## Chapter 1. Getting started

This User's Guide contains detailed information on the ThinkVision™ L171p Flat Panel Monitor. For a quick overview, please see the Setup Poster that was shipped with your monitor.

---

### Shipping contents

The product package should include the following items:

- *ThinkVision L171p Flat Panel Monitor Setup Poster*
- *Monitor Safety, Troubleshooting, and Warranty Guide*
- *Reference and Driver CD*
- ThinkVision L171p Flat Panel Monitor
- Power Cord
- Analog Interface Cable - Attached to monitor

**Note:** To attach a VESA mount, please see "Detaching the monitor stand" on page 2-7.

---

### Product overview

This section will provide information on adjusting monitor positions, setting user controls, and using the cable lock slot.

## Types of adjustments

Please see the illustration below for an example of the tilt range.

## Tilt/Swivel

With the built-in pedestal, you can tilt and swivel the monitor for the most comfortable viewing angle.

## Height Adjustment

After pressing the top of the monitor, remove the fixed pin and adjust the height of the monitor.

## Monitor Pivot

1. In locked/down Position
  - Tilt upwards, so that lower edge of monitor clears the stand.
  - Rotate clockwise until the monitor stops at 90 °.
2. Extended Position
  - Rotate clockwise until the monitor stops at 90 °.

## User controls

Your monitor has controls on the front which are used to adjust the display.

For information on how to use these controls, please see “Adjusting your monitor image” on page 2-3.

## Cable lock slot

Your monitor is equipped with a cable lock slot located on the rear of your monitor (in the lower right corner). Please see the instructions that came with the cable lock to learn how to attach it.

---

## Setting up your monitor

This section provides information to help you set up your monitor.

### Connecting and turning on your monitor

**Note:** Be sure to read the Safety Information located in the *Monitor Safety, Troubleshooting, and Warranty Guide* before carrying out this procedure.

1. Power off your computer and all attached devices, and unplug the computer power cord.

2. Connect the analog signal cable to the video port on the back of the computer.

**Note:** One end of the signal cable is already pre-attached to your monitor.

Connect the digital cable to the DVI connector of the monitor and the other end on the back of the computer.

**Note:** The digital cable is not included with the monitor.

Plug the monitor power cord and the computer cord into grounded electrical outlets.

Power on the monitor and the computer.

To install the monitor driver, insert the *Reference and Driver CD*, click **Install driver**, and follow the on-screen instructions.

To optimize your monitor image, press the Automatic Image Setup key. Automatic image setup requires that the monitor is warmed up for at least 15 minutes. This is not required for normal operation.

**Note:** If automatic image setup does not establish the image that you prefer, perform manual image setup. See “Manual image setup” on page 3-4 .

---

## Registering your product

Please take a few moments to register your product and provide us with information that will help IBM to better serve you in the future. Your feedback is valuable to us in developing products and services that are important to you, as well as in developing better ways to communicate with you. Register your option on the IBM Web site at <http://www.ibm.com/pc/register/>

IBM will send you information and updates on your registered product unless you indicate on the Web site questionnaire that you do not want to receive further information.

---

## Chapter 2. Adjusting and using your monitor

This section will give you information on adjusting and using your monitor.

---

### Comfort and accessibility

Good ergonomic practice is important to get the most from your personal computer and to avoid discomfort. Arrange your workplace and the equipment you use to suit your individual needs and the kind of work that you perform. In addition, use healthy work habits to maximize your performance and comfort while using your computer.

For more detailed information on any of these topics, visit the IBM Healthy Computing Web site at: <http://www.ibm.com/pc/ww/healthycomputing>

### Arranging your work area

Use a work surface of appropriate height and available working area to allow you to work in comfort.

Organize your work area to match the way you use materials and equipment. Keep your work area clean and clear for the materials that you typically use and place the items that you use most frequently, such as the computer mouse or telephone, within the easiest reach.

Equipment layout and setup play a large role in your working posture. The following topics describe how to optimize equipment setup to achieve and maintain good working posture.

### Positioning and viewing your monitor

Position and adjust your computer monitor for comfortable viewing by considering the following items:

- **Viewing distance:** Optimal viewing distances for monitors range from approximately 510mm to 760mm (20 in to 30 in) and can vary depending on ambient light and time of day. You can achieve different viewing distances by repositioning your monitor or by modifying your posture or chair position. Use a viewing distance that is most comfortable for you.
- **Monitor height:** Position the monitor so your head and neck are in a comfortable and neutral (vertical, or upright) position. If your monitor does not have height adjustments, you might have to place books or other sturdy objects under the base of the monitor to achieve the desired height. A general guideline is to position the monitor such that the top of the screen is at or slightly below your eye-height when you are comfortably seated. However, be sure to optimize your monitor height so the line of site between your eyes and the center the monitor suits your preferences for visual distance and comfortable viewing when your eye muscles are in a relaxed state.
- **Tilt:** Adjust the tilt of your monitor to optimize the appearance of the screen content and to accommodate your preferred head and neck posture.
- **General location:** Position your monitor to avoid glare or reflections on the screen from overhead lighting or nearby windows.

The following are some other tips for comfortable viewing of your monitor:

- Use adequate lighting for the type of work you are performing.
- Use the monitor brightness, contrast, and image adjustment controls, if equipped, to optimize the image on your screen to meet your visual preferences.
- Keep your monitor screen clean so you can focus on the screen's contents.

Any concentrated and sustained visual activity can be tiring for your eyes. Be sure to periodically look away from your monitor screen and focus on a far object to allow your eye muscles to relax. If you have questions on eye fatigue or visual discomfort, consult a vision care specialist for advice.

## Quick tips for healthy work habits

The following information is a summary of some important factors to consider to help you remain comfortable and productive while you use your computer.

- **Good posture starts with equipment setup:** The layout of your work area and the setup of your computer equipment have a large effect on your posture while using your computer. Be sure to optimize the position and orientation of your equipment by following the tips outlined in “Arranging your work area” on page 2-1 so you can maintain a comfortable and productive posture. Also, be sure to use the adjustment capabilities of your computer components and office furniture to best suit your preferences now and as your preferences change over time.
- **Minor changes in posture can help avoid discomfort:** The longer you sit and work with your computer, the more important it is to observe your working posture. Avoid assuming any one posture for an extended period of time. Periodically make minor modifications in your posture to help deter any discomforts that might arise. Make use of any adjustments that your office furniture or equipment provide to accommodate changes in posture
- **Short, periodic breaks help ensure healthy computing:** Because computing is primarily a static activity, it is particularly important to take short breaks from your work. Periodically, stand up from your work area, stretch, walk for a drink of water, or otherwise take a short break from using your computer. A short break from work gives your body a welcome change in posture and helps to ensure you remain comfortable and productive while you do work.

## Accessibility information

IBM is committed to providing greater access to information and technology to people with disabilities. With assistive technologies, users can access information in the way most appropriate to their disability. Some of these technologies are already provided in your operating system; others can be purchased through vendors or accessed at: <http://www.ibm.com/able/>

## Adjusting your monitor image

This section describes the user control features used to adjust your monitor image.

### Using the direct access controls

The direct access controls can be used when the On Screen Display (OSD) is not displayed.

**Note:** The direct access controls are blue.

Table 2-1. Direct access controls

Icon	Control	Description
	Image Setup	Activates automatic image adjustment.
	Brightness	Direct access to Brightness adjustment.
	Input Change	Switches the video input source.

### Using the On-Screen Display (OSD) controls

The settings adjustable with the user controls are viewed through the On-Screen Display (OSD), as shown below.

To use the controls:

1. Press  to open the main OSD menu.
2. Use  or  to move among the icons. Select an icon and press  to access that function. If there is a sub-menu, you can move between options using  or , then press  to select that function. Use  or  to make adjustments. Press  to save.
3. Press  to move backwards through the sub-menus and exit from the OSD.
4. Press and hold  for 10 seconds to lock the OSD. This will prevent accidental adjustments to the OSD. Press and hold  for 10 seconds to unlock the OSD and allow adjustments to the OSD.

Table 2-2. OSD functions

OSD Icon on Main Menu	Submenu	Description	Controls and Adjustments (Analog)		Controls and Adjustments (Digital)	
 Brightness/ Contrast	 Brightness	Adjusts overall brightness	 ←	 →	Same as Analog	
	 Contrast	Adjusts difference between light and dark areas	 ←	 →	Controls Locked - not required for digital input	
 Image Position	 Horizontal Position	Moves the image left or right.	 ←	 →		
	 Vertical Position	Moves the image up or down.	 ←	 →		
 Image Setup	 Automatic	Automatically optimizes the image.				
	 Manual	Manually optimizes the image. See "Manual image setup" on page 3-4. <ul style="list-style-type: none"> <li>• Clock</li> <li>• Phase</li> <li>• Save</li> </ul>				
 Image Properties	 Color	Adjusts intensity of red, green, and blue.				Same as Analog
	Preset mode	<ul style="list-style-type: none"> <li>• Default</li> <li>• Reddish</li> <li>• Bluish</li> </ul>				
	Custom	<ul style="list-style-type: none"> <li>• Red: Increases or decreases the saturation of 'red' in the image.</li> <li>• Green: Increases or decreases the saturation of 'green' in the image.</li> <li>• Blue: Increases or decreases the saturation of 'blue' in the image.</li> <li>• Save: Saves the custom color choices.</li> </ul>				
	 Sharpness	Changes the clearness of image.				
	Mode 1	<ul style="list-style-type: none"> <li>• Adjusts the image softer.</li> </ul>				
Default	<ul style="list-style-type: none"> <li>• Returns the image sharpness to the default settings.</li> </ul>					
Mode 2	<ul style="list-style-type: none"> <li>• Adjust the image sharper.</li> </ul>					

Table 2-2. OSD functions

OSD Icon on Main Menu	Submenu	Description	Controls and Adjustments (Analog)	Controls and Adjustments (Digital)
	 Input video signal	This monitor can accept video signals through two different connectors. Most desktop computers use a D-SUB connector. Select digital among OSD Controls when you use DVI connector.  - Selects D-SUB (Analog) - Selects DVI-Digital		Same as Analog
 Options	 Information	Shows resolution, refresh rate, and product details. <b>Note:</b> This screen does not allow any changes to the settings.		Same as Analog
	 Language	This section lists the languages supported by your monitor. <b>Note:</b> The language chosen only affects the language of the OSD. It has no effect on any software running on the computer.		
 Options	 Menu Position	Menu position adjusts menu location on the screen.		Same as Analog
	Default	Default returns the menu position to the default settings.		
	Custom	<ul style="list-style-type: none"> <li>Horizontal: Changes the horizontal position of the OSD.</li> <li>Vertical: Changes the vertical position of the OSD.</li> </ul>		
	 Reset	<ul style="list-style-type: none"> <li>Cancel</li> <li>Reset</li> <li>Save</li> </ul> Resets monitor to the original factory settings.		
	Accessibility	Controls button and menu settings for accessibility preferences.  Button repeat rate: Select ← or → to change. <ul style="list-style-type: none"> <li>Off</li> <li>Default</li> <li>Slow</li> </ul>  Menu time out: Sets the length of time the OSD will remain active after the last time a button is pressed.		

---

## Selecting a supported display mode

The display mode the monitor uses is controlled by the computer. Therefore, refer to your computer documentation for details on how to change display modes.

The image size, position and shape might change when the display mode changes. This is normal and the image can be readjusted using automatic image setup and the image controls.

Unlike CRT monitors, which require a high refresh rate to minimize flicker, LCD or Flat Panel technology is inherently flicker-free.

**Note:** If your system has previously been used with a CRT monitor and is currently configured to a display mode outside the range of this monitor, you may need to re-attach the CRT monitor temporarily until you have re-configured the system; preferably to 1280 x 1024 at 60 Hz, which is the Native Resolution Display mode.

The display modes shown below have been optimized at the factory.

*Table 2-3.* Factory set display modes

Addressability	Refresh rate
640 x 350	70 Hz
640 x 480	60 Hz, 67 Hz, 72 Hz, 75 Hz
720 x 400	70 Hz
800 x 600	60 Hz, 72 Hz, 75 Hz
1024 x 768	60 Hz, 70 Hz, 75 Hz
1280 x 1024	60 Hz, 70 Hz, 75 Hz

---

## Image rotation

Before rotating the monitor, you should set-up your computer to rotate the image. Rotating the image may require special imaging software or you may find that your computer is preloaded with video graphic drivers that enable image rotation. Check the Graphic Properties setting on your computer to see if this feature is available.

Try these steps to check if image rotation is available on your computer.

1. Right-click on the desktop and click **Properties**.
2. Select the **Settings** tab and click **Advanced**.
3. If you have **ATI**, select the **Rotation** tab and set the preferred rotation.  
If you have **nVidia**, click the **nVidia** tab, in the left-hand column select **NVRotate**, and then select the preferred rotation.  
If you have **Intel**, select the Intel graphics tab, click **Graphic Properties**, select the **Rotation** tab, and then set the preferred rotation.

Check with the manufacturer of your computer to see if graphic drivers with image rotation can be downloaded from their support website.

---

## Understanding power management

Power management is invoked when the computer recognizes that you have not used your mouse or keyboard for a user-definable period. There are several states as described in the table below.

For optimal performance, switch off your monitor at the end of each working day, or whenever you expect to leave it unused for long periods during the day.

*Table 2-4.* Power indicator

State	Power Indicator	Screen	Restoring Operation	Compliance
On	Steady green	Normal		
Standby/Suspend	Flashing green	Blank	Press a key or move the mouse  There may be a slight delay before the image reappears. <b>Note:</b> Standby also occurs if there is no image output to the monitor.	ENERGY STAR
Off	Off	Blank	Press a key or move the mouse  There may be a slight delay before the image reappears.	ENERGY STAR

---

## Caring for your monitor

Be sure to turn off the power before you perform any maintenance on the monitor.

**Do not:**

- Apply water or liquid directly to your monitor.
- Use solvents or abrasives.
- Use flammable cleaning materials to clean your monitor or any other electrical equipment.
- Touch the screen area of your monitor with sharp or abrasive items. This type of contact may cause permanent damage to your screen.
- Use any cleaner which contains an anti-static solution or similar additives. This may harm the coating of the screen area.

**Do:**

- Lightly dampen a soft cloth with water and use this to gently wipe the covers and the screen.
- Remove grease or finger marks with a damp cloth and a little mild detergent.

---

## Detaching the monitor stand

After placing the monitor face down on a clean surface or soft cloth, remove the four screws from the stand to remove it from the monitor.

## Chapter 3. Reference information

This section contains monitor specifications, instructions to manually install the monitor driver, troubleshooting information, and service information.

### Monitor specifications

*Table 3-1.* Monitor specifications for type-model 9417-Hxx

Dimensions	Height	381.2 mm (15.0 in.)
	Depth	204.7 mm (8.1 in.)
	Width	367.5 mm (14.5 in.)
Stand	Tilt	Range: -0°, +30°
	Swivel	Range: -45°, +45°
	Lift	Range: 110.0mm
	Pivot	Yes (clockwise 90 degree)
VESA mount	Supported	100 mm (3.94 in.)  IBM radial arm sold separately.
Image	Viewable image size	430 mm (17.0 in.)
	Maximum height	270.34 mm (10.6 in.)
	Maximum width	337.92 mm (13.3 in.)
	Pixel pitch	0.264 mm (.010 in.) (V)
Power input	Supply voltage	90-264VAC (100~240VAC+/-10%)
	Max supply current	1.5 A at 120 V ac
Power consumption	Normal operation	< 40 W
	Standby/Suspend	< 2W (Analog), <3W (Digital)
	Off	< 1W at 100Vac & 240Vac
Video input (Analog)	Input signal	Analog Direct Drive, 75 ohm 0.7 V
	Horizontal addressability	1280 pixels (max)
	Vertical addressability	1024 lines (max)
	Clock frequency	135 MHz

**Table 3-1.** Monitor specifications for type-model 9417-Hxx

Video input (Digital)	Interface	DVI
	Input Signal	VESA TMDS (Panel Link™)
	Horizontal addressability	1280 pixels (max)
	Vertical addressability	1024 lines (max)
	Clock frequency	135 MHz
Communications	VESA DDC	CI
Supported Display Modes (VESA Standard modes between noted ranges)	Horizontal frequency	30 kHz - 81 kHz
	Vertical frequency	56 Hz - 76 Hz
	Native Resolution	1280 x 1024 at 60 Hz
Temperature	Operating	10° to 35° C (5° to 95° F)
	Storage	-20° to 60° C (-4° to 140° F)
	Shipping	-20° to 60° C (-4° to 140° F)
Humidity	Operating	10% to 80% non-condensing
	Storage	5% to 95% non-condensing
	Shipping	5% to 95% non-condensing

## Troubleshooting

If you have a problem setting up or using your monitor, you might be able to solve it yourself. Before calling your dealer or IBM, try the suggested actions that are appropriate to your problem.

**Table 3-2.** Troubleshooting

Problem	Possible cause	Suggested action	Reference
The words "Out of Range" are shown on the screen, and the power indicator is flashing green.	The system is set to a display mode which is not supported by the monitor.	<p>If you are replacing an old monitor, reconnect it and adjust the display mode to within the specified range for your new monitor.</p> <p>If using a Windows system, restart the system in safe mode, then select a supported display mode for your computer.</p> <p>If these options do not work, contact the IBM Support Center.</p>	"Selecting a supported display mode" on page 2-6

**Table 3-2.** Troubleshooting

<b>Problem</b>	<b>Possible cause</b>	<b>Suggested action</b>	<b>Reference</b>
The image quality is unacceptable.	The video signal cable is not connected with the monitor or system completely.	Be sure the signal cable is firmly plugged into the system and monitor.	"Connecting and turning on your monitor" on page 1-4
	The color settings may be incorrect.	Select another color setting from the OSD menu.	"Adjusting your monitor image" on page 2-3
	The automatic image setup function was not performed.	Perform automatic image setup.	"Adjusting your monitor image" on page 2-3
The power indicator is not lit and there is no image.	<ul style="list-style-type: none"> <li>• The monitor's power switch is not switched on.</li> <li>• The power cord is loose or disconnected.</li> <li>• There is no power at the outlet.</li> </ul>	<ul style="list-style-type: none"> <li>• Be sure the power cord is connected properly.</li> <li>• Be sure the outlet has power.</li> <li>• Power on the monitor.</li> <li>• Try using another power cord.</li> <li>• Try using another electrical outlet.</li> </ul>	"Connecting and turning on your monitor" on page 1-4
Screen is blank and power indicator is steady amber or flashing green	The monitor is in Standby/Suspend mode	<ul style="list-style-type: none"> <li>• Press any key on the keyboard or move the mouse to restore operation.</li> <li>• Check the Power Options settings on your computer.</li> </ul>	"Understanding power management" on page 2-7
The power indicator is green, but there is no image.	The video signal cable is loose or disconnected from the system or monitor.	Be sure the video cable is connected with the system properly.	"Connecting and turning on your monitor" on page 1-4
	The monitor brightness and contrast are at the lowest setting.	Adjust the brightness and contrast setting on the OSD menu.	"Adjusting your monitor image" on page 2-3
One or more of the pixels appear discolored	This is a characteristic of the LCD technology and is not an LCD defect.	If there are more than five pixels missing, contact the IBM Support Center.	Appendix A, "Service and Support," on page A-1

Table 3-2. Troubleshooting

Problem	Possible cause	Suggested action	Reference
<ul style="list-style-type: none"> <li>Fuzzy lines in text or a blurry image.</li> <li>Horizontal or vertical lines through the image.</li> </ul>	<ul style="list-style-type: none"> <li>Image setup has not been optimized</li> <li>Your system Display Properties setting have not been optimized.</li> </ul>	Adjust the resolution settings on your system to match the native resolution for this monitor: 1280 x 1024 at 60 Hz.	<p>“Adjusting your monitor image” on page 2-3</p> <p>“Manual image setup”</p>
		Perform automatic image setup. If automatic image setup does not help, perform manual image setup.	“Selecting a supported display mode” on page 2-6
		When working in the native resolution, you may find additional improvements by adjusting the Dots Per Inch (DPI) setting on your system.	See the Advanced section of your system’s display properties.

## Manual image setup

If automatic image setup does not establish the image that you prefer, perform manual image setup.

**Note:** Have your monitor powered on for about 15 minutes, until the monitor warms up.

- Press  at the bottom of the monitor to open the OSD menu.
- Use  or  to select  and press  to access.
- Use  or  to select **Clock** and **Phase** adjustment.
  - Clock** (pixel frequency) adjusts the number of pixels scanned by one horizontal sweep. If the frequency is not correct, the screen shows vertical stripes and the picture does not have the correct width.
  - Phase** adjusts the phase of the pixel clock signal. With a wrong phase adjustment, the picture has horizontal disturbances in light picture.
- When the image no longer looks distorted, save the Clock and Phase adjustments.
- Press  to leave the OSD menu.

## Manually installing the monitor driver

Below are steps for manually installing the monitor driver in Microsoft® Windows XP® and Microsoft Windows 2000 Professional. Please see the Install Driver section of the *Reference and Driver CD* for automatic installation.

### Installing the monitor driver in Windows XP

To use the Plug and Play feature in Windows XP, files should be loaded from the *Reference and Driver CD*.

**Note:** This section must be completed before continuing with the Windows XP automatic image setup.

1. Turn off the computer and all attached devices.
2. Ensure that the monitor is connected correctly.
3. Turn on the monitor and then the system unit. Allow the system to boot into Windows XP.
4. Open the **Display Properties** window by clicking **Start → Settings → Control Panel**, and then double-clicking the **Display** icon.
5. Click the **Settings** tab.
6. Click the **Advanced** button.
7. Click the **Monitor** tab.
8. Click the **Properties** button.
9. Click the **Drivers** tab.
10. Open the **Hardware Update Wizard** window by clicking on **Update Driver**, and then click **Next**.
11. Select **Install from a list or Specific location(Advanced)**, and then click **Next**.
12. Insert the Setup CD into the CD drive, then click the **Have Disk** button.
13. Click **OK**.
14. Ensure that the CD drive letter is selected.
15. Choose **ThinkVision L171p Monitor** and click **OK**. The files will be copied from the CD to your hard disk drive.
16. Close all open windows and remove the CD.
17. Restart the system. The system will automatically select the maximum refresh rate and corresponding Color Matching Profiles.

**Note:** On LCD monitors, unlike CRTs, a faster refresh rate does not improve display quality. IBM recommends using either 1280 x 1024 at a refresh rate of 60 Hz, or 640 x 480 at a refresh rate of 60 Hz.

## Installing the monitor driver in Windows 2000

To use the Plug and Play feature in Windows 2000, files should be loaded from the *Reference and Driver CD*.

**Note:** This section must be completed before continuing with the Windows 2000 automatic image setup.

1. Turn off the computer and all attached devices.
2. Ensure that the monitor is connected correctly.
3. Turn on the monitor and then the system unit. Allow the system to boot into Windows 2000.
4. Open the **Display Properties** window by clicking **Start → Settings → Control Panel**, and then double-clicking the **Display** icon.
5. Click the **Settings** tab.
6. Click the **Advanced** button.
7. Click the **Monitor** tab.
8. Click the **Properties** button.
9. Click the **Drivers** tab.

10. Open the **Upgrade Device Driver Wizard** window by clicking on **Update Driver**, and then click **Next**.
11. Select **Display a list of the known drivers for this device so that I can choose a specific driver**, and then click **Next**.
12. Insert the Setup CD into the CD drive, then click the **Have Disk** button.
13. Click **OK**.
14. Ensure that the CD drive letter is selected.
15. Choose **ThinkVision L171p Monitor** and click **OK**. The files will be copied from the CD to your hard disk drive.
16. Close all open windows and remove the CD.
17. Restart the system. The system will automatically select the maximum refresh rate and corresponding Color Matching Profiles.

**Note:** On LCD monitors, unlike CRTs, a faster refresh rate does not improve display quality. IBM recommends using either 1280 x 1024 at a refresh rate of 60 Hz, or 640 x 480 at a refresh rate of 60 Hz.

### **Getting further help**

If you still can't solve your problem, please contact the IBM Support Center. For more information on contacting the IBM Support Center, please see Appendix A, "Service and Support," on page A-1.

## Service information

### Product numbers

The product number for your monitor is located on the side of the display bezel as shown below.

### Customer responsibilities

The warranty does not apply to a product which has been damaged due to accident, misuse, abuse, improper installation, usage not in accordance with product specifications and instructions, natural or personal disaster, or unauthorized alterations, repairs or modifications.

The following are examples of misuse or abuse and not covered by warranty:

- Images burned onto the screen of a CRT monitor. Burned image is preventable by utilizing a moving screen saver or power management.
- Physical damage to covers, bezel, base and cables.
- Scratches or punctures on monitor screens.

## Service parts

The following parts are for use by servicers and dealers authorized by Lenovo to support the customer warranty. Parts are for service use only. The table below shows information for model 9417-Hxx.

*Table 3-3.* List of service parts

<b>FRU (Field Replaceable Unit) Part number</b>	<b>Description</b>	<b>Color</b>	<b>Machine Type Model (MTM)</b>
30R5060	Monitor- L171p	Business Black	9417-HB7
30R5061	Monitor- L171p	Dual Tone (TCO'03) - Graphite Silver Bezel	9417-HG7
30R5047	Video cable		9417-HB7, HG7
30R5065	Stand	Black	9417-HB7, HG7

---

## Appendix A. Service and Support

The following information describes the technical support that is available for your product, during the warranty period or throughout the life of the product. Refer to your IBM Statement of Limited Warranty for a full explanation of IBM warranty terms.

---

### Online technical support

Online technical support is available during the life of your product through the Personal Computing Support Web site at <http://www.ibm.com/pc/support>.

During the warranty period, assistance for replacement or exchange of defective components is available. In addition, if your IBM product is installed in an IBM computer, you might be entitled to service at your location. Your technical support representative can help you determine the best alternative.

---

### Telephone technical support

Installation and configuration support through the IBM Support Center will be withdrawn or made available for a fee, at IBM's discretion, 90 days after the product has been withdrawn from marketing. Additional support offerings, including step-by-step installation assistance, are available for a nominal fee.

To assist the technical support representative, have available as much of the following information as possible:

- Product name
- Product number
- Proof of purchase
- Computer manufacturer, model, serial number (if IBM), and manual
- Exact wording of the error message (if any)
- Description of the problem
- Hardware and software configuration information for your system

If possible, be at your computer. Your technical support representative might want to walk you through the problem during the call.

For the support telephone number and support hours by country, refer to the following table. If the number for your country or region is not listed, contact your IBM reseller or IBM marketing representative. Response time may vary depending on the number and nature of the calls received.

Phone numbers are subject to change without notice. For the latest phone number list, go to <http://www.ibm.com/pc/support> and click **Support Phone List**.
