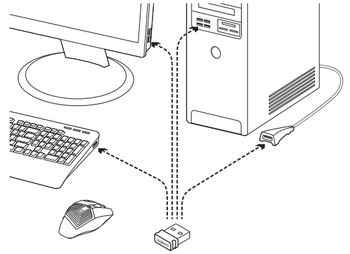
2



Plug in the gaming receiver

To optimize the wireless connection, plug the receiver into a computer USB port close to the G602.

Note: Some hubs can degrade wireless performance. If this happens, use the USB port on your computer with the most direct path to the G602.

Troubleshooting

No pointer movement?

- Make sure the power switch is on the ON position.
- Verify that the batteries still have available power and that they are inserted in the proper direction.
- Restart your computer.
- Should you need to pair your G602 to the gaming receiver, download the Logitech Connect Utility from www/logitech.com/downloads.

Erratic pointer movement or missed button clicks?

- Remove metallic objects between the G602 and the gaming receiver.
- If the receiver is plugged into a USB hub, try plugging it directly into the computer instead.
- Move the receiver closer to the G602 by using the included receiver extension cable.
- Try tracking on a different surface. Highly-reflective or transparent surfaces, like glass, do not deliver good tracking results.
