SAVE THESE INSTRUCTIONS

Your safety and the safety of others is very important.

We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages.

This is the safety alert symbol.

This symbol alerts you to hazards that can kill or hurt you and others.

All safety messages will be preceded by the safety alert symbol and the word "DANGER" or "WARNING." These words mean:

 **DANGER**

You will be killed or seriously injured if you don't follow instructions.

 **WARNING**

You can be killed or seriously injured if you don't follow instructions.

All safety messages will identify the hazard, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

TO ASSEMBLE:

Insert the grind worm (A) into the grinder body (B). Place the knife (C) over the square shank at the exposed end of the grind worm. Place grinding plate (D) over the knife, matching the tabs of the plate with the notches of the grinder body. Place ring (E) on grinder body, turning by hand until secured but not over tightened. Note: Use wrench (F) for removal only, do not use to tighten ring.

TO ATTACH:

Before attaching accessory, turn off and unplug unit.

Loosen attachment knob (1) by turning it counterclockwise. Remove attachment hub cover. Insert attachment shaft housing (2) into attachment hub (3) making certain that attachment power shaft fits into square hub socket. Rotate attachment back and forth if necessary. When attachment is in proper position, the pin on the attachment will fit into the notch on the hub rim. Tighten attachment knob until attachment is completely secured to mixer.

TO USE:

! WARNING	
	Rotating Blade Hazard
	Always use food pusher.
	Keep fingers out of openings.
	Keep away from children.
Failure to do so can result in cuts or other injury.	

Cut food into small strips or pieces and feed them into hopper. Meat should be cut into long narrow strips. Turn mixer to Speed 4 and feed food into hopper using food pusher. Never put your fingers in the hopper.

Note: Liquid may appear in hopper when processing large amounts of high moisture foods such as tomatoes or grapes. To drain liquid, continue to operate mixer. Do not process additional food until liquid has drained from hopper; damage to mixer may result.

GENERAL INFORMATION:

Coarse Plate — Use for grinding raw or cooked meats, firm vegetables, dried fruits and cheese.

Fine Plate — Use for grinding raw meat, cooked meats for spreads and bread for crumbs.

Grinding Meat — For better mix and more tender results, grind beef twice. Best texture results from grinding very cold or partially frozen meat. Fatty meats should be ground only once.

Grinding Bread — To grind bread for bread crumbs, be sure that bread is either oven dried thoroughly to remove all moisture, or not dried at all. Partially dried bread may jam the Food Grinder.

Note: Very hard, dense foods such as totally dried homemade bread should not be ground in the Food Grinder. Homemade bread should be ground fresh and then oven or air dried.

TO LOOSEN THE RING:

If ring is too tight to remove by hand, slip the wrench over the grooves. Turn wrench handle counterclockwise.

TO CLEAN:

Completely disassemble unit. Grinder body, grind worm, ring and wrench are dishwasher safe. The knife, grinding plates and wooden stomper should be washed in warm, sudsy water and dried thoroughly.
