

Service Manual

Wireless Display

CF-08TX1A1M

This is the Service Manual for
the following areas.
M ...for U.S.A.

 **WARNING**

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

WARNINGS

For U.K.

This apparatus must be earthed for your safety.

To ensure safe operation the three-pin plug must be inserted only into a standard three-pin power point which is effectively earthed through the normal household wiring.

Extension cords used with the equipment must be three-core and be correctly wired to provide connection to earth. Wrongly wired extension cords are a major cause of fatalities.

The fact that the equipment operates satisfactorily does not imply that the power point is earthed and that the installation is completely safe.

For your safety, if you have any doubt about the effective earthing of the power point, consult a qualified electrician.

FOR YOUR SAFETY PLEASE READ THE FOLLOWING TEXT CAREFULLY

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 3 amp fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 3 amps and that it is approved by ASTA or BSI to BS 1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local Panasonic Dealer.

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13 AMP SOCKET.

If a new plug is to be fitted please observe the wiring code as shown below.

If in any doubt please consult a qualified electrician.

Warning: THIS APPLIANCE MUST BE EARTHED.

Important

The wires in this mains lead are coloured in accordance with the following code:

Green-and-yellow:	Earth
Blue:	Neutral
Brown:	Live

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured GREEN-and-YELLOW must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol  coloured GREEN or GREEN-and-YELLOW.

The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured BLACK.

The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured RED.

The mains plug on this equipment must be used to disconnect the mains power.

Please ensure that a socket outlet is available near the equipment and shall be easily accessible.

How to replace the fuse

Open the fuse compartment with a screw-driver and replace the fuse.

Warnings

- This equipment is not designed for connection to an IT power system.
(An IT system is a system having no direct connections between live parts and Earth; the exposed-conductive-parts of the electrical installation are earthed.
An IT system is not permitted where the computer is directly connected to public supply systems in the U.K.)
- Disconnect the mains plug from the supply socket when the computer is not in use.

This equipment is produced to BS800/1983.

Safety precautions

1. Before servicing, unplug the power cord to prevent an electric shock.
2. When replacing parts, use only manufacture's recommended components for safety.
3. Check the condition of the power cord. Replace if wear or damage is evident.
4. After servicing, be sure to restore the lead dress, insulation barriers, insulation papers, shields, etc.

Important Safety Instructions

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

1. Do not use this product near water, for example, near a bath tub, wash bowl, kitchen sink or laundry tub, in a wet basement or near a swimming pool.
2. Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.
3. Do not use the telephone to report a gas leak in the vicinity of the leak.
4. Use only the power cord and batteries indicated in this manual. Do not dispose of batteries in a fire. They may explode. Check with local codes for possible special disposal instructions.

SAVE THESE INSTRUCTIONS

LITHIUM BATTERY ⚠

• CAUTION

Danger of explosion if battery is incorrectly replaced.

Replace only with the same or equivalent type recommended by the equipment manufacture.

Discard used batteries according to the manufacturer's instructions.

LITHIUMBATTERIES ⚠

Vorsicht!

Explosionsgefahr bei unsachgemäßem Austausch der Batterie. Ersatz nur durch denselben oder einen vom Hersteller empfohlenen ähnlichen Typ. Entsorgung gebrauchter Batterien nach Angaben des Herstellers.

PILE AU LITHIUM ⚠

ATTENTION: IL Y A DANGER D'EXPLOSION S' IL Y A REMPLACEMENT INCORRECT DE LA PILE. REMPLACER UNIQUEMENT AVEC UNE PILE DU MÊME TYPE OU D'UN TYPE RECOMMANDÉ PAR LE CONSTRUCTEUR. METTRE AU RÉBUT LES PILES USAGÉES CONFORMÉMENT AUX INSTRUCTIONS DU FABRICANT.

For U.S.A. / CANADA

A lithium ion battery that is recyclable powers the product you have purchased. Please call 1-800-8-BATTERY for information on how to recycle this battery.

L'appareil que vous vous êtes procuré est alimenté par une batterie au lithium-ion. Pour des renseignements sur le recyclage de la batterie, veuillez composer le 1-800-8-BATTERY.

Precautions

Battery Pack

Care should be exercised with regard to the following in order to avoid the possibility of overheating, fire or damage.

Avoid Heat

Do not throw the battery pack into a fire or expose it to excessive heat.

Keep Articles Away

Do not place the battery pack together with articles such as necklaces or hairpins when carrying or storing.

Do Not Disassemble

Do not insert sharp objects into the battery pack, expose it to bumps or shocks, deform, disassemble, or modify it.

Do Not Short

Do not short the positive (+) and negative (-) contacts.

Avoid Extreme Heat, Cold and Direct Sunlight

Do not charge, use or leave the battery pack for extended periods where it will be exposed to direct sunlight, in a hot place (in a car on a sunny day, for example), or in a cold place.

Do Not Use With Any Other Equipment

The battery pack is rechargeable and was intended for the specified equipment. Do not use it with any equipment other than the one for which it was designed.

Do Not Use This Wireless Display with a Battery Pack Other Than the One Specified

Use only the specified Panasonic battery pack (CF-VZSU44U) with your CF-08. Use of batteries other than those manufactured and supplied by Panasonic may represent a safety hazard.

Do Not Put into a Microwave

Do not put the battery pack into a microwave oven or a pressurized chamber.

Stop Using

Should the battery emit an abnormal odor, become hot to the touch, become discolored, change shape, or become in any way different from normal, remove it from the wireless display and stop using it.

Do not touch the terminals on the battery pack. The battery pack may no longer function properly if the contacts are dirty or damaged. Do not expose the battery pack to water, or allow it to become wet. If the battery pack will not be used for a long period of time (a month or more), charge or discharge (use) the battery pack until the remaining battery level becomes 30% to 40% and store it in a cool, dry place. This wireless display prevents overcharging of the battery by recharging only when the remaining power is less than approx. 95% of capacity. The battery pack is not charged when the wireless display is first purchased. Be sure to charge it before using it for the first time. When the AC adaptor is connected to the wireless display, charging begins automatically. Should the battery leak and the fluid get into your eyes, do not rub your eyes. Immediately flush your eyes with clear water and see a doctor for medical treatment as soon as possible.

NOTE

The battery pack may become warm during recharging or normal use. This is completely normal. Recharging will not commence if internal temperature of the battery pack is outside of the allowable temperature range (0 °C to 45 °C {32°F to 122°F}). Once the allowable range requirement is satisfied, charging begins automatically. Note that the recharging time varies based on the usage conditions. (Recharging takes longer than usual when the temperature is 10 °C {50°F} or below.) If the temperature is low, the operating time is shortened. Only use the equipment within the allowable temperature range. The battery pack is a consumable item. If the amount of time the equipment can be run by using a particular battery pack becomes dramatically shorter and repeated recharging does not restore its performance, the battery pack should be replaced with a new one. When transporting a spare battery inside a package, briefcase, etc., it is recommended that it be placed in a plastic bag so that its contacts are protected. Always power off the equipment when it is not in use. Leaving the equipment on when the AC adaptor is not connected will exhaust the remaining battery capacity.

1 Specifications

Main Specifications

Model No.	CF-08TX1A1M
CPU	Intel® PXA270 Processor 312 MHz
Memory (ROM/RAM)	32 MB (Flash) /64 MB
Display Method	10.4 XGA type
Internal LCD Display	65,536 colors (1024 × 768 pixels)
Wireless LAN	Built-in
Bluetooth	Built-in
LAN	IEEE 802.3 10Base-T, IEEE 802.3u 100Base-TX
Sound	WAVE playback, Monaural speaker
Card Slot	SD Memory Card*1
	× 1, Data transfer rate=4.8 MB per second*2
Interface	USB Port × 1 (USB1.1), LAN Port (RJ-45), Expansion Bus Connector (Dedicated 16-pin), Microphone Jack (Miniature jack, 3.5 DIA, Monaural), Headphone Jack (Miniature jack, 3.5 DIA, Impedance 32 Ω, Output Power 4 mW × 2)
Button	Power button, USER button, Keyboard button, Cursor control button (with Enter key)
Pointing Device	Touchscreen (Anti-Reflection, Stylus (included) touch capable)
Power Supply	AC adaptor or Battery pack
AC Adaptor*3	Input: 100 V to 240 V AC, 50 Hz/60 Hz Output: 16.0 V DC, 2.5 A
Battery Pack	Li-ion 7.4 V, 5.2 Ah
Operating Time*4	Approx. 4.5 hours to 14 hours*5 (Approx. 7 hours)*6
Charging Time*4	Approx. 4 hours
Power Consumption*7	Approx. 10 W *8/ Approx. 30 W (Maximum when recharging in the ON state)
Physical Dimensions (W × H × D)	267 mm × 208 mm × 36 mm (excluding protrusion) {10.5 " × 8.2 " × 1.4 "}
Weight	Approx. 1.2 kg {Approx. 2.6 lb.}
Operation Environment	Temperature: 5 °C to 35 °C {41 °F to 95 °F} Humidity: 30% to 80% RH (No condensation)
Storage Environment	Temperature: -20 °C to 60 °C {-4 °F to 140 °F} Humidity: 30% to 90% RH (No condensation)
Operating System	Microsoft® Windows® CE 5.0 Professional

Software	Microsoft® Remote Desktop Connection, Citrix® ICA® Client, Microsoft® Internet Explorer 6.0
----------	---------------------------------------------------------------------------------------------

- *1 This slot does not support the MultiMedia card.
Operation has been confirmed for Panasonic SD Memory Cards with up to 2 GB capacity.
- *2 Theoretical value and not the actual speed. The transfer rate does not become higher even if you use a card that supports the higher transfer rate.
- *3 <Only for North America>
The AC adaptor is compatible with power sources up to 240 V AC adaptor. The wireless display is supplied with a 125 V AC compatible AC cord.
- *4 Varies depending on the usage conditions.
- *5 Measured using BatteryMark™ Version 4.0.1 (LCD brightness: Maximum - Minimum)
- *6 Measured using MobileMark™ 2002 (LCD brightness: 150 cd/m²)
- *7 Approx. 0.9 W when the battery pack is fully charged (or not being charged) and the wireless display is OFF.
- *8 Rated power consumption

Wireless LAN

Data transfer rates* ⁹	11/5.5/2/1 Mbps (automatically switched)
Standards supported	IEEE802.11b
Transmission method	OFDM system, DS-SS system
Wireless channels used	Channels 1 to 11
RF frequency band	2412-2462 MHz

- *⁹ These are speeds specified in IEEE802.11b standards. Actual speeds may differ.

Bluetooth™

Bluetooth Version	1.2
Transmission Method	FHSS system
Wireless Channels Used	Channels 1 to 79
RF Frequency Band	2.402-2.48 GHz

3 Description of parts

- A. LCD (Touchscreen)
- B. Wireless LAN antenna
- C. Bluetooth antenna
- D. Power status
- E. Power button
- F. Battery status
- G. DC-IN jack
- H. LAN port
- I. Cursor control button
- J. Keyboard button
- K. USB port
- L. USER button
- M. SD Memory Card slot
- N. SD Memory Card status

- A. **Battery cover latch**
- B. **Hand strap**
Adjust the length of the belt so that the wireless display does not fall by mistake, and firmly hold the wireless display when using it.
- C. **Battery pack**
- D. **Headphone jack**
You can connect headphones or amplified speakers. When they are connected, audio from the internal speakers is not heard.
- E. **Microphone jack**
Use only monaural condenser microphone (miniature jack). Connecting another type of microphone may interrupt audio input or may cause a malfunction.
- F. **Stylus holder**
- G. **Security lock**
You can connect a Kensington cable. Refer to the instruction manual of the cable.
- H. **Speaker**
- I. **Expansion bus connector**

CAUTION

Do not put metallic objects or magnetic media close to the speaker.
Do not touch the expansion bus connector. The wireless display may no longer function properly if the connector is dirty or damaged.

Using the Tether

The tether can be attached to the upper right or upper left corner of the display. It prevents the pen (included) from falling accidentally.

Attaching the Tether

4 Starting up/Shutting Down

Starting Up

1 Turn on the wireless display.	
When you log on as a Supervisor	When you log on as a User
Press the power button with the USER button pressed. <ul style="list-style-type: none"> If you do not do so, even when you set enter the Supervisor Password, the wireless display will run in the User operating environment. 	Press the power button.

<p>2 When the [Enter Password] screen appears, enter the password, and then tap [OK].</p> <p>When you log on as a User When the check mark is added for [Skip Password Dialog] of the [User] tab in [Security (Supervisor)], the [Enter Password] screen is not displayed.</p>

3 Connect to the server.	
When making connections with Microsoft® Remote Desktop Connection	When making connections with Citrix® ICA® Client
Double-tap  *1 on the desktop. XXX The server desktop screen will appear. <p>*1 The file name entered when making the server setting will appear instead of "XXX".</p> <ul style="list-style-type: none"> When you do not add the check mark for [Save my password] in "When making connections with Microsoft® Remote Desktop Connection" step C of "First-time Operation" step 7 Enter the password, and then tap [OK]. 	Double-tap  *2 the desktop. XXX *2 The file name entered when making the server setting will appear instead of "XXX".
	When making connections with Microsoft® Internet Explorer
	Double-tap  on the desktop. Internet Explorer

NOTE

When logged on as a User, the security setting screen can be displayed using the following procedure.

- Double-tap  on the desktop.
Control Panel
- Double-tap [Security (User)].
The following screen will appear.

A. Auto Launch

B. Wait for Network Connection

- When the Supervisor does not add the check mark for [Allow Change Auto Launch] in the [User] tab of the [Security Settings (Supervisor)] screen, [Auto Launch] and [Wait for Network Connection] cannot be set here.

C. Password

To set the password

- If a User Password has been set in the [User] tab of [Security (Supervisor)] screen, User cannot delete a password.
- If a User Password has not been set in the [User] tab of [Security (Supervisor)] screen, User cannot create a new password.

When terminating the connection

Perform the following operation.

Tap [Start] - [Log Off] - [Log Off].

<Only when making connections with Microsoft® Remote Desktop Connection>

You can terminate the connection using the following operation.

Tap  (A), and when the message appears, tap .

CAUTION

If you tap [Start] - [Shut Down], the power for the server itself will be turned off.

Make the settings (only for the Supervisor)

When settings have been changed

Before turning off the wireless display, save (back up) the settings making reference to step 9 in “First-time Operation”.

When deleting settings

Perform the following procedure.

A Double-tap  on the desktop and double-tap [Flash Delete].

B Connect your wireless display to a power outlet.

C Tap [Delete Backup].

When the confirmation message appears, tap [Yes].

Deleting data will start.

D When the message “Backup data has been deleted.” appears, tap .

NOTE

When you turn on the wireless display next time, the calibration screen will appear.

When returning the wireless display to its condition at the time of shipment

Perform the following procedure while the wireless display is turned off.

- A** Connect your wireless display to a power outlet.
- B** Press the power button with the keyboard button and USER button pressed until the message “Reset the device to factory default...” appears.
When the [Enter Password] screen appears, enter the Supervisor Password and tap [OK].
- C** Select [Yes].

NOTE

When you turn on the wireless display next time, the calibration screen will appear.

Shutting Down (power off the wireless display)

- 1 Press the power button for one or two seconds until the message “Preparing to Power off...” appears.**
When shutting down forcefully, press the power button for four seconds or longer.

5 Diagnosis & Repair

5.1. Basic Procedures

The basic procedures for diagnosis, disassembly, and test of defective parts of a set to be repaired are summarized below. For details, refer to relevant pages in the Service Manual.

- Flow Chart

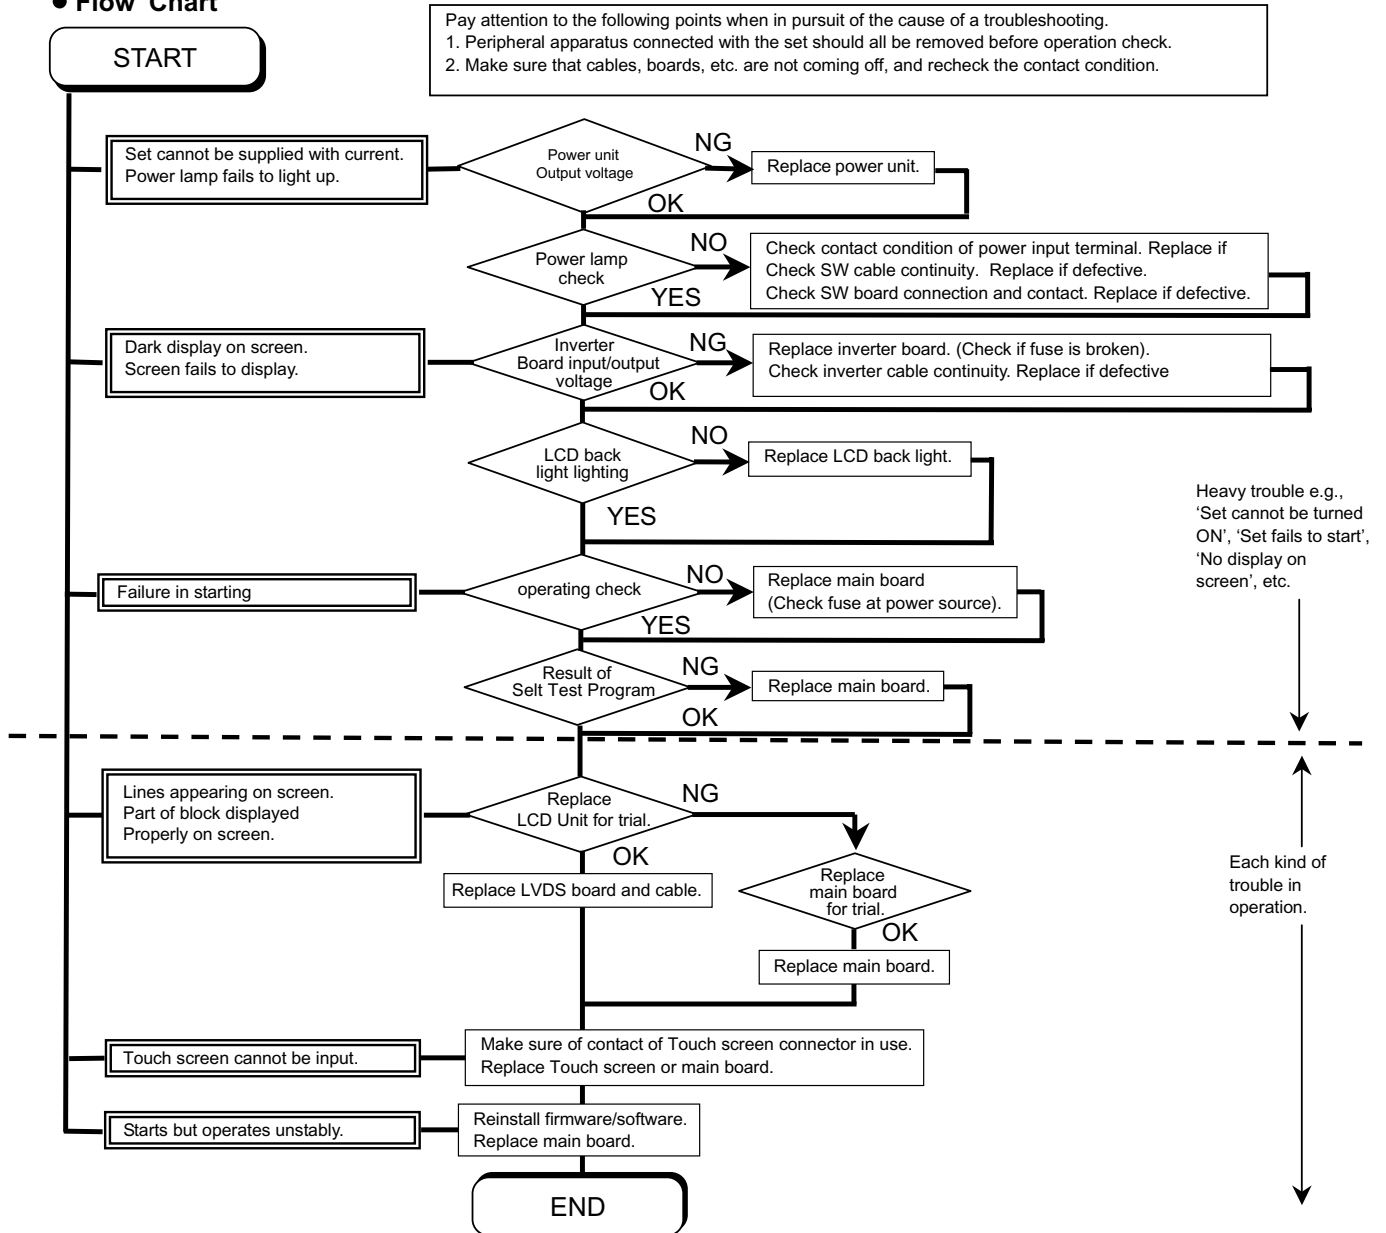

5.2. Troubleshooting

Please take note of the following two points with regard to troubleshooting:

1. Know-how of diagnosis upon occurrence of heavy troubles, e.g. 'Set cannot be turned ON', 'Set fails to start', 'No display on screen', etc.
2. Explanation of each trouble, mainly symptom of trouble in operation.

• Flow Chart

5.3. Self Test Program

1. Introduction

This description explains Self-Test Program of this Test.

2. How to Start-up

(1) Connect the AC adaptor. (Unless you connect the AC adaptor, the Self-Test Program does not start.)

(2) Connect the AC adaptor. Press the USER button and Cursor Control button at the same time, then press the Power button to turn on the computer. Self-Test Program starts automatically.

3. Self-Test

This test is to check if the device is disconnected.

3.1. Test Items

Conduct the device test in the following order.

- (1) CPU Type check
- (2) SDRAM march test
- (3) Test register check for the source microcomputer
- (4) ID check and frame buffer test for 2700G(GRAPHIC)
- (5) Test register and chip ID test for LAN9118
- (6) Card detection pin check and tuple information check for PCMCIA

3.1.1. CPU Type check

Check if the CPU is mounted with Intel PXA270 C5 Stepping.

3.1.2. SDRAM march test

Conduct the march test for the main-64MB and 2700G-VRAM8MB.

3.1.3. Test register check for the source microcomputer.

Check the test register of the source microcomputer

3.1.4. ID check for 2700G

Confirm the ID of 2700G.

3.1.5. Chip ID check for LAN9118

Check the test register and chip ID of LAN9118.

3.1.6. Card detection pin check and tuple information check for PCMCIA

When you cannot obtain the tuple information, wait 0.5 second, then try to obtain the information by calling for API. Repeat this up to 10 times. (The maximum time required: 5 seconds.)

3.2. Display during the test

The following characters are shown during the Self-Test.

```
*** SELF TEST ***
```

```
Now Testing...
```

3.3. Test Result

When the Self Test ends normally, each test result is shown on the display. The same result as Overall Result is shown underneath.

If the results of all items are OK, the following display appears.

*** SELF TEST ***

CPU Type : OK
SDRAM March Test : OK
Embedded Controller : OK
2700G : OK
LAN9118 : OK
PCMCIA : OK

Overall Result : OK

If only the PCMCIA result is NG, the following display appears.

*** SELF TEST ***

CPU Type : OK
SDRAM March Test : OK
Embedded Controller : OK
2700G : OK
LAN9118 : OK
PCMCIA : NG

Overall Result : NG

After the test result is shown on the display, the program hangs.

4. How to Restart

To restart the computer, either disconnect the AC adaptor, or press and hold the power button more than 4 seconds.

6 Troubleshooting

Follow the instructions below when a problem has occurred. For a software problem, refer to the software's instruction manual. If the problem persists, contact your technical support office.

Starting Up

Cannot start up. The power indicator or battery indicator is not lit.	Connect the AC adaptor. Insert a fully charged battery. Remove the battery pack and the AC adaptor, then connect them again.
Cannot turn on the wireless display.	Leave it in an environment of 5 °C {41 °F} or higher temperature for about an hour, then turn on the power once more.
You have forgotten the password.	Supervisor Password or User Password: Contact your technical support office.
The date and time are incorrect.	Make the correct settings. Double-tap  on the desktop, and double-tap [Date/Time].
Other startup problems.	Remove all peripheral devices.

Display

No display.	The display is turned off by the power-saving function. To resume, touch the LCD. The wireless display powers off by the power-saving function. To power on, press the power button.
The screen is dark.	Adjust the brightness. As you increase the brightness, battery consumption increases.

Touchscreen

The cursor does not work.	When using the external mouse, connect it correctly.
Cannot point the correct position using the included stylus.	Perform the touchscreen calibration .

Shut Down

Cannot shut down.	Press the power button for four seconds or longer to shut down the wireless display.
-------------------	--------------------------------------------------------------------------------------

Sound

No sound.	Confirm the volume for [Quick Menu] or [Volume & Sounds] in Control Panel.
Unable to hear sound in stereo.	Playback conditions vary depending on the server. <ul style="list-style-type: none">• If you are connecting through Microsoft® Remote Desktop Connection or a web server, you will hear monaural sound even if the original sound is stereo.• For playback conditions when connecting through Citrix® Presentation Server 4.0, refer to the Citrix manual for details.

Wireless Communication

Cannot connect to network.	Check the network settings. You may experience interference with other wireless LAN access points. Verify that each wireless LAN access point is set to a different channel.
----------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Connecting Peripherals

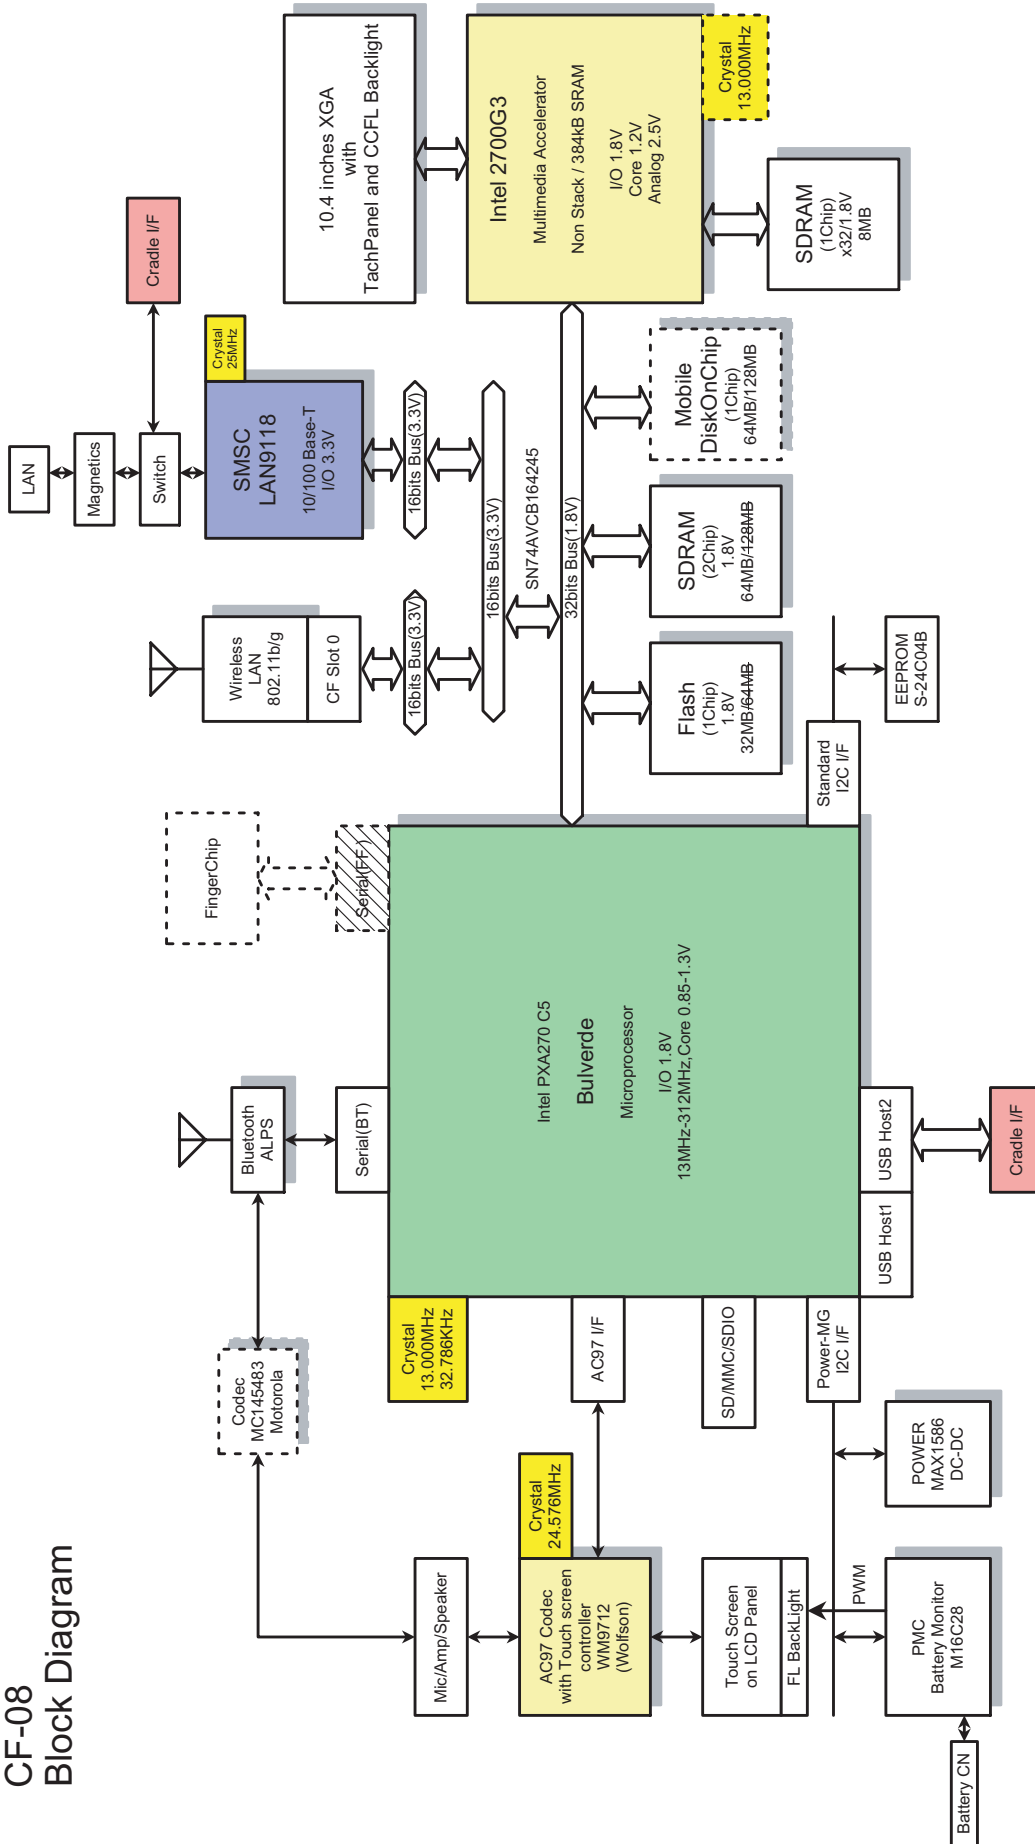

The connected keyboard and mouse do not work.	Check the keyboard and mouse connection.
The device connected to the serial port does not work.	Check the connection. The device driver may not work. Refer to the instruction manual of the device. Do not connect two mouse devices simultaneously.
Cannot print.	Check the printer connection. Turn on the printer. The printer is not online. No paper is in the printer tray or there is a paper jam. Turn on the printer and connect it to the wireless display, and then turn on the wireless display.

Others

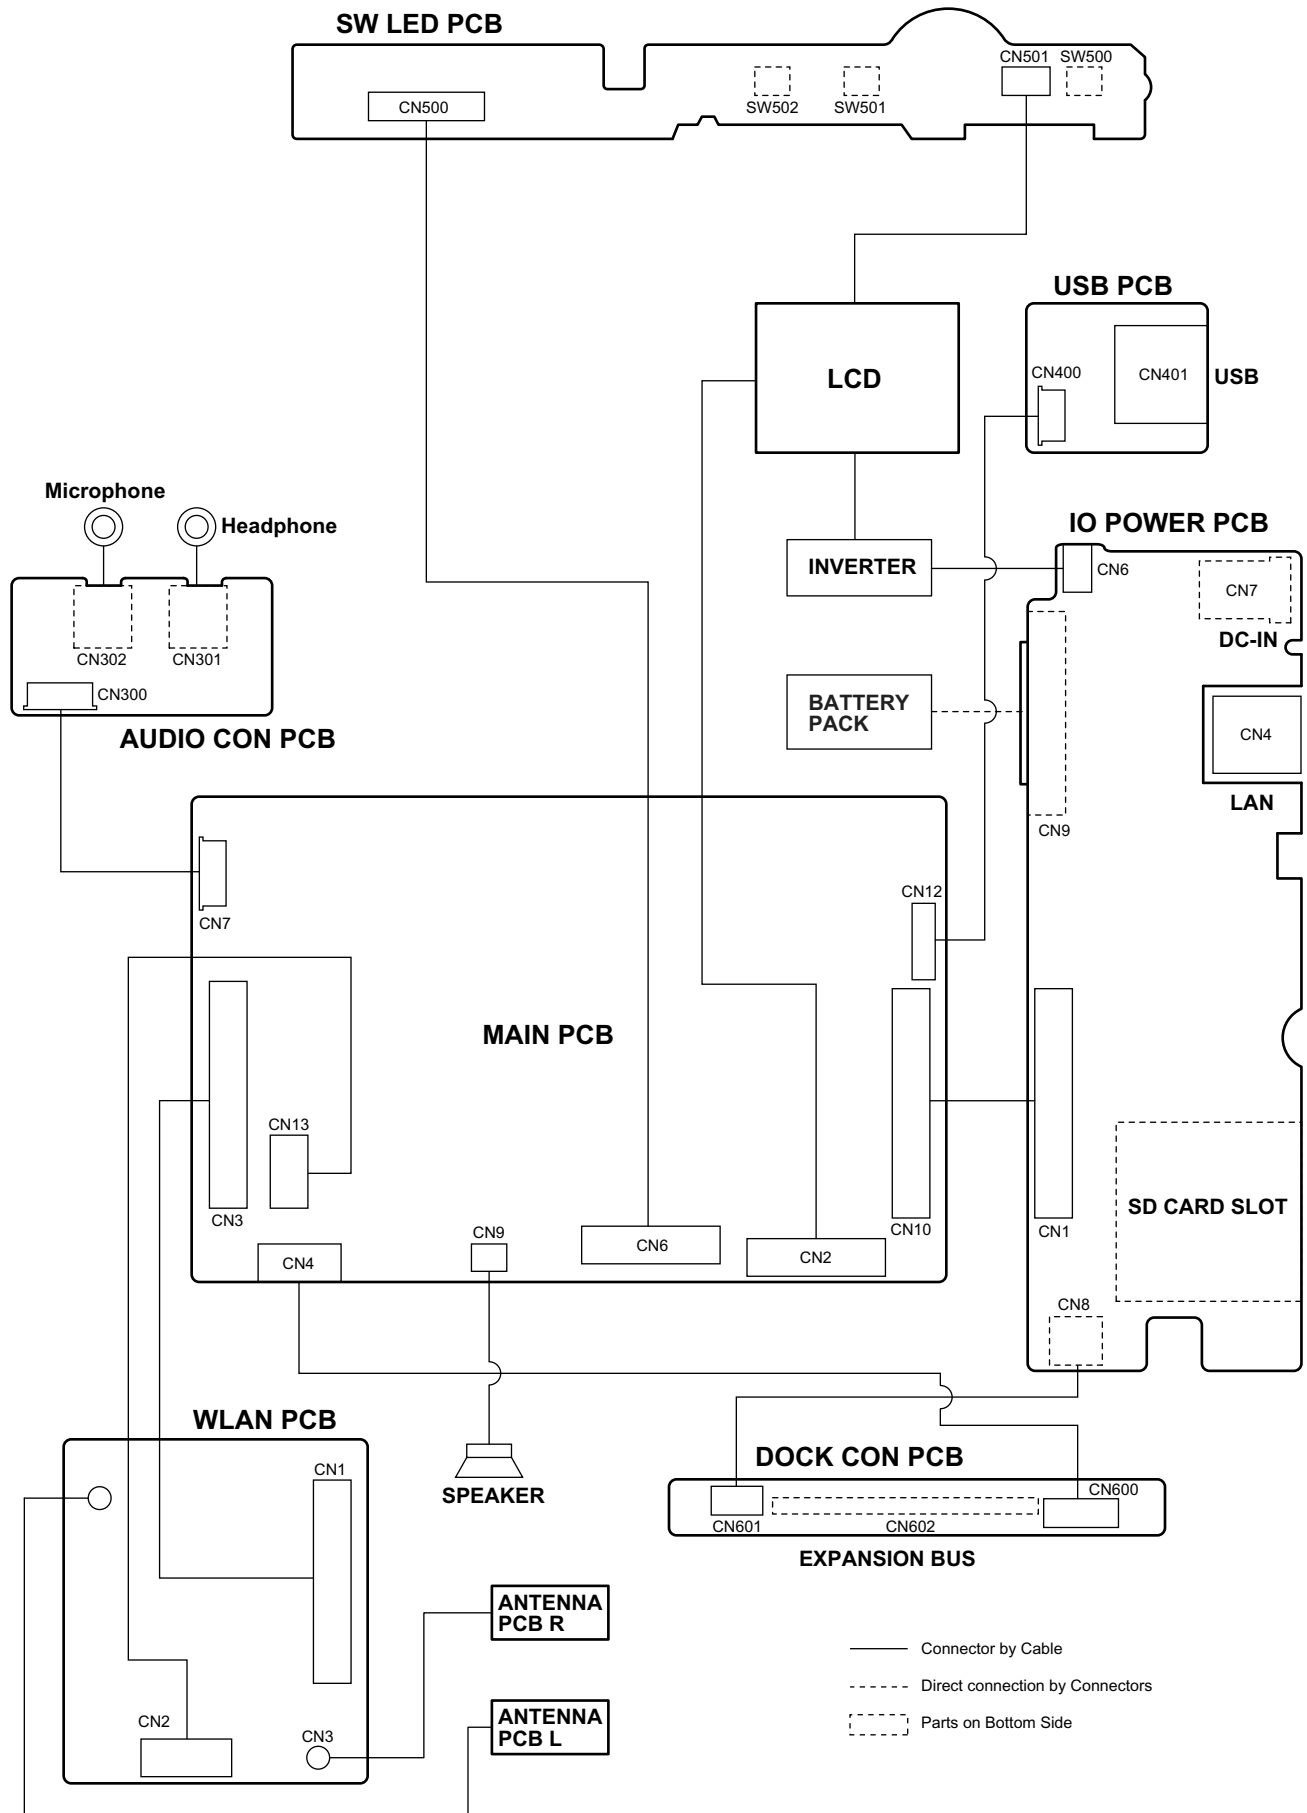

No response.	The screen content may not display correctly due to poor signal quality. In such case, move to a place where signal quality is good then make a connection. Press the power button for four seconds or longer to shut down the wireless display, and then press the power button to turn it on.
--------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

8 Wiring Connection Diagram

9 Disassembly/Reassembly

Note:

Power off the computer. Do not shut down to the Suspend or hibernation mode.

Do not add peripherals while the computer is in the Suspend or hibernation mode; abnormal operation may result.

9.1. Disassembly Instructions

9.1.1. Preparation

Be sure to make the following preparations before disassembling.

- Shut down Windows and turn off the power.
- Disconnect the AC adaptor.
- Remove other devices if they are connected.

Attention:

- Please execute writing BIOS ID when you exchange the Main Board.
- Parts (Sheet and rubber) etc. related various the Conductive Cloth and Heat Spreader cannot be recycled. Use new parts.

9.1.2. Removing the Battery Pack

1. Open the hand strap cover.

2. Remove the hand strap.

3. Slide the Battery cover latch.

4. Open and remove the Battery cover.

5. Pull the tab of the Battery Pack and remove it from the wireless display.

6. Attach the hand strap.

7. Close the hand strap cover.

9.1.3. Removing the Display Unit

1. Remove the two Screws <N4> and the Antenna Cover L.

2. Remove the two Screws <N4> and the Antenna Cover R.

3. Remove the 12 Screws <N6>.

4. Remove the Cable Hold Sheet while opening the Rear Cabinet ASS'Y slowly.
5. Remove the Cable hooked on the Lamp Cable Spring.
6. Remove both the Inverter and the Inverter Case.
7. Remove the Connector (CN6) connected to the IO Power PCB.
8. Open the Rear Cabinet.

9.1.4. Removing the Main PCB

1. Disconnect the seven Cables from the Connectors (CN3,CN4,CN7,CN9,CN10,CN12,CN13).
2. Remove the four Screws <N1>.
3. Remove the Main PCB.

Screws <N1>: XSB2+4FNL

9.1.5. Removing IO Power PCB

9. Remove the Clamper and the Connectors (CN2, CN6) connected to the Main PCB.
10. Remove the Display Unit.

Screws <N4>:DXSB2+6FNL
Screws <N6>:DXYN26+J6FNL

1. Disconnect the Cable from the Connector (CN8).
2. Remove the Edge Sheet.
3. Remove the eight Screws <N1>.
4. Remove the IO Power PCB.

Screws <N1>:XSB2+4FNL

9.1.6. Removing the WLAN PCB

1. Remove the two Antenna Cables.
2. Remove the four Screws <N1>.
3. Remove the Lamp Cable Spring.
4. Remove the WLAN PCB.

Screws <N1>:XSB2+4FNL

9.1.7. Removing the Audio Con PCB

1. Disconnect the Cable from the Connector (CN300).
2. Remove the Edge Sheet.
3. Remove the two Screws <N1>.
4. Remove the Audio Con PCB.

Screws <N1>:XSB2+4FNL

9.1.8. Removing the Speaker

1. Remove the two Screws <K1-1-2>.
2. Remove the Speaker Hold Sheet.
3. Remove the Speaker fixed with the two-sided tape.

Screws <K1-1-2>:XSB2+4FNL

9.1.9. Removing the USB PCB

1. Remove the two Screws <N1>.
2. Disconnect the Cable from the Connector (CN400).
3. Remove the USB Hold Plate and the USB PCB.

Screws <N1>:XSB2+4FNL

9.1.10. Removing the WLAN L PCB

1. Remove the Insulation Sheet.
2. Remove the Screw <N7>.
3. Remove both the Antenna Cable and the WLAN L PCB.

Screw <N7>:DFHE5025XA

9.1.11. Removing the Bluetooth WLAN R PCB

1. Remove the two tapes.
2. Remove the Screw <N7>.
3. Remove both the Antenna Cable and the Bluetooth WLAN R PCB.

Screw <N7>:DFHE5025XA

9.1.12. Removing the Dock Con PCB

1. Remove the FFC Hold Cushion.
2. Disconnect the two Cables from the Connectors

(CN600,CN601).

3. Remove the five screws <N3>.
4. Remove the Base Joint Cover, the Docking PCB Sheet and the Dock Con PCB.

Screws <N3>:DXQT26+D5FNL

9.1.13. Removing the SW LED PCB

1. Remove the three Screws <N2>.
2. Remove the SW Board Stopper Plate.
3. Disconnect the two Cables from the Connectors (CN500,CN501).
4. Remove the SW LED PCB.

Screws <N2>:DRSB2+5FKL

9.1.14. Removing the LCD Unit and the Inverter

1. Disconnect the Cable from the Inverter Connector.
2. Remove the Inverter with the Inverter Case.
3. Remove the Pet Tape.

4. Remove the TS Noise Tape.
5. Remove the Cable from the Clamper.
6. Remove the LCD Unit.

9.2. Reassembly Instructions

9.2.1. Attention when CF-08 series is repaired

- Please execute writing BIOS ID when you exchange the Main Board.
- Parts (Sheet and rubber) etc. related various the Conductive Cloth and Heat Spreader cannot be recycled. Use new parts.

9.2.2. Setting the LCD Unit and the Inverter

1. Attach the LCD Unit.
2. Attach the TS Noise Tape.
3. Put the Cable into the Clamper.

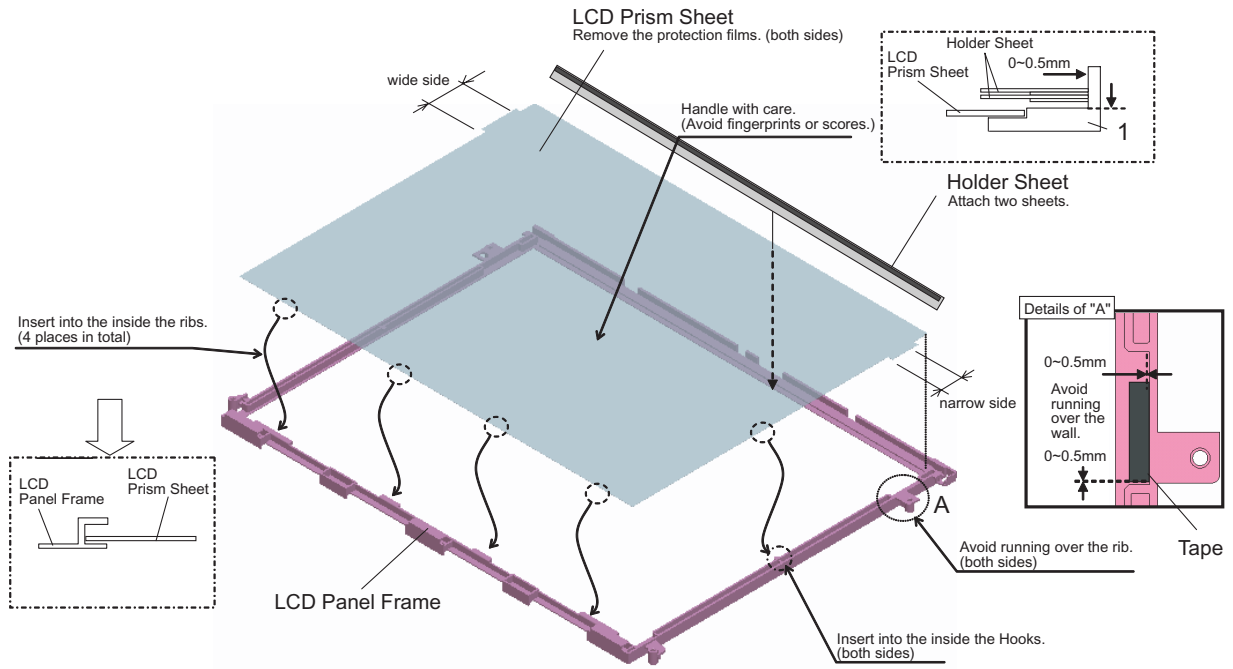

4. Attach the Pet Tape.
5. Connect the Cable to the Inverter connector.

■ Preparations for backlight

For appearance standard information of the LCD process, refer to the "Common Assembly Instruction Manual".

■ Assembly of the LCD

Safety Working

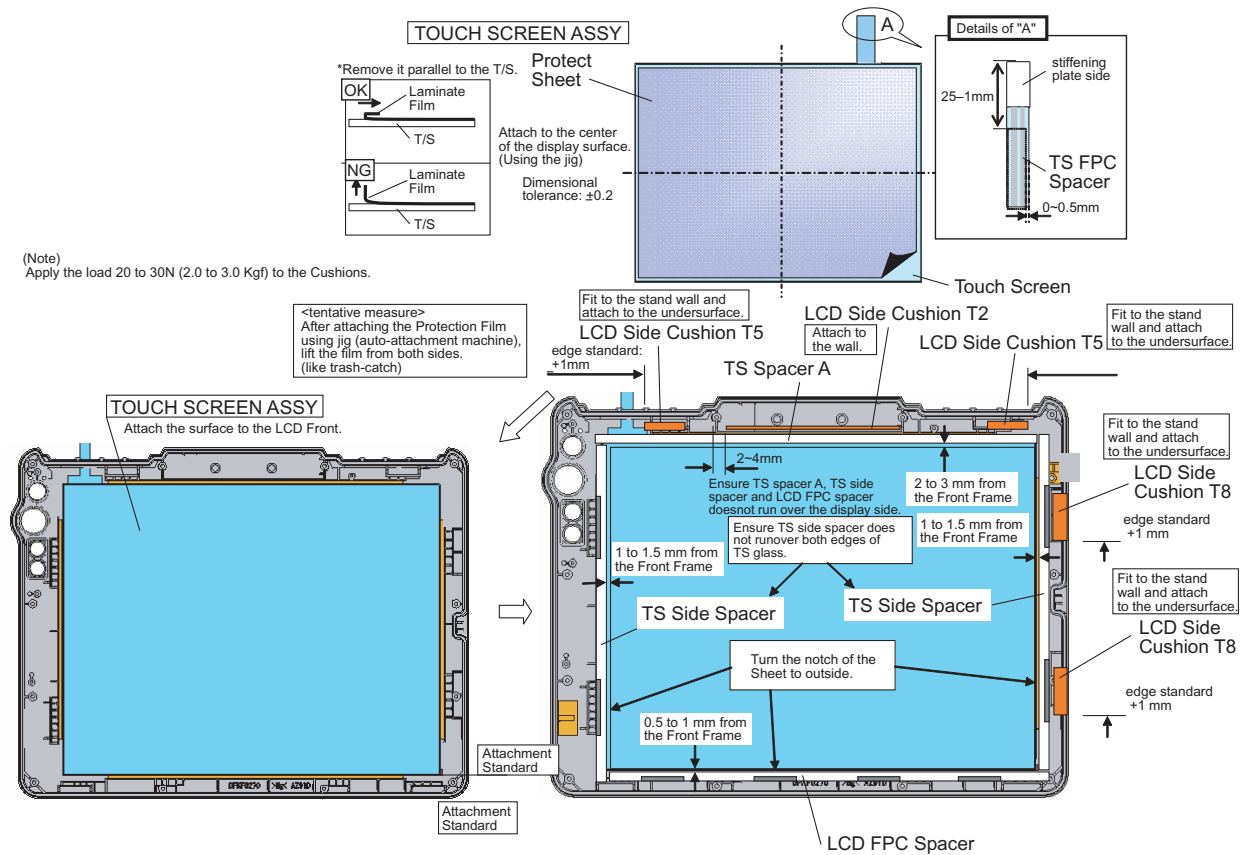

Remove the Protection Films. (both sides)
Peeled Laminate Film is electric-charged.
Before reusing the Film, remove electricity.

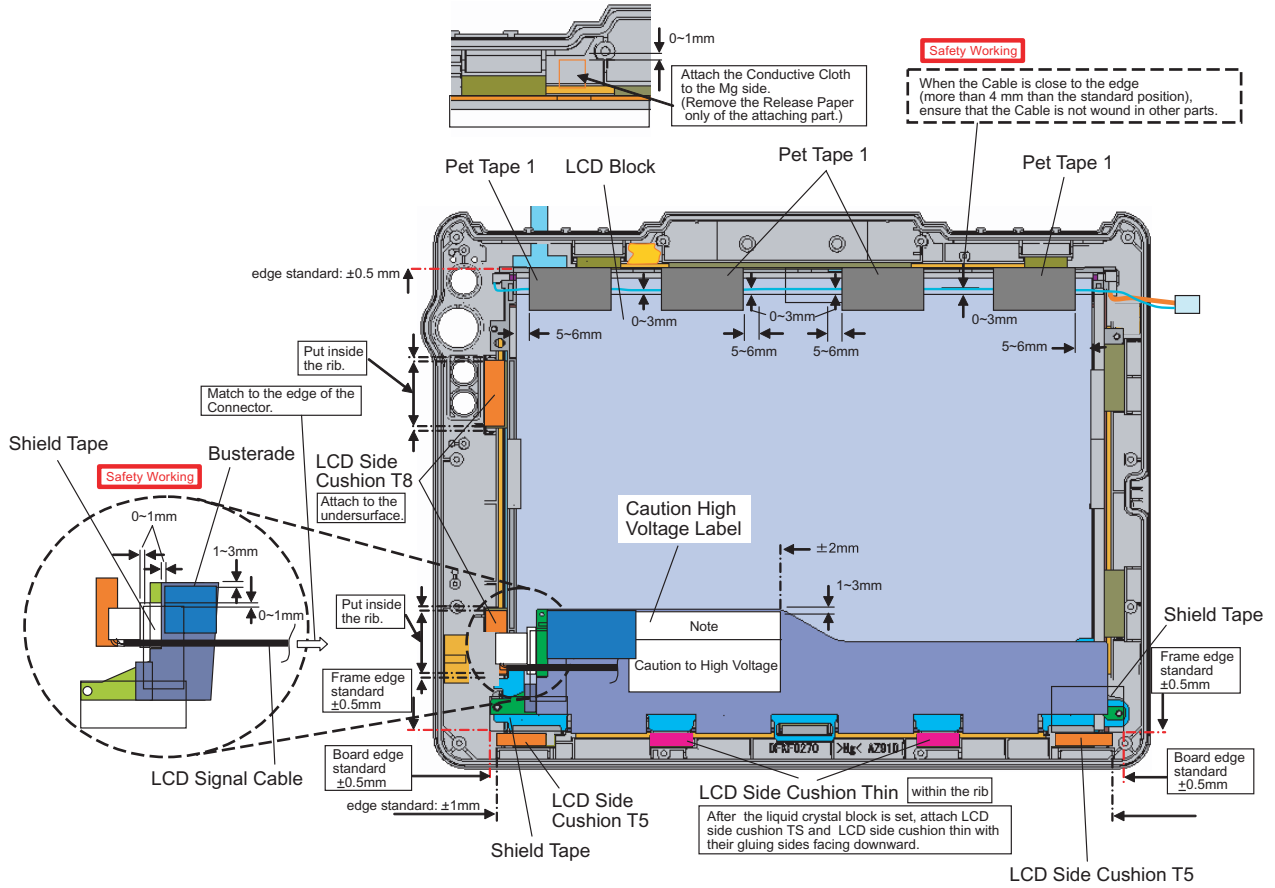

■ Preparations for Touchscreen

■ Assembly of the Touchscreen

■ Assembly of the LCD Block

9.2.3. Setting the SW LED PCB

1. Connect the Cable to the connector (CN501) of the SW LED PCB.
2. Attach the tape.
3. Fix the SW LED PCB and SW Board Stopper Plate using three Screws <N2>. No1 to No3
4. Put the Cable into the Clamper.

Note:

Tighten the Screws in the numbered order (No1 to No3).

Screws <N2>:DRSB2+5FKL

■ Assembly of the SW LED PCB

9.2.4. Setting the Dock Con PCB

1. Fix the Docking PCB Sheet, the Base Joint Cover and the Dock Con PCB using five Screws <N3>. No1 to No5

2. Connect the two Cables to the two connectors (CN600, CN601) of the Dock Con PCB.
3. Attach the FFC Hold Cushion.

Note:

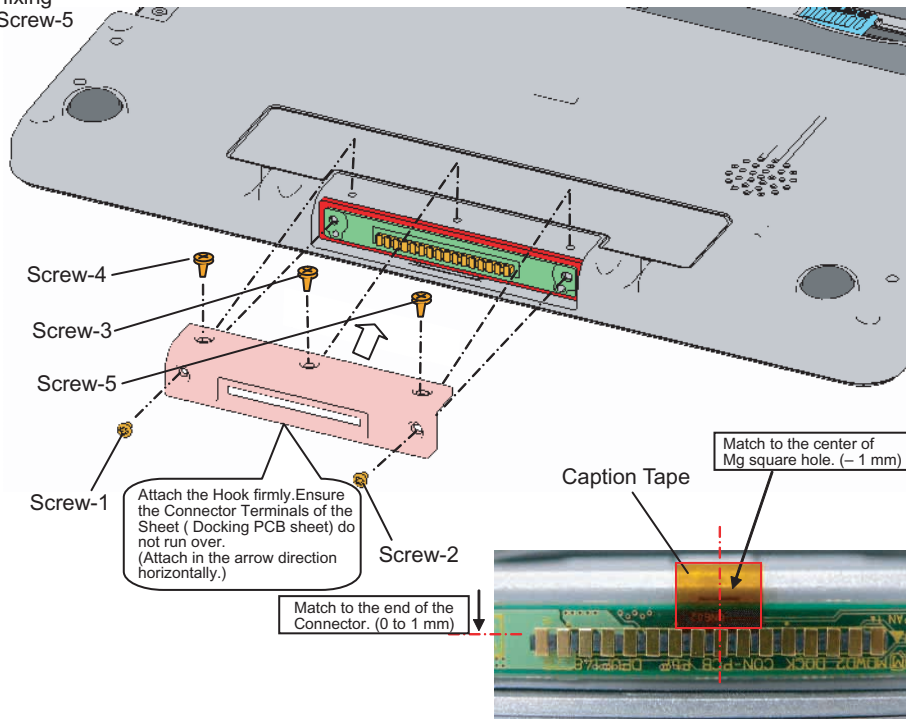

Tighten the Screws in the numbered order (No1 to No5).

Screws <N3>:DXQT26+D5FNL

■ Assembly of the DOCK CON PCB

Order of fixing
Screw-1->Screw-5

9.2.5. Setting the Bluetooth WLAN R PCB

1. Fix the Antenna Cable and the Bluetooth WLAN R PCB using one Screw <N7>.
2. Fix the Antenna Cables with the two tapes.

Screw <N7>:DFHE5025XA

9.2.6. Setting the WLAN L PCB

1. Fix the Antenna Cable and the WLAN L PCB using one Screw <N7>.
2. Fix the Antenna Cable with the Insulation Sheet.

Screw <N7>:DFHE5025XA

■ Assembly of the Antenna PCB

9.2.7. Setting the USB PCB

1. Fix the USB Hold Plate and the USB PCB using two Screws <N1>.
2. Attach the Edge Sheet.

Screws <N1>:XSB2+4FNL

9.2.8. Setting the Speaker

1. Attach the Speaker.
2. Fix the Speaker Hold Sheet using two Screws <K1-1-2>.

Screws <K1-1-2>:XSB2+4FNL

9.2.9. Setting the Audio Con PCB

1. Connect the Cable to the Connector (CN300) of the Audio Con PCB.
2. Fix the Audio Con PCB using two Screws <N1>.
3. Attach the Edge Sheet.

Screws <N1>:XSB2+4FNL

9.2.10. Setting the WLAN PCB

1. Fix the WLAN PCB and the lamp Cable Spring using four Screws <N1>.
2. Fix the two Antenna Cables.

Screws <N1>:XSB2+4FNL

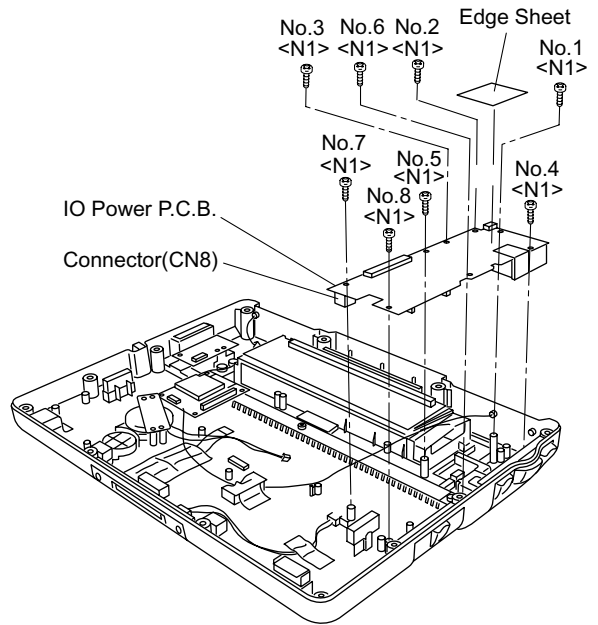

9.2.11. Setting the IO Power PCB

1. Fix the IO Power PCB using eight Screws <N1>. No1 to No8
2. Connect the Cable to the Connector (CN8) of the IO Power PCB.
3. Attach the Edge Sheet.

Note:

Tighten the Screws in the numbered order (No1 to No8).

Screws <N1>:XSB2+4FNL

9.2.12. Setting the Main PCB

1. Connect the Cable to the Connector (CN7) of the Main PCB.
2. Fix the Main PCB using four Screws <N1>. No1 to No4
3. Connect the Cables to the six Connectors (CN3,CN4,CN9,CN10,CN12,CN13) of the Main PCB.

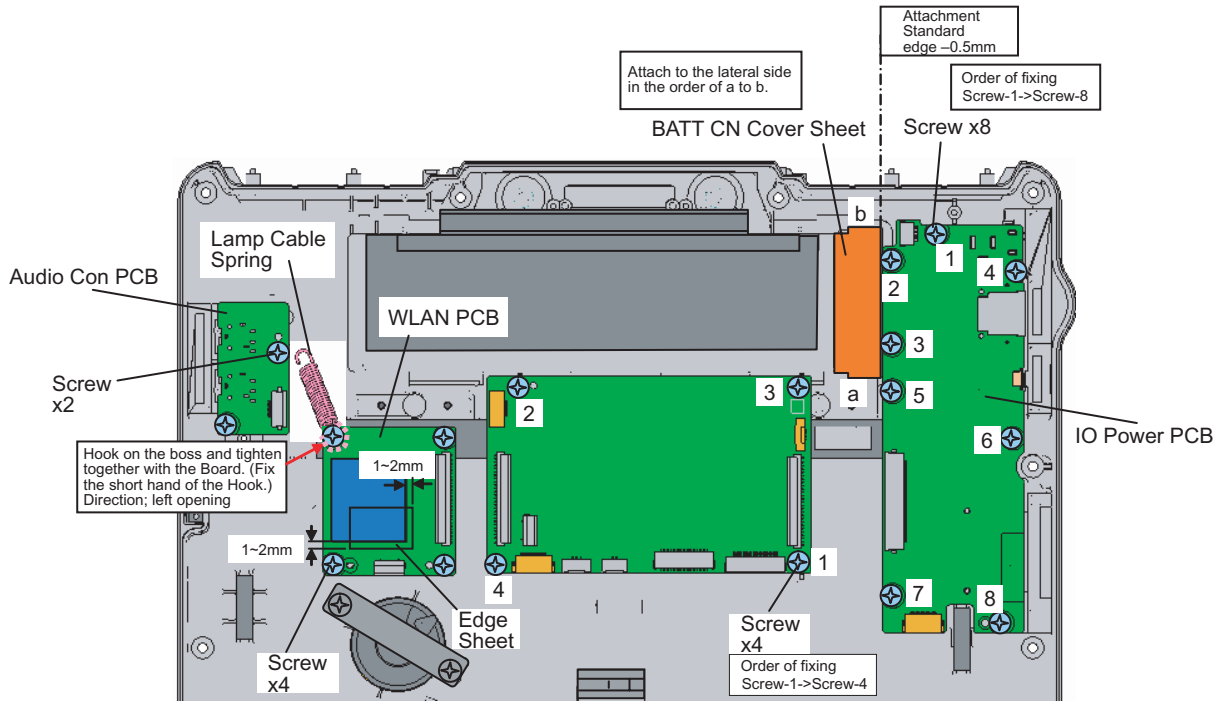

Note:

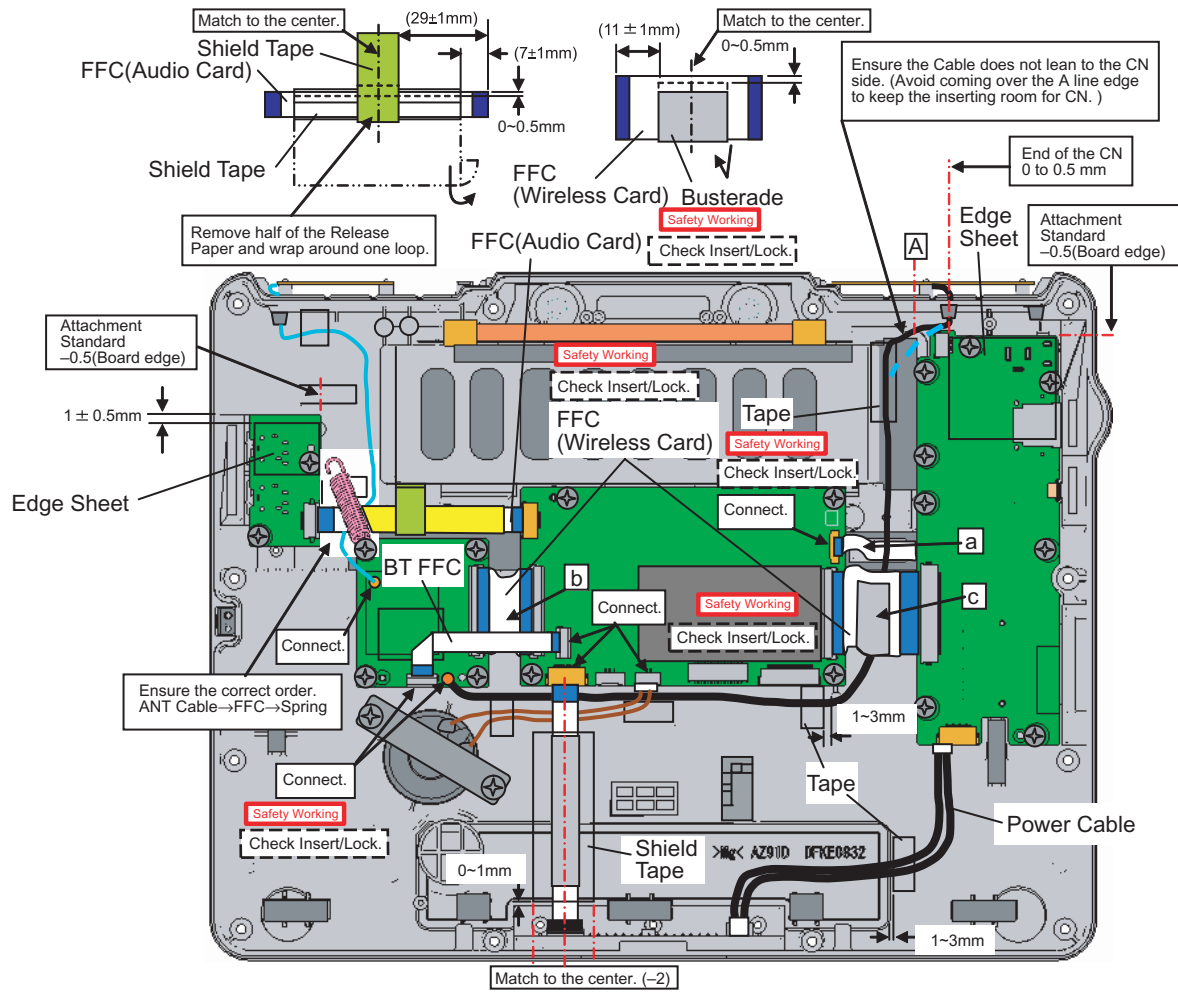

Tighten the Screws in the numbered order (No1 to No4).

Screws <N1>:XSB2+4FNL

■ Assembly of the USB PCB, Audio Con PCB, WLAN PCB, IO Power PCB, and Main PCB

*Note
Apply the load to attach. 20 to 30N (2.0 to 3.0 Kgf)
*Paste Sheets firmly. 20~30N(2.0~3.0Kgf)

9.2.13. Setting the Display Unit

1. Connect the Cables to the connectors (CN2, CN6) of the Main PCB.
2. Put the two Cables into the Clamper.

3. Connect the Inverter Cable to the connector (CN6) of the Power PCB as closing the Rear Cabinet.
4. Attach both the Inverter Case and the Inverter.
5. Hook the Cable on the lamp Cable Spring.
6. Attach the Cable Hold Sheet.
7. Set the LCD Unit with its face down and then close the Rear Cabinet.

8. Fix the Rear Case ASS'Y using 12 Screws <N6>. No1 to No12
9. Fix the Antenna Cover R using two Screws <N4>.
10. Fix the Antenna Cover L using two Screws <N4>.

Note:

Tighten the Screws in the numbered order (No1 to No12).

Screws <N4>:DXSB2+6FNL

Screws <N6>:DXYN26+J6FNL

■ Assembly of the Display unit

*Note
Ensure the Cable does not run over the Cushions (a,b,c).

Note
Avoid any stress on the transformer
and the coil.

Safety Working

Insert the cushions on the both sides with the "Caution to High Voltage" label facing front until they reach the bottom while matching the cushions to the A boss and the rib..(Top of the A boss and the cushions on the both sides must be on the same line.)

9.2.14. Setting the Battery Pack

1. Open the hand strap cover.

2. Remove the hand strap.

3. Slide the Battery cover latch.

4. Open and remove the Battery cover.

5. Firmly attach the battery pack to the connector.

6. Fit the battery cover, and then close the battery cover.

7. Slide the battery cover latch.

8. Attach the hand strap.

9. Attach the hand strap cover.

■ Assembly of the Battery Pack

CN 602	K4AE16A00001	CONNECTOR, EXPANSION BUS	1
R 600	ERJ2GEJ473X	RESISTOR, 1/16W, 47K Ω	1
WLAN PCB			
C 1	F1J0J1060004	CAPACITOR, 6.3V, 10µF	5
C 2			
C 3			
C 8			
C 9			
C 4	F1G1A104A014	CAPACITOR, 10V, 0.1µF	3
C 5			
C 7			
C 10	F1G1H102A496	CAPACITOR, 50V, 1000pF	1
C 11	ECJ0EC1H0R5C	CAPACITOR, 50V, 0.5pF	1
C 12	ECJ0EC1H060D	CAPACITOR, 50V, 6pF	1
CN 1	K1MN50AA0018	CONNECTOR	1
CN 2	K1MN12AA0018	CONNECTOR	1

CN 3	K1QZA1AE0001	CONNECTOR	1
F 1	 K5H5011A0015	FUSE, 5A	1
IC 1	N5HZD0000006	IC, LAN MODULE	1
IC 2	N5HZZ0000045	IC, BLUETOOTH MODULE	1
R 4	ERJ2GEJ104X	RESISTOR, 1/16W, 100K Ω	1
L 2 L 4	J0JDC0000045	INDUCTOR	2
L 3	DDB5Z031I-L	INDUCTOR	1

Main PCB

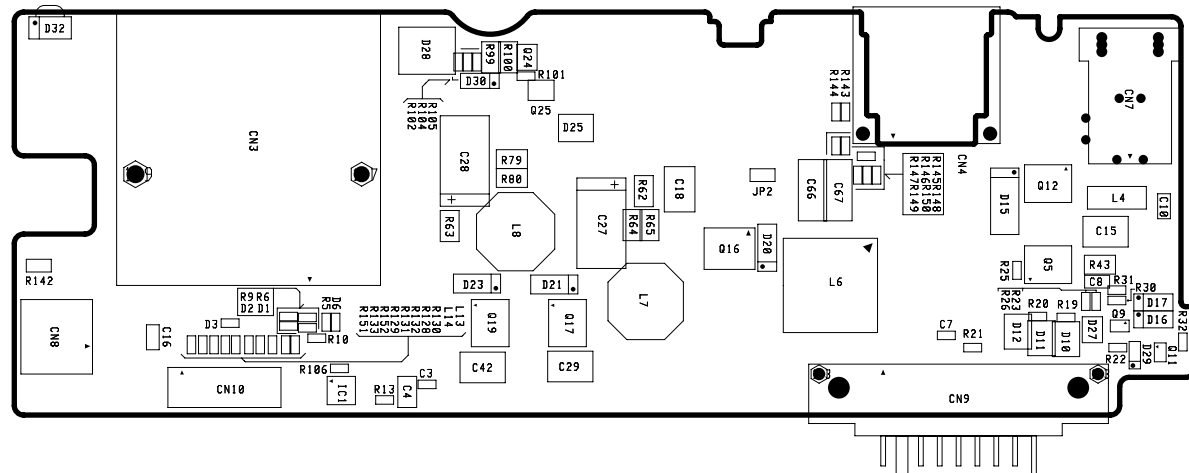

SW LED PCB

Dock Con PCB

IO Power PCB

Audio Con PCB

USB PCB

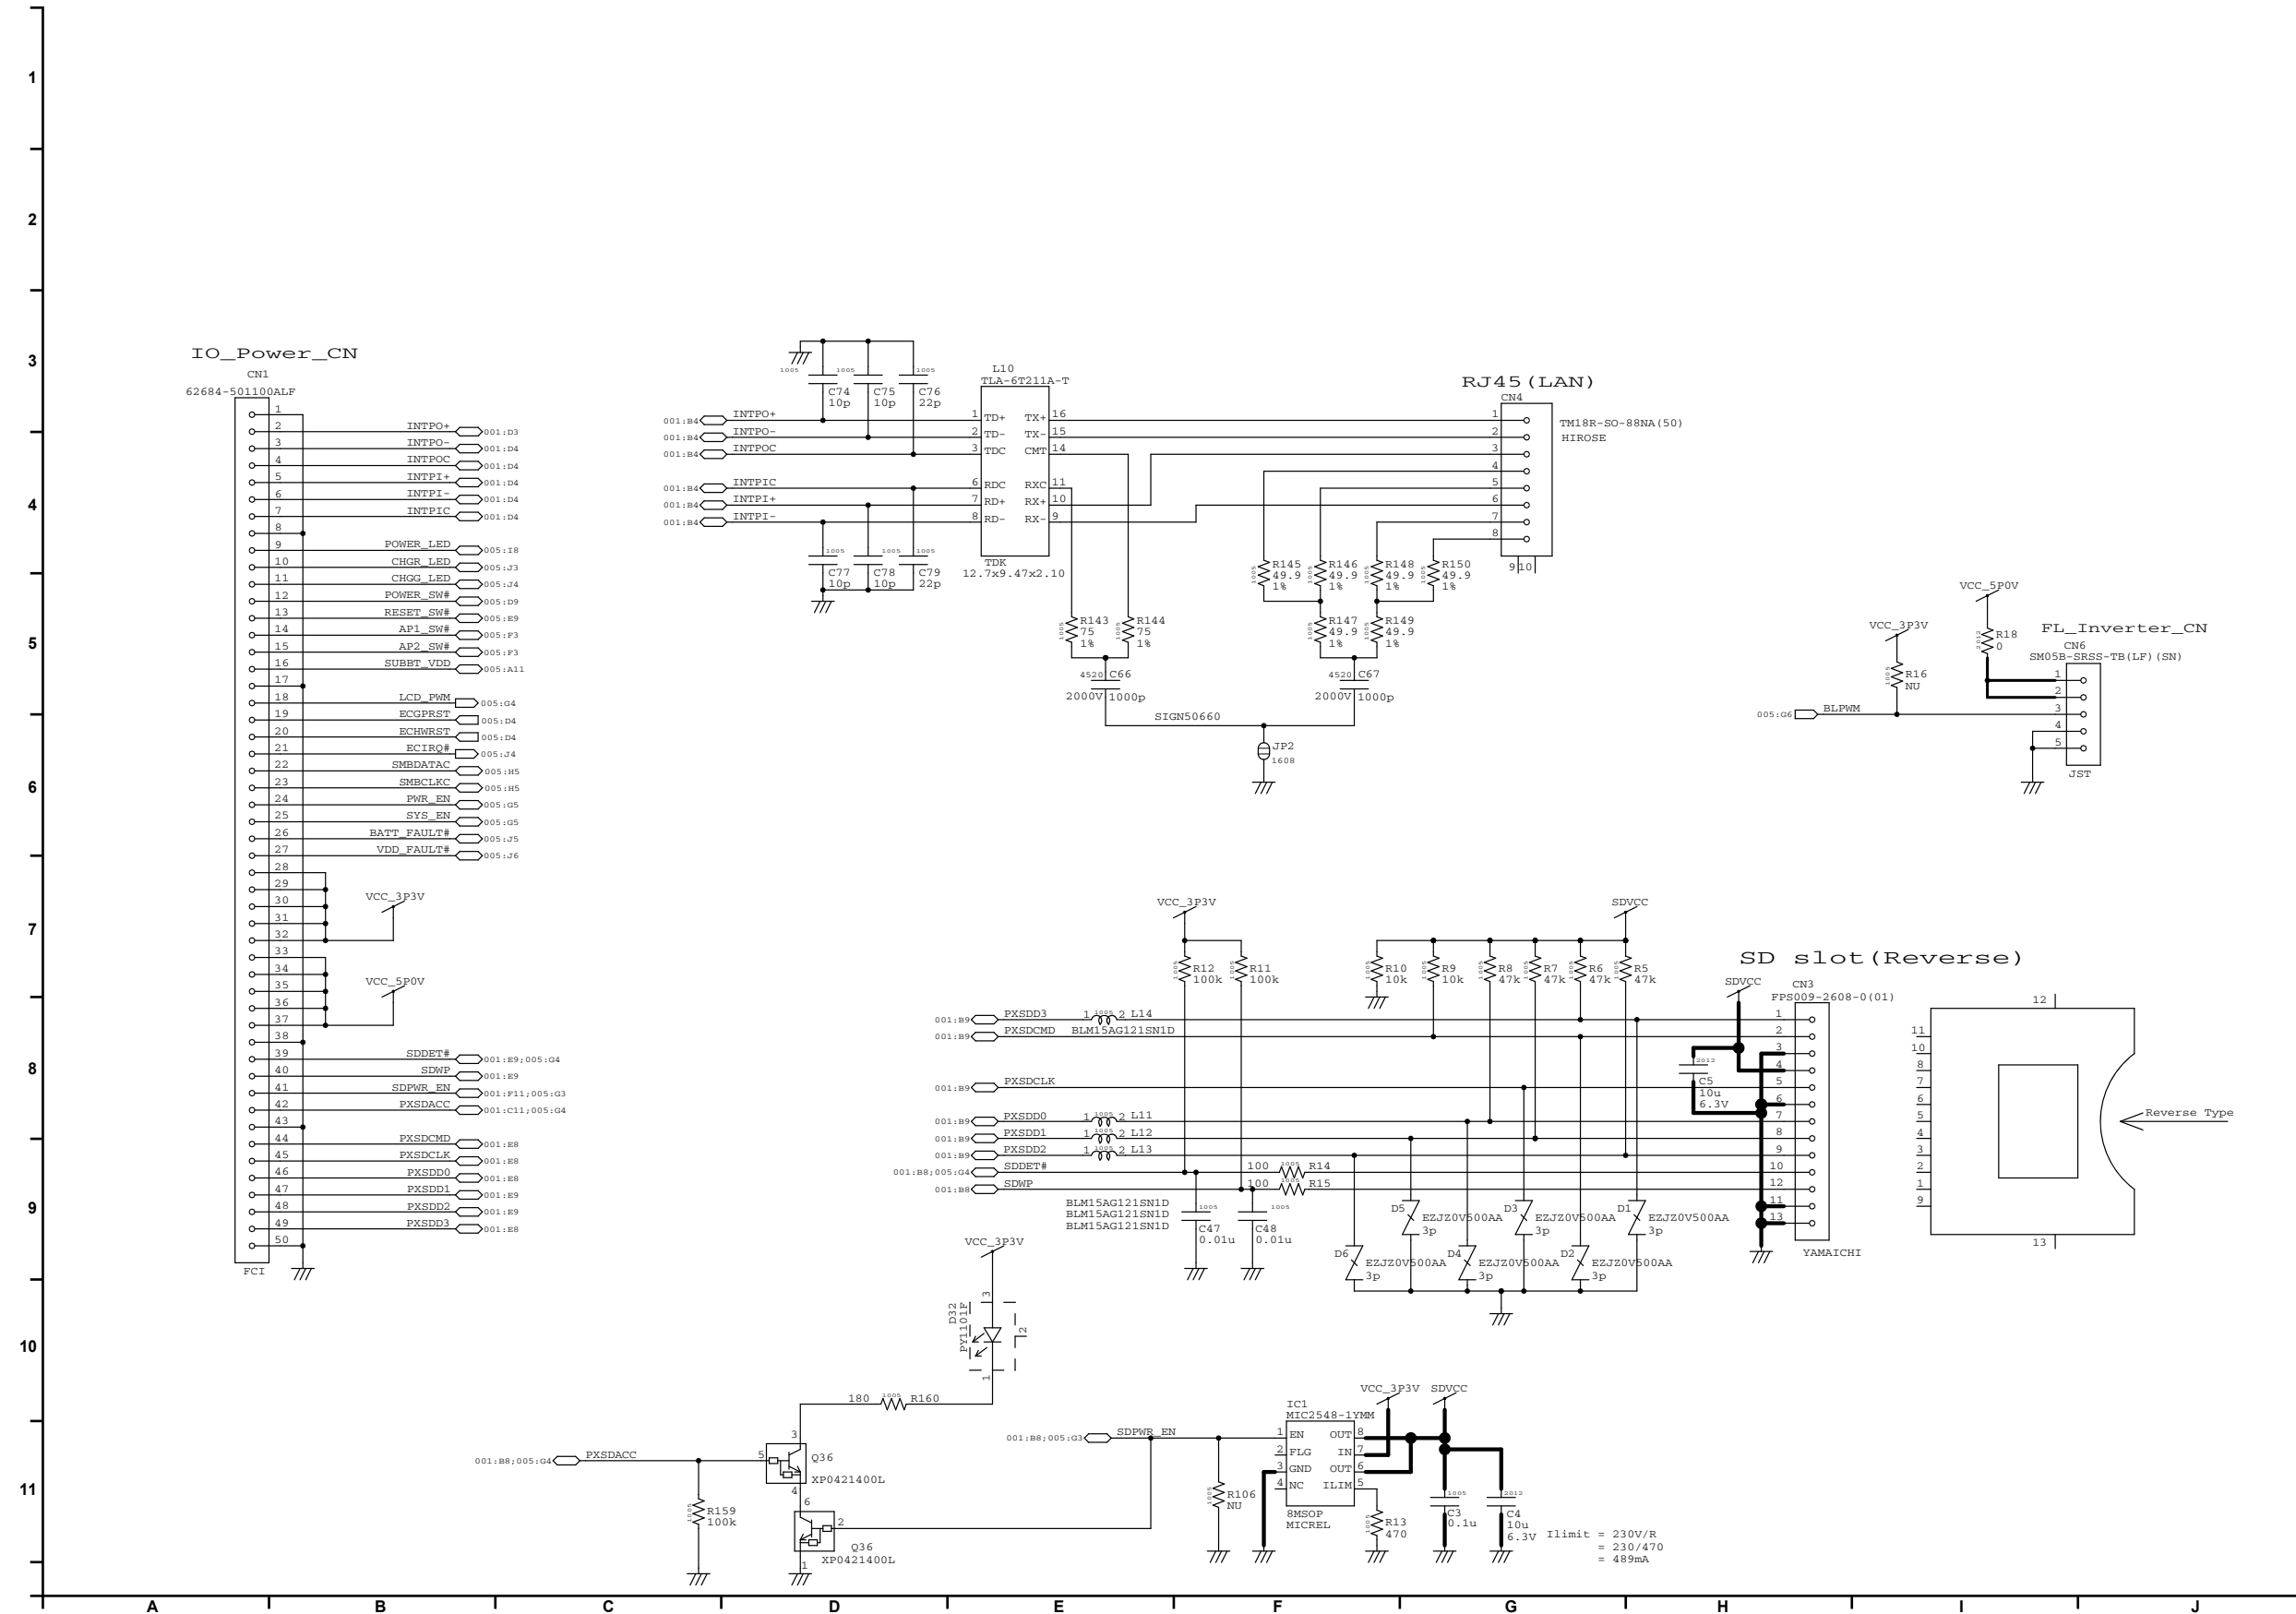

CF-08

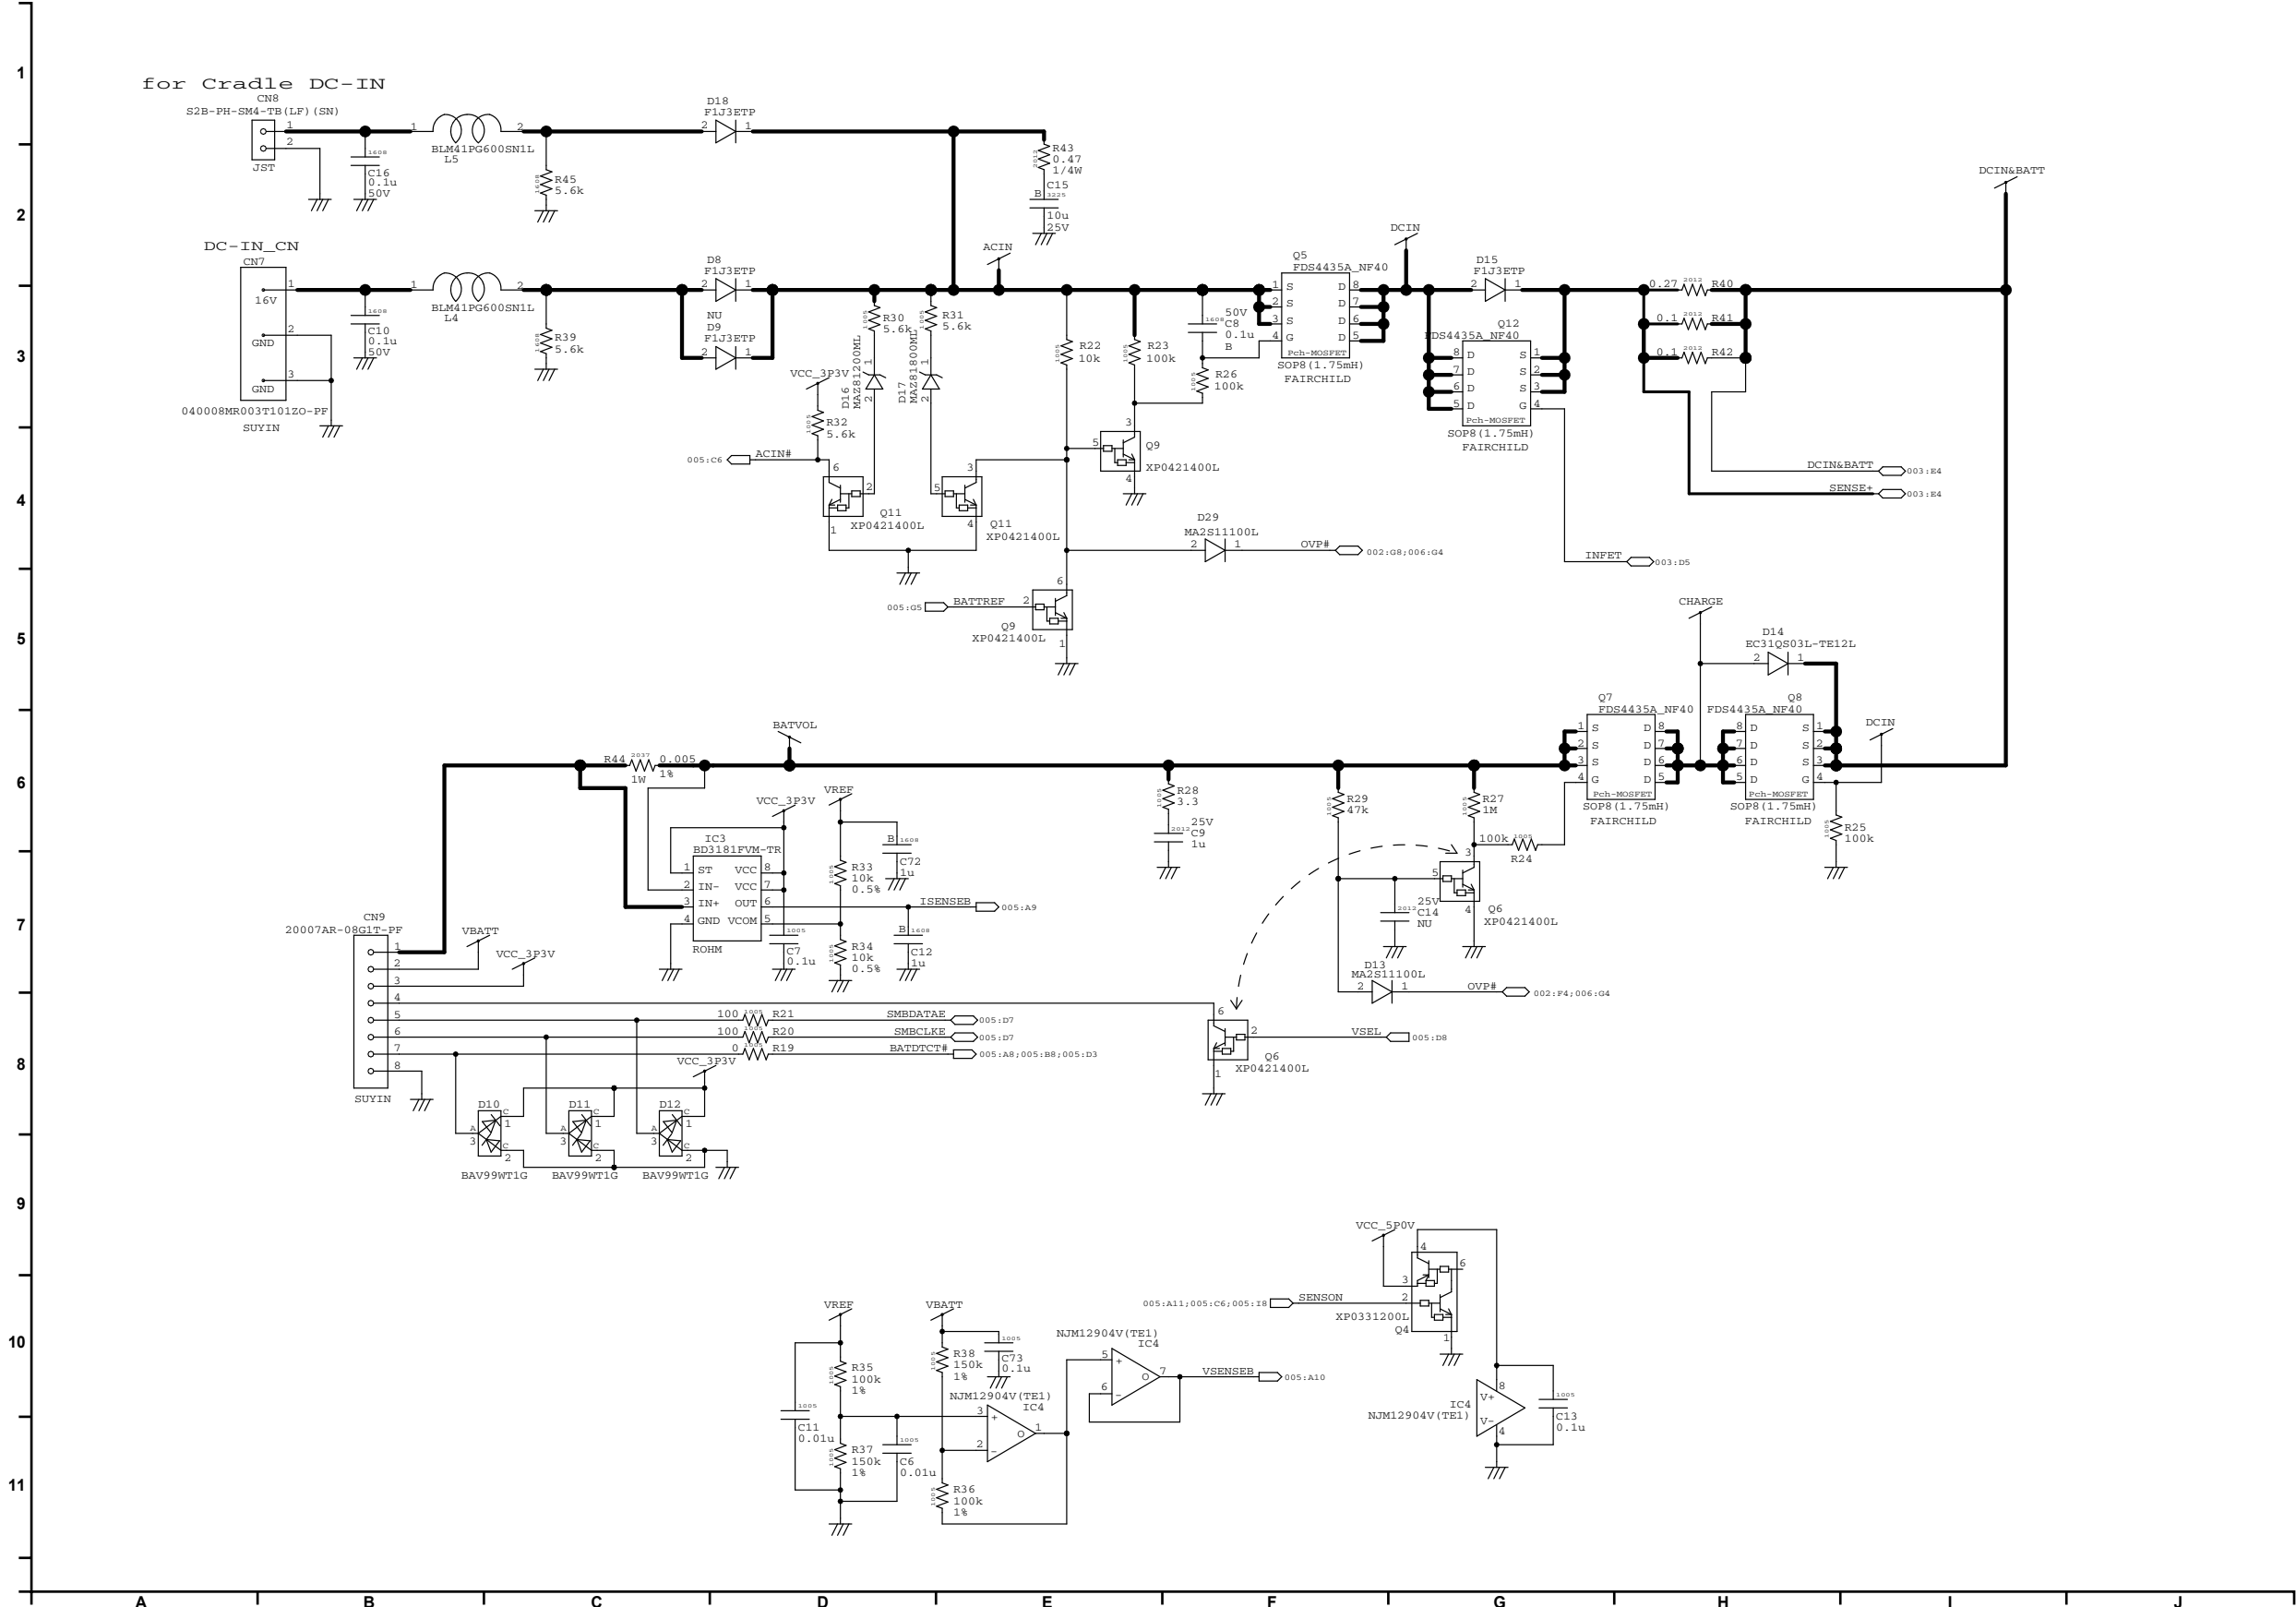

Schematic Diagram

IO Power 1 I/F CONNECTOR

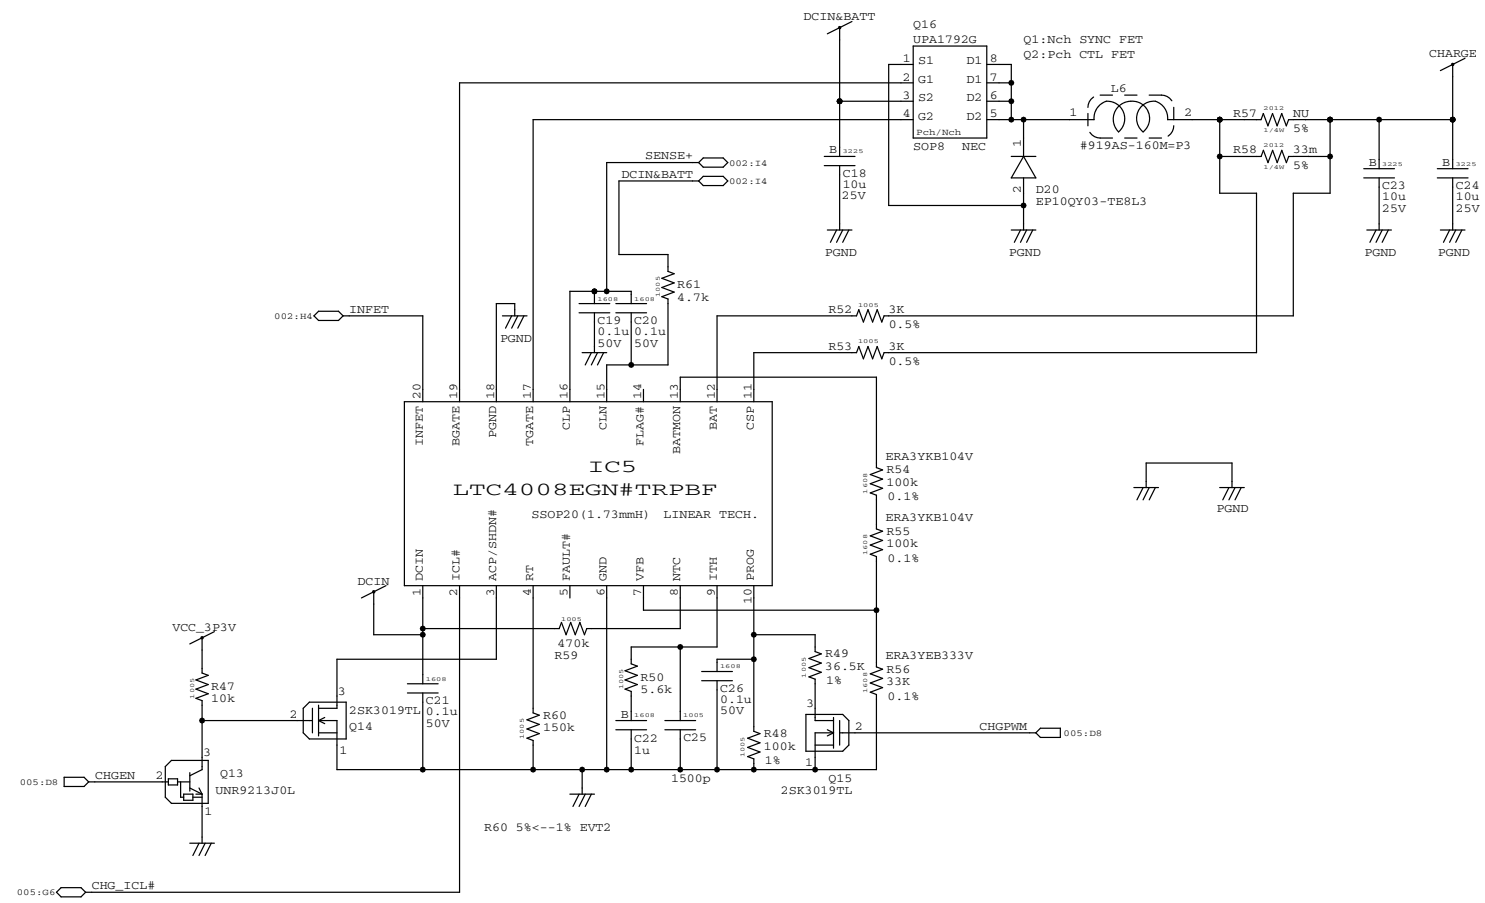

Note: All Schematic Diagrams are confidential.

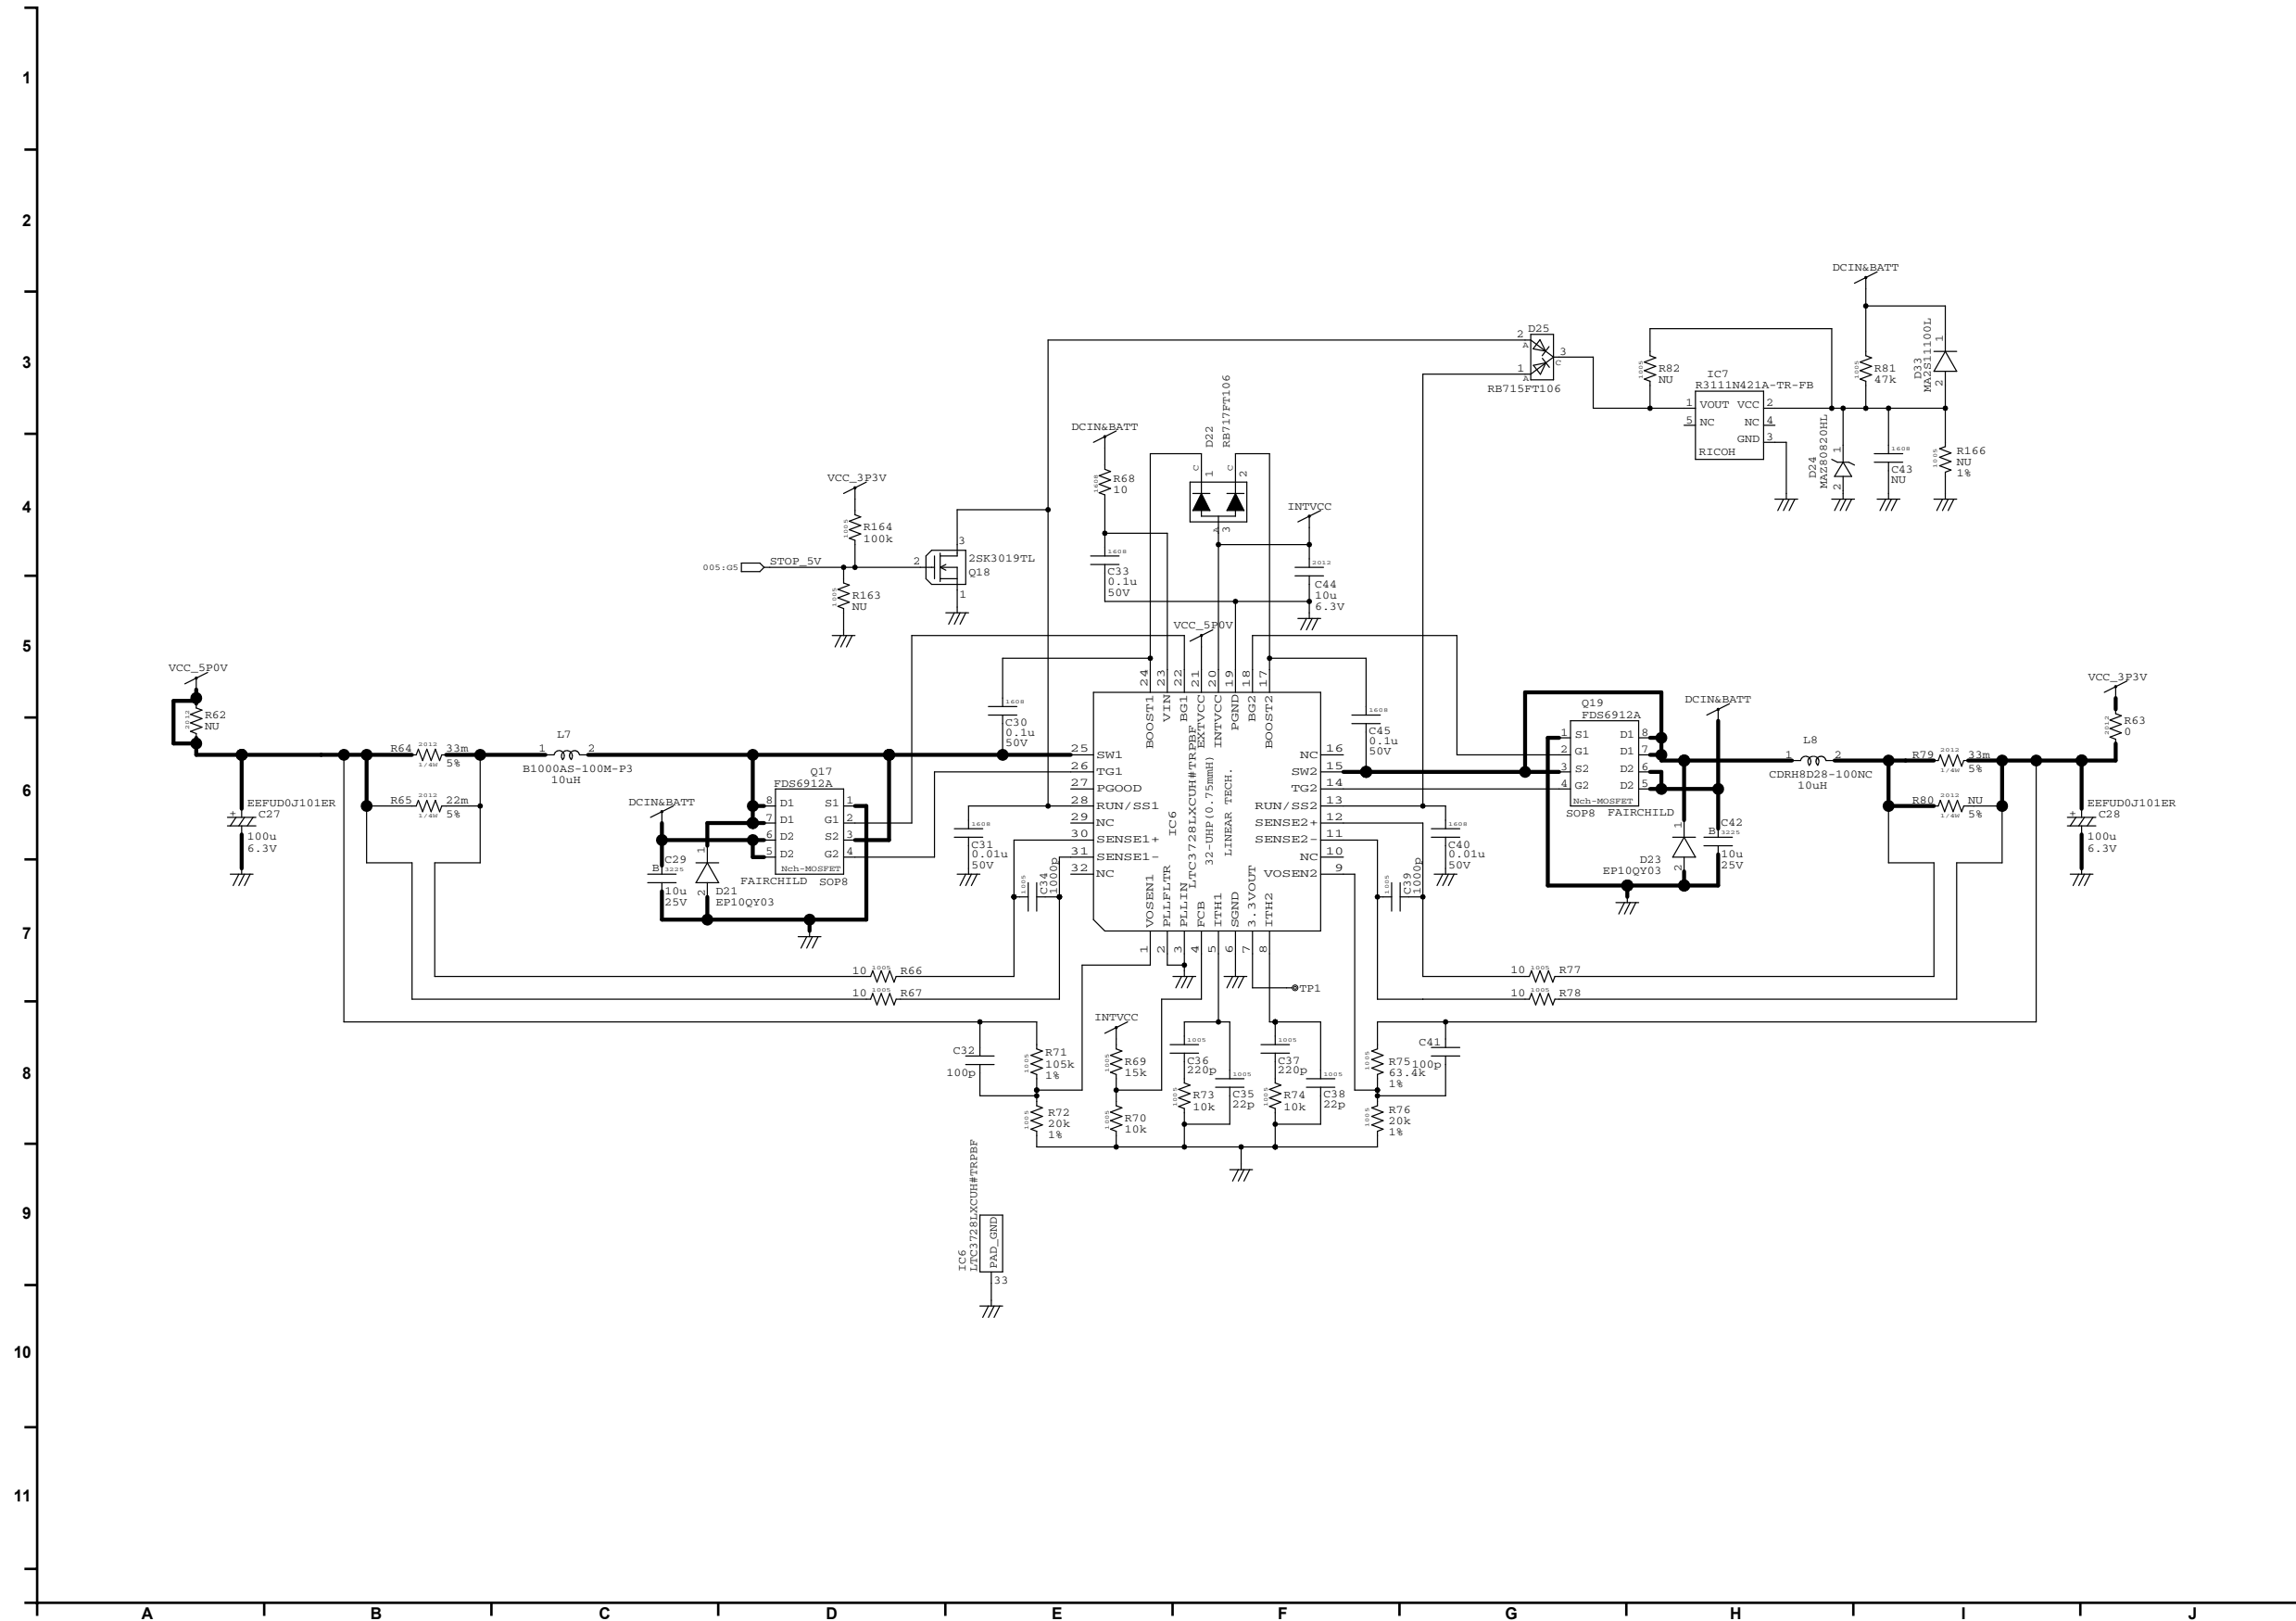

IO Power 2 DCIN/ BATTERY

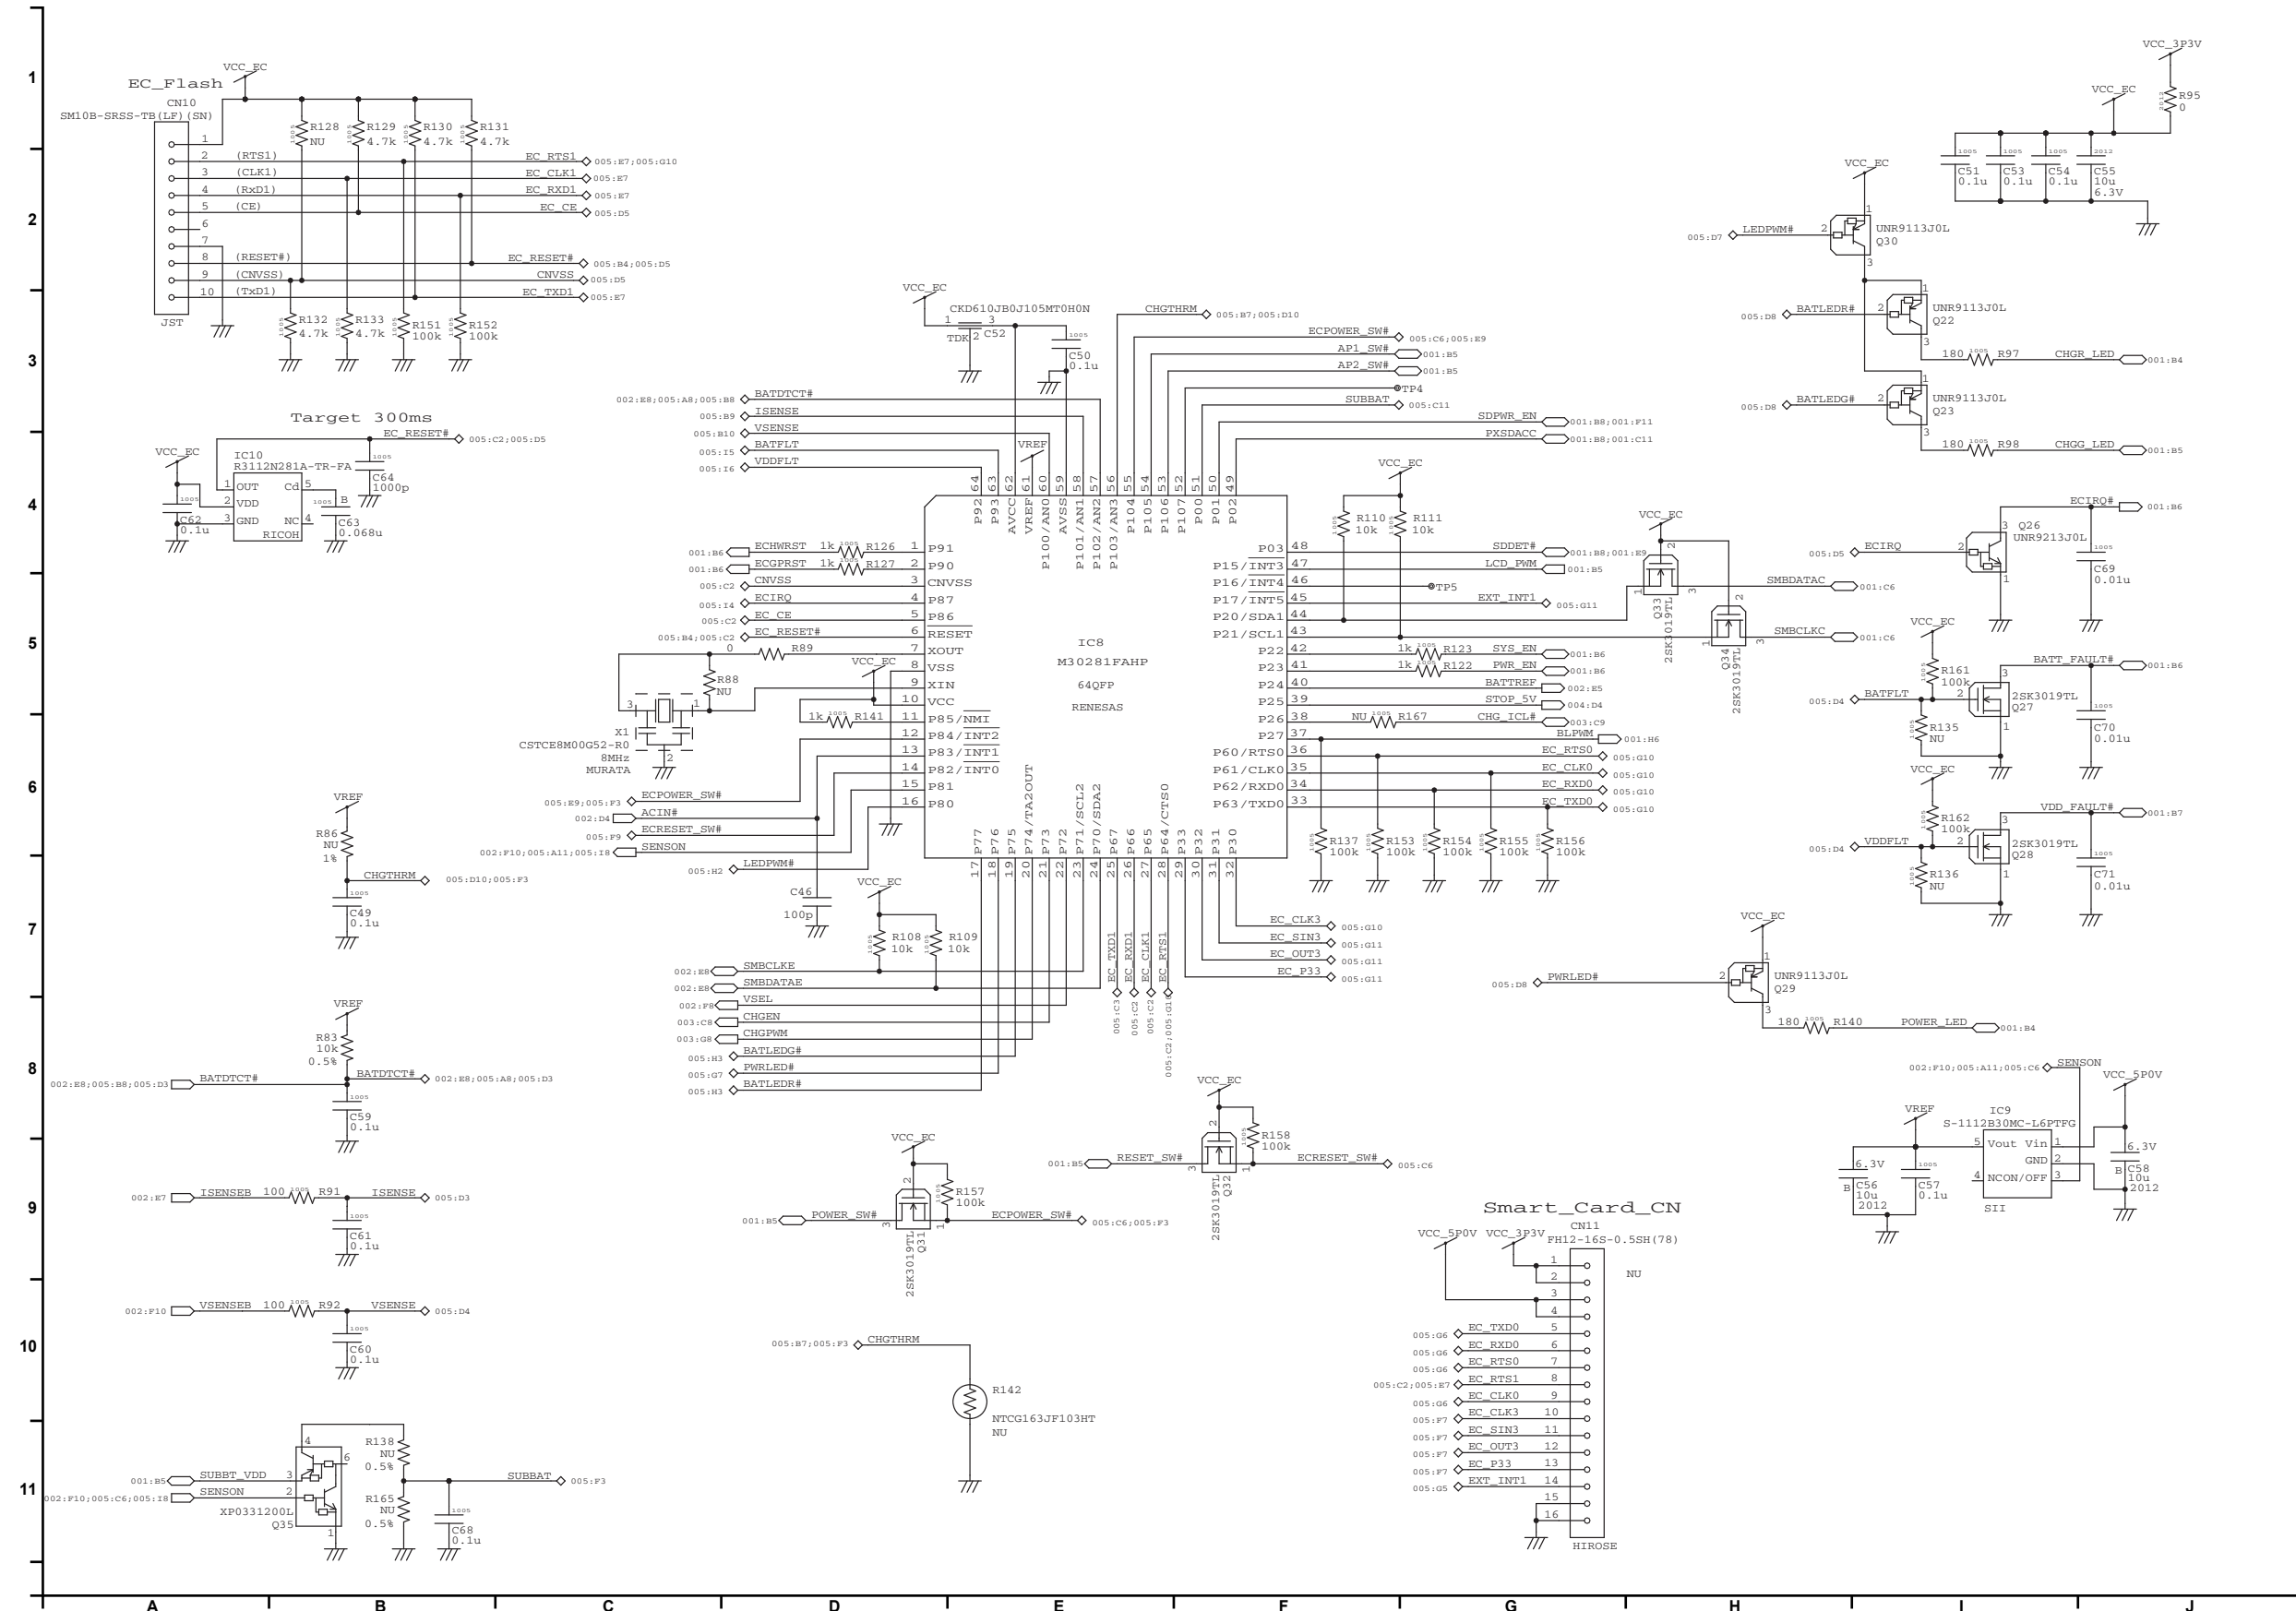

IO Power 3 CHARGER

IO Power 4 VA3,VA5

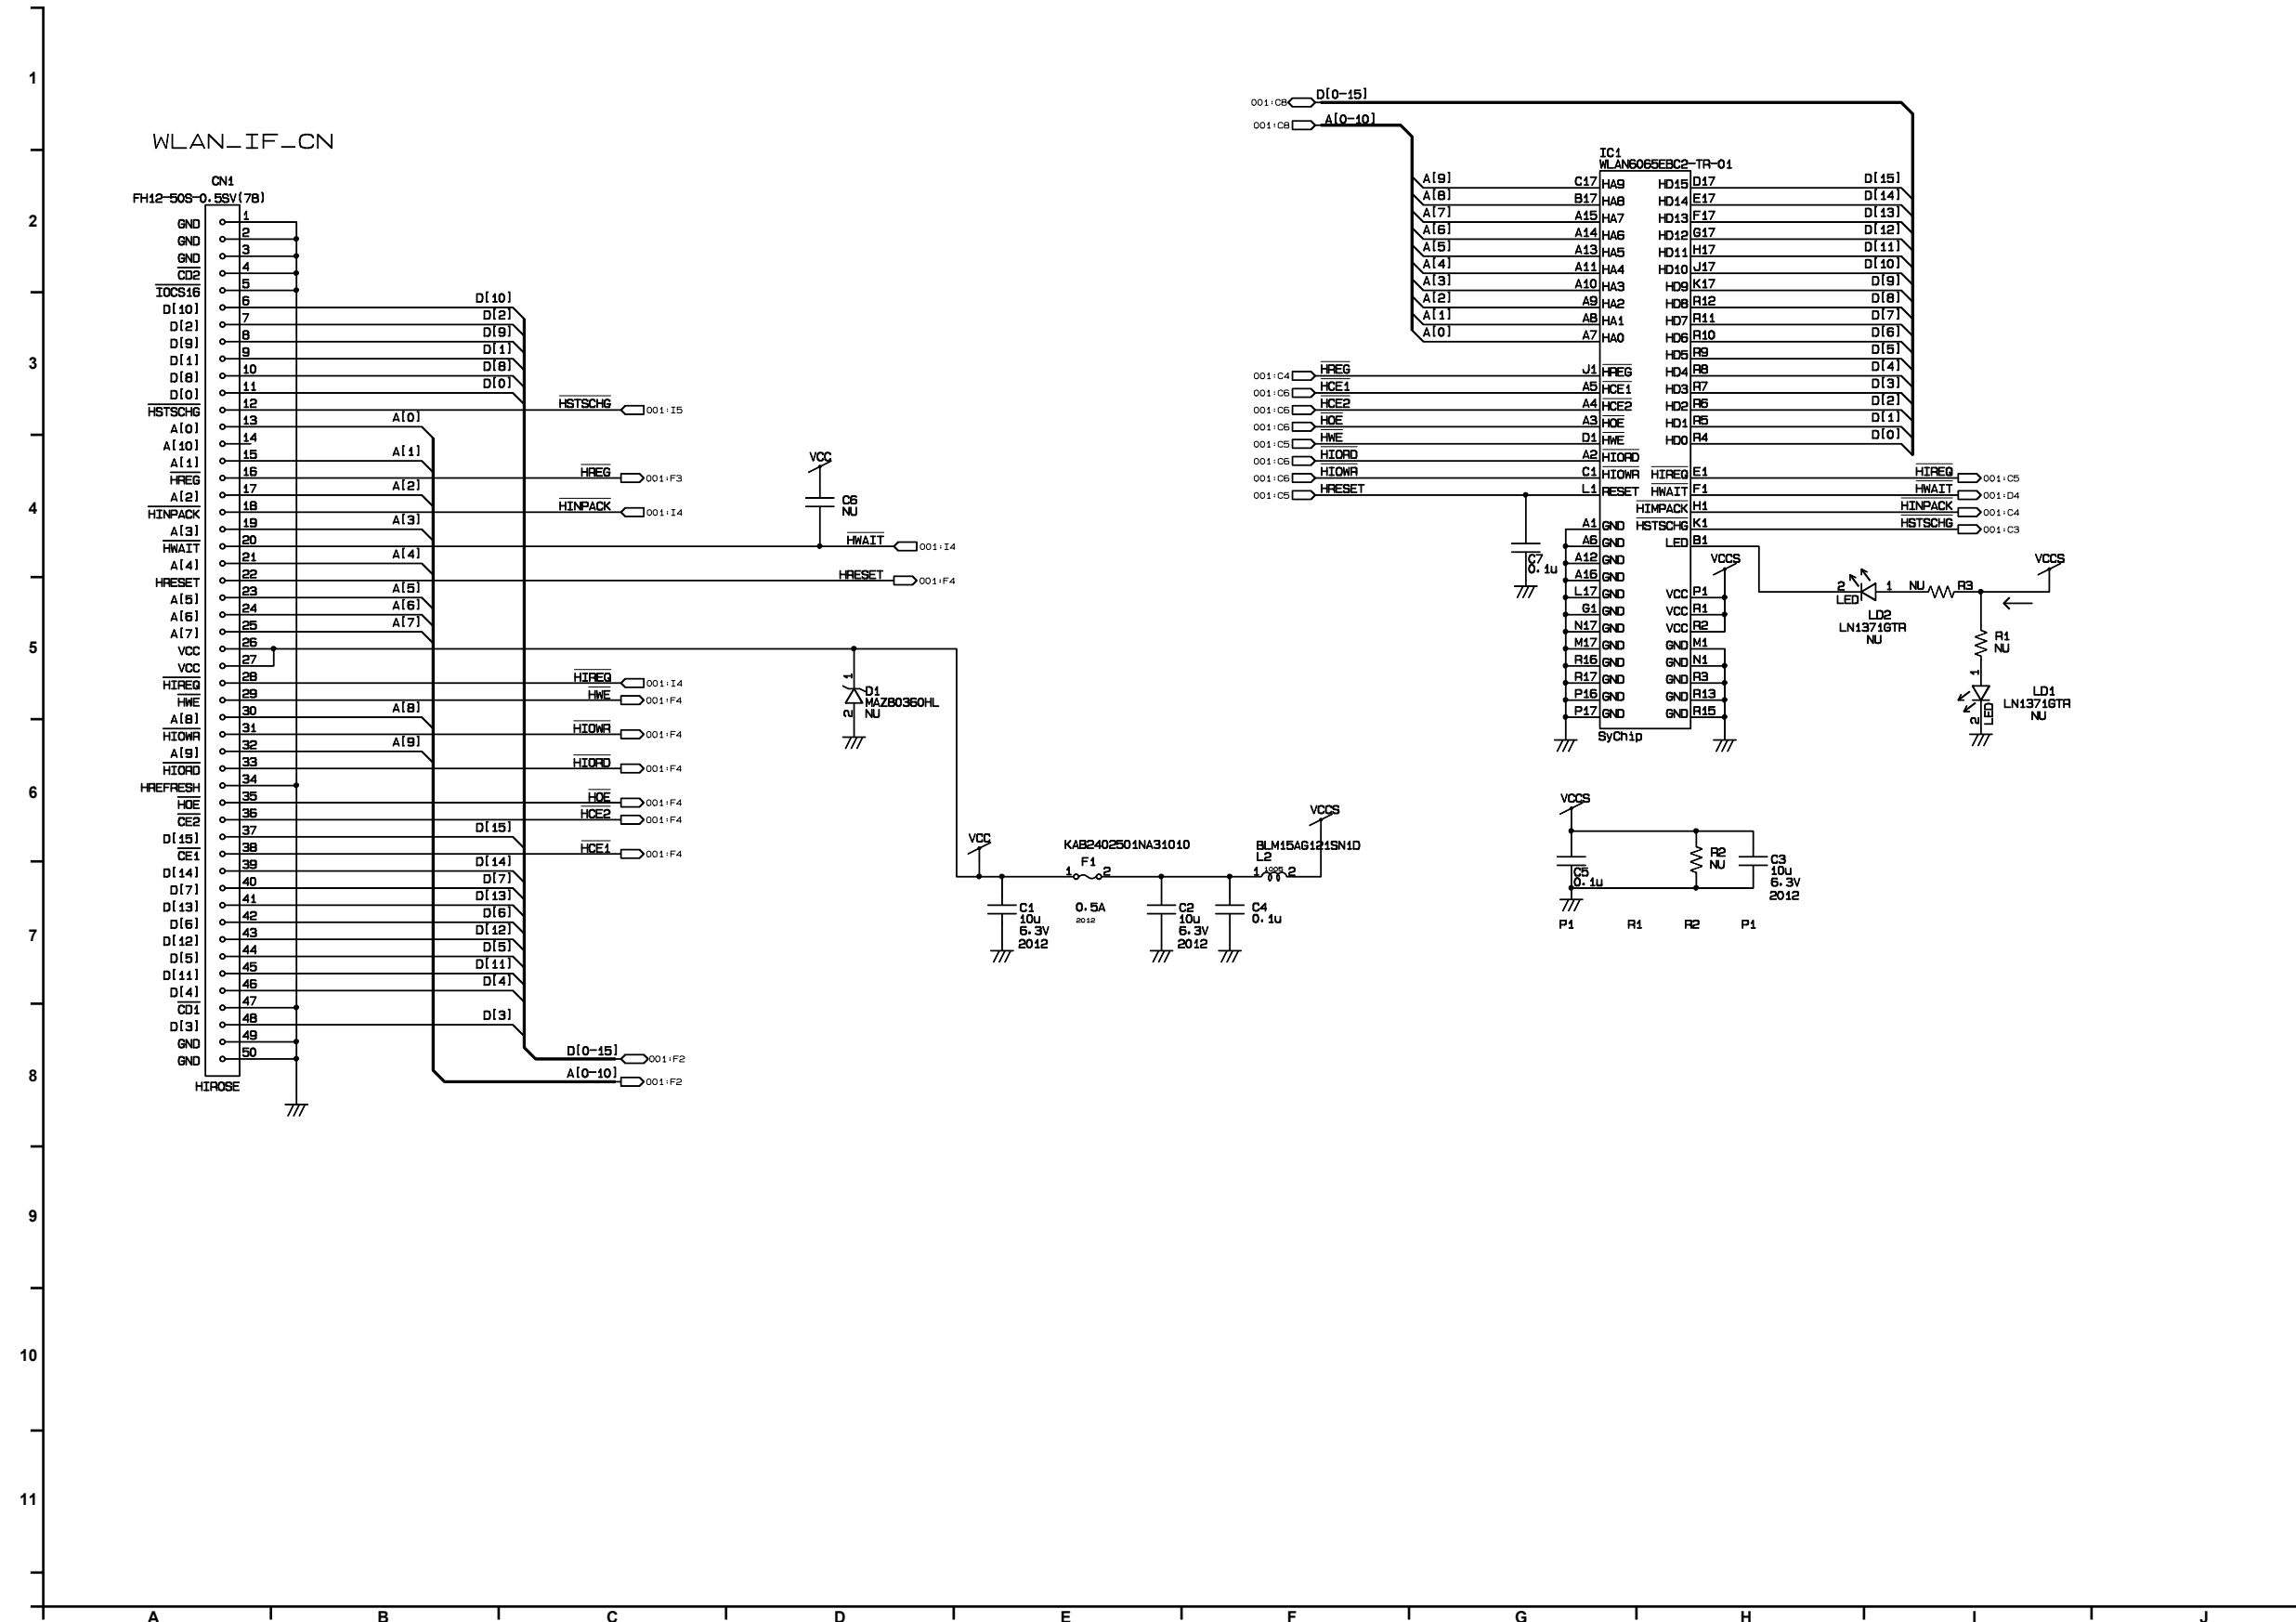

IO Power 5 EC

IO Power 6 OVERPROTECT

WLAN 1 SYCHIPWLAN/ BT BOARD

WLAN 2 SYCHIPWLAN/ BT BOARD
