NEW MEYER REAR UNLOAD FORAGE BOX MANUFACTURER'S WARRANTY

- I. The "Product Registration & Inspection Certificate" along with the original billing invoice "Owners Registration Form" must be completed in full and promptly returned to Meyer Mfg. Corp. for this warranty to become both valid and effective. All warranties on New Meyer Forage Boxes shall apply only to the original retail customer from an authorized Meyer Mfg. Corp. dealership.
- II. This warranty shall not apply to any Meyer Forage Box which has been subjected to misuse, negligence, alteration, accident, incorrect operating procedures, or which shall have been repaired with parts other than those obtained through Meyer Mfg. Corp.
- III. Meyer Mfg. Corp. warrants New Meyer Forage Boxes to be free from defects in material and workmanship under recommended use and maintenance service, as stated in the Operator's and Parts Manual," as follows:
 - A. Meyer Mfg. Corp. will repair or replace F.O.B. Dorchester, WI, as Meyer Mfg. Corp. elects, any part of a new Meyer Forage Box which is defective in material or workmanship:
 1. Without charge for either parts or labor during the first (1) year from purchase date to the original retail customer.
 2. Without charge for parts only during the second (2) year from purchase date to the original retail customer.
 - B. In addition to the above basic warranty, Meyer Mfg. Corp. will repair or replace F.O. B. Dorchester, WI as Meyer Mfg. Corp. elects:
 1. Any part of the following which is defective in material or workmanship (not neglect to recommended use and service) without charge for parts only (not labor) during the stated time periods from date of purchase to the original retail customer:

Five (5) Years: The D667XH pintle main apron chain assembly.
 2. Any part of the following which is defective in material or workmanship (not neglect to recommended use and service) with a "pro-rated" charge for parts only (not labor) during the stated time period from date of purchase to the original retail customer:

Ten (10) Years: a. The all welded steel frame box structure.
- IV. COMMERCIAL USE: Coverage as in paragraph III A1 ONLY, except warranty coverage is for (90) days for parts and labor to the original commercial retail customer.
- V. Repairs eligible for labor warranty must be made by Meyer Mfg. Corp. or an authorized Meyer dealership. The original retail customer is responsible for the transportation of the forage box to the dealership for warranty service or for any service call expenses.
- VI. Except as stated above, Meyer Mfg. Corp. shall not be liable for injuries or damages of any kind or nature, direct, consequential, or contingent, to persons or property. This warranty does not extend to loss of crop or for any other reasons.
- VII. No person is authorized to give any other warranties or to assume any other obligation on Meyer Mfg. Corp.'s behalf unless made or assumed in writing by Meyer Mfg. Corp. This warranty is the sole and exclusive warranty which is applicable in connection with the manufacture and sale of this product and Meyer Mfg. Corp.'s responsibility is limited accordingly.

Optional Equipment-Tarp, scales etc. warranty-See original equipment warranty.

INTRODUCTION

Congratulations on your purchase of a new Meyer Rear Unload Forage Box. Undoubtedly you have given much consideration to your purchase and we're proud that you have selected Meyer. Pride in craftsmanship, engineering and customer service have made Meyer products the finest in the farm equipment industry today.

The Model 9100 is available as a truck/trailer mounted unit or mounted to a wagon running gear pulled and powered by a farm tractor. When the PTO is referred to, it means power takeoff from the truck.

The Model 9100 may be referred to as rear unload box, forage box, box or rear unload forage box in this manual.

This SAFETY ALERT SYMBOL means ATTENTION! BE CAREFUL! YOUR SAFETY IS INVOLVED! It stresses an attitude of HEADS UP FOR SAFETY. When you see this symbol, be alert to the possibility of PERSONAL INJURY and carefully read the message that follows.

WARNING: NEVER OPERATE WITHOUT ALL COVERS, SHIELDS AND GUARDS IN PLACE. KEEP HANDS, FEET AND CLOTHING AWAY FROM MOVING PARTS. SOME COVERS AND GUARDS HAVE BEEN REMOVED FOR ILLUSTRATIVE PURPOSES ONLY IN THIS MANUAL. FAILURE TO HEED MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH.

There is no substitute for quality. That is why thousands of people like you have purchased Meyer farm equipment. They felt it was the best equipment to serve their farming needs, now and in years to come. We ask that you follow our policy of "safety first," and we strongly suggest that you read through the owner's manual before operating your Meyer farm equipment.

Meyer Manufacturing Corporation wants to thank you for not compromising quality. We are determined to offer excellence in customer service as well as provide you with the very best value for your dollar.

Sincerely,

All Employees of
MEYER MANUFACTURING CORPORATION

Meyer Manufacturing Corporation reserves the right to make improvements in design, or changes in specifications at any time, without incurring any obligation to owners of units previously sold.

This supersedes all previous published instructions.

IMPORTANT:

At the front of this manual is a Product Registration and Inspection Certificate. Be sure your dealer has completed this certificate and promptly forwarded a copy to Meyer Manufacturing to validate the manufacturer's warranty. The product model and serial number are recorded on this certificate and below for proper identification of your Meyer Forage Box by your dealer and the manufacturer when ordering repair parts. The serial number is stamped in the front upright of the left-hand side.

Model No. _____

Serial No. _____

Date of Purchase _____

At the back of this manual is the repair parts section. All replacement parts are to be obtained from or ordered through your Meyer dealership. When ordering repair parts, refer to the parts section and give complete information including quantity, correct part number, detailed description and even Model No. and Serial No. of the forage box which needs repair parts.

NOTE: All references to right hand (RH), left hand (LH), front and rear apply to the product as viewed from the rear of the box.

You are urged to study this manual and follow the instructions carefully. Your efforts will be repaid in better operation and service as well as a savings in time and repair expense. Failure to read this manual and understand the machine could lead to serious injury. If you do not understand instructions in this manual, contact either your dealer or Meyer Manufacturing Corp. at Dorchester, WI 54425.

SAFETY PRECAUTIONS

THIS SYMBOL IS USED TO CALL ATTENTION TO INSTRUCTIONS CONCERNING PERSONAL SAFETY. BE SURE TO OBSERVE AND FOLLOW THESE INSTRUCTIONS. TAKE TIME TO BE CAREFUL!

WARNING: BEFORE ATTEMPTING TO OPERATE THIS FORAGE BOX, READ AND STUDY THE FOLLOWING SAFETY INFORMATION. IN ADDITION, MAKE SURE THAT EVERY INDIVIDUAL WHO OPERATES OR WORKS WITH THE FORAGE BOX, WHETHER FAMILY MEMBER OR EMPLOYEE, IS FAMILIAR WITH THESE SAFETY PRECAUTIONS.

Require anyone who will operate this forage box to read and completely understand this owner's manual. Give necessary instructions.

DO NOT operate, service, inspect or otherwise handle this forage box until all operators have read this Owner's Manual and have been properly trained in its intended usage.

DO NOT allow minors (children) or inexperienced persons to operate this forage box.

DO NOT clean, adjust or lubricate while the forage box is in motion.

Inspect when first delivered and regularly thereafter; that all connections and bolts are tight and secure before operating.

Know how to stop operation of the forage box before starting it!

DO NOT operate until all shields and guards are in place and securely fastened.

Make certain everyone is clear of the forage box before applying power.

Keep hands, feet and clothing away from moving parts. Loose or floppy clothing should not be worn by the operator.

Observe all applicable traffic laws when transporting on public roadways (where legal to do so). Check local laws for all highway lighting and marking requirements.

Tractor Models: Always install a SMV emblem on forage box for transporting on roadways and keep this emblem clean and bright.

DO NOT step up on any part of the forage box at any time.

Keep the forage box away from power lines. Contact with electric lines may result in serious injury or death by electrocution!

If the forage box becomes clogged, shut off the power, set park brake, remove keys, keep keys in your possession, and allow all mechanism to stop. Then, clean or work on the forage box as required.

Always shut off the power, remove keys, keep keys in your possession to prevent accidental startup or unexpected movement before working on forage box.

Tractor Models: DO NOT tow at speeds in excess of 20 MPH when transporting this forage box. Never exceed a safe travel speed.

MEYER MFG. CORP. PROVIDES GUARDS FOR EXPOSED MOVING PARTS FOR THE OPERATOR'S PROTECTION; HOWEVER, SOME AREAS CANNOT BE GUARDED OR SHIELDED IN ORDER TO ASSURE PROPER OPERATION. THE OPERATOR'S MANUAL AND DECALS ON THE FORAGE BOX ITSELF WARN YOU OF DANGERS AND MUST BE READ AND OBSERVED CLOSELY!

Study the Above Safety Rules

FAILURE TO HEED MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH.

 **SAFETY FIRST**

 **CAUTION:** READ ALL DECALS ON THE FORAGE BOX AND IN THIS MANUAL. KEEP THESE DECALS CLEAN AND REPLACE ANY LOST OR DESTROYED DECALS. BECOME FAMILIAR WITH ALL TRUCK OR TRACTOR AND FORAGE BOX CONTROLS.

SAFETY FIRST

The Meyer Forage Box is manufactured with operator safety in mind. Located on the forage box are various decals to aid in operation and warn of danger or caution areas. Pay close attention to all decals on the forage box.

DO NOT REMOVE ANY DECALS. IF DECALS ARE LOST, DAMAGED OR IF FORAGE BOX IS REPAINTED, REPLACE DECALS. REMEMBER: DECALS ARE FOR YOUR PROTECTION AND INFORMATION.

A brief definition of signal words that are used in this manual is as follows:

DANGER Indicates an imminently hazardous situation that, if not avoided, will result in death or serious injury.

WARNING Indicates a potentially hazardous situation that, if not avoided could result in death or serious injury, and includes hazards that are exposed when guards are removed.

CAUTION Indicates a potentially hazardous situation that, if not avoided may result in minor or moderate injury.

SAFETY INSTRUCTIONS

SAFETY FIRST

(Do Not Operate This Machine Without Reading These Instructions)

Meyer Mfg. Corp. always takes the operator's safety into consideration when designing farm machinery by covering exposed moving parts for his protection; however, some areas cannot be guarded or shielded in order to assure proper operation.

This safety alert symbol means ATTENTION! BE CAREFUL! YOUR SAFETY IS INVOLVED! It stresses an attitude of HEADS UP FOR SAFETY, also read all other decals as they are also safety warnings.

Remember: The careful operator is the best operator. Most accidents are caused by human error. Certain precautions must be observed to prevent the possibility of injury or damage.

Read the **HEADS UP** Rules before you operate our equipment.

- DO NOT** allow persons other than the authorized adult operator near the machine.
- DO NOT** clean, adjust or lubricate the machine when any part is in operation.
- DO NOT** hook a tractor with a 1000 RPM PTO speed to the unloader.
- DO NOT** pass in front of discharge area of machine when implement is in operation.

IF THE MACHINE BECOMES CLOGGED, DISENGAGE POWER TAKE-OFF, REMOVE KEYS FROM TRACTOR, AND ALLOW ALL MECHANISMS TO STOP BEFORE CLEANING.

KEEP HANDS, FEET, CLOTHING AND HAIR AWAY FROM ALL MOVING PARTS WHEN MACHINE IS IN OPERATION. LOOSE OR FLOPPY CLOTHING SHOULD NOT BE WORN BY THE OPERATOR.

STOP ENGINE. WAIT FOR ALL MOVEMENT TO STOP BEFORE LEAVING OPERATOR'S POSITION TO ADJUST, LUBRICATE, CLEAN OR UNLOAD MACHINES. UNLESS OTHERWISE SPECIFICALLY RECOMMENDED IN THE "OPERATOR'S MANUAL."

NEVER START THE MACHINE UNTIL ALL GUARDS AND SAFETY SHIELDS ARE SECURED IN PLACE.

KEEP OFF EQUIPMENT UNLESS SEAT OR PLATFORM FOR OPERATION AND OBSERVATION IS PROVIDED. KEEP ALL OTHERS OFF.

PTO SHIELD MUST ROTATE FREELY AND BE IN PLACE.

ALWAYS RUN PTO STRAIGHT IN LINE TO AVOID AN ACCIDENT BY BREAKAGE.

YOU MUST OBSERVE ALL APPLICABLE TRAFFIC LAWS WHEN TRANSPORTING ON PUBLIC ROADWAYS (WHERE LEGAL TO DO SO). CHECK LOCAL LAWS FOR ALL HIGHWAY LIGHTING AND MARKING REQUIREMENTS AND COMPLY WITH THESE LAWS.

MAKE CERTAIN EVERYONE IS CLEAR OF MACHINE BEFORE STARTING ENGINE OR OPERATION

PLEASE KEEP ALL DECALS AND SLOW MOVING VEHICLE SIGN CLEAN SO THEY ARE LEGIBLE.

If any decal becomes damaged or lost, call your dealer or our plant for replacement.

Always use GENUINE MEYER replacement parts

PRE-OPERATION

GENERAL

Whenever adjusting, cleaning, lubricating or otherwise servicing this forage box, you must shutoff and lockout power to the box. Because this box can be truck mounted or powered by a tractor, methods vary. On truck mounted units, the connection between the PTO and box is permanently installed and not intended to be disconnected. On trucks, disengage the PTO drive, turn off the engine, set the parking brake, remove the ignition keys and keep them in your possession to prevent anyone else from accidentally applying power to the box unexpectedly. For tractors, disengage the hydraulics, turn off the engine, set the brakes.

Throughout this manual, when directed to shutoff and lockout power, be familiar with the previously described procedures for the type of machine you are operating.

Be sure your forage box is properly mounted to the truck frame or to the wagon running gear. Consult your dealer if you have any questions about proper installation. A tie down kit from the manufacturer and illustrated in the parts listing of this manual is available for wagon applications.

Hydraulic input to the 9100 forage box requires 35GPM @ 3000 PSI. If truck mounted, install a relief valve set at 3000 PSI. Engine RPM should be 1500 RPM. Set up hydraulic system on truck mounted units with a 40 gallon reservoir minimum. Call factory for further information.

WARNING: INSPECT REGULARLY THAT ALL CONNECTIONS AND BOLTS ARE TIGHT AND SECURE BEFORE OPERATING. FAILURE TO HEED MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH.

Inspect the forage box for proper adjustments as this will ensure maximum machine performance. See "Adjustments" section. Grease and oil the forage box as required. See "Lubrication" section.

WARNING: DO NOT OPERATE UNTIL ALL SHIELDS AND GUARDS ARE IN PLACE AND SECURELY FASTENED. FAILURE TO HEED MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH.

LIGHT HOOKUP

A 7 pin electrical socket is provided to plug the electrical control plug from your truck or tractor. See figure 1

This will operate signal, tail, clearance and brake lights.

Depending on make and model of truck, it may be necessary to install a light converter. (Meyer part #56-0028). Converter allows signal lights and brake lights to operate according to DOT lighting.

AIR BRAKE HOOKUP

Connect the control line (blue) from your truck air supply to the blue gladhand on the trailer. Connect the tank supply line (red) to the red gladhand on the trailer. See figure 1.

WARNING: IF THE ABS INDICATOR LAMP COMES ON AND STAYS ON WHEN YOU APPLY BRAKES TO A MOVING TRAILER, THE TRAILER ABS IS NOT WORKING PROPERLY. THE ABS MUST BE SERVICED AS SOON AS POSSIBLE UPON COMPLETION OF YOUR TRIP TO ENSURE FULL ANTI-LOCK BRAKING CAPABILITY

HYDRAULIC HOOKUP

Connect hydraulic lines from the hydraulic power supply to the pressure and return lines as illustrated on figure 1.

START UP AND STOPPING

Operation of the forage box with truck begins when the PTO is engaged to run the hydraulic pump.

Operation for tractor pulled forage boxes begins when the tractor hydraulic system is engaged.

FIGURE 1. ELECTRICAL LIGHT AND AIR BRAKE HOOKUP

TRANSPORTING

WARNING: (TRACTOR POWERED) INSTALL A SMV EMBLEM ON REAR OF FORAGE BOX FOR TRANSPORTING ON ROADWAYS. KEEP THIS EMBLEM CLEAN AND BRIGHT. FAILURE TO HEED MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH.

Be sure and observe that the rear discharge door is latched closed before traveling on roadways.

If you will travel on public roads you must know all rules governing such operation. This will include lighting and brake requirements in addition to traffic rules. You may also be required to install a safety chain device on the running gear.

TRACTOR TOWING SIZE REQUIREMENTS

Use the following chart for calculating the minimum tractor weight.

MODEL	FORAGE BOX EMPTY WEIGHT + LOAD = GW	MINIMUM TRACTOR WEIGHT UP TO 20 MPH
9122	6,300 + _____ = _____	2/3 of box gross weight
9124	6,600 + _____ = _____	2/3 of box gross weight

MATERIAL ESTIMATED WEIGHT PER CUBIC FOOT

MATERIAL	LBS / CU. FT.
SOYBEANS	47 LBS.
COTTON SEED DRY	20 LBS.
CORN (SHELLED)	45 LBS.
CORN SILAGE	30 LBS.
HAYLAGE	20 LBS.
SAWDUST	17 LBS.

SOURCE: ASAE

NOTE: HEAPED LOADS HAVE SIGNIFICANTLY HIGHER CAPACITIES

WARNING: MAKE CERTAIN EVERYONE IS CLEAR OF EQUIPMENT BEFORE APPLYING POWER. FAILURE TO HEED MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH.

WARNING: (TRACTOR POWERED) DO NOT TOW AT SPEEDS IN EXCESS OF 20 MPH. FAILURE TO HEED MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH.

WARNING: YOU MUST OBSERVE ALL APPLICABLE TRAFFIC LAWS WHEN TRANSPORTING ON PUBLIC ROADWAYS. CHECK LOCAL LAWS FOR ALL HIGHWAY LIGHTING AND MARKING REQUIREMENTS. FAILURE TO HEED MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH.

Operating speed is dictated by the terrain over which you are traveling. Always use caution. Avoid traveling on slopes or hills that are unsafe.

CAUTION: FOR TRACTOR TOWED USE FLASHING WARNING LIGHTS WHEN TRANSPORTING ON ALL PUBLIC ROADWAYS, EXCEPT WHEN PROHIBITED BY LAW. CHECK FOR TRAFFIC CONSTANTLY. BE SURE YOU CAN SEE THAT NO ONE IS ATTEMPTING TO PASS YOU AND THAT ALL TRAFFIC IS SUFFICIENTLY CLEAR FROM YOU BEFORE MAKING ANY TURNS.

	<p>CAUTION</p> <p>Use Flashing Warning Lights when transporting on ALL highways (public roadways) at ALL times.</p> <p>EXCEPT WHEN PROHIBITED BY LAW!</p> <p>(Check w/local law enforcement)</p> <p style="font-size: small;">46-0001-62</p>
<p>By all State and Federal laws, implement lights do not replace the SMV (Slow-Moving Vehicle) Identification Emblem. All towed agricultural vehicles must display SMV Emblems when traveling LESS than 25 mph (40 Km/h).</p>	

REAR UNLOAD OPERATION

Whenever adjusting, cleaning, lubricating or otherwise servicing this forage box, you must shutoff and lockout power to the box. Because this box can be truck mounted or powered by a tractor, methods vary. On truck mounted units, the connection between the PTO and box is permanently installed and not intended to be disconnected. On trucks, disengage the PTO drive, turn off the engine, set the parking brake, remove the ignition keys and keep them in your possession to prevent anyone else from accidentally applying power to the box unexpectedly. For tractors, disengage the hydraulics, turn off the engine and set the brakes.

Throughout this manual, when directed to shutoff and lockout power, be familiar with the previously described procedures for the type of machine you are operating.

WARNING: MAKE CERTAIN EVERYONE IS WELL CLEAR OF EQUIPMENT BEFORE APPLYING POWER. FAILURE TO HEED MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH.

Tractor Pulled:

Always park the forage box and unloading tractor in a straight line. Shift the unloading tractor to "Neutral" or "Park". Set the brakes and turn power off.

Make sure all persons are well clear of the forage box and the unloading area.

The rear discharge door opens automatically by releasing its latches as the main aprons begin to move. The rear discharge door can spring open with extreme force when its latches release. See figure 1. Pressure of forage against the rear door causes it to spring open very quickly.

WARNING: THE REAR DISCHARGE DOOR CAN SPRING OPEN QUICKLY AND WITH EXTREME FORCE. KEEP ALL PERSONS WELL CLEAR OF THE FORAGE BOX AND UNLOADING AREA. FAILURE TO HEED MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH.

From the operator's seat, restart, and **SLOWLY** engage the apron chains to open the rear door. Once the door opens, regulate the discharge flow with the engine speed. Do not operate above rated engine speed.

Unloading is best observed from the operator's seat. Keep moving the forage box forward to prevent silage from being carried underneath into the main apron chain return area.

The front of the box has a plexiglass window for convenient observation.

FIGURE 2. REAR OPENING DISCHARGE DOOR CAUTION - QUICK RELEASE

WARNING: DO NOT STEP UP ON ANY PART OF THE FORAGE BOX AT ANY TIME. FAILURE TO HEED MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH.

The unloading process described is to be performed by the operator alone. This will eliminate unexpected “start-ups” and minimize other hazards that could result by more than one person in control. If the forage box should become clogged, shut off all power to the forage box and wait for all motion to stop. Shut off and lockout power. Then clean out the machine.

When finished unloading reduce engine speed to idle and disengage the truck PTO drive or the tractor hydraulics. Pull the rear unload box straight ahead to pull the door away from the unloaded pile of forage. When free, gravity will allow the door to swing shut and the door latches will engage the apron chain links to secure it shut. Observe that this happens properly.

WARNING: SHUT OFF AND LOCK OUT POWER BEFORE CLEANING, ADJUSTING, LUBRICATING OR SERVICING THIS MACHINE. FAILURE TO HEED MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH.

Allow box to completely clean out the last load of forage. It is recommended to lube the rear unload box before storage to exclude moisture from bearings. Apply oil to roller chain drives with gravity oil luber and to the apron chains with a brush. This is also a good time to inspect all adjustments and check for parts that need repair or replacement. Performing these tasks now will guarantee that the box is ready for use at the beginning of the next season.

Never use “live” power to aid in the clean-out of a clogged machine. If any mechanism fails, move the forage box to a safe work area and then repair the mechanism before proceeding with unloading of the forage. If repairs require removal of forage from inside the forage box, remove the rear discharge door (bolted hinges on top of each side) and empty the forage manually by hand through the rear opening.

DANGER: NEVER ENTER THE FORAGE BOX FOR ANY REASON WITHOUT FIRST SHUTTING OFF AND LOCKING OUT POWER. FAILURE TO HEED MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH.

Never enter the forage box for any reason if there is any possibility of power being applied to the unit.

LUBRICATION DIAGRAM

LUBRICATION

WARNING: SHUT OFF AND LOCK OUT POWER BEFORE CLEANING, ADJUSTING, LUBRICATING OR SERVICING THIS MACHINE. FAILURE TO HEED MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH.

DAILY LUBRICATION

(every 8-10 loads)

(L1)

Oil (3) roller chains on apron drive. This is done by opening the ball valve on the gravity oiler while unloading, once per day.

WARNING: DO NOT STAND BEHIND UNIT WHILE PERFORMING THIS OPERATION.

(L2)

Refill the gravity oiler at the beginning of each day.

(L3)

Grease three jackshaft bearings on the rear driveshaft (each end, one @ center).

(L4)

Oil (4) rear gate latch pivot bolts.

(L5)

Grease (3) main apron shaft bearings.

END OF CROP CLEANUP AND MAINTENANCE

Allow box to completely clean out last load of forage. Clean out all forage material from inside the box and on the outside of the box.

It is recommended to lube the forage box before storage to exclude moisture from bearings. Apply oil to roller chain drives with the gravity oil luber and to the main apron chains with a brush.

It is also a good time to inspect all adjustments and check for parts that need repair or replacement. Performing these tasks now will guarantee that the forage box is ready for use at the beginning of the next season.

ADJUSTMENTS

WARNING: SHUT OFF AND LOCK OUT POWER BEFORE CLEANING, ADJUSTING, LUBRICATING OR SERVICING THIS MACHINE. FAILURE TO HEED MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH.

(A1)

Correct tension on the apron chains is when the apron chain slat is 1/8" to 1/4" off the return slides (three feet from the front of the box). To tighten chains, tighten the adjuster bolts at each end of the front sprocket shafts. Each apron chain has its own sprocket shaft. Tighten the adjuster bolts at each end of the shaft equally.

The roller chain drives are tensioned by automatic spring loaded tension blocks. Periodically tighteners will need to be adjusted to maintain proper spring tension. Springs should be compressed to obtain approximately 5" overall length.

GATE DELAY PACKAGE

(#8100-Gate)

GATE DELAY ADJUSTMENTS

When the gate is completely closed (Tight to rear upright) cable and eyebolt assembly should be adjusted so cable has no slack. Cable should be tight but not overtightened. If cable and eyebolt is overtightened lower cylinder will trip out of the L-shaped slot on the lower bracket too soon and the gate will try to close before the cylinder is stroked out. If the cable and eyebolt is too loose the lower cylinder will not trip out of the L-shaped slot and the cylinder will reach its maximum stroke and the gate will still not be in the closed position. The gate will be held open by the top cylinder bracket and the bracket may become damaged over time. Eyebolt and cable will need to be adjusted periodically to maintain proper operation.

KEY	PART NO.	DESCRIPTION	KEY	PART NO.	DESCRIPTION
1	55-0095	1/8" to 3/8" NPT Reducer	11	952-0007-1	7-1/4" Nylon Tie Strap
2	30-0015	1/4x90 Degree Elbow	12	25-8098	Cable/Eyebolt Assy.
3	25-8095	Oil Reservoir Assembly	13	25-8097-1	Lower Sleeve Spacer
4	55-0097	3/8 to 3/8" Hydraulic Nipple	14	25-8093-1	Lower Shaft Plate Assy.
5	55-0094	Flow Control Valve	15	25-8095-6	Top Copper Line Assy.
6	55-0096	3/8 NPT x 90 Degree Male Pipe Elbow	16	25-8101	Ground Control Rod Assy. W/Grip
7	25-8096	Gate Release Trip Arm Assembly	17	51-0007	Handle Grip
8	25-8092-1	Gate Regulator Top Shaft Assy.	18	933-3804	5/16 x 4" Eyebolt
9	25-8090-1	Top Cylinder Bracket Assy.	19	825-25-1Z	1/4x1" Self Tapping Screw
10	55-0093	Hydraulic Cylinder
