

MATRIX™ 801 Series 2

Floor-standing loudspeaker system

Product Summary

- Buy applying computer-aided design (CAD) techniques B&W has substantially improved the performance of the original Model 801. The Matrix 801 Series 2 can deliver a full octave more bass and treble than its predecessor and at the same time offer increase sensitivity, better dispersion and transient response.
- The bass system decided by CAD programs is a sixth-order Butterworth alignment vented-box system giving less cone excursion at subsonic frequencies. The cone is made from a specially formulated plastic compound allowing critical mass requirement to be accurately controlled.

Technical highlights

Kevlar®: B&W developed and patented the method of using Kevlar® for loudspeaker cones to reduce unwanted standing waves. DuPont originally created Kevlar® for use in bulletproof vests.

- Tweeter on top: B&W's Tweeter on top technology ensures that the sound remains focused and time-sensitive and that the stereo-image is presented with unparalleled three dimensional accuracy.

Matrix: The basic construction of nearly all loudspeakers is exactly the same - panels of wood-based materials, bonded to form a rectangular box. B&W studied and evaluated how each aspect of cabinet behaviour and the efficiency of various materials and construction methods affects sound.

Description	3-way vented-box system	Nominal Impedance	8 ohms (minimum 4 ohms)
Drive Units	1 x 25mm metal dome - high frequency 1 x 126mm Kevlar® - midrange 1 x 300mm high power polymer cone bass	Power Handling	50W – 600W into 8 ohms on unclipped programme
Frequency Response	20Hz – 20kHz ± 2dB free-field with external bass alignment filter	Dimensions	Height: 1008mm Width: 432mm Depth: 560mm
Sensitivity	87dB spl(2.83V 1m)	Finish	Black Ash, Walnut, Rosewood. Grille: Black Cloth
