

Model MM9000 User Guide

Power Amplifier

CAUTION

RISK OF ELECTRIC SHOCK DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK,

DO NOT REMOVE COVER (OR BACK).

NO USER-SERVICEABLE PARTS INSIDE.

REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

WARNING

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

CAUTION: TO PREVENT ELECTRIC SHOCK, MATCH WIDE BLADE OF PLUG TO WIDE SLOT, FULLY INSERT.

ATTENTION: POUR ÉVITER LES CHOCS ÉLECTRIQUES, INTRODUIRE LA LAME LA PLUS LARGE DE LA FICHE DANS LA BORNE CORRESPON DANTE DE LA PRISE ET POUSSER JUSQU'AU FOND.

SAFETY INSTRUCTIONS

READ BEFORE OPERATING EQUIPMENT

This product was designed and manufactured to meet strict quality and safety standards. There are, however, some installation and operation precautions which you should be particularly aware of.

- 1. Read Instructions All the safety and operating instructions should be read before the appliance is operated.
- 2. Retain Instructions The safety and operating instructions should be retained for future reference.
- 3. Heed Warnings All warnings on the appliance and in the operating instructions should be adhered to.
- Follow Instructions All operating and use instructions should be followed.
- Water and Moisture The appliance should not be used near water — for example, near a bathtub, wash-bowl, kitchen sink, laundry tub, in a wet basement, or near a swimming pool, etc.
- Carts and Stands The appliance should be used only with a cart or stand that is recommended by the manufacturer.
- An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

- Wall or Ceiling Mounting The appliance should be mounted to a wall or ceiling only as recommended by the manufacturer.
- 9. Ventilation The appliance should be situated so that its location or position does not interfere with its proper ventilation. For example, the appliance should not be situated on a bed, sofa, rug, or similar surface that may block the ventilation openings; or, placed in a built-in installation, such as a bookcase or cabinet that may impede the flow of air through the ventilation openings.
- Heat The appliance should be situated away from heat sources such as radiators, heat registers, stoves, or other appliances (including amplifiers) that produce heat.
- 11. Power Sources The appliance should be connected to a power supply only of the type described in the operating instructions or as marked on the appliance.

12. Grounding or Polarization — The precautions that should be taken so that the grounding or polarization means of an appliance is not defeated.

AC POLARIZED PLUG

- 13. Power-Cord Protection Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the appliance.
- Cleaning The appliance should be cleaned only as recommended by the manufacturer.
- Power Lines— An outdoor antenna should be located away from power lines.
- 16. Outdoor Antenna Grounding If an outside antenna is connected to the receiver, be sure the antenna system is grounded so as to provide some protection against voltage surges and built up static charges. Section 810 of the National Electrical Code, ANSI/NFPA No. 70-1984, provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna-discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See Fig. 1.
- 17. Nonuse Periods The power cord of the appliance should be unplugged from the outlet when left unused for a long period of time.
- 18. Object and Liquid Entry Care should be taken so that objects do not fall and liquids are not spilled into the enclosure through openings.
- 19. Damage Requiring Service The appliance should be serviced by qualified service personnel when:
 - A. The power-supply cord or the plug has been damaged; or
 - B. Objects have fallen, or liquid has spilled into the appliance: or
 - C. The appliance has been exposed to rain; or
 - D. The appliance does not appear to operate normally or exhibits a marked change in performance; or
 - E. The appliance has been dropped, or the enclosure damaged.
- Servicing The user should not attempt to service the appliance beyond that described in the operating instructions. All other servicing should be referred to qualified service personnel.

FIGURE 1

EXAMPLE OF ANTENNA GROUNDING ACCORDING TO NATIONAL ELECTRICAL CODE INSTRUCYIONS CONTAINED IN ARTICLE 810 -"RADIO AND TELEVISION EQUIPMENT"

NEC - NATIONAL ELECTRICAL CODE

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

Cet appareil numérique de la Classe B respecte toutes les exigences du Règlement sur le materiel brouilleur du Canada.

NOTE TO CATV SYSTEM INSTALLER:

This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specified that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

1. INTRODUCTION

Thank you for purchasing the Marantz MM9000 power amplifier for your sound system. Please take a few minutes to read this manual thoroughly, before you attempt connections and operation.

The Marantz MM9000 is a Multi channel power amplifier, that is designed for home theater and high quality audio systems.

2. FEATURES

The MM9000 is a five channel power amplifier developed for use in hi-fi AV systems.

- It is a high-power amplifier with all-discrete circuit configuration with rated outputs of 170W / 8-ohms.
- It is provided with the MARANTZ remote control capability so its power can be controlled from a MARANTZ preamplifier or surround receiver (MARANTZ remote control compatible products).
- The power of the unit can be switched by remote control using a video signal or DC signal.
- The MM9000 are equipped with peak power indicators which indicate that the amplifier attains the maximum peak power even this occurs for a very short instant.

THX is an exclusive set of standards and technologies established by the world-renowned film production company, Lucasfilm Ltd. THX grew from George Lucas' personal desire to make your experience of the film soundtrack, in both movie theatres and in your home theatre, as faithful as possible to the master recording.

Before any home theatre component can be THX Ultra certified, it must pass a rigorous series of quality and performance tests. Only then can a product feature the THX Ultra logo, which is your guarantee that the Home Theatre products you purchase will give you superb performance for many years to come

Home THX Amplifiers

With today's superior quality but exceptionally complex audio systems it is important to ensure that noise, distortion and frequency response errors are negligible in all links in the audio chain. With discrete multichannel sources it is especially important that maximum power is instantly available without instability, rise in distortion or other undesirable side affects.

THX Ultra requirements cover every performance aspect of this product including operation, output power levels, gain, frequency response and numerous other parameters. Whether you choose music or movies, multichannel or stereo, this amplifier will be supremely flexible, easy to use, sonically transparent and absolutely reliable.

3. NAMES AND FUNCTIONS

1 POWER switch

Press the button to turn power on (POWER ON mode), and press it again to turn power off (POWER OFF mode). When it is required to remote control the power mode of the MM9000, be sure to leave this switch in the POWER ON mode.

② STANDBY indicator

This indicator lights up when the unit is put to the STANDBY mode by remote control or based on the video signal input. In the STANDBY mode, the power supply to the internal circuit of the amplifier is cut so the heat generation and power consumption are minimized.

③ POWER indicator

The indicator lights up when the power is on and the unit is ready to output sound.

(4) PEAK indicators

When the output power of a channel is clipped momentary, the corresponding indicator lights in red. If the indicators light continuously in red, decrease the listening volume.

(5) INPUT LEVEL control

This control sets the amplifier's output level by adjusting its input level.

When you use the MM9000 in a THX system, the knob must be set to THX Ref. (Maximum position)

6 AUDIO INPUT jack

Connect the preamplifier output to this jack.

① EXT. CONT IN jack

Not connected when the power is to be controlled from a MA-RANTZ remote control unit.

Connect to the video signal output of a video component when the power is to be controlled based on a video signal.

The external control allows to switch the "POWER ON" and "STANDBY" modes of the unit according to the "presence" and "absence" of video signal.

When the video signal becomes absent while the power of the unit is on, it enters the "STANDBY" mode in about 4 seconds, the unit enters the "POWER ON" mode again when the video signal is input again.

External control using a signal from 5 to 13 V in place of video signal is also possible using this jack. However, as this scheme belongs to the professional use, please consult MARANTZ if you want to adopt such an external control scheme.

8 SPEAKER SYSTEM terminals

Connect with speakers using speaker cords. Respect the + and - polarity when connecting speakers.

9 AC INLET

Connect AC cord (Supplied) and plug into a household AC power outlet.

10 RC-5 IN / OUT jack

If your system uses a Marantz remote control compatible component with preamplifier outputs, such as an A/V preamplifier or surround receiver, these jacks allow to turn the power of the MM9000 to ON or OFF/Standby through remote control from the preamplifier or receiver. Before using these jacks, check the owner's manual of the Marantz component to see if it is remote control compatible.

(1) Ventilation hole

CAUTION

When the amplifier is in operation, The temperature of set will rise. Never place any object on the set and back side to maintain ventilation.

12 AC OUTLET

This receptacle supplies AC power regardless of the power switch setting.

The total power consumption of the equipment connected to this receptacle should not exceed 120 W.

4. CONNECTIONS

5. SPEAKER CONNECTION

This equipment, being a high audio output power amplifier, has a hazardous energy at its speaker terminal. Please be sure to make an appropriate speaker connection according to the following procedures:

- Confirm that the power switch of the equipment is at "OFF" position. If it is at "ON", turn it to "OFF" position to connect a speaker cable.
- Use a speaker cable with the flame retardant rating of type SPT12 or more.
- Don't strip the insulation off more than shown in the figure, at the speaker terminal connection of speaker cable.

Speaker cable (Type SPT12)

- Connect speakers in correct polarity, according to the indication for the polarity of speaker terminals.
- Prevent any stress from being applied to the speaker cable connected to the speaker terminal.
- Don't touch the speaker terminals during operation.

Losen the Terminal Insert the core

Tighten the Terminal

Connection of speaker cable Terminal

6. CARE AND MAINTENANCE

This section describes the care and maintenance tasks that must be performed to optimize the operation of your Marantz equipment.

CLEANING OF EQUIPMENT EXTERNAL SURFACES

The exterior finish of your unit will last indefinitely with proper care and cleaning. Never use scouring pads, steel wool, scouring powders or harsh chemical agents (e.g., lye solution), alcohol, thinners, benzine, insecticide or other volatile substances as these will mar the finish of the equipment.

Likewise, never use cloths containing chemical substances. If the equipment gets dirty, wipe the external surfaces with a soft, lint-free cloth.

If the equipment becomes heavily soiled:

- Dilute some washing up liquid in water, in a ratio of one part detergent to six parts water.
- Dip a soft, lint free cloth in the solution and wring the cloth out until it is damp.
- Wipe the equipment with the damp cloth.
- Dry the equipment by wiping it with a dry cloth.

7. REPAIRS

Only the most competent and qualified technicians should be allowed to service your unit. Marantz and its factory trained warranty station personnel have the knowledge and special equipment needed for repair and calibration of this precision instrument.

In the event of difficulty, call the toll-free telephone number listed on the face of the warranty to obtain the name and address of the Marantz Authorized Service Center nearest you. In many cases, the dealer where you purchased your Marantz unit may be equipped to provide service. Please include the model, serial number of your unit together with a copy of your purchase receipt and a full description of what you feel is abnormal in its behavior.

8. TROUBLESHOOTING

The amplifier does not operate and the POWER ON indicator does not light.

- Is the power cable plugged in properly to the AC power outlet?
 The POWER ON indicator lights, but the amplifier does not function.
- Are speaker cables and input cables connected properly?

170W 8-ohm / Channel

9. SPECIFICATION

Front I /B (20Hz -20KHz)

Rated power output

FIORE L/R (2002 -20002)	170W 6-0HH / Channel
Center (20Hz - 20KHz)	170W 8-ohm / Channel
Surround L/R (20Hz - 20KHz)	170W 8-ohm / Channel
THD (20Hz - 20KHz)	0.03% 8-ohm
Input sensitivity	100mV / 1W Output
Input impedance	20K ohms
Frequency response (-1dB)	5 Hz to 100KHz
Signal to noise ratio	95dB
Power requirement	120 VAC, 60 Hz
Power consumption (L/R cannel 10	00W driven) 400W
Dimensions (Maximum)	
Width	17-5/16 inches (440mm)
Height	6-5/16 inches (159mm)
Depth	17-4/5 inches (452mm)
Weight	44.1 lbs (20Kg)
