# 1. Introduction

---

The industrial tri-segment media converter series provides one 10/100BASE-TX Fast Ethernet port and two 100BASE-FX ports. It supports the connections to three network segments, one UTP and two fiber cables. It serves the network data transfer between any two segments in switching basis. The following figure illustrates a basic connection example:

The following figure illustrates another example which deploys multiple fiber cables to connect other Ethernet devices in a daisy-chain method.

For industrial environment, the converters are designed with the following enhanced features exceeding that of commercial media converters:

- High and wide operating Temperature:  $-10^{\circ}\text{C}$  to  $+55^{\circ}\text{C}$
- Wide operating voltage range for DC power input:  $+7 \sim 30\text{VDC}$
- Power input interface: Screw terminal block and DC jack for adapter
- DIN rail mounting support for industrial enclosure
- Screw plane mounting support for industrial enclosure
- Industrial-rated Emission and Immunity performance

## 1.1 Features

- Support network data transfer at full wire speed
- The TP port supports 10Mbps and 100Mbps connections
- Auto MDI/MDI-X detection function on the TP (copper) port
- Auto-negotiation function on the TP port
- Transparent conversion to 802.1Q VLAN tagged packets between any two segments
- Far End Fault function on FX (fiber) ports
- Support wide range of fiber options on the FX ports
- Low power consumption
- Two power interface type: screw terminal block and DC jack
- Wide operating voltage input range : +7 ~ 30VDC
- Support DIN rail mounting
- Support plane mounting
- High and wide operating temperature range : -10°C to +55°C

## 1.2 Specifications

This figure shows the important components of the converter:

### **Twisted-Pair Interface (TP Port, or called copper Port)**

|                         |  |
|-------------------------|--|
| Connector               | Shielded RJ-45   |
| Pin Assignments         | Auto MDI/MDI-X detection                                     |
| Signal Compliance       | IEEE 802.3 10BASE-T, 802.3u 100BASE-TX                       |
| Data Speed              | 10Mbps or 100Mbps  |
| Duplex Mode             | Half-duplex or Full-duplex                                   |
| Configuration           | Auto-negotiation capable and optional forced manual settings |
| Cable Types             | 10Mbps - Category 3, 4, or 5 UTP<br>100Mbps - Category 5 UTP |
| Supported Link Distance | Up to 100 meters   |

### **Fiber Optic Interfaces (FX1 Port, FX2 Port)**

|                         |   |
|-------------------------|---|
| Signal Compliance       | IEEE 802.3u 100BASE-FX  |
| Connector               | SC, ST, or Single SC (model dependent)                                |
| Data Speed              | 100Mbps   |
| Duplex Mode             | Full-duplex and optional half duplex                                  |
| Cable Types             | Multimode (MMF) - 50/125, 62.5/125 mm<br>Single mode (SMF) - 9/125 mm |
| Supported Link Distance | MMF up to 2km<br>SMF, single SMF (model dependent)                    |
| Eye Safety compliance   | IEC825 Class 1  |

### Configuration Setting Switches (SW)

| <u>NO.</u> | <u>FUNCTION</u> | <u>SETTINGS</u> |                            |
|------------|-----------------|-----------------|----------------------------|
| SW1        | TP Port mode    | OFF             | Auto-negotiation (default) |
|            |                 | ON              | Forced mode                |
| SW2        | TP Port Duplex  | OFF             | Full duplex (default)      |
|            |                 | ON              | Half duplex                |
| SW3        | TP Port Speed   | OFF             | 100Mbps (default)          |
|            |                 | ON              | 10Mbps                     |
| SW4        | 802.3x function | OFF             | Enable (default)           |
|            |                 | ON              | Disable                    |
| SW5        | FX1 port duplex | OFF             | Full duplex mode (default) |
|            |                 | ON              | Half duplex mode           |
| SW6        | FX2 port duplex | OFF             | Full duplex mode (default) |
|            |                 | ON              | Half duplex mode           |

### LED Indicators

| <u>LED</u> | <u>DISPLAY</u>        | <u>STATE INTERPRETATION</u> |                            |
|------------|-----------------------|-----------------------------|----------------------------|
| PWR        | Power status          | ON                          | Power on                   |
|            |                       | OFF                         | Power off                  |
| TP LINK    | TP port link status   | ON                          | Link up and no traffic     |
|            |                       | OFF                         | Link fault                 |
|            |                       | BLINK                       | Rx/Tx activities           |
| TP 100M    | TP port speed status  | ON                          | 100Mbps                    |
|            |                       | OFF                         | 10Mbps                     |
| TP FDX     | TP port duplex status | ON                          | Full duplex                |
|            |                       | OFF                         | Half duplex                |
|            |                       | BLINK                       | Collisions on half duplex  |
| FX1 LINK   | FX1 port link status  | ON                          | Link up and no traffic     |
|            |                       | OFF                         | Link fault                 |
|            |                       | BLINK                       | Rx/Tx activities           |
| FX1 OL     | FX1 port optical link | ON                          | Optical signal is detected |
|            |                       | OFF                         | No optical signal          |
| FX2 LINK   | FX2 port link status  | ON                          | Link up and no traffic     |
|            |                       | OFF                         | Link fault                 |
|            |                       | BLINK                       | Rx/Tx activities           |
| FX2 OL     | FX2 port optical link | ON                          | Optical signal is detected |
|            |                       | OFF                         | No optical signal          |

## **DC Power Input**

|                          |   |
|--------------------------|---|
| Interface                | Screw-type terminal block<br>(2 sets for power wire cascading)<br>DC Jack (-D 6.3mm / +D 2.0mm) |
| Operating Input Voltages | +7V ~ +30V(+5%)   |
| Power consumption        | 2.7W max. @7.5VDC input<br>2.9W max. @24VDC input<br>3.0W max. @+30VDC input                    |

## **Basic Information**

|                         |  |
|-------------------------|--|
| MAC Addresses Entries   | 1K   |
| Forwarding Throughput   | Full wire speed at 100M full duplex<br>10Mbps - 14,880 pps at 64-byte packets<br>100Mbps - 148,800pps at 64-byte packets |
| Forwarding Packet Types | Transparent and no modification for<br>- IEEE 802.3 standard packets<br>- IEEE 802.1Q VLAN tagged packets                |
| Packet Length           | Up to 1536 bytes at store-and-forward mode   |
| Flow Control            | Back-pressure for half-duplex mode<br>802.3x pause-frame base for full duplex mode                                       |
| Far End Fault Function  | Supported on both FX ports   |

## **Mechanical**

|                  |                                   |
|------------------|-----------------------------------|
| Dimension (base) | W 28mm x D 82mm x H 95mm          |
| Housing          | Enclosed metal with no fan        |
| Mounting Support | DIN-rail mounting, Plane mounting |
| Weight           | 250g                              |

## **Environmental**

|                       |  |
|-----------------------|--|
| Operating Temperature | Typical -10°C ~ 55°C (model dependent) |
| Storage Temperature   | -40°C ~ 85°C                           |
| Relative Humidity     | 5% ~ 90%                               |

## **Certificate**

## 1.3 Model Specifications

The media converter series provides the following fiber options:

### Model Specifications

| KCD-302-xxx<br>Model Ext. | FX Connectors | WaveL.<br>(nm) | Fiber Distance | Operating<br>Temperature |
|---------------------------|---------------|----------------|----------------|--------------------------|
| -2T                       | FX1 : ST MMF  | 1310           | 2 km           | -10 ~ 55°C               |
|                           | FX2 : ST MMF  | 1310           | 2 km           | -10 ~ 55°C               |
| -2C                       | FX1 : SC MMF  | 1310           | 2 km           | -10 ~ 55°C               |
|                           | FX2 : SC MMF  | 1310           | 2 km           | -10 ~ 55°C               |
| -2CL1                     | FX1 : SC MMF  | 1310           | 2 km           | -20 ~ 55°C               |
|                           | FX2 : SC MMF  | 1310           | 2 km           | -20 ~ 55°C               |
| -2CL2                     | FX1 : SC MMF  | 1310           | 2 km           | -20 ~ 55°C               |
|                           | FX2 : SC MMF  | 1310           | 2 km           | -20 ~ 55°C               |
| -MCSC2                    | FX1 : SC MMF  | 1310           | 2 km           | -20 ~ 55°C               |
|                           | FX2 : SC SMF  | 1310           | 20 km          | -20 ~ 55°C               |

|                           | FX2 : SC MMF  | 1310           | -19 ~ -12         | -31 max.          | -8 min.          |
| -2CL2                     | FX1 : SC MMF  | 1310           | -19 ~ -14         | -34 max.          | -3 min.          |
|                           | FX2 : SC MMF  | 1310           | -19 ~ -14         | -34 max.          | -3 min.          |
| -MCSC2                    | FX1 : SC MMF  | 1310           | -19 ~ -14         | -34 max.          | -3 min.          |
|                           | FX2 : SC SMF  | 1310           | -18 ~ -7          | -32 max.          | -3 min.          |
| -2SA2                     | FX1 : SC SMF  | 1310           | -15 ~ -8          | -31 max.          | -7 min.          |
|                           | FX2 : SC SMF  | 1310           | -15 ~ -8          | -31 max.          | -7 min.          |
| -2SL2                     | FX1 : SC SMF  | 1310           | -18 ~ -7          | -32 max.          | -3 min.          |
|                           | FX2 : SC SMF  | 1310           | -18 ~ -7          | -32 max.          | -3 min.          |

WaveL. : Wavelength, Rx Sens. : Rx sensitivity, Rx max. : Maximum Rx power

## 1.4 Special Functions

### Auto MDI/MDI-X Function

This function allows the TP port to auto-detect the twisted-pair signals and adapts itself to form a valid MDI to MDI-X connection with the remote connected device automatically.

### Auto-negotiation Function

When TP port is set on Auto-negotiation mode (SW1:ON), it is featured with auto-negotiation function and full capability. It performs a negotiation process for the speed and duplex configuration with the connected device automatically when each time a link is being established.

### Far End Fault Function

The FX ports are facilitated with this function, which conforms to IEEE 802.3u 100BASE-FX specifications. When the FX port detects a link failure on its receiving circuitry, it will send out an FEFI (Far End Fault Indication) signal to the remote connected device to indicate a remote fault is detected. It also is capable to receive FEFI signal sent from the remote link partner. Upon receiving an FEFI signal, it indicates a link failure occurred on the transmitting path. This function allows the converter to report a fiber link fault even when a link failure occurred on transmitting fiber cable.

## 2. Installation

---

### 2.1 Unpacking

Check that the following components have been included:

- Information CD
- The product unit
- DIN-rail mounting bracket

If any item is found missing or damaged, please contact your local reseller for replacement.

The following are available optional accessories:

- Plane Mounting Bracket  
The bracket is used for mounting the converter on a plane surface.
- Commercial-rated AC power adapters:
  - Rated AC120V/60Hz DC7.5V 1A
  - Rated AC230V/50Hz DC7.5V 1A
  - Rated AC100V/50-60Hz DC7.5V 1A
  - Rated AC240V/50Hz DC7.5V 1A

The adapters are used for supplying DC power to the converter via DC power jack interface.

## 2.2 DIN-Rail Mounting

In the product package, a DIN-rail bracket is provided for mounting the converter in a industrial DIN-rail enclosure.

The steps to mount the device onto a DIN-rail are:

1. Clamp the bracket into the rear of the device. Align the bracket with the rear face of the device and screw it onto the device unit.

Clamp to the hole

Screw the bracket  
on the device

2. Unscrew and loose the mounting clamp plate of the bracket. Mount the bracket with the device onto the DIN rail.

5. Screw the clamp with the bracket and make sure the device is properly fixed on the DIN rail.

Make sure that there are proper heat dissipation from and adequate ventilation around the device.

The final mechanical dimensions after installing DIN rail mounting bracket are:

## 2.3 Mounting on a Plane Surface

An optional mounting bracket, as shown below is also available for mounting the device on a plane surface such as a wall, a wood board, or a metal plate in an industrial enclosure.

To mount the device on a plane surface, the steps are:

1. Clamp the bracket into the device and align the bracket with the bottom surface of the device and screw it on the converter firmly as shown below:

2. Mount and screw the device on the target surface. The final dimension after bracket installation is also shown below:

Make sure that there are proper heat dissipation from and adequate ventilation around the device. Do not place heavy objects on the device.

## 2.4 Applying Power

The product provide two types of power interfaces, terminal block and DC power jack for receiving DC power input from external power supply.

### DC Power Input Specification

|                   |                  |
|-------------------|------------------|
| Operating Voltage | +7~+30VDC        |
| Power Consumption | Max. 3.0W @30VDC |

### DC Power Terminal Block

|                 |  |
|-----------------|--|
| Connectors      | Screw-type Terminal block (2 sets)   |
| Pin Assignments | DC1 + - Positive (+) Negative (-) terminals<br>DC2 + - 2nd Positive (+) Negative (-) terminals |
| Power wires     | 24 ~ 12AWG (IEC 0.5~2.5mm <sup>2</sup> )   |

The steps to install power wires to the terminal block are:

1. Loose the terminal screw to open the contact for power wire insertion. Insert power wire into the contact.

2. Screw the terminal and make sure power wire is fixed securely.

DC2+ and DC2- can be installed with another power-pair for delivering the main power input to next converter in a cascading way.

*Note: Only up to four device units can be cascaded to receive power from one main power input source.*

### DC Power Jack

Connector: Jack D 6.3mm —  + D 2.0mm

AC Power Adapters: Optional commercial rated adapters are available for purchasing.

Rated AC120V/60Hz DC7.5V 1A

Rated AC230V/50Hz DC7.5V 1A

Rated AC100V/50-60Hz DC7.5V 1A

Rated AC240V/50Hz DC7.5V 1A

Steps to apply the power to the device are:

1. Connect power adapter DC plug to the DC power jack of the converter before connecting to the AC outlet.

2. Connect the power adapter to the AC outlet.

*Note: Before you begin the installation, check the AC voltage of your area. The AC power adapter which is used to supply the DC power for the unit should have the AC voltage matching the commercial power voltage in your area.*

## 2.5 Making TP Port Connection

TP port is featured to support connection to :

- Auto-negotiation devices
- Auto-negotiation incapable 10BASE-T devices
- Auto-negotiation incapable 100BASE-TX devices

### Network Cables

10BASE-T: 2-pair UTP Cat. 3,4,5 , EIA/TIA-568B 100-ohm STP

100BASE-TX: 2-pair UTP Cat. 5, EIA/TIA-568B 100-ohm STP

Link distance: Up to 100 meters

*Note: The TP port is featured with auto MDI/MDI-X crossover detection and configuration function. No matter a straight through cable or crossover cable is connected, the TP port can sense the receiving pair automatically and configure itself to match the rule for MDI to MDI-X connection.*

### Configuration Setup

To make a proper connection to different devices, the following configuration settings are recommended:

| <u>Link partner of TP port</u> | <u>SW1</u> | <u>SW2</u>       | <u>SW3</u> |
|--------------------------------|------------|------------------|------------|
| Auto-negotiation device        | Off: auto  | Off: full duplex | Off: 100M  |
| Fixed 10M half duplex device   | On: forced | On: half duplex  | On: 10M    |
| Fixed 100M half duplex device  | On: forced | On: half duplex  | Off: 100M  |
| Fixed 10M full duplex device   | On: forced | Off: full duplex | On: 10M    |
| Fixed 100M full duplex device  | On: forced | Off: full duplex | Off: 100M  |

## 2.6 Making FX Port Connections

FX1 port and FX2 port operate on 100Mbps and full duplex (factory default).

A variety of fiber options is provided as follows:

### Model Specifications

| <b>KCD-302-xxx</b> |                           | <b>WaveL.</b> |                       | <b>Operating</b>   |

|             | FX2 : SC SMF  | 1310   | -18 ~ -7  | -32 max. | -3 min.  |

WaveL. : Wavelength, Rx Sens. : Rx sensitivity, Rx max. : Maximum Rx power

## Network Cables

Multimode (MMF) - 50/125, 62.5/125 mm

Single mode (SMF) - 9/125 mm

### 3 Configuration Switches & LED Indicators

The following figure shows the locations of the configuration switches and LED indicators:

Refer to the following sections for the related functions.

## 3.1 Configuration Switches

| <b>SW</b> | <b>FUNCTION</b> | <b>SETTING &amp; STATE</b> |                            |
|-----------|-----------------|----------------------------|----------------------------|
| SW1       | TP Port mode    | OFF                        | Auto-negotiation (default) |
|           |                 | ON                         | Forced mode                |
| SW2       | TP Port Duplex  | OFF                        | Full duplex (default)      |
|           |                 | ON                         | Half duplex                |
| SW3       | TP Port Speed   | OFF                        | 100Mbps (default)          |
|           |                 | ON                         | 10Mbps                     |
| SW4       | 802.3x function | OFF                        | Enable (default)           |
|           |                 | ON                         | Disable                    |
| SW5       | FX1 port duplex | OFF                        | Full duplex mode (default) |
|           |                 | ON                         | Half duplex mode           |
| SW6       | FX2 port duplex | OFF                        | Full duplex mode (default) |
|           |                 | ON                         | Half duplex mode           |

### 3.1.1 TP Port Settings SW1-SW3

SW1, SW2, SW3 are used for configuring the TP port especially when connecting to a link partner port which is not auto-negotiation capable. Refer to section 2.5 for details.

### 3.1.2 802.3x Function Setting SW4

IEEE 802.3x function is the flow control method used for full duplex operation on the TP port and FX ports under store and forward mode. This method uses pause frames for one port to stop further transmission from its link partner.

### 3.1.3 FX Port Duplex Settings SW5 SW6

This settings are used to set the duplex mode of the FX1 port and FX2 port individually. It is recommended to use full duplex mode for FX connection unless its link partner is a fixed half duplex device. Half duplex mode will shorten the connection distance. The following table lists the maximum **MMF** cable length connecting to different devices:

| <u>Link Partner of FX Port</u>        | <u>Distance (MMF cable)</u> |
|---------------------------------------|-----------------------------|
| Network card half-duplex fiber port   | 400 m                       |
| Network card full-duplex fiber port   | 2 km                        |
| Class I hub half-duplex fiber port    | 160 m                       |
| 2 Class II hub half-duplex fiber port | 112 m                       |
| Switched half-duplex fiber port       | 400 m                       |
| Switched half-duplex fiber port       | 2 km                        |

*Note: For SMF connection, be sure the link partner is a full duplex device and set SW5 SW6 to full duplex mode for the FX ports.*

### 3.1.4 Factory Default Settings

The factory default settings are as follows:

|     |     |  |
|-----|-----|--|
| SW1 | OFF | TP port mode - auto-negotiation          |
| SW2 | OFF | TP port - full duplex                    |
| SW3 | OFF | TP port - 100Mbps                        |
| SW4 | OFF | Enable IEEE 802.3x flow control function |
| SW5 | OFF | FX1 port - full duplex                   |
| SW6 | OFF | FX2 port - full duplex                   |

## 3.2 LED Indicators

| <b><u>LED</u></b> | <b><u>DISPLAY</u></b> | <b><u>STATUS &amp; INTERPRETATION</u></b> |                               |
|-------------------|-----------------------|---|-------------------------------|
| PWR               | Power status          | ON  | Power on                      |
|                   |                       | OFF                                       | Power off                     |
| <b><u>TP</u></b>  |                       |   |                               |
| LINK              | TP port link status   | ON  | Link up and no traffic        |
|                   |                       | OFF                                       | Link fault                    |
|                   |                       | Blink                                     | Rx/Tx activities              |
| 100M              | TP port speed status  | ON  | 100Mbps                       |
|                   |                       | OFF                                       | 10Mbps                        |
| FDX               | TP port duplex status | ON  | Full duplex                   |
