- Quick Start Guide

Contents

Installing the Software

1 Insert the CD into the CD drive.

Note: If the install screen does not launch automatically, open the folders on the CD and double-click the setup.exe file.

2 The Micro Innovations® software install window will appear. Select **Webcam Driver** to begin the installation.

3 The InstallShield® Wizard will guide you through the rest of the Webcam Driver installation. Click **Next** to continue.

DIGITAL INNOVATIONS®

4 The software will automatically choose a default destination folder, or you may choose the destination folder yourself. Click **Next** to continue.

5 Click **Install** to begin the installation of the Webcam Software.

6 When the Webcam Software has completed installation, click **Finish** to exit the wizard. Proceed to Step 7 to install the ooVoo™ Software.

DIGITAL INNOVATIONS®

7 The Micro Innovations® software install window will still be active on the desktop. Select **ooVoo™ Software** to begin the installation.

8 The ooVoo™ InstallShield® Wizard screen will appear. Click **Next** to begin the installation of the ooVoo™ Software.

9 The software will automatically choose a default destination folder, or you may choose the destination folder yourself. Click **Install** to continue.
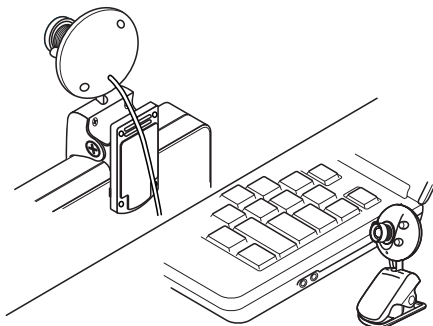

10 Follow the instructions on the screen to create your ooVoo™ account. Use the ooVoo™ login screen to sign-in to begin chatting with your camera.

Restart your computer after completing the software installation proceedures.

# Installing your New Webcam

1

Mount webcam above the computer monitor or use on your desk as a standalone camera.

2

Plug in microphone cable to microphone jack, and USB cord into an available USB port on the computer. USB ports are identified as ⟵⟶.
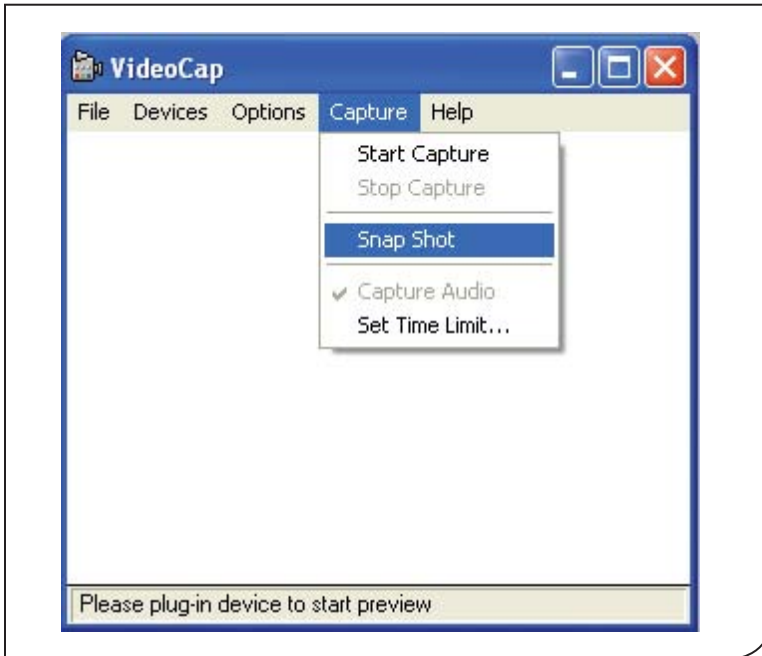

3

Ball Joint

Rotate the ball joint to adjust the angle of view.

4

Use the switch on the cord to adjust the LED brightness on the webcam's face.
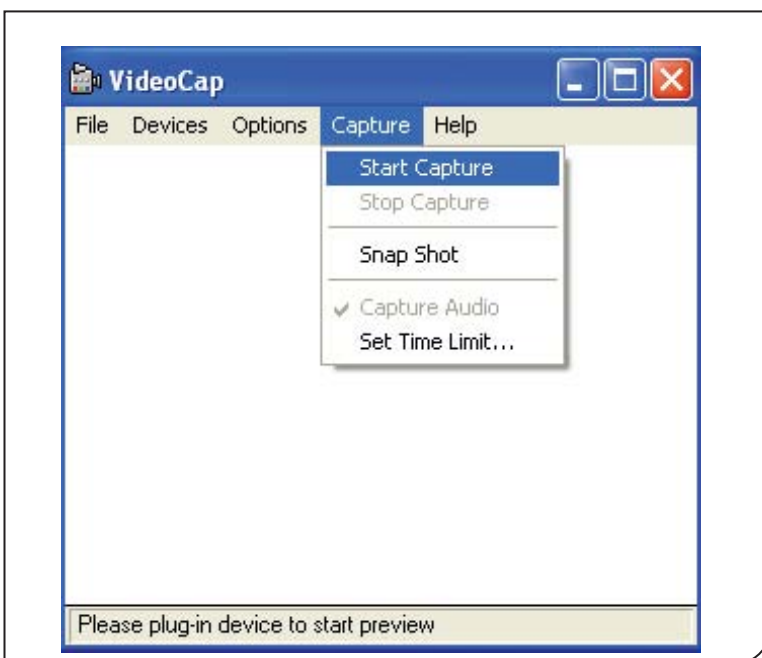

Capturing a Photograph

1 Launch VideoCap from your desktop.

VideoCap

Click on **Capture**. Click on **Snap Shot**.

After the image has been captured, it will open in your default photo viewing application.
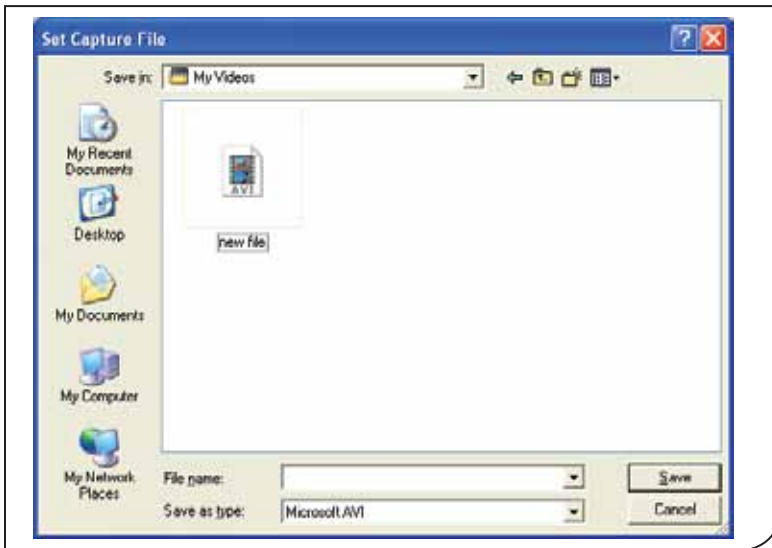

Capturing a Video

1 Launch VideoCap from your desktop.

VideoCap

Click on **Capture**. Click on **Start Capture**.

2 The very first time you are recording video, the Set Capture File window will appear. Navigate to your desired destination, choose a file name, and click **Save**.

Note: This step will be skipped if this is not your first time capturing video.

3 Click **OK** to start capturing video.

4 To stop capturing video, click on **Capture**. Click on **Stop Capture**.

Setting Webcam Options

The software has many options available to personalize your settings.

1 To select or change the folder where your videos will be automatically saved, click on **File** and then select **Set Capture File**.

2 Navigate to the desired folder and click **OK**. The default folder is My Documents.

3 The **Devices** menu allows you to switch between your currently installed video, photo, or audio capturing devices (if applicable).

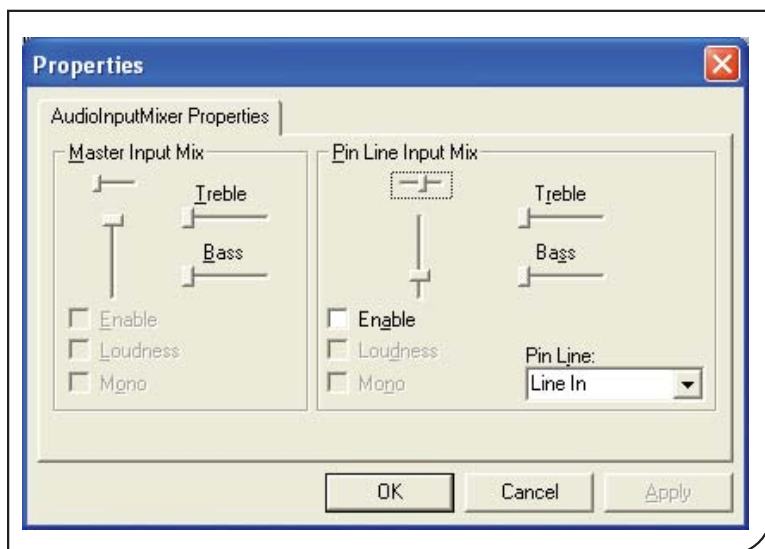

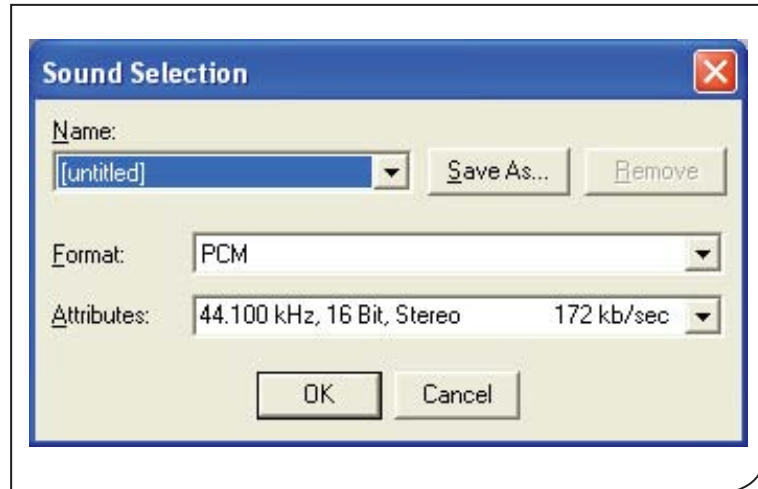

4 The **Preview** option allows you to view on your screen what the camera is currently seeing. It is selected as a default.
