Warnings, Cautions and Others

Caution — 小 button!

Disconnect the mains plug to shut the power off completely. When installing the apparatus, ensure that the plug is easily accessible

The U/I button in any position does not disconnect the mains line. The power can be remote controlled. • When the unit is on standby, the STANDBY lamp lights red. • When the unit is turned on, the STANDBY lamp goes off.

CAUTION

To reduce the risk of electrical shocks, fire, etc.: 1. Do not remove screws, covers or cabinet. 2. Do not expose this appliance to rain or moisture.

CAUTION:

- Do not block the ventilation openings or holes. (If the ventilation openings or holes are blocked by a newspape
- or cloth, etc., the heat may not be able to get out.) • Do not place any naked flame sources, such as lighted
- candles, on the apparatus. When discarding batteries, environmental problems must be considered and local rules or laws governing the
- disposal of these batteries must be followed strictly. Do not expose this apparatus to rain, moisture, dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the apparatus.

Getting Started

Supplied Accessories

After unpacking, check to be sure that you have all the following items. The number in parentheses indicates the quantity of each piece supplied.

- Remote control (x 1)
- Lithium coin battery CR2025 (x 1) (The battery has been
- FM antenna (x 1)
- AC plug adapter (x 1) (except for Hong Kong and

Do not connect the AC power cord until all other connections have been made.

NOTES

Make sure the antenna conductors do not touch any other terminals,

metallic parts of the System, connecting cords, and the AC power cord. This could cause poor reception.

• If the cords are covered with vinyl, remove the vinyl to expose the tip of the cord by twisting the vinyl.

Caution for mains (AC) line BEFORE PLUGGING IN, check that your mains (AC) line

set to the same voltage as where you are plugging in the

oltage corresponds with the position of the voltage selector switch on the bottom of the unit and, if different, set the voltage selector correctly to preven any damage or risk of fire/electric shock.

CAUTION: DO NOT plug in before setting the voltage selector and all onnection procedures are complete.

IMPORTANT FOR LASER PRODUCTS

. CLASS 1 LASER PRODUCT 2. CAUTION: Do not open the top cover. There are no user serviceable parts inside the System; leave all servicing to

- ualified service personnel. 3. CAUTION: Visible and/or invisible class 1M laser radiation
- when open. Do not view directly with optical instruments.

The model information is located on the bottom.

Precautions

Notes on the power cord

• When you are away on travel or otherwise for an extended period of time, remove the plug from the wall outlet. A small amount of power (5.0 W) is always consumed while the power cord is connected to the wall outlet. • When unplugging the System from the wall outlet, always pull the plug, not the power cord.

• Do not handle the power cord with wet hands. • Disconnect the power cord before cleaning the System or moving the System.

• Do not alter, twist or pull the power cord, or put anything heavy on it, which may cause fire, electric shock, or other accidents. • If the cord is damaged, consult a dealer and have the power cord replaced with a new one.

Avoid moisture, water, dust, and high temperatures

- Do not place the System in moist or dusty places.
- If water gets inside the System, turn off the power and remove the plug from the wall outlet, then consult your dealer. Using the System in this state may cause a fire or electrical shock.
- Do not expose the System to direct sunlight or place it near a heating device.

Notes on installation

• Select a place which is level, dry and neither too hot nor too cold between 5°C and 35°C. • Do not install the System in a place subject to vibrations.

Do not put heavy objects on the System

To prevent malfunction or damage of the System • Do not insert any metallic objects, such as wires, hairpins, coins, etc. into the System.

Do not block the vents.

1

2

- To clean the cabinet • Use a soft cloth. Follow the relevant instructions on the use of chemically-coated cloths.
- Do not use benzene, thinner or other organic solvents and disinfectants. These may cause deformation or discoloring

There are no user-serviceable parts inside. If anything goes wrong, unplug the power cord and consult vour dealer.

Basic and Common Operations (see page 3) Sound adjustments also affect the sound through the

• You can set the clock and daily timer while the Save mode is turned on. While setting the clock or daily timer, the display

Playing Back Discs (see pages 4)

• This System cannot play "packet write" discs.

- MP3 discs are required a longer readout time than regular CDs. (It depends on the complexity of the group/file
- Some MP3 files cannot be played back and will be skipped. This result from their recording processes and conditions. When making MP3 discs, use ISO 9660 Level 1 or Level 2
- This System can play back MP3 files with the extension code <.mp3> (regardless of the letter case—upper/lower). - It is recommended that you make each MP3 file at a sampling rate of 44.1 kHz and at bit rate of 128 kbps. This System cannot play back files made at bit rate of less than
- Playback order of MP3 tracks may be different from the one you have intended while recording. If a folder does not include MP3 tracks, they are ignored.
- This System can recognize up to 511 tracks in a disc. Also, the System can recognize up to 150 tracks per group and up
- to 99 groups in a disc. (for MP3) - If there are any unplayable files in a folder, those files are also counted in the total file number
- Playable files which do not belong to any groups are handled as Group 1.

Connecting a Portable Audio Device (see page 6)

- Playing back a portable audio device: If a component connected to the LINE IN jack is not loud enough, QP Link may not work properly. In such cases, adjust the volume level of the component
- louder so that the System can detect the sound signal properly. Changing from "LINE" to another source while QP Link works will deactivate QP Link temporarily.
- In this case, the following reactivates QP Link: Pressing QP LINK on the remote control
- When no sound signal comes from the LINE IN jack for about 30 seconds after the System is turned off
- If you press ψ/I button to turn the System off or if preset Timer turns the System off while QP Link works, the System deactivates QP Link temporarily.
- In such cases, the following reactivates QP Link: - When no sound signal comes from the LINE IN jack for
- about 30 seconds after the System is turned off When you turn on the power again

Setting the Clock and Daily Timer (see page 5)

- "0:00" will flash on the display until you set the clock. The clock may gain or lose 1 to 2 minutes per month. If this happens, readjust the clock. • When you unplug the AC power cord or if a power failure
- occurs, the clock and the timer will be canceled. You need to set the clock first, then the timer again.
- If you do not specify the preset station correctly while setting a timer, the currently selected station will be played when the timer is activated.
- When the on-time of the daily timer comes, the System sets the volume level gradually to the preset level after about 5 seconds.

Timer Priority:

• If you set the Sleep Timer after Daily Timer starts playing the selected source, Daily Timer is canceled.

Troubleshooting

If you are having a problem with your System, check this list for a possible solution before calling for service.

General

Power does not come on.

Power plug is not inserted securely. Plug in securely. Adjustments or settings are suddenly canceled before

you finish. ➡ There is a time limit. Repeat the procedure again.

Operations are disabled.

The built-in microprocessor may malfunction due to external electrical interference. Unplug the AC power cord and then plug it back in.

Unable to operate the System from the remote control. ➡ The path between the remote control and the remote sensor on the System is blocked.

➡ The batteries are exhausted.

No sound is heard.

➡ Speaker connections are incorrect or loose. → Headphones are connected.

Radio Operations

- Hard to listen to broadcasts because of noise.
- Antennas connections are incorrect or loose ➡ The AM loop antenna is too close to the System
- → The FM antenna is not properly extended and positioned

Disc Operations

The disc does not play.

- → The disc is placed upside down. Place the disc with the label side up. ➡ MP3 disc is recorded with the "packet writing (UDF file)."
- It cannot be played. Check the files you want to play back.
- ID3 Tag on an MP3 disc cannot be shown.
- ➡ There are two types of ID3 Tag—Version 1 and Version 2. This System can only show ID3 Tag Version 1.
- MP3 groups and tracks are not played back as you expect. → The playing order is determined when the disc was
- recorded. It depends on the writing application.

The disc sound is discontinuous. The disc is scratched or dirty.

The disc trav does not open or close.

The AC power cord is not plugged in.

Timer Operations

Daily Timer does not work.

 \rightarrow The System has been turned on when the on-time comes. Timer starts working only when the System is turned off

Maintenance

To get the best performance of the System, keep your discs

- Remove the disc from its case by holding it at the edge while pressing the center hole lightly
- Do not touch the shiny surface of the disc, or bend the disc. Put the disc back in its case after use.
- Be careful not to scratch the surface of the disc when placing it back in its case
- Avoid exposure to direct sunlight, temperature extremes,

Wipe the disc with a soft cloth in a straight line from center to

Cleaning the System • Stains should be wiped off with a soft cloth. If the System is

- heavily stained, wipe it with a cloth soaked in water-diluted neutral detergent and wrung well, then wipe clean with a dry cloth.
- Since the System may deteriorate in quality, become damaged or get its paint peeled off, be careful about the following
- DO NOT wipe it with a hard cloth.
- DO NOT wipe it strong.
- DO NOT wipe it with thinner or benzine. - DO NOT apply any volatile substance such as insecticides
- DO NOT allow any rubber or plastic to remain in contact for a long time.

Specifications Specifications and appearance are subject to change without prior notice.
