzine, etc.) to clean discs.*

4:3 Letterbox Screen

This is one method for displaying a wide screen picture on a conventional sized (4:3) TV. While viewing a wide screen picture, the black bars appear on the top and the bottom of the screen.

4:3 Pan-Scan Screen

This is one method for displaying a wide screen picture on a conventional sized (4:3) TV. While viewing a wide screen picture, the left and right edges of the pictures will not be shown on the screen.
Dolby Digital

This is a digital audio compression technology that was developed by Dolby Laboratories. Dolby Digital encoding method (so-called discrete 5.1 channel digital audio format) records and compresses the left front channel, right front channel, center channel, left rear channel, right rear channel, and LFE channel (total 6 channels, but LFE channel is counted as 0.1 channel, therefore called 5.1 channels) signals digitally. Each channel is completely independent from other channel signals to avoid interference, therefore, you can obtain much better sound quality with stereo and surround effects.
To reproduce these original surround signals, you need to connect an amplifier or a decoder compatible with Dolby Digital.

DTS Digital Surround

Another discrete 5.1 channel digital audio format, available on CD, LD, and DVD software, developed by Digital Theater Systems, Inc. Compared to Dolby Digital, audio compression rate is relatively low. This fact allows DTS Digital Surround format to add breadth and depth to the reproduced sounds. As a result, DTS Digital Surround features natural, solid and clear sound. To reproduce these surround signals, you need to connect an amplifier or a decoder compatible with DTS Digital Surround.

Linear PCM

This is a digital recording format that is used for audio CDs.

Playback Control (VCD)

When a VCD has the PBC (Playback Control) function, you can enjoy menu-driven operations and high-resolution still pictures.

Sampling Frequency, Quantization Bits

When analog signals are converted into digital signals, they are divided into many points and digitized. This dividing method is called "sampling." The sampling frequency indicates how many points one second is divided into – for example, for CD sound, one second is divided into 44100 points since its sampling frequency is 44.1 kHz. On the other hand, the number of quantization bits indicates the volume size used to memorize each divided point.
The larger this number is, the clearer the sound can be reproduced.

Titles and Chapters (DVD)

A DVD is divided into several titles (large divisions), and each title is divided into chapters (smaller divisions).
These divisions are assigned their particular numbers, so that they are easily accessed.

Tracks (VCD, CD)

VCDs and CDs are divided into tracks. Each track has its own number so that it is easily accessed.

TROUBLESHOOTING

What appears to be trouble is not always serious. Check the following points before calling a service center.

Symptoms	Causes	Remedies
• Playback cannot start after inserting a disc.	The disc is inserted upside down.	Insert the disc correctly.
• Sound and picture are sometimes interrupted or distorted.	You are driving on rough roads.	Stop playing a disc while driving on rough roads.
	The disc is scratched.	Change the disc.
	Connections are incorrect.	Check the cords and connections.
• Sound cannot be heard from the speakers.	The volume is turned to the minimum level.	Adjust it to the optimum level.
	Connections are incorrect.	Check the cords and connections.
	You are playing a disc with DTS Digital Surround.	This unit cannot output DTS sound without connecting a decoder compatible with DTS Digital Surround.
• No picture appears on the screen.	The video cord is not connected correctly.	Connect the video cord correctly.
	An incorrect input has been selected on the TV or monitor.	Select a correct input on the TV or monitor.
• The left and right edges of the picture are missing on the screen.	"4:3 PAN-SCAN (PS)" is selected when viewing on a conventional TV (aspect ratio 4:3).	Select "4:3 LETTERBOX (LB)." (See page 25.)
• No subtitle appears on the display though you have selected the initial subtitle language.	————————	Some DVDs are programed to always display no subtitle initially. If this happens, press **SUBTITLE** 💬 after starting play.
• Audio language is different from the one you have selected as the initial audio language.	————————	Some DVDs are programed to always use the original language initially. If this happens, press **AUDIO** 🔊 after starting play.
• Disc can be neither played back nor ejected.	The built-in microcomputer may function incorrectly due to noise, etc.	Turn off the power, then turn it again.
• This unit does not work at all.	The built-in microcomputer may function incorrectly due to noise, etc.	Press the reset button to reset the unit. (See page 2.)

SPECIFICATIONS

AUDIO SECTION

Frequency Response:
DVD, fs=48 kHz:	16 Hz to 22 000 Hz
DVD, fs=96 kHz:	16 Hz to 44 000 Hz
VCD, CD:	16 Hz to 20 000 Hz

Dynamic Range: 93 dB
Signal-to-Noise Ratio: 95 dB
Pickup wave length: 650 nm
Wow and Flutter: Less than measurable limit

Audio output level:
  Analog (AUDIO L/R):   1.5 Vrms
  Digital (DIGITAL OUT):
    Signal wave length: 660 nm
    Output level: –21 dBm to –15 dBm

VIDEO SECTION

Color system: NTSC
Video output (composite): 1 Vp-p/75 Ω

GENERAL

Power Requirement:
  Operating Voltage: DC 14.4 V
                     (11 V to 16 V allowance)
Grounding System: Negative ground
Allowable Operating Temperature:
                     0°C to +40°C
                     (32°F to 104°F)
Dimensions (W x H x D):
  Unit Size:
    178 mm x 50.5 mm x 167 mm
    (7-1/16" x 2" x 6-5/8")
  Installation Size:
    182 mm x 52 mm x 150 mm
    (7-3/16" x 2-1/16" x 5-15/16")
  Panel Size: 188 mm x 58 mm x 13.4 mm
    (7-7/16" x 2-5/16" x 9/16")
Mass: 1.4 kg (3.1 lbs) (excluding accessories)

Design and specifications subject to change without notice.

> If a kit is necessary for your car, consult a telephone directory for the nearest car audio speciality shop.

Output signals through the DIGITAL OUT terminal

They differ depending on the "DIGITAL OUT" setting on the Setup Menu.

DIGITAL OUT / Playback Disc		Output Signals		
		STREAM	**LPCM**	**OFF**
DVD	48 kHz, Linear PCM	48 kHz, Linear PCM	48 kHz, Linear PCM	None
	96 kHz, Linear PCM	48 kHz, Linear PCM	48 kHz, Linear PCM	None
	with **Dolby Digital**	Dolby Digital bitstream	Down mix (2 channels)	None
	with **DTS Digital Surround**	DTS bitstream	None	None
Video CD, Audio CD		44.1 kHz, 16 bit Linear PCM	44.1 kHz, 16 bit Linear PCM	None
Auido CD with DTS		DTS bitstream	DTS bitstream	None
