A Note to You

Thank you for buying a KENMORE appliance.

Your KENMORE electric range takes on a new value when you discover that Sears has service centers around the country. Trained Sears Service Professionals use fully-equipped trucks and Searsapproved methods for expert repairs backing up all Sears guarantees.

Please record your model's information.

Whenever you call to request service for your appliance, you need to know your complete model number and serial number. You can find this information on the model and serial number plate (see diagram in the "Parts and Features," p. 7).

Please also record the purchase date of your appliance and your store's name and telephone number.

Model Number <u>665.</u>	
Serial Number <u>R</u>	
Purchase Date	

Keep this book and the sales slip together in a safe place for future reference.

Radiant Free-Standing Range Warranty

FULL ONE YEAR WARRANTY ON ALL PARTS

If, within one year from the date of installation, any part fails to function properly due to a defect in material or workmanship, Sears will repair or replace it, at our option, free of charge.

LIMITED WARRANTY ON RADIANT GLASS COOKTOP AND COOKTOP COOKING ELEMENTS

For the second through fifth year from the date of installation, Sears will at our option repair or replace parts with defects as listed below. You pay for labor.

- Cracking of the radiant glass cooktop due to thermal shock
- Wear-off of the pattern on the radiant glass cooktop
- · Cracking of the rubber seal between the radiant glass cooktop and the porcelain edge
- Burn-out of any of the radiant glass cooktop cooking elements

If this product is used for other than private family purposes, the above warranty is effective for only 90 days.

WARRANTY SERVICE IS AVAILABLE BY CONTACTING THE NEAREST SEARS SERVICE CENTER IN THE UNITED STATES.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

To Further Add To The Value Of Your Range, Buy a Sears Maintenance Agreement.

W = Warranty MA = Maintenance Agreement

Your Kenmore appliance is designed, manufactured and tested to provide years of dependable operation. Yet any major appliance may require service from time to time. The Sears Maintenance Agreement offers you an outstanding service program, affordably priced.

The table above shows the additional benefits a Sears Maintenance Agreement provides beyond the Sears Warranty. Contact your Sears Sales Associate or call 1-800-827-6655 to purchase a Sears Maintenance Agreement.

Range Safety

Your safety and the safety of others are very important.

We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages.

This is the safety alert symbol.

This symbol alerts you to potential hazards that can kill or hurt you and others.

All safety messages will follow the safety alert symbol and either the word "DANGER" or "WARNING." These words mean:

ADANGER

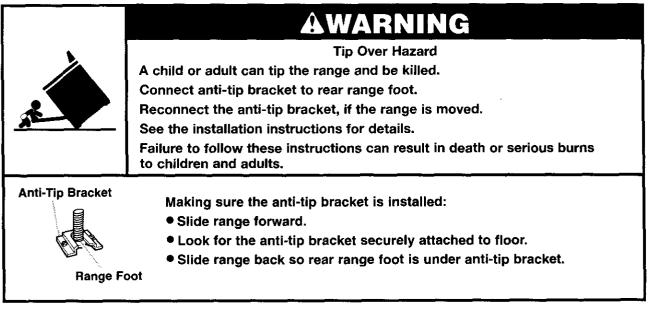

You can be killed or seriously injured if you don't immediately follow instructions.

You can be killed or seriously injured if you don't follow instructions.

All safety messages will tell you what the potential hazard is, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

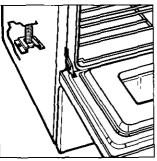

THE ANTI-TIP BRACKET

The range will not tip during normal use. However, the range can tip if you apply too much force or weight to the open door without the anti-tip bracket fastened down properly.

Anti-tip bracket location

The illustration on the right shows the proper placement of the anti-tip floor bracket. To install correctly, see your installation instructions.

IMPORTANT SAFETY INSTRUCTIONS

WARNING: To reduce the risk of fire, electrical shock, injury to persons, or damage when using the range, follow basic precautions, including the following:

- WARNING: To reduce the risk of tipping of the range, the range must be secured by properly installed anti-tip devices. To check if the devices are installed properly, slide range forward, look for anti-tip bracket securely attached to floor, and slide range back so rear range foot is under anti-tip bracket.
- CAUTION: Do not store items of interest to children in cabinets above a range or on the backguard of a range children climbing on the range to reach items could be seriously injured.
- Proper Installation Be sure the range is properly installed and grounded by a qualified technician.
- Never Use the Range for Warming or Heating the Room.
- Do Not Leave Children Alone Children should not be left alone or unattended in area where the range is in use. They should never be allowed to sit or stand on any part of the range.
- Wear Proper Apparel Loose-fitting or hanging garments should never be worn while using the range.
- User Servicing Do not repair or replace any part of the range unless specifically recommended in the manual. All other servicing should be referred to a qualified technician.
- Storage in or on the Range Flammable materials should not be stored in an oven or near surface cooking zones.
- Do Not Use Water on Grease Fires Smother fire or flame or use dry chemical or foam-type extinguisher.
- Use Only Dry Potholders Moist or damp potholders on hot surfaces may result in burns from steam. Do not let potholder touch hot heating elements. Do not use a towel or other bulky cloth.

• DO NOT TOUCH SURFACE COOKING ZONES OR AREAS NEAR THEM – Surface Cooking Zones may be hot even though they are dark in color. Areas near surface cooking zones may become hot enough to cause burns. During and after use, do not touch, or let clothing or other flammable materials contact surface cooking zones or areas near them until they have had sufficient time to cool. Among those areas are the cooktop and surfaces facing the cooktop.

3(6) **20**-3(-) 3

- Use Proper Pan Size The range is equipped with one or more surface cooking zones of different size. Select utensils having flat bottoms large enough to cover the surface cooking zone heating element. The use of undersized utensils will expose a portion of the heating element to direct contact and may result in ignition of clothing. Proper relationship of utensil to burner will also improve efficiency.
- Never Leave Surface Cooking Zones Unattended at High Heat Settings – Boilover causes smoking and greasy spillovers that may ignite.
- Protective Liners Do not use aluminum foil to line oven bottom, except as suggested in the manual. Improper installation of these liners may result in a risk of electric shock, or fire.
- Glazed Cooking Utensils Only certain types of glass, glass/ceramic, ceramic, earthenware, or other glazed utensils are suitable for range-top service without breaking due to the sudden change in temperature.
- Utensii Handles Should Be Turned Inward and Not Extend Over Adjacent Surface Cooking Zones – To reduce the risk of burns, ignition of flammable materials, and spillage due to unintentional contact with the utensil, the handle of a utensil should be positioned so that it is turned inward, and does not extend over adjacent surface cooking zones.

SAVE THESE INSTRUCTIONS

continued on next page

IMPORTANT SAFETY INSTRUCTIONS

- Do Not Cook on Broken Cooktop If cooktop should break, cleaning solutions and spillovers may penetrate the broken cooktop and create a risk of electric shock. Contact a qualified technician immediately.
- Clean Cooktop With Caution If a wet sponge or cloth is used to wipe spills on a hot cooking area, be careful to avoid steam burn. Some cleaners can produce noxious fumes if applied to a hot surface.
- Use Care When Opening Door Let hot air or steam escape before removing or replacing food.
- Do Not Heat Unopened Food Containers Build-up of pressure may cause container to burst and result in injury.
- Keep Oven Vent Ducts Unobstructed.
- Placement of Oven Racks Always place oven racks in desired location while oven is cool. If rack must be moved while oven is hot, do not let potholder contact hot heating element in oven.
- DO NOT TOUCH HEATING ELEMENTS OR INTERIOR SURFACES OF OVEN – Heating elements may be hot even though they are dark in color. Interior surfaces of an oven become hot enough to cause burns. During and after use, do not touch, or let clothing or other flammable materials contact heating elements or interior surfaces of oven until they have had sufficient time to cool. Other surfaces of the appliance may become hot enough to cause burns – among these surfaces are oven vent openings and surfaces near these openings, oven doors, and windows of oven doors.

For self-cleaning ranges -

- Do Not Clean Door Gasket The door gasket is essential for a good seal. Care should be taken not to rub, damage, or move the gasket.
- Do Not Use Oven Cleaners No commercial oven cleaner or oven liner protective coating of any kind should be used in or around any part of the oven.
- Clean Only Parts Listed in Manual.
- Before Self-Cleaning the Oven Remove broiler pan and other utensils.

For units with ventilating hood -

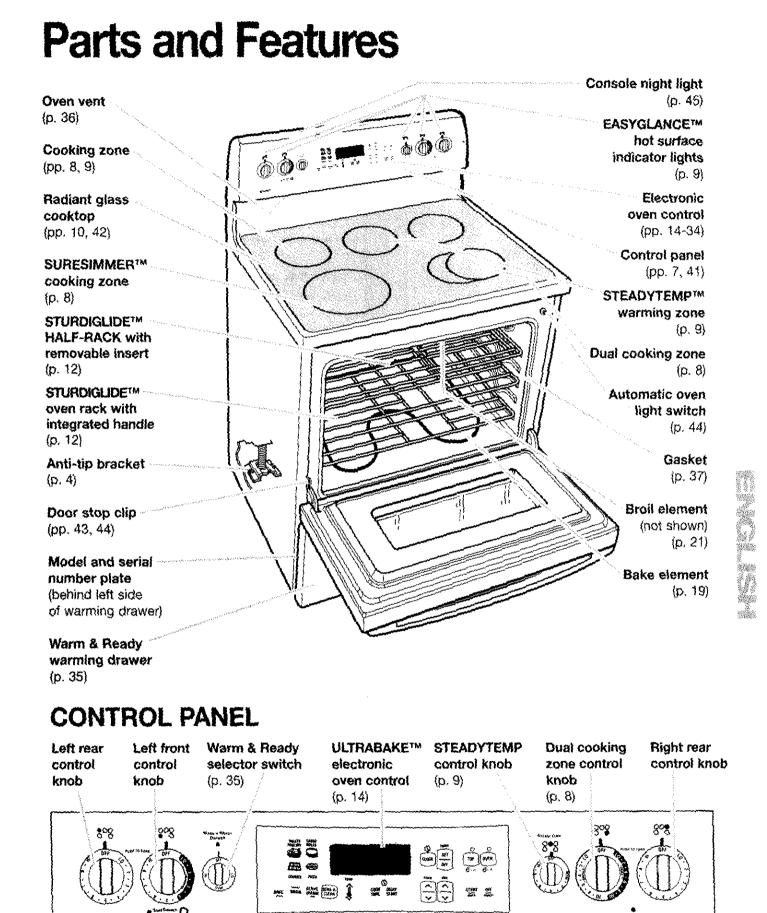

- Clean Ventilating Hoods Frequently Grease should not be allowed to accumulate on hood or filter.
- When flaming foods under the hood, turn the fan on.

SAVE THESE INSTRUCTIONS

The California Safe Drinking Water and Toxic Enforcement Act requires the Governor of California to publish a list of substances known to the State of California to cause cancer, birth defects, or other reproductive harm, and requires businesses to warn of potential exposure to such substances.

WARNING: This product contains a chemical known to the State of California to cause cancer, birth defects, or other reproductive harm.

This appliance can cause low-level exposure to some of the substances listed, including benzene, formaldehyde, carbon monoxide, and toluene.

SURESIMMER SURESIMMER Indicator light button (p. 8) (p. 8)

COOKTOP ON indicator light (p. 9)

Using Your Range USING THE SURFACE COOKING ZONES

Using the control knobs

Push in the control knobs before turning them to a setting. You can set

Surface cooking zone heat settings

RECOMMENDED USE

To start food cooking.

• To hold a boil.

• To bring liquid to a boil.

To maintain a slow boil.

To fry poultry or meat.

To stew or steam food.

• To simmer food.

To keep food warm.

To quickly brown or sear food.

To cook pudding, sauce, or gravy.

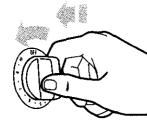

For a low simmer or when using

To melt chocolate or butter.

For a high simmer or when

simmering without lids.

Use the following chart as a guide.

SETTING

HI

6-8

5

2-4

LO

SURESIMMER™

warming zone

(MIN to MAX)

LO

4

them anywhere between HI and OFF.

WARNING

Using the SURESIMMER feature

SURESIMMER is an adjustable control for the left front surface cooking zone which allows for more accurate simmering of foods. The SURESIMMER on/off button does not affect operation of the other surface cooking zones.

To set the SURESIMMER control:

- 1. Push the SURESIMMER button in to turn on. Push in again to turn off. The SURESIMMER light will glow when SURESIMMER is on.
- 2. Turn the left front knob on between the SURESIMMER LO and 4 settings. Adjust the setting according to type and size of cookware, the type and amount of food, and whether cookware lids are on or off. (See "Cookware tips" section on p. 10.) The indicator light will glow.

REMEMBER: When range is in use or during the Self-Cleaning cycle, the entire cooktop area may become hot.

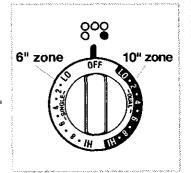

Using the Dual Cooking zone

lids.

STEADYTEMP™ ● To keep cooked foods warm.

The right front element has two cooking zones: 10" cooking zone 6" cooking zone

- To use the 6" cooking zone, push and turn the right front control knob clockwise between LO and HI.
- To use both the 6" and 10" cooking zones, push and turn the right front control knob counterclockwise. between LO and HI.

USING THE SURFACE COOKING ZONES (contd.)

STEADYTEMP

control knob

Using the STEADYTEMP™ warming zone

Use the STEADYTEMP warming zone to keep cooked foods warm. It is not recommended for heating cold foods. Choose the MIN setting for heat-sensitive and smaller quantities of food. Choose the MAX setting for liquids and larger quantities of food. Adjust as needed.

To set the STEADYTEMP warming zone:

- 1. Push in and turn the control knob to the desired setting from **MIN** to **MAX** for different levels of heating.
- 2. Turn the knob to OFF when finished. The STEADYTEMP warming zone will remain warm until the hot surface indicator light on the control panel goes off.
- Cover all foods with a lid or aluminum foil. Do not use plastic wrap to cover food because it may melt onto the cooktop surface. When warming baked goods, allow a small opening in the cover for moisture to escape.
- Use only cookware and dishes recommended for oven and cooktop use.
- Use potholders or oven mitts to remove cookware.
- The STEADYTEMP warming zone will not glow red when it is on, unlike the surface cooking zones. However, the surface indicator light on the control panel will glow.
- Cookware and dishes should have a flat bottom to make direct contact with the cooktop surface.

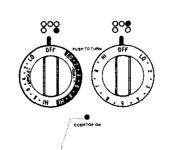

EASYGLANCE™ hot surface indicator lights

The hot surface indicator light above the control knob will glow when the cooking zone controlled by that knob becomes too hot to touch. The indicator light will continue to glow as long as the cooking zone is too hot to touch, even after the surface cooking zone is turned off.

COOKTOP ON indicator light

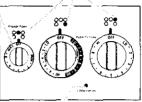

The COOKTOP ON indicator light on the right of the control panel will glow when any surface control knob is turned on.

The indicator light will go off when all control knobs have been turned off, even when one or more cooking zones are still hot.

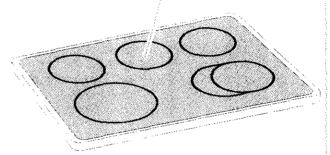

COOKTOP ON indicator light

COOKTOP ON indicator light

STEADYTEMP warming zone

- The STEADYTEMP warming zone may be used whether the other surface cooking zones are in use or not.
- Food quality may deteriorate if it is kept on the STEADYTEMP warming zone for an extended period of time.
- For best results, hold food no longer than 30 to 45 minutes.

800

Hot surface

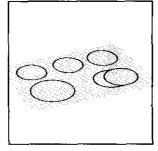

ON

indicator light

USING THE SURFACE COOKING ZONES (contd.)

Using the Radiant Class cooktop

Cooking on the radiant glass cooktop is similar

to cooking on coil elements. There are, however, a few differences:

• The surface cooking zone will glow red when the element is turned on. You will see the element cycling on and off – even on the HI setting – to

prevent the glass from overheating.

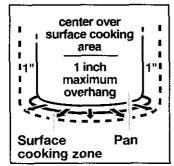

- Do not cook foods directly on the cooktop.
- Sugary or starch spills, boilovers, and some soils can cause pitting. Wipe as soon as the hot surface indicator light goes off. Rinse thoroughly and dry. See "Cleaning the radiant glass cooktop" in the "Caring for Your Range" section, p. 42, for more information.
- Do not cook popcorn that comes in prepackaged aluminum containers on the cooktop. The container could leave aluminum marks on the cooktop that cannot be removed completely.

- Make sure the bottoms of pots and pans are clean and dry before using them. Food and water particles left on the bottoms can leave deposits on the cooktop when it is heated.
- Lift pots and pans onto and off of the cooktop. Sliding pots and pans on the cooktop could leave marks that are difficult to remove or could leave permanent marks.
- Dropping a heavy or hard object on the cooktop could crack it. Be careful when using heavy skillets and large pots. Do not store jars or cans above the cooktop.
- Do not use the cooktop as a cutting board.
- Do not allow anything that could melt, such as plastic salt and pepper shakers, to come in contact with the cooktop while it is hot.
- Wiping off the cooktop before and after each use will help keep the surface free from stains and give you the most even heating. See "Cleaning the radiant glass cooktop" in the "Caring for Your Range" section, p. 42, for care and cleaning suggestions.

Home canning information

To protect your range:

• Use flat-bottomed canners on all types of

cooktops, especially radiant glass. Canners with rippled or ridged bottoms do not allow good contact with the surface.

• Center the canner over the largest surface cooking zone. Do not extend more than one inch outside the surface

cooking zone. Large diameter canners/pans, if not centered correctly, trap heat and can cause damage to the cooktop.

- Do not place your canner on two surface cooking zones at the same time.
- The type of material the canner is made of determines the length of heating time. Refer to the "Characteristics of cookware materials" chart, p. 11.

- When canning for long periods of time, allow surface cooking zones and the surrounding surfaces to cool down.
- Alternate use of the surface cooking zones between batches or prepare small batches at a time.
- Start with hot water, cover with a lid, and bring to a boil; then reduce heat to maintain a boil or required pressure levels in a pressure canner.
- For up-to-date information on canning, contact your local U.S. Government Agricultural Department Extension Office or companies who manufacture home canning products.

USING THE SURFACE COOKING ZONES (contd.)

Cookware tips

- Select a pan that is about the same size as the surface cooking zone. Cookware should not extend more than 1 inch (2.5 cm) outside the zone,
- For best results and greater energy efficiency, use only flat-bottomed cookware that makes good contact with the surface cooking zone. Cookware with rounded, warped, ribbed (such as some porcelain enamelware), or dented bottoms could cause uneven heating and poor cooking results.
- Cookware designed with slightly indented bottoms or small expansion channels can be used.
- Cookware with a non-stick finish has heating characteristics of the base material.

- Check for rough spots on the bottom of metal or glass cookware which will scratch the radiant glass surface.
- Use flat-bottom cookware for best heat conduction from the surface cooking zone to the cookware. Determine flatness with the ruler test. Place the edge of a ruler across the bottom of the cookware. Hold it up to the light. No light should be visible under the ruler. Rotate the ruler in all directions and look for any light.
- **Do not leave** empty cookware, or cookware which has boiled dry, on a hot surface cooking zone. The cookware could overheat, causing damage to the cookware or the surface cooking zone.

CHARACTERISTICS OF COOKWARE MATERIALS

The pan material affects how fast heat transfers from the surface cooking zone through the pan material and how evenly heat spreads over the pan bottom. Choose pans that provide the best cooking results.

Aluminum	 Heats quickly and evenly. Use for all types of cooking. Medium or heavy thickness is best for most cooking. Used as a core or base in cookware to provide even heating.
Cast iron	 Heats slowly and evenly. Good for browning and frying. Maintains heat for slow cooking. Can be coated with porcelain enamel.
Ceramic or ceramic glass	 Heats slowly and unevenly. Use on low to medium settings. Follow manufacturer's instructions.
Copper	 Heats very quickly and evenly. Used as a core or base in cookware to provide even heating.
Earthenware	 Can be used for cooktop cooking if recommended by the manufacturer. Use on low settings.
Porcelain enamel-on-steel or enamel-on-cast iron	See cast iron and stainless steel.
Stainless steel	 Heats quickly but unevenly. A core or base of aluminum or copper on the cookware provides even heating. Can be coated with porcelain enamel.

USING THE OVEN

STURDIGLIDE™ oven rack with integrated handle

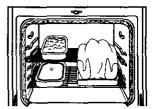

The integrated handle area makes pulling out the STURDIGLIDE rack simple. The opening is large enough for a potholder or oven mitt.

STURDIGLIDE HALF-RACK with removable insert

The STURDIGLIDE™ HALF-RACK with removable insert is a space maximizer. When attached, they make a full rack. The insert can also be used on the counter for a cooling rack.

Position a full rack on guide 1 or 2 and the half-rack on guide 3 or 4. On the full rack place large items on right side and deeper, covered dishes on left side. Place shallow dishes on the half-rack. It may be necessary to increase cooking time. At the end of cooking, carefully remove items from the oven.

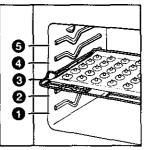

Positioning racks and pans

Place the STURDIGLIDE racks where you need them before turning on the oven.

- To move a rack, pull it out to the stop position, raise the front edge and lift it out.
- Be sure the rack(s) is level.
- Use pot holders or oven mitts to protect your hands if rack(s) must be moved while the oven is hot.
- For best performance, cook on one rack. Place the rack so the top of the food will be centered in the oven.
- When cooking with two racks, arrange the racks on the 2nd and 4th rack guides. Two sheets of cookies may be baked if sheets are switched at approximately three quarters of the total bake time. Increase baking time, if necessary.

• For best results allow 2 inches of space around

each pan and between pans and oven walls. Hot air must circulate around the pans in the oven for even heat to reach all parts of the oven. This results in better baking.

Where to place pans:

WHEN YOU HAVE	PLACE
1 pan	In center of the oven rack.
2 pans	Side by side or slightly staggered.
3 or 4 pans	In opposite corners on each oven rack. Stagger pans so no pan is directly over another.

Rack placement for specific foods:

FOOD	RACK POSITION
Frozen pies, large roasts, turkeys, angel food cakes	1st or 2nd rack guide from bottom
Bundt cakes, most quick breads, yeast breads, casseroles, meats	2nd rack guide from bottom
Cookies, biscuits, muffins, cakes, nonfrozen pies	2nd or 3rd rack guide from bottom

NOTE: For information on where to place your rack when broiling, see "Broiling guidelines," pp. 22, 23.

BAKEWARE CHOICES

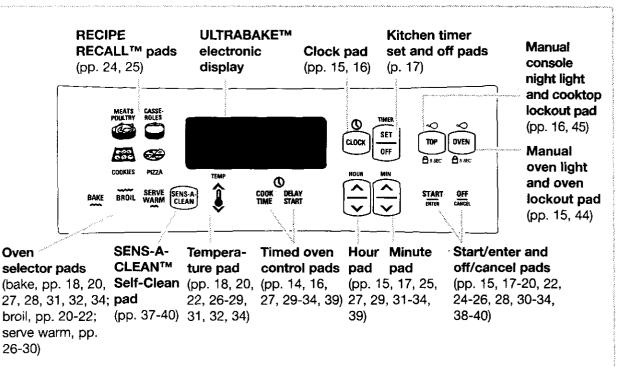

Baking performance is affected by the type of bakeware used. Use the bakeware size recommended in the recipe.

BAKEWARE TYPE	BEST USED FOR	GUIDELINES
Light colored aluminum	 Light golden crusts Even browning 	 Use temperature and time recommended in recipe.
Dark aluminum and other bakeware with dark, dull, and/or non-stick finish	• Brown, crisp crusts	 May reduce baking temperature 25°F. Use suggested baking time. Use temperature and time recommended in recipe for pies, breads, and casseroles. Place rack in center of oven.
Ovenproof glassware, ceramic glass, or ceramic	Brown, crisp crusts	May reduce baking temperature 25°F.
Insulated cookie sheets or baking pans	Little or no bottom browning	 Place in the bottom third of oven. May need to increase baking time.
Stainless steel	 Light, golden crusts Uneven browning 	May need to increase baking time.
Stoneware	Crisp crusts	Follow manufacturer's instructions.

USING ALUMINUM FOIL

- Do not line the oven bottom with any type of foil, liners, or cookware. Permanent damage will occur to the oven bottom finish.
- **Do not cover** the entire rack with aluminum foil. Doing so will reduce air circulation and overall oven performance.
- To catch spillovers from pies or casseroles place foil on the oven rack below. Foil should be turned up at edges and be at least 1 inch larger than dish.
- Place tent-shaped foil loosely over meat or poultry to slow down surface browning for long term roasting. Remove foil for the last 30 minutes.
- Use narrow strips of foil to shield piecrust edges if browning too quickly.

THE ELECTRONIC OVEN CONTROL

Display/clock

- After you install the range according to the installation instructions and connect the power supply, everything on the display will light up for about 5 seconds, then a time of day and "PF" will appear on the temperature display. Press OFF/CANCEL to clear "PF" from the display. If, after you set the clock (see "Setting the clock," p. 15), "PF" again appears on the display, your electricity was off for a while indicating a Power Failure. Reset the clock, if needed.
- When you are not using the oven, the display will show the time of day.
- When you are using the oven or kitchen timer, the display will show times, temperature settings, and what command pads have been pressed.
- You can find out what time the oven turned on or is going to turn on when the display is active by pressing DELAY START.

- When showing the time of day, the display will show the hour and minutes.
- When you are using the kitchen timer, the display will show minutes and seconds in the following sequence:
 - For settings from 1 to 59 minutes, the display will count down each second.
 - For settings one hour or over, the display will count down each minute.
- When you are using COOK TIME and DELAY

START, the display will show hours and minutes or minutes and seconds.

SETTING THE CLOCK

1. Press CLOCK.	PRESS CLOCK	YOU SEE (denotes blinking)
 Set the time. Press the HOUR/MIN (▲) or (▼) pad(s) until the correct time of day shows on the display. 	PRESS HOUR MIN	YOU SEE
3. Press START/ENTER or CLOCK.	PRESS	YOU SEE
NOTE: This is a 12-hour clock and does not show a.m. or p.m.	START OR CLOCK	5:30

USING THE OVEN LOCKOUT

The oven lock lets you prevent use of the control panel command keypads. This feature comes in handy when cleaning the control panel to avoid accidentally turning on the oven.

NOTE: You can only lock the oven when the oven is not in use or the control has not been set. The oven will remain locked after a power failure if it was locked before the power failure.

To lock the oven:

Press and hold the OVEN keypad for 5 seconds.

A 5 SEC

You will hear a single tone and "Loc" and will appear on the display. Three tones will sound when the oven is locked and you press any command pad other than CLOCK, TIMER, START/ENTER,

OFF/CANCEL, TOP or OVEN.

To unlock the oven:

Press and hold the OVEN keypad for 5 seconds.

You will hear a single tone and "Loc" and a will disappear from the temperature display.

USING THE COOKTOP LOCKOUT

The cooktop lock prevents unintended use of the surface cooking zones. When the cooktop is locked, turning the control knobs will not turn on the surface cooking zones.

NOTES:

- Turn off all cooking zones first.
- The cooktop will remain locked after a power failure if it was locked before the power failure.

To lock the cooktop:

Press and hold the TOP keypad for 5 seconds. You

will hear a single tone and "Loc on" will show in the display for 5 seconds. Then will appear on the display.

To unlock the cooktop:

Press and hold the TOP keypad for 5 seconds.

You will hear a single tone and "Loc OFF" will show in the display for 5 seconds Rewill disappear from the display.

TONES

Keypad tones let you know a keypad has been pushed.

To remove keypad tones:

Press and hold the COOK TIME keypad for

COOK TIME 5 seconds. You will hear a short tone and see "Snd OFF" when the keypad tones are turned off.

To bring back keypad tones:

Press and hold the COOK TIME keypad for

COOK TIME 5 seconds. You will hear a short tone and see "Snd on" when the keypad tones are turned on.

Repeater tones are four 1-second tones which remind you that the set time has expired for a kitchen timer or a timed oven control function.

To remove repeater tones:

Press and hold the SET keypad for 5 seconds. You TIMER will hear a short tone and see "rEP OFF"

SET when the repeater tones are turned off.

To bring back repeater tones:

Press and hold the SET keypad for 5 seconds. You TIMER will hear a short tone and see "rEP on"

will hear a short tone and see "rEP on" when the repeater tones are turned on.

Error tones indicate a problem with the electronic oven control. An error code will appear in the display. See "Display Messages" in the "Troubleshooting" section, p. 47.

Volume can be adjusted between high and low.

To adjust:

Press and hold the DELAY START keypad for

DELAY 5 seconds. You will hear a short tone and

START see either "Snd HI" or "Snd Lo". Press

and hold the DELAY START keypad again for 5 seconds to change to desired setting.

NOTE: You can remove "Snd on", "Snd OFF", "rEP on", "rEP OFF", "Snd HI" or "Snd Lo" and bring

back the time of day by pressing any key.

USING THE 12-HOUR SHUT-OFF

The oven control is set to automatically shut the oven off 12 hours after the oven turns on. This will not interfere with any timed or delayed cook function.

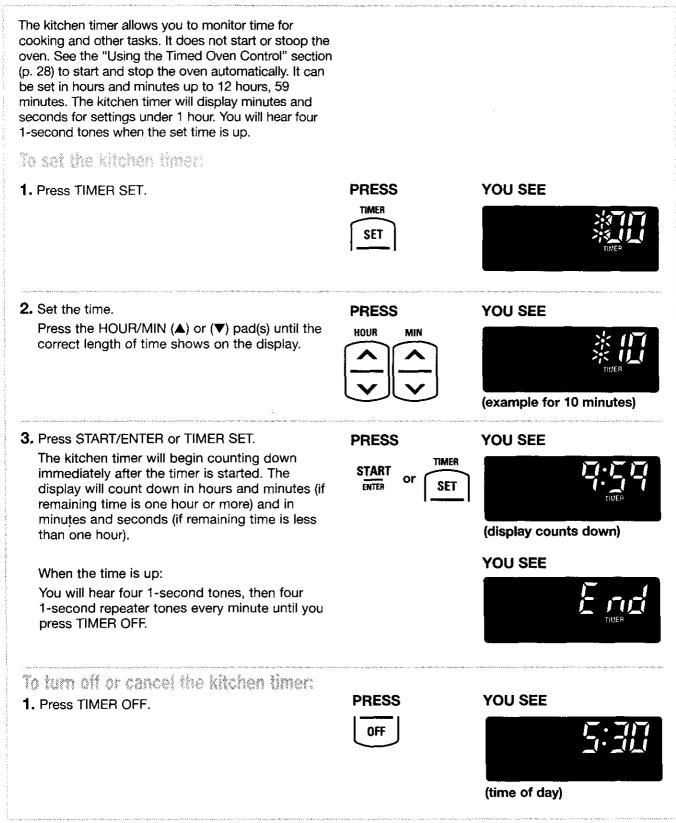

To override the 12-hour shut-off:

For longer cooking periods and for religious observances that require oven usage longer than 12 hours, press and hold the CLOCK keypad for 5 seconds. You will hear a tone and see "12H OFF" when the feature is off. The oven will remain on until turned off by the user. **NOTE:** The oven light will come on when the oven door is opened. To keep the light on continuously, turn the light on by pressing the OVEN keypad. See instructions, p. 44.

To reset the 12-hour shut-off:

Press and hold the CLOCK keypad for 5 seconds. You will hear a tone and see "12H on" when the feature is on. The oven will automatically turn off after 12 hours.

USING THE ELECTRONIC KITCHEN TIMER

STARTING/CANCELING A FUNCTION

After setting a function, you must press START/ START ENTER to start the function. If you do not press START/ENTER within 5 seconds of setting, "START?" will show on the display as a reminder. If you do not press START/ENTER within 5 minutes of setting, the time of day will appear. You must reset the function and press START/ENTER.

OFF/CANCEL will cancel any function except the

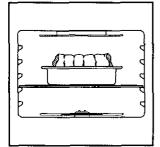

OFF CANCEL Clock, Timer, or Oven or Cooktop Lockouts. When you press OFF/CANCEL, the display will show the time of day or, if the minute timer is also being used, the time remaining.

ULTRABAKE™ BAKING/ROASTING

Your oven is designed with the ULTRABAKE **IMPORTANT:** Never place food or cookware enhanced baking system to constantly monitor directly on the oven door or the oven bottom. oven temperature. The bake and broil elements will cycle, as needed, to maintain the desired temperature. This feature is automatically activated when the oven is in operation. 1. Place the STURDIGLIDE[™] rack(s) where you need them in the oven. For more information, see the "Positioning racks and pans" section, p. 12. 2. Press BAKE. PRESS YOU SEE BAKE **3.** Set the temperature (optional). PRESS YOU SEE Do this step if you want to set a temperature TEMP other than 350°F. Press TEMP (▲) or (▼) pad(s) to raise or lower the temperature in 5°F amounts. Use these pads until the desired temperature BAKE shows on the small display. (example for bake at 375°F)

ULTRABAKE™ BAKING/ROASTING (contd.)

4. When roasting, preheating the oven is not

necessary unless your recipe recommends it. **NOTE:** The oven will heat normally even though "PrE HEAt" is displayed and then maintain the selected cooking temperature.

Reasting meats and poultry

- For even cooking, place the meat on a rack in a shallow pan. This keeps the meat out of the drippings and allows the heat to circulate better.
- Use a meat thermometer for the most accurate doneness. Insert it so the tip is in the center of the largest muscle or thickest portion of the meat or poultry. Make sure the thermometer is not touching bone, fat, or the bottom of the pan.

YOU SEE

YOU SEE

of 350°F)

ON

(example for set temperature

BAKF

5. Press START/ENTER.

A preheat mode is entered after the oven temperature has been set and START has been pressed. Once the preheat conditioning ends, the selected oven temperature replaces "PrE HEAt" on the display. You will hear a 1-second tone, indicating the oven is ready to use.

The ULTRABAKE[™] system electronically regulates the preheat time and temperature to maintain a precise temperature range for the best cooking results.

NOTES:

- You can change the temperature setting any time after pressing START/ENTER. You do not have to press START/ENTER again.
- While the oven is in the preheat mode, you can see the set temperature for 5 seconds by pressing BAKE.

the preheat conditioning ends. During baking/ roasting, the elements will turn on and off to keep the oven temperature at the setting.

NOTE: The top element helps heat during baking/roasting, but does not turn red.

Saving energy

PRESS

START

ENTER

- To avoid loss of heat, open the oven door as little as possible.
- Use the timer to keep track of cooking time.
- Plan your meals for the most efficient use of the oven by cooking more than one food at a time, or baking while the oven is still hot after cooking a meal.

7. After cooking, turn off the oven.

PRESS

(time of day)

READJUSTING THE OVEN TEMPERATURE CONTROL (OPTIONAL)

Although your new oven is properly adjusted to provide accurate temperatures, it may cook faster or slower than your old oven.

If you are not satisfied with the baking/roasting results, you can change the temperature calibration by following the steps below. **NOTE:** DO NOT measure the oven temperature with a thermometer. Opening the oven door will lower the oven temperature and give you an incorrect reading. Also, the thermometer temperature reading will change as your oven cycles.

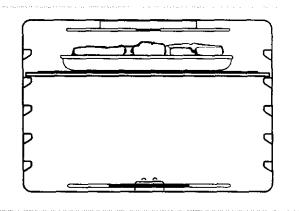

Press a	nd hold BROIL for 5 seconds. You will hear a
	short tone and the temperatures displayed will
BROIL	switch to °C. To switch back to °F, repeat the
i se dita	instructions above. Whenever you switch, "°C"
or "°F"	will be displayed until another key is pressed.

USING YOUR RANGE

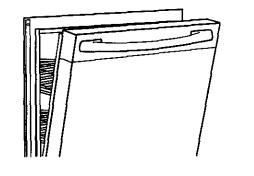

BROILING

For best results, do not preheat when broiling, unless your recipe recommends it.

- Place the STURDIGLIDE[™] rack so that the surface of the food is at least 3 inches away from the broil element. See "Broiling guidelines," pp. 22, 23.
- 2. Put your food on the broiler pan and place the pan in the center of the oven rack.

 Close the door to the broil stop position.
 The broil stop position lets the door stay open by itself about 5 inches and ensures proper broiling temperatures.

4. Press BROIL. PRESS YOU SEE BROIL BROIL

USING SERVE WARM

Serve Warm allows you to schedule your cooking time and makes home-cooked dinners possible even if you are always on the go. This feature, activated by the SERVE WARM key on the console, controls warming in the oven. You can use this feature to hold hot cooked foods near serving temperature. Use the feature by itself or add it to the end of a timed cook.

AWARNING

Food Poisoning Hazard

Do not let food sit in oven more than one hour before or after cooking.

Doing so can result in food poisoning or sickness.

1. Place the STURDIGLIDE[™] rack(s) where you need them in the oven. For more information see "Positioning racks and pans" on p. 12.

If the oven is still warm from use, put your hot cooked food in the oven now. If oven has not been used to cook the food, allow the oven to preheat for 5 minutes, then place hot cooked food in the oven.

IMPORTA	NT:
---------	-----

- Food must be at serving temperature before placing it in the warmed oven.
- Food may be held for up to one hour. To maintain food quality, hold no longer than 30-45 minutes.

 Place the STURDIGLIDE[™] rack(s) where you need them in the oven. For more information see "Positioning racks and pans" on p. 12.

USING THE TIMED OVEN CONTROL

AWARNING

Food Poisoning Hazard

Do not let food sit in oven more than one hour before or after cooking.

Doing so can result in food poisoning or sickness.

The Timed Oven control will turn the oven on at a set time of day, cook for a set length of time, then shut off automatically when programmed. You can do this by setting the COOK TIME and DELAY START.

Before using the Timed Oven control, make sure the clock is set to the correct time of day. (See "Setting the clock," p. 15.)

- To Start now and Stop automatically: Set COOK TIME
- To Delay Start and Stop automatically:

Set COOK TIME and DELAY START

NOTE: Delayed time cooking is ideal for foods that do not need a preheated oven, like meats and casseroles. Do not use a delayed time function when baking.

 To start now and stop automatically: To use this function, it is necessary to program the COOK TIME. 1. Place the STURDIGLIDE™ rack(s) where you need them and put your food in the oven. To place your racks correctly, see "Positioning racks and pans" section, p. 12. 		
2. Press BAKE.	PRESS BAKE	YOU SEE
 3. Set the temperature (optional). Do this step if you want to set a temperature other than 350°F. Press TEMP (▲) or (▼) pad(s) to raise or lower the temperature in 5°F amounts. Use these pads until the desired temperature shows on the small display. 	PRESS TEMP	YOU SEE
4. Press COOK TIME	PRESS COOK TIME	YOU SEE F BAKE COOK TIME
 Set the cook time. Press the HOUR/MIN (▲) or (▼) pad(s) until the correct cook time shows on the display. 	PRESS HOUR MIN	YOU SEE
 6. Press START/ENTER. NOTES: You can change the temperature or time settings any time after pressing START/ENTER by repeating Steps 3 or 5. You do not have to press START/ENTER again. The display will count down the baking/ roasting time in hours and minutes (if cook time is more than 1 hour) or in minutes and seconds (if cook time is less than 1 hour). 	PRESS START ENTER	YOU SEE FF CON HEAT HEAT HEAT TIMED COOK TIME COOK TIME COOK TIME

USING THE WARM & READY WARMING DRAWER

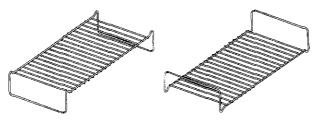

AWARNING

Food Poisoning Hazard

Do not let food sit for more than one hour before or after cooking.

Doing so can result in food poisoning or sickness.

The Warm & Ready warming drawer is ideal for keeping hot cooked foods at serving temperature and raising/proofing bread. It may also be used for warming breads and pastries. This feature, activated by the WARM & READY knob on the control panel, controls warming in the warming drawer, which is located below the oven. The rack can be used in two positions.

- For best results, hold most foods no longer than one hour. Hold smaller quantities and heat sensitive foods, such as eggs, no longer than 30 minutes.
- Food must be at serving temperature before being placed in the drawer.
- Different types of food can be placed in the warming drawer at the same time.
- Breads, pastries, and fruit pies may be warmed from room temperature on HI setting.
- Remove food from plastic bags and place in an oven-safe container.
- Cover foods with a lid or aluminum foil, not plastic wrap.
- Use only containers approved for oven use and follow manufacturer's instructions.
- Empty serving dishes and dinner plates can be heated while preheating the drawer.
- The LO setting can be used to raise bread dough. Covering should be acceptable for oven use. Raising time will be reduced by about half, so check often to make sure the dough does not rise too high in the pan.

To use:

1. If using rack, position it where needed.

- **2.** Turn the WARM & READY switch to choose HI, MED or LO settings.
- **3.** Allow the drawer to preheat for ten minutes.
- 4. Place container with food in warming drawer.
- 5. When finished, turn knob to OFF.

Choosing the right temperature

Food should be hot before being placed in the warming drawer. All foods should be covered except those marked with an asterisk (*).

USING THE WARM & READY WARMING DRAWER (contd.)

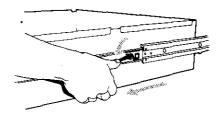

To remove the warming drawer:

Remove all items from inside the warming drawer and allow the unit to cool completely before attempting to remove the drawer.

- 1. Pull drawer to its full open position.
- 2. Locate the black triangle tabs on each side of the drawer.

3. Press the tab DOWN on the RIGHT side and lift the tab UP on the LEFT side at the same time. Then pull drawer out another inch.

4. Carefully pull the drawer all the way out holding on to the sides, not the drawer front.

THE OVEN VENT

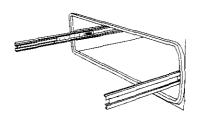

Hot air and moisture escape from the oven through a vent on the backguard below the control panel. The vent lets air circulate properly. Be careful not to block the vent, or you will get poor baking/roasting results.

NOTE: Never store plastics, paper, or other items that could melt or burn near the oven vent, or any of the surface cooking zones.

Oven vent

To replace the warming drawer:

1. Align the drawer glides with the receiving guides.

- 2. Push drawer in completely.
- **3.** Gently open and close drawer to ensure it is seated properly on the slides.

Using the SENS-A-CLEAN™ Self-Cleaning Cycle

AWARNING

Burn Hazard

Do not touch the oven during the Self-Cleaning cycle. Keep children away from oven during Self-Cleaning cycle. Do not use commercial oven cleaners in your oven. Failure to follow these instructions can result in burns, or illness from inhaling dangerous fumes.

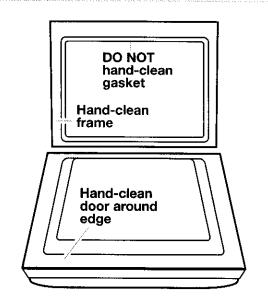

BEFORE YOU START

NOTES:

- Heat and odors are normal during the Self-Cleaning cycle. Keep the kitchen well ventilated by opening a window or by turning on a vent hood or other kitchen vent during the cycle.
- DO NOT clean, move, or bend the gasket. You may get poor cleaning, baking, and roasting.
- The oven light will not work during the Self-Cleaning cycle.
- The console night light will not work during the Self-Cleaning cycle.

Before you start the Self-Cleaning cycle, make sure you:

- Hand-clean the areas shown. They do not get hot enough during the Self-Cleaning cycle for soil to burn away. Use hot water and detergent or a soapy, steel-wool pad for cleaning.
- Do not let water, cleaner, etc., enter slots on door and frame.
- Remove the broiler pan and grid and any cookware/bakeware being stored in the oven.
- Wipe out any loose soil or grease. This will help reduce smoke during the Self-Cleaning cycle.
- Wipe up food spills containing sugar and/or milk as soon as possible after the oven cools down. When sugar is heated to a high temperature in the Self-Cleaning cycle, the high temperature can cause the sugar to burn and react with the porcelain. This can cause staining and etching or pitting.
- Remove the oven racks from the oven if you want them to remain shiny. You can clean the oven racks in the Self-Cleaning cycle, but they will become harder to slide. (See the "Cleaning chart" in the "Caring for Your Range" section, p. 41.) If you clean the racks in the Self-Cleaning cycle, place them on the 2nd and 4th rack guides. (The guides are counted from bottom to top.)

IMPORTANT: The health of some birds is extremely sensitive to the fumes given off during the Self-Cleaning cycle. Exposure to the fumes may result in death to certain birds. Always move birds to another closed and well ventilated room.

TIPS:

- Keep the kitchen well ventilated during the Self-Cleaning cycle to help get rid of heat, odors, and smoke.
- Clean the oven before it gets heavily soiled. Cleaning a very soiled oven takes longer and results in more smoke than usual.
- Do not block the vent during the Self-Cleaning cycle. Air must move freely for best cleaning results.
- Do not leave plastic utensils on the cooktop. They may melt.
- Do not leave any foil in the oven during the Self-Cleaning cycle. Foil could burn or melt and damage the oven surface.

HOW THE CYCLE WORKS

The SENS-A-CLEAN™ Self-Cleaning cycle uses temperatures much hotter than normal oven use to break up and burn away soil and grease. The oven is equipped with a sensor that evaluates by-products released from burning off baked-on food and cleans accordingly. There is no guessing on how long to set the time because all steps are taken care of by the "one-touch" button. The oven will automatically shut off once it senses it is clean. As another option, the soil level can be manually set to light, average or heavy soil levels.

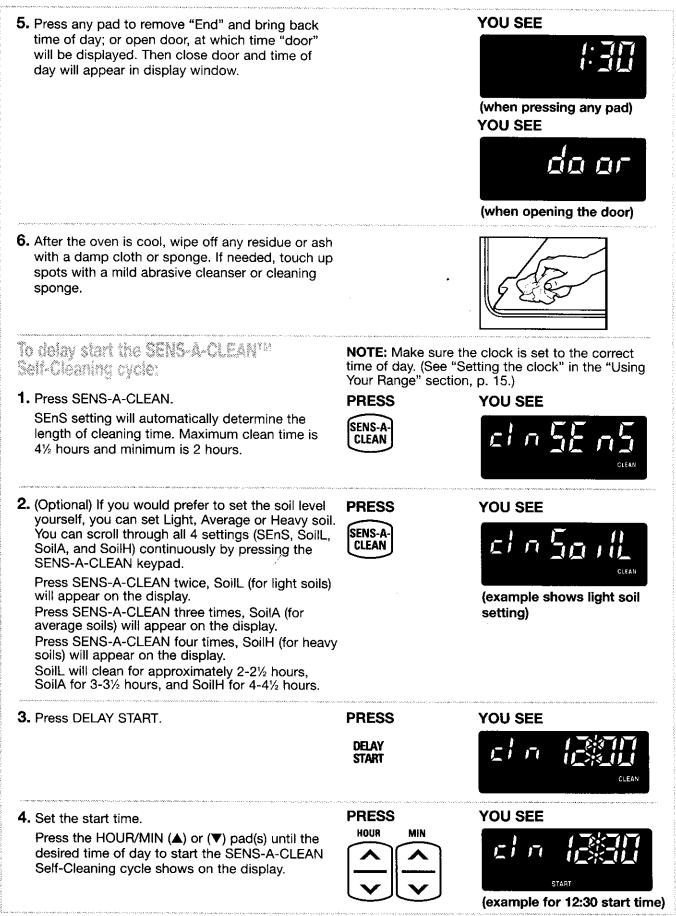

The door must be closed completely for it to lock and the cycle to begin. If properly closed, the door will lock approximately 6 seconds after START/ENTER is pressed. The cycle time includes an approximate 30 minute cool down time. To see the time of day during the cycle, press CLOCK for 5 seconds.

NOTE: The first Self-Cleaning cycle will be approximately 4 hours in duration. This is to allow the high temperature calibration of the sensor and to burn off manufacturing residues.

SETTING THE CONTROLS To start SENS-A-CLEAN Self-Cleaning Immediately: 1. Press SENS-A-CLEAN. PRESS YOU SEE SEnS setting will automatically determine the SENS-A cinsp length of cleaning time. Maximum clean time is CLEAN 4½ hours and minimum is 2 hours. **2.** (Optional) If you would prefer to set the soil level PRESS YOU SEE yourself, you can set Light, Average or Heavy soil. SENS-A You can scroll through all 4 settings (SEnS, SoilL, CLEAN SoilA, and SoilH) continuously by pressing the SENS-A-CLEAN keypad. CLEAP Press SENS-A-CLEAN twice, SoilL (for light soils) will appear on the display. (example shows light soil Press SENS-A-CLEAN three times, SoilA (for setting) average soils) will appear on the display. Press SENS-A-CLEAN four times, SoilH (for heavy soils) will appear on the display. SoilL will clean for approximately 2-2½ hours, SoilA for 3-3½ hours, and SoilH for 4-4½ hours. YOU SEE 3. Press START/ENTER. PRESS START ENTER LOCKED 4. After the SENS-A-CLEAN Self-Cleaning cycle ends: YOU SEE LOCKED goes off and the door unlocks.

USING THE SENS-A-CLEANTM SELF-CLEANING CYCLE

SETTING THE CONTROLS

continued on next page 39

SETTING THE CONTROLS (contd.) PRESS YOU SEE 5. Press START/ENTER. START The door will lock as soon as you press ENTER START/ENTER. ON DELAY YOU SEE 6. Once Delay Start time has been reached, the oven begins the SENS-A-CLEAN™ Self-Cleaning cycle. (example shows sensor setting) 7. After the SENS-A-CLEAN Self-Cleaning cycle ends: **YOU SEE** LOCKED goes off and the door unlocks. YOU SEE 8. Press any pad to remove "End" and bring back time of day; or open door, at which time "door" will be displayed. Then close door and time of day will appear in display window. (when pressing any pad) YOU SEE da ar (when opening the door) 9. After the oven cools to room temperature, wipe off any residue or ash with a damp cloth or sponge. If needed, touch up spots with a mild abrasive cleanser or cleaning sponge. To stop the SENS-A-CLEAN Self-Cleaning cycle at any time: Press OFF/CANCEL. PRESS YOU SEE OFF ビロリ CANCEL 20 LOCKED If the oven temperature is too high for you to immediately open the door when you press OFF/CANCEL, "cln," ON, "cool," and LOCKED will appear on the display until the oven cools; then "End" will appear and the door will unlock.

40

Caring for Your Range

AWARNING

Explosion Hazard

Do not store flammable materials such as gasoline near this appliance. Doing so can result in death, explosion, or fire.

CLEANING CHART

Before cleaning, always make sure all controls are off and the range is cool. Refer to instructions on all cleaning products before using them to clean your range.

PART	CLEANING METHOD	SPECIAL INSTRUCTIONS
Control knobs	 Soap and water Dishwasher 	 DO NOT use steel wool or abrasive cleaners. Pull knobs straight away from control panel. Wash, rinse and dry with soft cloth.
Control panel and console night light lens	 Soap and water Spray glass cleaner 	 Wash, rinse and dry with soft cloth. Apply spray cleaner to paper towel, do not spray directly on panel.
Exterior surfaces* (excluding radiant glass cooktop, control panel and oven door glass)	 Soap and water Mild liquid cleaner Spray glass cleaner 	 DO NOT use abrasive or harsh cleaners like chlorine bleach, ammonia or oven cleaners. Wash, rinse and dry with soft cloth.
	 Non-abrasive plastic scrubbing pad 	 Gently clean around the model and serial plate; too much scrubbing could remove the numbers.
Radiant glass cooktop		 See the "Cleaning the Radiant Glass cooktop" section, p. 42.
Oven door glass	 Soap and water Non-abrasive plastic scrubbing pad Spray glass cleaner 	 Wash, rinse and dry with soft cloth. Wipe with paper towel.
 Oven cavity Food spills containing sugar and/or milk 	Soap and water	 When oven cools, wash, rinse and dry with soft cloth or sponge.
 All other spills 	Self-cleaning cycle	 See the "Using the SENS-A-CLEAN Self-Cleaning Cycle" section, p. 37.
Oven racks	 Soap and water Steel wool pad 	Wash, rinse and dry.
	 Self-cleaning cycle 	 Place on 2nd and 4th rack guides. Racks will discolor and become harder to slide. After cleaning, apply vegetable oil to rack guides for easier sliding.

*When the cooktop is cool, remove all spills and clean. Food spills containing acids, such as vinegar and tomato, may affect the finish.

	 Solution of 1/2 cup ammonia to 1 gallon water Mild abrasive cleanser or commercial oven cleaner 	 Soak for 20 minutes, then scrub with plastic scrubbing pad. DO NOT clean the pan and grid in the self-cleaning cycle.
Warming drawer cavity		
		When drawer cools, wash, rinse and dry with soft cloth.
 All other spills 	Mild detergent	 Wash, rinse and dry with soft cloth.

CLEANING THE RADIANT GLASS COOKTOP

Your cooktop is designed for easy care. It has been prepolished at the factory for improved protection and easier cleaning. Foods spilled directly on the cooktop will not burn off as on open-coil elements. Because of this, you should keep the surface dust free and soil free before heating. Use the Cook Top Cleaning Creme®, included with your range, to clean and maintain the cooktop.

NOTE: DO NOT use steel wool, plastic cleaning pads, abrasive powdered cleansers, chlorine bleach, rust remover, ammonia, or glass cleaners with ammonia. They may damage the cooktop surface.

TYPE OF SOIL	WHAT TO USE	HOW TO CLEAN
Light to moderate soil	Paper towelClean, damp sponge	Wipe as soon as Hot Surface Indicator Light goes off. Rinse thoroughly and dry.
Heavy soil, dark streaks, specks, and discoloration	Cook Top Cleaning Creme Non-abrasive cleanser	Rub into soil using damp paper towel. Rinse and dry.
Burned-on soils	Cook Top Cleaning Creme Razor scraper in a holder	Rub creme into soil using paper towel. Reapply creme to remaining spots. Hold razor scraper as flat to surface as possible, scrape spots. Polish entire cooktop with creme and paper towel. Rinse and dry. Store razor blades out of reach of children.
Sugary spills (jellies, candy syrups)	Paper towelClean, damp sponge	Wipe while radiant glass surface is warm. Rinse thoroughly and dry.
Metal marks from copper, aluminum pans	Cook Top Cleaning Creme	Before heating cooktop again, rub into area using damp paper towel. Rinse and dry.
Tiny scratches or abrasions	Cook Top Cleaning Creme	To prevent scratches and abrasions, use the Cook Top Cleaning Creme regularly. Scratches and abrasions do not affect cooking performance. After many cleanings, they will become less visible.

NOTE: Always wipe your cooktop with clean water and dry it well after using the cleanser to prevent streaking or staining.

You can purchase additional Cook Top Cleaning Creme at your Sears Retail Stores in the range department. Ask for stock no. 22-40079 or call Sears Service Parts at 1-800-366-7278 and give the following information: 1. Division 22, 2. PLS-022, 3. Part no. 40079.

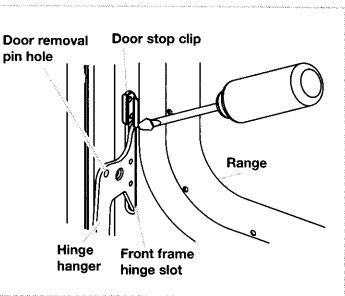

REMOVING THE OVEN DOOR

For normal use of your range, you do not need to remove the door. However, if you find it necessary to remove the door, follow the instructions in this section.

NOTE: The oven door is heavy.

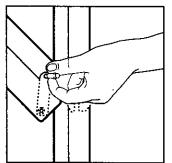

Before removing the door:

- **1.** Use a putty knife or screwdriver and insert it at the bottom corner of the door stop clip.
- **2.** Pry door stop clip free and remove from front frame hinge slot. Take care not to scratch porcelain.
- **3.** Repeat procedure for other door stop clip.

To remove:

1. Open the oven door. Insert door removal pins,

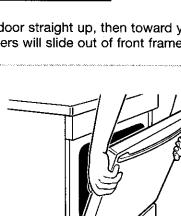

included with your range, into both hinge hangers. Do not remove the pins while the door is removed from the range.

2. Carefully close the door until it rests against the door removal pins.

To replace:

NOTE: The door removal pins you inserted must still be in both door hinges.

1. Grasp the door on the sides with your fingers on the front of the door and your thumbs on the inside surface.

continued on next page

on the front of the door and your thumbs on

3. Grasp the door on the sides with your fingers

the inside surface.

- 4. Pull door straight up, then toward you. Hinge hangers will slide out of front frame hinge slot.

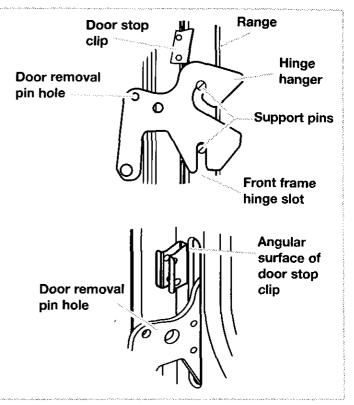

REMOVING THE OVEN DOOR (contd.)

- 2. Hold oven door so that the top edge of each hinge hanger is horizontal. Insert hinge hangers into the front frame hinge slots.
- **3.** Tilt top of door toward range. Slide hinge hangers down onto front frame support pins.

NOTE: Make sure the hinge hangers are fully seated and engaged on the support pins.

- 4. Insert the door stop clip with the angular surface at the top of the frame hinge slot, then push in the bottom of the clip until flanges are flush with the front frame.
- 5. Open the door completely and remove the door removal pins. Save door removal pins for future use.
- 6. Close the door.
- 7. Check for alignment to make sure door is installed evenly.

THE OVEN LIGHT

The oven light will come on when you open the oven door. The oven light will not work during the Self-Cleaning cycle.

To turn the light on or off when the oven door is closed:

• Press the OVEN pad.

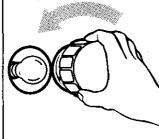

To replace the oven light:

1. Unplug range or disconnect power.

2. Remove the glass bulb cover in the back of the

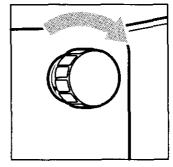

counterclockwise.

oven by turning it

3. Remove the light bulb from its socket by turning it counterclockwise. Replace the bulb with a 40-watt appliance bulb.

Replace the light bulb cover by turning it clockwise.

Plug in range or reconnect power.

THE CONSOLE NIGHT LIGHT

The console night light is located on the top of the control panel. It has two replaceable parts. The fluorescent light is a standard F8T5 miniature fluorescent lamp. The starter is the knob-shaped part to the left of the light. It is a standard FS-5C starter. The console night light will not work during the Self-Cleaning cycle.

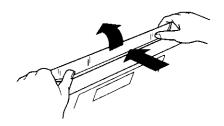

To turn the light on and off:

Press the TOP pad momentarily.

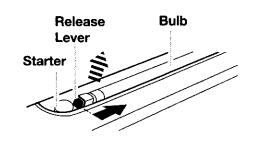

To remove the starter and/or bulb:

- 1. Unplug range or disconnect power.
- **2.** From the front of the range, push back on lens and lift lens out.

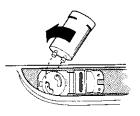

3. Push release lever toward the bulb. The left end of the light assembly will raise up.

- **4.** To remove the starter, turn it counterclockwise and lift out of its mounting base.
- **5.** To remove the bulb, roll it forward or backward 90° until you hear a click, then lift out.

To install the starter and/or bulb:

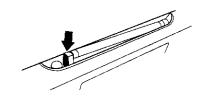

1. Fit starter prongs into starter mounting base and turn clockwise.

 Slide bulb prongs into bulb mounting base ends. Roll the bulb forward or backward 90° until you hear a click.

3. Push down on the left bulb mounting base. You will hear a click indicating the assembly has latched.

- **4.** Replace the lens cover. Position the two rear lens cover tabs in front of the two metal spring clips, located directly behind the bulb. Push back and down on the lens to lock lens into position.
- 5. Plug in range or reconnect power.

Troubleshooting

Most cooking problems are caused by little things you can find and fix without tools of any kind. Check the lists below and on the next page before calling for assistance or service.

RANGE DOES NOT WORK

PROBLEM	CAUSE/SOLUTION
Nothing works	 The range is not plugged into a properly grounded live outlet with the proper voltage. (See Installation Instructions.)
	A household fuse has blown or a circuit breaker has been tripped.
	 The control knob is not set correctly. Push in the control knobs before turning them.
	 The Oven and Cooktop Lockouts have been set.
The oven does not work	 The electronic control is not set correctly. Refer to setting the electronic oven control section. (See pp. 14-34.)
	 A delay start has been set. Wait for the start time to be reached or cancel and reset the control.
	 The Oven Lockout has been set.
The surface cooking	A household fuse has blown or a circuit breaker has been tripped.
zones will not work	 The control knobs have not been set correctly. Push the control knobs in before turning them to a setting.
	 The cooking element is burned out. Call a Sears Service Center for replacement or repair.
	 The Cooktop Lockout has been set.
Cannot boil on left front	Press the SURESIMMER button to OFF.
surface cooking zone/ SURESIMMER™ feature	 Turn left front control knob to HI for a rapid boil.
SURESIMMER will not simmer	 Turn left front control knob on between the SURESIMMER LO and 4 settings along with pressing the SURESIMMER button on.
SURESIMMER surface cooking zone does not get hot enough	 Turn left front control knob to "4", along with pressing the SURESIMMER button on.

WHEN SELF-CLEANING YOUR OVEN

PROBLEM	CAUSE/SOLUTION	A STATE AND A STATE OF
The Self-Cleaning cycle will not work	 START/ENTER has not been pressed. A delayed start has been set. Wait for the start time to be reached or cancel and reset the control. 	and the second second second
	The door is not closed all the way.	Sector 1

COOKING RESULTS

PROBLEM	CAUSE/SOLUTION
Cookware not level on cooktop (Check to see if liquids are level in cookware)	 Level the range. (See the Installation Instructions.) Use cookware with a flat bottom.
Excessive heat on cooktop in areas around cookware	 Choose cookware the same size or slightly larger than the surface cooking zone.
The oven temperature seems too low or too high	 Adjust the oven temperature control. (See "Readjusting the oven temperature control," p. 20.)
Slow baking or roasting	 Increase baking or roasting time. Increase temperature 25°F. Preheat oven to selected temperature before placing food in when preheating is recommended. Choose bakeware that will allow 2 inches of air space around all sides. Open oven door to check food when timer signals shortest time suggested in recipe. Oven peeking can make cooking times longer.
Baked items too brown on bottom	 Preheat oven to selected temperature before placing food in oven. Choose bakeware that will allow 2 inches of air space around all sides. Position rack higher in oven. Decrease oven temperature 15° to 25°F.
Unevenly baked items	 Level the range. Bake in center of oven with 2 inches of space around each pan. Check to make sure batter is level in pan.
Crust edge browns before pie is done	Shield edge with foil.

DISPLAY MESSAGES

PROBLEM	CAUSE/SOLUTION
The display is showing "PF"	 There has been a power failure. Press OFF/CANCEL to clear the display, then reset the clock. (See p. 15.)
"F" followed by a number shows on the display	 Press OFF/CANCEL to clear the display. If an "F" code appears again, call for service.
"EO F5" appears on the display (The oven door will not close because the self-clean latch mechanism interferes.)	 Press OFF/CANCEL to clear display. Depress and hold the door switch plunger (located on the oven front frame). Latch mechanism will unlock in about 6 seconds.
