

Sockets with blue socket nuts, and cable plugs with blue locking collars are NMEA 2000 connection types. The NMEA 0183 Data Cable can transmit NMEA position data to another device. The Main Power Supply Cable provides 12-volt power for the sonar/GPS unit (the white speaker wire is not used). The NMEA 2000 Power Cable supplies 12-volt power to the LGC-2000 GPS antenna module and/or a NMEA 2000 network buss. All unused wires in the 3-way Power/Data Cable should be capped with wire nuts or electrical tape.

This figure corrects the drawing on page 35 in the LMS-480 manual, part 988-0151-181. The manual showed the sonar and power/data sockets in the wrong place, and listed the wrong speed sensor model.
