LOEWE.

Dear Customer,

Congratulations on your purchase of this high quality Loewe television. Loewe stands for innovative design, excellent quality and exceptional functionality. To ensure that your product retains these properties for as long as possible, please follow the operating and safety instructions contained in this manual.
This instruction manual will help you to get started.

Your Loewe Team

Setup

Installation possibilities:

- **as a desktop unit**
- – on a sideboard or table (Xelos SL 32 HD/37 HD.
- – Using a rotary table stand (Motor Unit) you can adjust your Spheros 32 HD or 37 HD easily with the remote control to suit your sitting position.

- **on a Flat-TV F-Stand**
  as a standing unit, manually rotatable.

- **Spheros 32 HD or 37 HD on the System Rack Cube 1, Cube 2**
  with motor control for rotating the TV set and shelves for DVD player, VCR etc.

- **as a wall unit**, the flat screen (LCD) can be hung on the wall like a picture. It can be tilted up to 5°.

Auxiliary devices such as VCRs, DVD players, Pay-TV decoders, Loewe sound systems Concertos/Certos can be connected to the Spheros Signal Box.

Operation
We have designed the TV set in such a way that it is easy to operate with menus. If you need information on operating the set, simply press the **i** key on the remote control to display the help texts, which will quickly enable you to understand the system.

If it is a matter of operating the TV, you can access a function directly from the index. This saves you from having to read through detailed operating instructions and is the reason, why this operating manual only explains the most important operating steps.

For your safety ...

For your own safety and to avoid unnecessary damage to your equipment, protect it against
- moisture, splashing and dripping water
- shock and mechanical stress
- cold, heat and extreme temperature fluctuations
- dust
- covering which obstructs air circulation
- tampering with the insides
Never place vases filled with water, lit candles etc. on the TV set.
If you have moved the set out of the cold into a warm environment, leave it switched off for about an hour because of the possible forming of condensation.

Lightning can damage your TV through the antenna and the mains. Therefore pull out the antenna and power plugs during thunderstorms and in longer periods of absence.

Only transport the unit in an upright position.

- Avoid metal parts, needles, paper clips, liquids, wax or similar getting into the TV set through the air venting slits in the rear panel. This can lead to short-circuits and possibly to fire. If something should get into the set switch it off immediately at the on/off switch, pull out the power plug and notify the after-sales service for inspection.

- The TV power plug must be easily accessible so that the TV can be disconnected from the power supply at all times.

- Lay the power cable so that it cannot be damaged. The power cable may not be kinked or laid over sharp edges, not stood on and not exposed to chemicals, the latter also applies to the device as a whole. A power cable with damaged insulation can lead to electric shocks and is a fire risk.

- When removing the power plug, pull the plug housing and not the cable. The wires in the plug could be damaged and cause a short circuit the next time it is plugged in.

- Your new TV has been built exclusively for use in a home environment. The warranty covers this normal use of the device.

- Only have repairs done by the Loewe Service.

→

6

Setup and cleaning

Only hold the housing for transporting and never the panel.
The front panel and the LCD screen underneath it are made of glass and may break if not properly handled. If the LCD screen is damaged (not the glass panel) and in case of leaking liquid crystal, wear rubber gloves to carry the device.
In case of contact with the skin, wash the affected areas thoroughly with water.

Note
During the whole period of use, pixel errors may appear on the screen in the form of lighter or darker spots, this phenomenon is typical for an LCD display. It is not a defect.

• Install the Spheros Signal Box and the screen with room for air circulation. The air vents may not be covered by objects such as magazines, table cloths, curtains etc.
• Check the strength of furniture (e.g. tables, sideboards) before placing the set on it.
• Take the swivel range into account when installing a set with a rotary motor unit.

• Make sure no bright light or sunlight falls onto the screen otherwise reflections will be caused and the brilliance of the picture lost.
• Do not place the Signal Box on edge but on its feet.
• Do not place naked flames, e.g. lit candles, on the set.

**Note on installing the flat screen (LCD):**
Observe the enclosed installation instructions depending on the type of set you have purchased and installation.
With the Xelos SL 32 HD and 37 HD types a stand (Xelos table stand) is usually delivered for the LCD.

Handling the mesh tube

Use the enclosed mesh tube to lay the screen, base, wall holder or rack cables tidily and guide the hose with the cables to the Signal box. This looks more elegant.
The diameter of the mesh tube widens when it is pushed together lengthwise (see figure). This makes it easier to push through the cables with plugs.
Cleaning the front panel

(Only for Spheros 32/37 HD)
The inside of the front panel and the LCD screen need to be cleaned from time to time. Only remove the front panel when the TV has been switched off and has cooled down. The metal frame of the LCD panel may reach a temperature of up to 60°C in operation !
• Hold the glass panel at the bottom right and left and pull the panel out of the guide about 4 cm.
• Push the glass panel up evenly.
• Unhook the glass panel at the top and remove.
Use a damp, soft cloth to clean the LCD screen and a glass cleaner for the glass panel.

Replacing the front panel:
• Make sure you do not damage the LCD screen with the fastening bolts on the front panel.
• Hang the glass panel into the guide rails at the top with both fastening bolts.
• Then press the glass panel down lightly onto the screen until it snaps into place.

Clean the other components such as the remote control and signal box with a damp, soft cloth only (without aggressive and abrasive cleaning agents).

7

Connect LCD screen and antenna(e) to the Signal Box

TFT-LCD monitor
Removing the connection cover
Do **not** just pull the cover (fig.) back over the connections.
Reach into the opening in the cover and pull it back slightly at the top until it snaps open. Then pull the cover up and out.

Connect both the system cables and the power cable to the LCD screen as shown in the figure.
Then replace the cover.

✳ The antenna sockets 1 and 2 are only available in the set version with ″Digital-TV upgrade kit 2 Sat/Twin-Sat CI″.
✳✳ The connection socket ″CONTROL″ is only available for Spheros 32/37 HD and designed for a Motor Unit!
Note: For optimum picture resolution use the "Digital Visual Interface Input DVI" only connecting cables less than 2 meters long.
8

Initial installation

Batteries

To insert or change the batteries, press the point marked by an embossed arrow. Push the cover of the battery compartment down and remove it. Insert the batteries of the alkaline manganese type LR 03 (AAA) with the correct polarity (+/-).

Then push the cover back on.

Note on disposal of batteries:

The original batteries do not contain any pollutants such as cadmium, lead and mercury. Used batteries do not belong in the domestic waste. They must be taken to the appropriate collection points according to the national laws. Ask your dealer.
Connecting

Antenna
Connect your antenna or cable system to the UHF/VHF antenna socket on the back of the Signal Box.

• In sets with the ″Digital-TV Upgrade Kit 2 Sat/Twin-Sat CI- or CIP″ connect the Sat antenna cable to the ″ANT-1″ and ″ANT-2″ sockets, in this way you can receive two satellite programs simultaneously, e.g. for PIP display, see fig. on page 9.
• In sets with ″Digital-TV Upgrade Kit 2-T/S″ connect the antennae to the Signal Box as shown below.
Power mains
After connecting the flat screen to the Signal Box, connect both devices to 230V/60Hz mains sockets.

Switching on

Press the On/Off button so that it is pressed in. Due to the LCD technology it takes about 2 minutes to reach full brightness.

Switch on/off

Automatic programming

Automatic programming of the TV set is started the first time you switch it on. Follow the menus.
First you have to select the menu language for your set. Then you specify which antenna you have connected to your TV and in what country you are using it. Then you start the station search. The TV set searches for, saves and sorts all programs which are freely receivable on your antenna system.
You then see a list of the stored stations in which you can mark your favorites. Finally log in your video recorders, decoders, Loewe audio system and Home Automation with the connection wizard and connect these to the TV set according to the illustrated connection plan.

Select the settings with the arrows on the ring ...

... confirm the settings with **OK**. You then move on to the next menu ...

... press this button if you want information about the settings.

You can repeat initial installation at any time, e.g. after moving house. Call the index in the main information (i button). Then select the item ″Repeat initial installation″. Then start ″Initial installation″ with **OK**.

Daily handling

Remote control RC3

Remote control for operating different Loewe units.

Operating the TV:
Set the rotary switch to "TV".

Ex-factory settings are: Loewe video recorder, Loewe DVD recorder and for STB (Set Top Box) the d-box common in Germany.
The remote control must be switched for operating a Loewe DVD player.

TV equipment

Functions marked by ✳ are not available in all types of TV sets but can usually be retrofitted. Ask your dealer if you are interested.
Menu contents may differ from the ones shown depending on your TV equipment.
Operation of the "PhotoViewer functions" or the "Digital Recorder", if available, are described in a separate operating manual.

You can show your TV equipment by pressing the **INFO** button on the remote control.

Select the "Equipment" line in the "Main information" menu.

Press the **OK** button.

Hide the menu again with the **END** button.

Use the drive buttons in TV- and STB position for VCR, DVD or Digital Recorder
You can switch over the six drive buttons both for TV and STB for operating a VCR or DVD player/recorder. Operation of the built-in Digital Recorder Plus is specified ex-factory.
First turn the switch to the main function TV or STB.

Press the **END** and ✳ **EPG** buttons at the same time (5 secs). The display at the top left of the remote control flashes twice.

Enter the numbers 988 one after the other. The display again flashes twice.

Now turn the switch to the required function for the drive buttons. DVD, VCR or TV if the Digital Recorder is to be used.
Press the **# PIP** button to complete the setting. The display flashes twice.

The setting is saved.

Switching on/off

Your TV set is equipped with an economy standby power supply unit. On standby the power consumption drops to low power. If you want to save even more electricity, switch the set off at the On/Off switch (Signal Box).
But remember that EPG data will then be lost and timed recordings will not be made.

When the TV is switched on, you can switch it to standby with the blue on/off button. The red standby indicator on the set
lights up. If the green indicator is also alight a timer recording on the VCR is in progress, EPG data input is taking place or radio mode without on-screen display is active.

From standby it is best to switch back on with the blue On/Off button or with a numeric key (station 0-9). The green (blue) operating LED then lights up.

When you switch on the TV with **OK**, you see the station table and can choose a station.

None of the indicators lights up when you switch off the TV set with the On/Off button on the set.

Switch on the TV set with the On/Off button on the set when it is switched off.

10

Daily handling

Changing channels

Channels up/down (only favorite stations if these are shown in the station table).

With the numeric keys on the remote control
The set has a dynamic memory with 220 (with DVB 1470) memory slots. If up to 9 stations are stored, you only need to enter one number, up to 99 two numbers, up to 999 three numbers and above 999 four numbers (please look in the station table to find out how many stations have been stored).

1-digit stations

`7 pqrs` Keep the button 0 - 9 pressed for one second, the channel then changes immediately.
or press the button 0 - 9 briefly, the channel then changes after 2 seconds (immediately when up to 9 stations are stored).

2-digit stations

`2 abc`
`7 pqrs` Keep the second numeric key pressed for one second, the channel then changes immediately.
or press both numeric keys briefly, the channel then changes after 2 seconds (immediately when up to 99 stations are stored).

3-digit stations

`1`
`2 abc`
`7 pqrs` Keep the third numeric key pressed for one second, the channel then changes immediately.
or press the three numeric keys briefly, the channel then changes after 2 seconds (immediately when up to 999 stations are stored).

4-digit stations

`1`
`2 abc`
`7 pqrs`
`8 tuv` Press the four numeric keys briefly, the channel then changes immediately.

Depending on how many stations have been stored, you can place one or more zeros in front of the number and select for example station 7 = 07 or 007 or 0007.

Modes of operation

TV mode

In initial installation and daily operation, the TV set is in TV mode. This is also the case when none of the other modes of operation such as EPG, Teletext, PIP, Video or Radio is selected. Every one of these modes of operation has a menu which you can call with the **MENU**-button and with some color button assignments.

Function of the color buttons in TV mode
You can assign the functions of the four color buttons yourself. The following functions are set at the factory:

red: personal teletext page (with DR+: call DR archive)

green: call picture format setting (with DR+: call timer overview)

yellow: call last viewed station

blue: call station info

You can assign other functions to the buttons in the TV menu "Settings" - "Function keys".

The **explanation of the remote control** shows the function of every button in different modes of operation of the TV set and the remote control.
The **index** answers many questions regarding all aspects of the TV. If it is a question about the operation, you have direct access to the operating function from the index.
Loewe TV sets are supplied in different models with different equipment. You can find out what equipment your TV has under the menu item "**Technical spec. of the TV set**".
When you have made all the settings and connections, you can switch over to "**Simplified control**"(not in digital TV) using "Select Mode". Then the "Settings" and "Connections" can no longer be launched in all modes of operation menus. Switch "Simplified control" back off when you want to make settings.

TV menu

MENU   Launch the TV menu

TV menu

Rotate TV
Standard settings
Picture
Sound
zap2text
Connections
Settings ▶

Standard values
You can save the setting for picture and sound you have made in this menu and launch them again later.

Connections
You will find information about this in the chapter "Logging in and connecting AV equipment" on page 21/23.

zap2text
Some stations use this service. If teletext pages are referred to during a program, the TV set saves and/or displays this page number. You

call the teletext page with the **TEXT** button from the display during the program or from this menu.

Some **settings** in the TV menu:

Child lock
Use the child lock if you want to prevent your children watching after a certain time, once or daily, all or certain programs.

On-screen displays
You can define duration and position of the displays, the content of the program and status display and activate or deactivate zap2text as a display.

Timer functions
You can have your TV switch on and off at specific times or have yourself reminded by a signal tone.

Time and date
When you receive teletext, the TV records the right date and time settings. The time serves as information for timer recordings, timer functions and EPG. If you do not receive teletext you should set the date and time and not switch the TV off with the mains button as the settings will then be lost (Not all stations transmit the full date, you may have to add missing data manually).

Language
If "your" menu language is not set, you have to select the "Language" menu in a language you cannot understand:
Press the **MENU**-button (TV menu), mark the last menu item (settings), press the **OK** button and mark the last menu item (Language) under "other ..." and press the **OK** button.
Now select the right language and confirm with **OK**.

13

Modes of operation

Menu functions in TV

EPG
Call the electronic program guide of the TV set.
EPG can be called and hidden with the ⟨ * EPG ⟩
button.

PIP
Call/hide the picture in picture function of the
TV set. PIP can be called and hidden with the
⟨ # PIP ⟩ button.

TV radio (SAT radio)
Switch the radio mode of the TV set on/off with
⟨ RADIO ⟩ button. Prerequisite: Your TV is
equipped with a satellite tuner (see on page
17).

Video
Call or hide the video control bar.
Press the button ⟨ + ⟩ .

Format
Call the selection for setting the picture format.
Select the picture format by repeated pressing
of the ⟨ →□← ⟩ button.

AV input
Call the AV selection for playing connected
equipment (e.g. VCR, camcorder or DVD player).
The AV selection can be made with the
⟨ 0 AV ⟩ button.

Picture
Show/hide the picture menu. Press the button
⟨ □ ⟩ You can set the TV picture with the
help of the picture menu. The Picture menu can
also be called by the
TV menu ' Picture.

Sound
Show/hide the Sound menu. You can set the TV
sound with the Sound menu. The Sound menu
can be opened under the "TV menu – Sound".
On the **RC3** remote control also directly with
the ⟨ ◁ ⟩ button.

Sound mode
Call the sound mode settings of the connected
Loewe DVD-Preceiver "Auro".
Press the button ⟨ ◁ ⟩ .

Timer
Call the timer overview of the TV set.
Press the button ⟨ ○ ⟩ .

Digital PhotoViewer
With the Digital-PhotoViewer integrated in the
Signal Box you can show pictures taken with
digital cameras from the most common
memory cards (see fig. page 5) on the screen.
After inserting the memory card the set
switches to PhotoViewer mode and you first
see an overview of the pictures stored on the
card. The set switches back to TV mode when
the card is pulled out.
You will find a detailed description in the
"Digital PhotoViewer" operating manual
enclosed.

Digital Recorder Plus (DR+)
If a hard disk is integrated in the Signal Box
(set variant), you can record and play TV
programs. Depending on the selected recording
quality the possible recording capacity is
between about 20 and 100 hours.
The possibilities of the Digital Recorder are
much more versatile than those of a video
recorder. Use the separate "Digital Recorder
Plus" operating manual for operation.

14

Modes of operation

Picture in Picture (PIP)

PIP can be displayed as Standard PIP, iPIP or Split Screen by default.

Standard PIP functions:
The Standard PIP displays a PIP image in the presently displayed TV image.

`# PIP`   Show/hide PIP picture

The status of the PIP mode i.e. PIP channel selection or PIP scan is shown in the status display in a colored square before the channel name and appears while changing the channel or on pressing the **END** key.
If the PIP status is green, you can select the PIP channel:

Channel up/down or direct

PIP image as static image

The PIP status must be green. If it is not, press the green button.
Then press the red button; the PIP image becomes a static image.
Press the red button again for a moving image.

Changing the channel of the TV image

The PIP status must be white. If it is not, press the green button.
Then select the station as normal.

PIP channel scan

The PIP status must be green. If it is not, press the green button.
Start the PIP scan with the blue button. The PIP status turns blue.

The PIP channel now changes automatically. Stop the station scan with the blue button. The PIP status turns green again.

Interchanging PIP image/TV image

The PIP status must be green. If it is not, press the green button.
Interchange the pictures with the yellow button.

Position of the PIP image

`MENU`   The PIP status must be green. Call the PIP menu with the **MENU** button.

Mark "**Position**".

Select a symbol for the position.
`END`   Hide PIP menu

Size of the PIP image

Mark "**Size**" in the PIP menu.

Select "**Large**" or "**Small**".

Split Screen

Mark "**Type**" in the PIP menu.

Select the symbol for Split Screen.

`END`   Hide PIP menu

The image on the right pertains to the PIP image and has no sound. TV image and PIP image are separated from each other by a colored line (PIP status).

Adjusting "iPIP"
Switch on the PIP menu with the **MENU** button.

Mark the "**Functionality**" bar.

Select "**iPIP**".
Hide the menu with the **END** key.

iPIP function:
In iPIP the presently displayed TV image becomes the PIP image. For the TV image, select another channel and retain the PIP image.
In iPIP, the PIP status is orange-colored.

`# PIP`   Show/hide PIP picture
Also read the info text; press the **INFO** key.
The PIP image changes back into TV image, when you switch off PIP.

15

Modes of operation

EPG mode

EPG is the electronic station guide for TV programs. With this system, you can easily find the programs that interest you (sorted according to time, day, topics and programs). You can memorize programs and program recordings.

A wizard is activated the first time you use EPG (not with DVB) which guides you through the necessary settings. Then run the data acquisition (see page 17).

Using the EPG

    ★ EPG   Switch EPG on/off

```
EPG                                    Current: Fri 03.08./20:08
now  soon  21:00 22:00 23:00 00:00 01:00 02:00 03:00 04:00 05:00 ...
19:15 VOX    Zurück in die Vergangenheit
19:30 ZDF    WISO
19:30 BR3    Immer weiter, immer höher und dann?
19:40 SAT1   echt wahr!
19:40 RTL    Gute Zeiten, schlechte Zeiten            −20:16
19:50 MDR    Mach dich ran
20:00 ARD    Tagesschau
20:00 HR3    Tagesschau
20:00 NDR    Tagesschau
20:00 WDR    Tagesschau

 ▲   Select            ▬ Record              INFO Info
◄ OK ►  and press      ▬ Day (Fri 3.8./now)  TEXT Detail
 ▼   OK to view        ▬ Topics (all topics) MENU Menu
                       ▬ Programmes (all)    END  End
```

The first line is framed initially in green.

The green frame stands for time and date, with the green button you switch between time and day or, if the frame has a different color, back to the green frame. With the arrow buttons ◄ ► you select: now, later, the time or day for starting stations. The list of stations below is updated accordingly. With the buttons ▼ ▲ you mark a station you want to watch (now running), memorize or record.

```
EPG                                    Current: Fri 03.08./20:08
person. topics  all  - ... Hobby Sport Child Knowledge Music ...

 ▼   with OK           ▬ Topics (music)      END  End
                       ▬ Programs (all)
```
The frame turns yellow when you press the yellow button. The yellow frame means you can select topics. With the arrow buttons ◄ ► you choose between personal topics, all topics and the individual main topics such as Film, News, Show, Music etc. The list of stations below is updated accordingly. With the ▼ ▲ buttons, you mark a station you want to watch (a program currently running), memorize or record.

```
EPG                                    Current: Fri 03.08./20:08
Favorite programs   all   ARD  ...
14:03 ARD    WunschBox                               −15:00
20:45 MDR    Das deutsche Schlagermagazin
14:03 ARD    WunschBox

 ▲   Select and        ▬ Record              INFO Info
◄ OK ►  memorize       ▬ Time (Sat 4.8./14:03) MENU Menu
 ▼   with OK           ▬ Topics (Music)      END  End
                       ▬ Programs (fav.)
```
The frame turns blue when you press the blue button. The blue frame signifies station selection. Use the arrow buttons ◄ ► to choose between your favourite stations, all stations or the station just set. You can select another individual station by moving to "..." with ►, marking a station in the list and storing it with **OK.**

The respective current settings are shown next to the operating notes for the color buttons.

Direct input of time
You can also enter the time directly with the numeric keys of the keypad. After entering the first digit, the time is displayed first next to the symbol of the green button by asterisks and is then replaced by the entered numbers, e.g. 2100. If the entered time has already passed, its entry is used for the following day.

Viewing or noting a program
You can watch or note the program selected with the ▼ ▲ buttons by pressing the **OK** button. A + sign is set in front of the program title for noting. At the start of the broadcast, this program is switched to or you see a message.

Programming recording with VCR
You prepare the station marked with the buttons ▼ ▲ by pressing the red button. Under "Timer Recording" you select VCR and whether you want to record one program or a serial. A red dot is set in front of the title of the program. If a program is already marked by a red dot, you can delete the timer data again with the red button (the red dot disappears).

Calling detailed information
If detailed information about the selected station is available, you will see the **TEXT**-button displayed additionally. You can call the detailed information with this button.

Other functions in the EPG menu:
Call the EPG menu with the **MENU** key.

List of memorized programs
You will find the stations you have memorized in a list.

Switch on TV at mark
You can have the TV set switch on automatically from standby mode at the time of a marked program. If you are not in at this time, a security prompt makes sure that the TV switches off again after 5 minutes.

Indicate/start memorized station
If the TV is already on when the memorized program starts you can have the start of the program indicated or the TV switched over immediately.

Short info lines
Short infos are broadcast for many programs. Set how many lines this information should have or switch the short info lines off.

EPG entry
If you want to start EPG operation, you can retain your last settings for topic and program selection or start with all topics and all programs.

Modes of operation

EPG settings

If you want to change the provider or want to have other programs evaluated, you can do this in the EPG menu.

Provider search

[★ EPG]   EPG on/off

[MENU]   Call EPG menu

```
EPG menu

TV 5
TRT 1

△  Select provider    ══ Provider search       INFO  Info
◁ OK ▷ and confirm    ══ Change provider list  MENU  Back
▽  with OK            ══ Program selection      END   End
```
Start provider search (green button). This may take some time.

Mark the provider

Save the provider

This is followed by a station search and a list of TV stations is displayed which transmit data. Move on to the provider selection with the **OK**-button. If the stations offered are what you want, move on to the station selection with the blue button.

Selecting stations for EPG

Select the stations here for which information is to be collected.

```
Select provider
3SAT
PRO7
RTL2
TV 5
TRT 1

△  Select provider    ══ Provider search       INFO  Info
◁ OK ▷ and confirm    ══ Change provider list  MENU  Back
▽  with OK            ══ Program selection      END   End
```
Stations marked by + are favorite stations. The provider supplies information for stations marked by E (terrestrial, cable and analog satellites) and D (digital), these are already marked (blue letters).

Mark the station/Remove the marking

red: Only mark favorite stations

green: Mark all stations

yellow: Only mark this station

[MENU]   Back to the EPG menu

Switching data acquisition on/off

Mark "Data acquisition" in the EPG menu under "other"

Select data acquisition off/on

```
EPG menu
other ...
Memorized stations     first report
Data acquisition       off  [on]
Short info lines       none
EPG entry              last setting

◀         ▶                  INFO  Info
                             MENU  Back
  ▼                          END   End
```
If, for example, you cannot receive any EPG providers and no DVB is installed in the TV set, you should switch off the data acquisition.

Performing data acquisition

The data must be collected first after these settings or every time the TV is switched off. To do this, select the program which you have defined as a provider and leave it switched on for about one hour or switch the TV set to standby mode. The green (blue) LED lights up in addition to the red LED after about two minutes. Data acquisition takes about one hour, in sets with a DVB module a little longer. The data are automatically collected between 2 and 5 in the morning when the TV is switched off to standby.

Defining personal topics

You will find the programs that interest you faster when you define your personal topics. Mark "Select personal topics" in the EPG menu and put together your list of personal topics.

```
Select personal topics
Film          General music
News          Jazz
Show          Rock/Pop
Hobby         Classical
Sport         Folk/Easy listening
Child         Musicals/Opera
Knowledge     Other
Music
Culture

▲  Select topics      ══ mark all    INFO  Info
◁ OK ▷ and mark with OK ══ Mark only  MENU  Back
▼                                     END   End
```
TV-Radio mode

Switch the TV-radio mode on or off by pressing the [RADIO] button.

If a satellite tuner and a DVB module are installed in your TV, radio stations are available. If these accessory modules are not installed, you can select only the audio inputs (connections AV1 to AVS, DIG IN 1, DIG IN 2) with the program table or with the keys ▼ ▲ and play an external audio signal through these.

LOEWE Dialog

(only activated in connection with the Digital Recorder Plus)

In connection with the Digital Recorder Plus the LOEWE dialog page offers an overview and quick access to information content of the TV, e.g. the programs currently showing, programs last recorded etc.

You should have already made a few settings before using the LOEWE Dialog to provide selection possibilities.

You should have made the EPG settings described on page 16 and run the EPG data entry. The Digital Recorder archive should also already contain recordings. You should have defined a few personal teletext pages. In all these cases you then have a useful selection.

No LOEWE dialog is displayed with NTSC reception.

You call the LOEWE Dialog with the arrow buttons on the remote control when no menu is displayed.

Press one of the arrow buttons ▲ ▼ ◄ ► for about 1 second.

Operation of additional equipment

Video mode

You can operate Loewe video recorders and DVD players with the video control bars even if they are hidden. The VCR's must be connected to the Euro AV sockets (Scart) and logged in under the "Connections" menu.

Digital Link must be switched on on the Loewe video recorder. Only then can you use the control bar. You also need Digital Link for timer recordings of satellite programs controlled by the TV set.

You can display up to two menu bars, these are displayed when the appropriate video units are logged in the "Connections" › "Connections: Connection plan" menu.

⊞   Show/hide video menu bar

DVD	STOP

VCR	STOP

INFO Info
MENU Menu
END End
Select video menu bar, if for example several VCRs or a DVD player and a VCR are connected.

Select function

⏻   Switch VCR/DVD on/off

AUX   Select video input (Euro-AV socket) for the VCR

◄◄   Rewind (only for VCR) or Scan in rewind

■   Stop (STOP)

►   Playback (PLAY)

►►   Fast forward (only for VCR) or Scan in fast forward

II   Pause (PAUSE)

►I   Next chapter (only for DVD)

I◄   Previous chapter (only for DVD)

●   Record

OK   Perform selected function.

When you start a recording, the program you have just selected is recorded. You cannot switch over to another channel, it is locked. You can only switch over when the recording has finished.
Exceptions:
1. You have installed several tuners (not PIP tuners) in the TV set, then you can watch another channel with the second tuner.
2. You can also watch the signal via an AV connection (e.g. DVD player or a second VCR).
3. In a VCR with Digital Link Plus the VCR tuner is used for the recording (not for satellite programs).

Video menu

MENU   Show the Video menu

Video menu

Timer
Recording
DR archive
Connections
Settings
A line is displayed in the menu if a Link Plus Recorder is connected.

The Video menu provides you with the following options:

You can change and delete timer data or program new recordings in the "Timer" menu. The "Record" menu gives you the option for timer programming by EPG, teletext or manually.
You can call the archive list with "DR Archive" if a Digital Recorder is built in.
In the "Connections" menu you can log other AV equipment on or off. In the "Digital Link Plus transfer" menu the station data of the TV set (not satellite stations) are transmitted to the Digital Link Plus VCR.

Digital Link Plus VCRs have the possibility for transferring the station data from the TV set to the VCR via the Euro-AV cable (not for satellite stations). Every time you change the station memory of the TV, you are asked whether you want to make a data transfer.
The receiver unit of the VCR is always used for recording with a Digital Link Plus video recorder (not satellite stations) and the tuner of the TV set is available for watching TV.
Loewe VCRs also have **Digital Link**, a system for controlling Loewe VCRs via the Euro-AV cable. If the Loewe VCR only has Digital Link, the TV tuner is used for recording. If you have installed your Loewe VCR in a concealed place, you can operate the Loewe VCR with the remote control. Operation with the control bar also works with Digital Link.

Digital Link must be switched on on the video recorder.
Only use fully wired Euro-AV cables, otherwise Digital Link or Digital Link Plus will not work.

Operation of additional equipment

Logging in equipment
You have already logged in and connected all connected devices (video recorders, camcorders, DVD player, DVD recorder, Loewe audio system, Pay-TV decoders, Loewe home automation, door intercom) with the connection wizard when you put it into operation for the first time. If you want to connect further or different devices, you have to call the connection wizard in the TV menu - "Connections".

Connecting VCR equipment
In addition to the connection via the Euro-AV socket, you also have to connect the antenna (only for antenna or cable systems) through the VCR to the TV set. The antenna signal is then available both to the tuner in the VCR and the TV tuner.

signal box
video recorder

Search for and store the VCR station (if there is no Euro AV cable)
Switch on the test station on the VCR or insert a recorded tape and start playback.
Then call program 0 on the TV set (set ex-factory to channel 36). Select the first menu item (VCR) in the AV selection list.
To prevent "normal" TV stations being found in the search, pull out the antenna plug from the antenna input of the VCR temporarily (the plug attached to the cable to the antenna system).

Plug the antenna plug back into the VCR.
If you now get interference because a TV station is transmitting on the same channel as the VCR station, you have to change the transmitting station on the VCR (see operating instructions of the VCR) and search for the VCR station on the TV again.

Operation of additional equipment

Video playback

There are several ways to see the picture and hear the sound of the VCR, DVD player or camcorder on your TV:

1. Use the Euro-AV sockets on the signal box and VCR. This is the best way to get a good picture and sound quality. For camcorders it is best to use the front sockets AVS.
   If you are playing back from a VCR with Digital Link Plus, the VCR picture is shown on the current station slot.
   If you are playing back from a standard VCR, DVD player or camcorder, select the AV socket to which the video signal is connected in the AV selection list or the station table.
   Video recorders emit a switching voltage during playback which the TV set can decode (can be activated for every VCR in the connection wizard or set Settings - AV Settings - Allow switching voltage to "Yes" in the TV menu). Then the VCR picture is shown on the current station slot as in Digital Link Plus VCR's.
2. You can also control logged in Loewe VCRs and DVD players with the video menu bar. See page 11/20 for more details.
3. Use the antenna connection between the VCR and the signal box. The sound is only transmitted in mono. Select the first menu item, e.g. VIDEO, in the AV selection.

Calling an AV program in the AV selection list

| 0 AV | Call AV selection list |

| AV Selection | VIDEO AV1 AV2 AVS VGA/XGA DVI COMP.IN |

OK ◄ ► — Select AV connection (e.g. socket AV1) or VIDEO for the VCR station.

Now you will see the playback from the connected AV unit.

Calling an AV in the station table

OK ◄ ► — Call the station table

```
Channel overview: TV                              Numerical
    AVS              6  S–RTL
    AV3              7  N–TV
    AV2              8  DSF
    AV1              9  TM3
  0 VIDEO           10  PRO7

                       Favourite programs END End
                       Change sorting
```

In the numeric sorting you will always find the AV devices at the top of the list without station numbers.

OK ◄ ► — Select the AV connection and...

OK — confirm with **OK**.

Now you will see the playback from the connected AV unit.

IR-Link

″IR-Link″ enables you to operate a concealed d-Box or a video recorder from another manufacturer with its remote control via the TV set.

The ″Signal Box″ is equipped with a connection socket (IR-Link) for this purpose. You will need an ″IR-Link cable″ which is obtainable from Loewe.

Plug the jack plug of the cable with infrared transmitting diode into the IR-Link socket on the back of the signal box. The infrared transmitting diode at the end of this cable must be placed in front of the concealed device. The TV must be switched on for transmission.

A napped strip is provided to help to lay the cable. The strip is self-adhesive; pull off the backing foil first. Stick the strip to the shelf or cabinet and press the cable into the naps. You can cut up the strip into several sections with a knife.

Point the infrared remote control at the TV to operate the concealed VCR.

22

Operating additional equipment

Digital input/output

Have you logged in your video equipment, e.g. DVD players or VCRs in the "TV menu– Connections" as described on page 21?

For analog picture and sound signals from the VCR or DVD player, use a Euro-AV cable to connect the Euro-AV socket 1 or 2 to the Signal Box and the corresponding AV socket of the VCR.

The Signal Box also has 2 coaxial digital audio inputs "DIGITAL IN".
For optimum sound transmission connect the output socket of the DVD player (DIG OUT) to the "DIGITAL IN 1 or IN 2" socket on the Signal Box with a cinch cable.
The Signal Box has an electronic switch so that it is possible to assign a digital audio input to every AV input.
For example, if you switch a DVD player connected to "Euro-AV 1" to Play, the respective assigned audio input "DIG IN" is selected automatically.
In this way, you can connect two DVD players, for example, without the need for tiresome replugging.
Note
The TV set without Dolby Digital Module can only play PCM-Stereo sound.

✳ to Concertos or digital receiver or Certos.

Assigning digital inputs
Switch on the "Radio Mode". The digital inputs "DIGITAL IN 1" or "DIGITAL IN 2" can be selected directly.

MENU   1. Call up the TV menu by pressing the **MENU** key.

> **TV menu**
> Rotate TV
> Standard settings
> Picture
> Sound   ▶
> zap2text
> Connections
> Settings
2. Select the "Sound" line, then press the **OK** key.

3. "Sound via" select the "AV amplifier (Dig. input)" or "Concertos", if Concertos has been connected.

> **Sound**
> Sound via   TV [AV amplifier (digital input)] HiFi   Concertos
> Headphone volume
> Loudspeaker sound
> Headphone sound
> AV audio signal
> Dig. DVB output tone
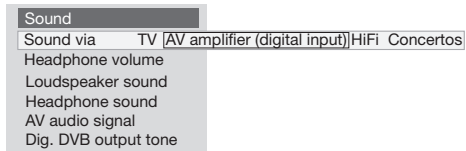

Press the **OK** key

4. Press the **MENU** key.

5. Select the bar "Settings" and confirm with **OK**.

6. Select the item "AV settings", then confirm with **OK**.

> **AV settings**
> Manual adjustment of AV standard
> Assign audio digital   ▶
> Allow swichting voltage
> RGB insertion at AV2
7. Select the "Assigning Audio digital" line and press **OK** to confirm.

> **Assign audio digital**
> Digital In1   no to AV1   to AV2 [to AVS]
> Digital In2   no

8. Select "Digital IN 1 - to AV3" for example for socket AV3 if a DVD player or CD player with coaxial-digital output is connected to digital input 1 and this device is logged in in the "Connections" menu.
If the video signal from a play console is connected to the AVS socket, the relevant device is logged in and the digital sound is present at the digital input 2, then select "Digital In 2 – to AVS" etc.

9. You can complete the settings by pressing the **END**

→

23

Operating additional equipment

Audio output "DIGITAL OUT"
The digital audio signal is applied at the "DIGITAL OUT" socket of the Signal Box. Here, for example, you can connect an external Dolby Digital Decoder or the Loewe sound system "Certos/Concertos".

An analog audio signal from the TV set or a VCR or another sound source which is received at one of the Euro-AV sockets of the Signal Box is converted into a digital signal (PCM) and output at the "DIGITAL OUT" socket.
The digital signal from the DVD player is output unchanged at this socket.
The digital TV sound or the sound of a DVD/CD player is only audible through a Digital Receiver or the Concertos or Certos system.

AV-connection/Select device

0 AV   Press the key 0 on the remote control a little longer; the AV selection bar is displayed again.

AV Selection   VIDEO AV1 AV2 AVS VGA/XGA DVI COMP.IN

◄ OK ►   Select the AV connection to which the sound source, such as the DVD player, is connected.

Converting the remote control in order to operate a Loewe DVD player or devices from other manufacturers
You can switch over the remote control for VCRs, DVD players and Set Top Boxes if the infrared code of the equipment type is listed in the code list or is in the code memory of the RC3.
Switching over is done on the one hand by entering a four-digit code and on the other hand the remote control suggests codes which you can test on the equipment.
If you cannot find the equipment in the code list, try a suggestion from the remote control.
Even if the manufacturer of the equipment is included in the code list, it is possible that it cannot be operated. Not all functions on the RC3 are available for this equipment.
Switching over the remote control – with code input – e.g. to the Loewe DVD player
Look for the code number of your equipment in the code list. The list is sorted according to equipment type – DVD, VCR, STB – and alphabetically according to manufacturer. You will find one or more code numbers next to the manufacturer name.
Using the switch select whether you want to switch over to a VCR, DVD player or a Set Top Box.

END **＊ EPG**   Press the **END** and **＊ EPG** buttons at the same time (5 secs). The display at the top left of the remote control flashes twice.

0 AV
5 jkl
3 def
9 wxyz

Enter the four numbers from the code list one after the other (0539 for Loewe DVD player). The display flashes once after each number is entered. Twice after the last number.
If the number was incorrect, the display flashes for longer. The code number has not been accepted.

Once the code has been accepted with two flashes, you can test the functionality of the device you have just programmed.
If the device cannot be operated or is difficult to operate, repeat the code input with the next code from the list. If no other codes are specified for this manufacturer, try a code suggested by the remote control.
Switching over the remote control – with the suggestions by the remote control (see page 37-43)
Switch on the device to which you want to set the remote control. Standby is not sufficient!

Using the switch select whether you want to switch over to a VCR, DVD player or a Set Top Box.

END **＊ EPG**   Press the END and **＊ EPG** buttons at the same time (5 secs). The display at the top left of the remote control flashes twice.

9 wxyz
9 wxyz
1

Enter the numbers 991 one after the other. The display flashes once after each number is entered.

 # PIP   Press the **# PIP** button to select the first code.

Hold the remote control pointed towards the device you want to switch over to. Watch the device.

▶ **⏻**   Now press the ▶ (Play) or ⏻ (On/Off) button on the remote control.
Wait a moment for the reaction of the device. If the device does not react, the code is incorrect.

 # PIP   Press the **# PIP** button to call the next code.

▶ **⏻**   Press the ▶ (Play) or ⏻ (On/Off) button again.

＊ EPG   If the device reacts, press the **＊ EPG** button to confirm the code.

Operating additional equipment

Rotating the TV set

(Only possible for Spheros 32/37 HD and equipped with "Motor Unit").
If the screen is mounted on a "Motor Unit" you can rotate it with the remote control to suit your sitting position.

`MENU` Launch the TV menu:
Press **MENU** on the remote control.

`OK` Select the "Rotate TV" bar.

`OK` You determine the direction of rotation right, stop or left with the arrows on the button.

`END` Close the menu.

Note:
Do not place any objects in the range of rotation of the TV set which could obstruct rotation or be knocked over in the process. Before activating the rotary function, make sure that the set can rotate freely and unhindered.

Viewing angle, range of rotation

Setting the rotation area (a maximum of +/- 40 degrees)

With this menu, you can determine the maximum rotation to the left and right.

`MENU` Press **MENU** on the remote control.

`OK` Highlight the "Settings" bar.

`OK` Press **OK**, then to "other..."

`OK` Highlight the "Rotate TV" bar, press **OK**.

`OK` Select line "Basic adjustment".

`OK` Press the **OK** button.

`OK` You set the desired maximum range of rotation to the right by pressing the ring (right). Rotation stops when you release the ring.

`OK` The setting is saved by pressing **OK**.

`OK` Then set the desired maximum rotation to the left by pressing the ring (left).

`OK` Confirm with **OK**.

`END` Press **END** to exit the menu.

Determining the switch off position
Here you determine the position of the screen (TV set) which is adopted when switching off providing you have activated this function.

`MENU` Press **MENU** on the remote control.

`OK` Highlight the "Settings" bar.

`OK` Press **OK**, then to "other..."

`OK` Highlight the "Rotate TV" bar, press **OK**.

`OK` The menu "Rotate TV" appears. Select Define "Switch-off position".

`OK` You set the desired switch off position to the right or left by pressing the ring.

Rotation stops when you release the button.

`OK` Save the "set switch-off position" with **OK**.

26

Connecting Loewe sound systems

Function switch off position on/ off

You determine whether the TV set moves back to the determined switch off position when switched off with the remote control (the set cannot be operated during this time, approx. 35 seconds).

MENU — Press **MENU** on the remote control.

OK — Highlight the ″Settings″ bar.

OK — Press **OK**, then to ″other…″

OK — Highlight the ″Rotate TV″ bar, press **OK**.

OK — If you select "**yes**" in the line "Activate switch off position" the TV set will turn to the set position when switching off with the remote control.
The TV does not rotate when switching off if "**no**" is selected under "Activate switch off position".
The TV set stays at the last set position when it is switched off.

END — Press **END** to exit the menu.

Loewe Audio systems and active speaker systems

- Concertos 1
- Concertos 2
- Certos with Concertos
- Tremo and Dolby Digital Decoder

In connection with a Loewe TV with a Loewe audio system and a Loewe speaker system you have an excellently tuned Home Cinema system. Advantages are high operating comfort, attractive design and adapted technology.

The speakers and the TV set can be arranged as illustrated below, for example.
The arrangement of the speakers and the television set might look as depicted below. However, the layout of the front and surround speakers should be set up in symmetry to the television set and your sitting position.
The surround speakers can also be set up behind your sitting position, facing towards the front speakers.
The Acoustimass® module can also be set up in another place, e.g. particularly effective behind your sitting position, but in such a way that the bass frequencies are able to radiate freely.
The Concertos sound system offers you a new type of sound dimension in music and film performances with integrated electronics.
Even at low volumes, you can then hear the full bass in the correct ratio to the higher and medium frequencies.

Loewe offers two sound systems **Concertos 1** and **Concertos 2**, consisting of an Acoustimass® Module, a set of cables and the satellite speakers.
If the integrated speakers of the TV set are not to be used for the center channel, then **Concertos 1** with five Loewe satellite speakers can be connected.

Use the integrated speakers of the TV as a center channel, then use **Concertos 2** with only four satellite speakers.

Connecting Concertos components:
Before connecting the devices, ensure that they are switched off or pull out the mains plug. Connect the components of the Concertos system to the TV set, as shown on page 28.

First use:
To put Spheros into use with the Concertos system, some settings from the Sound menu of Spheros are required.
In this context, please read the separate Operating Instructions ″Concertos 1 / 2 – Sound″.

Connecting the DVD Preceiver Auro 8116 DT and Tremo

Connecting the Loewe DVD Preceiver Auro 8116 DT to the Signal Box Spheros 32/37 HD or Xelos SL 32/37 HD

When you use the Loewe DVD Preceiver in connection with a Loewe TV set, connect the Tremo loudspeaker system to the audio outputs of the DVD Preceiver.

Connect the cubic socket on the DVD Preceiver to the "Master" cubic socket on the Tremo subwoofer. Use the cubic plug cable enclosed with the DVD Preceiver Auro (2-wire cable). Plug the white plug (without kink protection) in the cubic socket on the subwoofer.

If the loudspeakers of the Loewe TV set are used for center reproduction, connect the cubic socket of the TV set to the "Slave" cubic socket on the subwoofer with the cubic plug cable. Use the cubic plug cable enclosed with the Tremo loudspeaker system. Plug the white plug (without kink protection) into the cubic socket on the subwoofer. Set the switch "Center to" on the subwoofer to "TV".

If on the other hand you want to use the external center loudspeaker, do not connect Slave to the TV.

Set the "Center to" switch on the subwoofer to "Sat".

Connect the TV set (Euro AV socket 2) and the DVD Preceiver with the Euro-AV cable.

Connect the TV set (Service socket) to the TV-L-Link socket of the DVD Preceiver with the L-Link cable (delivered with the DVD Preceiver) . This ensures that the Tremo loudspeaker system is switched on during radio or CD playback from the DVD Preceiver but the TV remains switched off.

Connect the digital output of the TV set with the DIGITAL IN input of the Auro system with a cinch cable. This ensures that the digital audio signal for decoding is fed into the DVD Preceiver.

See the "Tremo" operating manual to find out how to connect the satellite loudspeaker.

Settings on the DVD Preceiver Auro 8116DT

Select the "Tremo" loudspeaker system in the DVD menu under Settings, set the Listener/Speaker distances and level the speakers. Also have a look at the DVD Preceiver manual (pages 12 and 13).

30
Displaying PC images (VGA/DVI)

Your Spheros/Xelos has a digital visual interface (DVI) with which you can show PC images on the TV screen for example.

Connecting personal computers
Connect the PC directly to the socket labeled "DVI" on the back of the Signal Box. The digital audio signal can be connected to the input "Digital In 1 or 2". If your PC does not have a DVI interface, please use a VGA/DVI adapter cable. This is available from electronics and computer dealers. Connect the analogue audio output of the PC to the "AUDIO IN 2" socket. The TV set can be connected to the following standards: VGA (640x480 @85Hz), XGA (1024x768 @85Hz), SVGA (800x600 @85Hz) or SXGA (1280x1024 @75Hz).

DDC Function (Display Data Channel)
The DDC function automatically detects graphic resolutions supported by the TV set.
If you wish to use the DDC function, first connect the PC to the TV set via the VGA or DVI socket. Boot the PC. Regardless of whether the TV set is on or off, you can select the graphic resolution (e.g. XGA 1024 x 768 at 75 Hz) in the "Properties" menu on the PC.

Launch the program for displaying PC images

Press the (Zero) key and "AV Selection" appears.

Choose "VGA"/"XGA"

PC image settings
If a PC image is displayed on the screen, you can call up the "VGA menu".

Call up the VGA menu and…

Highlight the "Picture" line
Confirm

In the **"Image"** menu, you can select the contrast, brightness, sharpness, picture format, colour standard (not with DVI) etc. and adjust the light ratios to your personal preferences.
To display pictures, you can select the format 4:3, since most camera pictures are taken in this format.
For an optimum display and maximum picture focus of standards VGA and SVGA, you can select **"Original"** under "Picture format". In this case the exact format values of the graphic card must be known and set in the menu "VGA geometry".

In the "**Sound**" menu, you can set the volume of the loudspeakers or headphones, or select the tone for two-tone playback.

VGA geometry settings

In the VGA menu, select the line "VGA Geometry"

Launch
The setting options are restricted in "DVI".

Select "**Automatic yes**" on a computer with a conventional graphics format.
Your Spheros will automatically adjust to the supplied image format.

Special graphic format may require further settings to be made:
• Set the picture width
• Move the picture horizontally, to the left or right
• Move the picture vertically, upwards or downwards
• Set the phase position to give a picture that is as jitter-free as possible
• "Input pixels" allows you to set the horizontal resolution of the PC image.
• "Input lines" allows you to set the vertical resolution of the PC image.

Save settings

Pressing the **END** key on the remote control hides the menu.

Selection possibilities for the "COMPONENT IN" socket: Choose the menu "Connections" and set it as follows: Connections: Connection plan → Device selection → others → Device to COMPONENT IN socket **yes**. After pressing **OK** several times, you get the menu "Connections" with the following selection possibilities:
• Automatic, it is detected automatically which signal SDTV or HDTV/Pro scan is applied at the "COMPONENT IN" socket.
• SDTV for PAL with 625 lines, 50 Hz interlaced or NTSC 525 lines, 60 Hz interlaced
• HDTV for high definition video signals
• Pro scan for 625 lines/50 Hz or 525 lines/60 Hz progressive.
• With **OK**, you finally get the menu "Connections: Assign Audio Digital".

31

What to do when ...

Problem	Possible cause	Remedy
Various menu items cannot be called (shown in gray) or the menus for the EPG and teletext modes of operation cannot be called	"Simplified operation" activated in the main information.	Deactivate "Simple control" in the Main Information, press the **i**-key, select "Select control level" and call up with **OK**. Set "Simple control" to "no".
Record and Timer are not displayed in the video menu	No VCR or DVD recorder logged in and no digital recorder installed	Log in VCR in the TV menu - Connections.
"Connections" for example cannot be called in the video menu (grayed out)	a) A timer recording is in progress (not with serial timer recording) b) You are recording from the TV set with the video bar	a) Wait until the timer recording has ended or clear the timer. b) Stop recording.
In the TV menu, the menu item "Programs" is missing and in the Main Information the item "Automatic channel search" and connections	The child lock is activated. If these menus were accessible, children could still set the programs.	Deactivate program-related child lock: Switch off child lock or enter PIN in the TV menu - Settings.
Control of the Loewe VCR with the video control bar and the timer does not work or does not work properly	a) The VCR's Digital Link function is not activated or not possible b) Euro-AV cable not connected c) Video recorder not logged in	a) Activate Digital Link in the VCR (see operating instructions of the VCR) b) Connect the Euro-AV cable c) Log in the VCR
General problems with connecting external devices through an AV input	a) The device is not logged in in the "Connections" menu or is connected differently to shown in the connection diagram b) The AV norm is set incorrectly c) The AV signal is set incorrectly	a) Compare the connection diagram with the actual installation in the "Main information" under "Connections" and connect as shown if necessary. b) Set the correct norm. c) Set the correct AV signal. If "Automatic" is set for AV norm or AV signal, this can lead to wrong detection in the case of non-standardized signals. In this case the norm and signal must be set according to the operating instructions of the external device.

What to do when ...

Problem	Possible cause	Remedy
Connection of a decoder does not work or does not work properly	a) The signal is not decoded because the correct decoder programs have not been selected in the TV menu - Connections b) The sound is missing in decoder mode because the wrong decoder sound is allocated in the TV menu - Connections	a) Follow the instructions in the TV menu - Connections again and select the appropriate decoder programs. b) Follow the instructions in the TV menu - Connections again and select the right sound source (decoder, TV or Autom.), see instructions of the decoder.
No sound through the TV loudspeakers	The item "Sound from..." in the Sound menu under "Sound" is not set to "TV"	Change the setting to "TV".
All menus appear in the wrong language	The wrong menu language has been set.	Set your menu language: 1. Switch off picture-in-picture (PIP) and switch off all on-screen displays (**END** button) 2. Call the TV menu (**MENU** button) 3. Select the last menu item and press **OK** 4. Select the last menu item on the last page and press the **OK** button 5. Now select the right language and.... 6. ... confirm with **OK**.
Digital Link Plus does not work	a) The VCR has not been logged in as a Digital Link Plus device or has been connected to the wrong socket b) The Euro-AV cable is not fully wired (Pin 10 not wired) c) Some video recorders can only take over the stations from the TV in initial installation d) All or some terrestrial or cable stations are stored at station slots ≥ 99	a) Log in the Digital Link Plus VCR under "Connections" and connect according to the diagram. b) Change the Euro-AV cable c) Reinstate the original state (ex-factory) of the VCR (see operating instructions of the VCR) d) Sort the terrestrial and cable stations so that they are between 1 and 99.
Various characters are displayed incorrectly in teletext	The wrong character set is set in the teletext menu	Set the right character set: Teletext menu - Settings - Character set - Standard or the appropriate character set.

Available accessories

Upgrade kits

Online Plus Box
Separate Online Plus Box for comfortable use of Internet, e-mail, etc. on the TV.

Sound-System Concertos Concertos 2
Exclusive 5.1 Digital-Surround Sound System. The center channel is reproduced by the integrated loudspeakers of the Spheros.

Certos
DVD/CD player with radio and Dolby Digital/dts-decoder in unusual design.

Dolby Digital (AC3)
For decoding audio signals from the DVD player,
TV set or other audio equipment to a 5.1 playback with active speakers.

Loewe audio systems (Auro and Tremo) and active loudspeaker systems
A combination of a Loewe TV set, a Loewe audio system and a Loewe loudspeaker system provides an excellently adapted Home Cinema system with the advantages of high operating comfort, matching design and adapted technology.

Wireless Home Automation
For controlling the house lighting circuit, shutters etc.

Accessories

System cable from the Signal Box to the flat screen
10 meters long, article number 89236 M25.

Wall holder WM 51
The flat screen can be fixed to the wall and tilted up to 5 degrees.

Flat-TV F-Stand 3
TV set as a standing unit and mechanically rotatable.

Motor Unit
(only for Spheros 32 HD and 37 HD)
Motorized rotating table stand (+/− 35 degrees), can be controlled with the remote control.

Racks

Xelos Rack
With two shelves for video recorders or DVD players.

System Cube 1/2
(only for Spheros 32 HD and 37 HD)
Rack system with motor unit for rotating the TV set and shelves for VCRs, DVD players etc. (in conjunction with the Spheros Cube Adapter).

Cube Adapter Set
Adapter for mounting the set on the rack systems System Cube 1/2.

The code number 3001 cancels out a secret code and with it the child lock. Please keep it in a safe place.
