

Service Manual

Notebook Computer

CF-18

TOUGHBOOK

This is the Service Manual for
the following areas.
M ...for U.S.A. and Canada

Model No. CF-18NHHZXBM

⚠ WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

Unauthorized copying and distribution is a violation of law.

WARNING

For U.K.

This apparatus must be earthed for your safety.

To ensure safe operation the three-pin plug must be inserted only into a standard three-pin power point which is effectively earthed through the normal household wiring.

Extension cords used with the equipment must be three-core and be correctly wired to provide connection to earth. Wrongly wired extension cords are a major cause of fatalities.

The fact that the equipment operates satisfactorily does not imply that the power point is earthed and that the installation is completely safe.

For your safety, if you have any doubt about the effective earthing of the power point, consult a qualified electrician.

FOR YOUR SAFETY PLEASE READ THE FOLLOWING TEXT CAREFULLY

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 3 amp fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 3 amps and that it is approved by ASTA or BSI to BS 1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local Panasonic Dealer.

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13 AMP SOCKET.

If a new plug is to be fitted please observe the wiring code as shown below.

If in any doubt please consult a qualified electrician.

Warning: THIS APPLIANCE MUST BE EARTHED.

Important

The wires in this mains lead are coloured in accordance with the following code:

Green-and-yellow:	Earth
Blue:	Neutral
Brown:	Live

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured GREEN-and-YELLOW must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol  coloured GREEN or GREEN-and-YELLOW.

The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured BLACK.

The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured RED.

The mains plug on this equipment must be used to disconnect the mains power.

Please ensure that a socket outlet is available near the equipment and shall be easily accessible.

How to replace the fuse

Open the fuse compartment with a screwdriver and replace the fuse.

Warnings

- This equipment is not designed for connection to an IT power system.
(An IT system is a system having no direct connections between live parts and Earth; the exposed-conductive-parts of the electrical installation are earthed.
An IT system is not permitted where the computer is directly connected to public supply systems in the U.K.)
- Disconnect the mains plug from the supply socket when the computer is not in use.

This equipment is produced to BS800/1983.

LASER SAFETY INFORMATION

For U.S.A.

Class 1 LASER-Product

This product is certified to comply with DHHS Rules 21 CFR Subchapter J.

This product complies with European Standard EN60825 (or IEC Publication 825)

For all areas

This equipment is classified as a class 1 level LASER product and there is no hazardous LASER radiation.

Caution:

- (1) Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.
- (2) The drive is designed to be incorporated into a computer-based system or unit which has an enclosing cover. It should never be used as a stand alone drive.

Danger:

The serviceman should not remove the cover of drive unit and should not service because the drive unit is a non-serviceable part.

Please check DANGER label on PD-drive unit.

- Unplug the AC power cord to the equipment before opening the top cover of the drive.
When the power switch it on, do not place your eyes close to the front panel door to look into the interior of the unit.

LASER Specification

Class 1 level LASER Product

Wave Length: DVD 658±8 nm

CD 775~815 nm

Laser safety information is appropriate only when drive with laser is installed.

Safety precautions

1. Before servicing, unplug the power cord to prevent an electric shock.
2. When replacing parts, use only manufacturer's recommended components for safety.
3. Check the condition of the power cord. Replace if wear or damage is evident.
4. After servicing, be sure to restore the lead dress, insulation barriers, insulation papers, shields, etc.

Important Safety Instructions

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

1. Do not use this product near water, for example, near a bath tub, wash bowl, kitchen sink or laundry tub, in a wet basement or near a swimming pool.
2. Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.
3. Do not use the telephone to report a gas leak in the vicinity of the leak.
4. Use only the power cord and batteries indicated in this manual. Do not dispose of batteries in a fire. They may explode. Check with local codes for possible special disposal instructions.

SAVE THESE INSTRUCTIONS

LITHIUM BATTERY ⚠

• CAUTION

Danger of explosion if battery is incorrectly replaced.
Replace only with the same or equivalent type recommended by the equipment manufacture.
Discard used batteries according to the manufacturer's instructions.

LITHIUMBATTERIES ⚠

Vorsicht!

Explosionsgefahr bei unsachgemäßem Austausch der Batterie. Ersatz nur durch denselben oder einen vom Hersteller empfohlenen ähnlichen Typ. Entsorgung gebrauchter Batterien nach Angaben des Herstellers.

PILE AU LITHIUM ⚠

ATTENTION: IL Y A DANGER D'EXPLOSION S' IL Y A REMPLACEMENT INCORRECT DE LA PILE. REMPLACER UNIQUEMENT AVEC UNE PILE DU MÊME TYPE OU D'UN TYPE RECOMMANDÉ PAR LE CONSTRUCTEUR. METTRE AU RÉBUT LES PILES USAGÉES CONFORMÉMENT AUX INSTRUCTIONS DU FABRICANT.

For U.S.A. / CANADA

A lithium ion battery that is recyclable powers the product you have purchased. Please call 1-800-8-BATTERY for information on how to recycle this battery.

L'appareil que vous vous êtes procuré est alimenté par une batterie au lithium-ion. Pour des renseignements sur le recyclage de la batterie, veuillez composer le 1-800-8-BATTERY.

Lithium Battery

Lithium Battery!

This computer contains a lithium battery to enable the date, time, and other data to be stored. The battery should only be exchanged by authorized service personnel.

Warning! A risk of explosion from incorrect installation or mis-application may possibly occur.

Precautions (Battery Pack)

- Care should be exercised with regard to the following in order to avoid the possibility of overheating, fire or damage.

Avoid Heat

Do not throw the battery pack into a fire or expose it to excessive heat.

Keep Articles Away

Do not place the battery pack together with articles such as necklaces or hairpins when carrying or storing.

Do Not Disassemble

Do not insert sharp objects into the battery pack, expose it to bumps or shocks, deform, disassemble, or modify it.

Do Not Short

Do not short the positive (+) and negative (-) contacts.

Avoid Extreme Heat, Cold and Direct Sunlight

Do not charge, use or leave the battery pack for extended periods where it will be exposed to direct sunlight, in a hot place (in an automobile on a sunny day, for example), or in a cold place.

Do Not Use With Any Other Computer

The battery pack is rechargeable and was intended for the specified computer or charger. Do not use it with a computer other than the one for which it was designed.

Do Not Put into a Microwave

Do not put the battery pack into a microwave oven or a pressurized chamber.

Discontinue Use

Should the battery emit an abnormal odor, become hot to the touch, become discolored, change shape, or become in any way different from normal, remove it from the computer or charger and discontinue use.

- Do not touch the terminals on the battery pack. The battery pack may no longer function properly if the contacts are dirty or damaged.
- Do not expose the battery pack to water, or allow it to become wet.

- If the battery pack will not be used for a long period of time (a month or more), charge or discharge (use) the battery pack until the remaining battery level becomes 30% to 40% and store it in a cool, dry place.
- This computer prevents overcharging of the battery by recharging only when the remaining power is less than approx. 95% of capacity.
- The battery pack is not charged when the computer is first purchased. Be sure to charge it before using it for the first time. When the AC adaptor is connected to the computer, charging begins automatically.
- Should the battery leak and the fluid get into your eyes, do not rub your eyes. Immediately flush your eyes with clear water and see a doctor for medical treatment as soon as possible.

NOTE

- The battery pack may become warm during recharging or normal use. This is completely normal.
- Recharging will not commence outside of the allowable temperature range (0 °C to 50 °C {32°F to 122 °F}). (☞ Reference Manual “Battery Power”) Once the allowable range requirement is satisfied, charging begins automatically. Note that the recharging time varies based on the usage conditions. (Recharging takes longer than usual when the temperature is 10 °C {50 °F} or less.)
- If the temperature is low, the operating time is shortened. Only use the computer within the allowable temperature range.
- The battery pack is a consumable item. If the amount of time the computer can be run off a particular battery pack becomes dramatically shorter and repeated rechargings do not restore its performance, the battery pack should be replaced with a new one.
- When transporting spare batteries inside a package, briefcase, etc., it is recommended that it be placed in a plastic bag so that its contacts are protected.
- Always power off the computer when it is not in use. Leaving the computer on when the AC adaptor is not connected will exhaust the remaining battery capacity.

8 Exploded View	8-1
9 Replacement Parts List	9-1

1 Diagnosis Procedure

1.1. Basic Procedure

The basic procedures for diagnosis, disassembly, and test of defective parts of a set to be repaired are summarized below. For details, refer to relevant pages in the Service Manual.

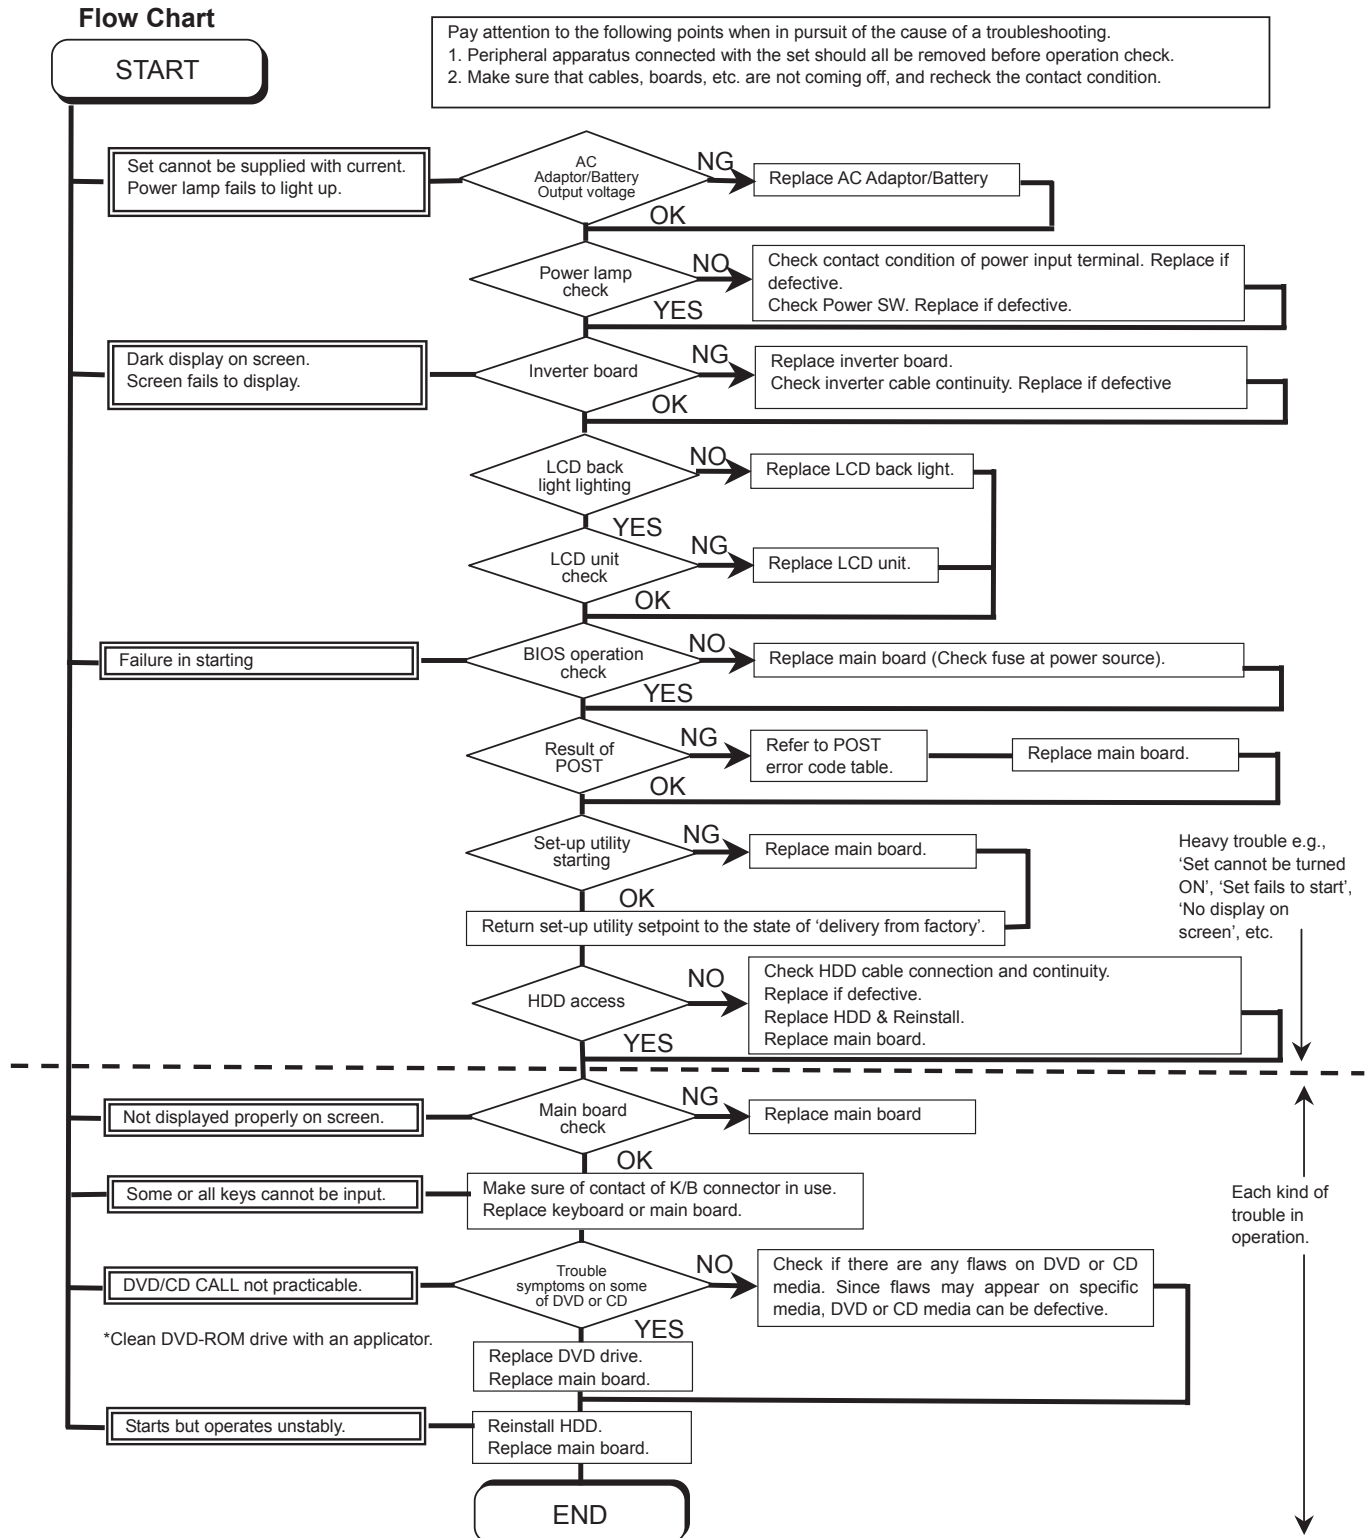

● Flow Chart

1.2. Troubleshooting

Please take note of the following two points with regard to troubleshooting:

1. Know-how of diagnosis upon occurrence of heavy troubles, e.g. 'Set cannot be turned ON', 'Set fails to start', 'No display on screen', etc.
2. Explanation of each trouble, mainly symptom of trouble in operation.

2 Power-On Self Test (Boot Check)

Outline of POST

The set has a boot check function called POST (Power-On Self Test) in it. The condition of the main body is diagnosed by checking beep sound or error code.

- StartTest begins automatically when power switch is set to ON.
- Normal finishAfter memory checking, a beep sound is issued once and the set is placed into automatic stop.

Note: If no error occurs, nothing is displayed. (No display of OK, etc.)

Error Diagnosis by Checking Beep Signal Sound

The beep sound is as follows:

(Length of bar shows length of sound.)

■ = long sound (about 0.4 sec.), ■ = short sound (about 0.2 sec.), Length between sounds is about 0.1 sec.

• Table of errors classified by beep sounds

Diagnosis	Beep signal sound	Error message
Main board	1(long sound)-2	BIOS ROM error
	1-2-2-3	BIOS ROM error
	1-3-1-1	RAM error
	1-3-1-3	Keyboard controller error
	1-3-4-1	RAM error
	1-3-4-3	RAM error
	1-4-1-1	RAM error
	2-1-2-3	BIOS ROM error
	2-2-3-1	Occurrence of unexpected offering

(Note) A beep sound is also issued in case of other I/O trouble.

3. List of Error Codes <Only when the port replicator is connected>

The following is a list of the messages that BIOS can display. Most of them occur during POST. Some of them display information about a hardware device, e.g., the amount of memory installed. Others may indicate a problem with a device, such as the way it has been configured.

Following the list are explanations of the messages and remedies for reported problems.

If your system displays one of except the messages marked below with an asterisk (*), write down the message and contact Panasonic Technical Support. If your system fails after you make changes in the Setup menus, reset the computer, enter Setup and install Setup defaults or correct the error.

0200 Failure Fixed Disk

Fixed disk in not working or not configured properly. Check to see if fixed disk is attached properly. Run Setup. Find out if the fixed-disk type is correctly identified.

0210 Stuck key

Stuck key on keyboard.

0211 Keyboard error

Keyboard not working.

0212 Keyboard Controller Failed

Keyboard controller failed test. May require replacing keyboard controller.

0213 Keyboard locked - Unlock key switch

Unlock the system to proceed.

0230 System RAM Failed at offset: *nnnn*

System RAM failed at offset *nnnn* of in the 64k block at which the error was detected.

0231 Shadow RAM Failed at offset: *nnnn*

Shadow RAM failed at offset *nnnn* of the 64k block at which the error was detected.

0232 Extended RAM Failed at offset: *nnnn*

Extended memory not working or not configured properly at offset *nnnn*.

0250 System battery is dead - Replace and run SETUP

The CMOS clock battery indicator shows the battery is dead. Replace the battery and run Setup to reconfigure the system.

***0251 System CMOS checksum bad - Default configuration used**

System CMOS has been corrupted or modified incorrectly, perhaps by an application program that changes data stored in CMOS. The BIOS installed Default SETUP Values.

If you do not want these values, enter Setup and enter your own values. If the error persists, check the system battery or contact Panasonic Technical Support.

0260 System timer error

The timer test failed. Requires repair of system board.

0270 Real time clock error

Real-time clock fails BIOS test. May require board repair.

***0280 Previous boot incomplete - Default configuration used**

Previous POST did not complete successfully. POST loads default values and offers to run Setup. If the failure was caused by incorrect values and they are not corrected, the next boot will likely fail. On systems with control of **wait states**, improper Setup settings can also terminate POST and cause this error on the next boot. Run Setup and verify that the wait-state configuration is correct. This error is cleared the next time the system is booted.

0281 Memory Size found by POST differed from EISA CMOS

Memory size found by POST differed from EISA CMOS.

02D0 System cache error - Cache disabled

Contact Panasonic Technical Support.

02F0: CPU ID:

CPU socket number for Multi-Processor error.

02F4: EISA CMOS not writable

ServerBIOS2 test error: Cannot write to EISA CMOS.

02F5: DMA Test Failed

ServerBIOS2 test error: Cannot write to extended DMA (Direct Memory Access) registers.

02F6: Software NMI Failed

ServerBIOS2 test error: Cannot generate software NMI (Non-Maskable Interrupt).

02F7: Fail - Safe Timer NMI Failed

ServerBIOS2 test error: Fail-Safe Timer takes too long.

device address Conflict

Address conflict for specified *device*.

Allocation Error for: *device*

Run ISA or EISA Configuration Utility to resolve resource conflict for the specified *device*.

Failing Bits: *nnnn*

The hex number *nnnn* is a map of the bits at the RAM address which failed the memory test. Each 1 (one) in the map indicates a failed bit. See error 230,231 or 232 for offset address of the failure in System, Extended or Shadow memory.

Invalid System Configuration Data

Problem with NVRAM (CMOS) data.

I/O device IRQ conflict

I/O device IRQ conflict error.

Operating System not found

Operating system cannot be located on either drive A: or drive C: Enter Setup and see if fixed disk and drive A: are properly identified.

Parity Check 1 *nnnn*

Parity error found in the system bus. BIOS attempts to locate the address and display it on the screen. If it cannot locate the address, it displays ????. Parity is a method for checking errors in binary data. A parity error indicates that some data has been corrupted.

Parity Check 2 *nnnn*

Parity error found in the I/O bus. BIOS attempts to locate the address and display it on the screen. If it cannot locate the address, it displays ????.

Press <F1> to resume, <F2> to Setup

Displayed after any recoverable error message. Press <F1> to start the boot process or <F2> to enter a Setup and change the settings. Write down and follow the information shown on the screen.

4. Diagnostic Test

4.1 Equipment

- (1) Test Computer 1 unit
- (2) External Floppy Disk Drive 1 unit
- (3) AC Adapter 1 pc.
- (4) Loopback Plug (Serial Port Test for RS232C) [P/N: DFWV95C0067] 1 pc.
- (5) Floppy Disk containg file DIAG 1 pc.

4.2 Preparation

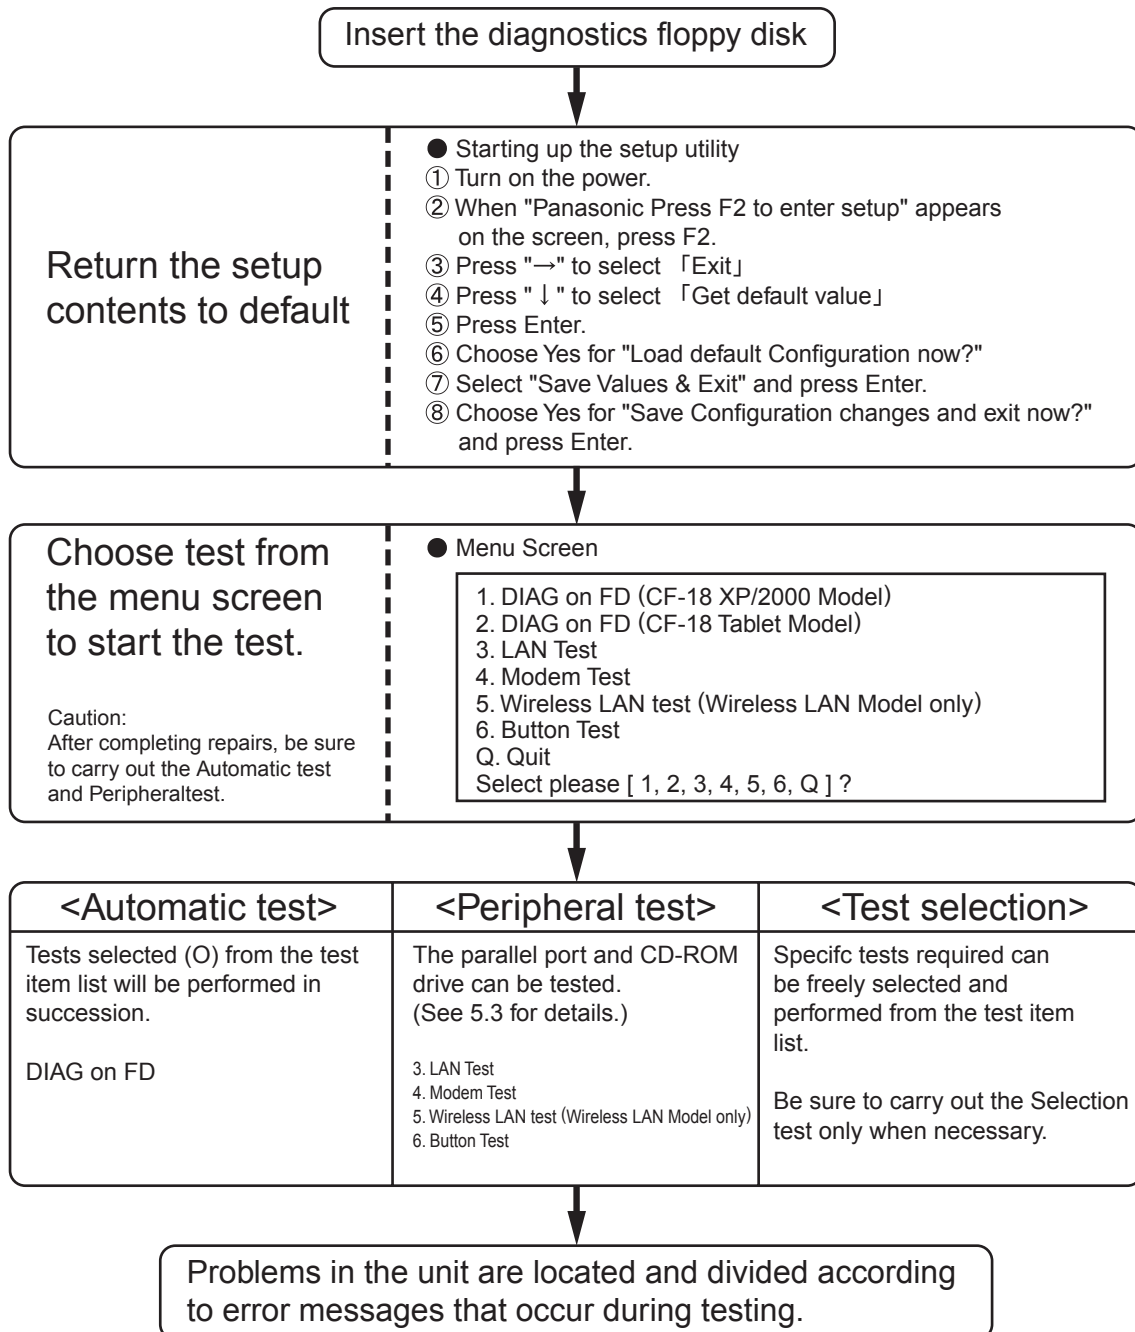

- (1) Connect the AC Adapter and External Equipments.
- (2) The System Setup should be set to the factory setting values by executing the "SETUP UTILITY" which can be invoked by F2 key at the POST.
If not, the messages and items of the diagnostic test may not be displayed properly on the LCD.
- (3) The serial port must be enabled in the "SETUP UTILITY" in order to execute the "1st SERIAL PORT" test.
- (4) Connect the serial loopback plug.

5 Self Diagnosis Test

Floppy disk is Included for the self-diagnostic tests that should be performed before using this product.
Important notice

1. System password
If the password function has been turned on, you will need to ask the user for the password before performing the self-diagnostics.
2. FDD test
Performing the FDD test will erase the contents of the floppy disk you insert into the drive. Use a formatted disk that has no contents or whose contents are not required. This product has a password function. However, if this function is turned on, the self-diagnostics tests will not work.

5.1. Outline of Self Diagnostic Tests

5.1.1 List of main test items

The Selection item displays the items selected under Automatic test. If you select Automatic test, these test items will be performed automatically. You can use Selection test to choose items from the menu screen that you want to have tested.

These items are shown below.

1		SPEAKER TEST	Speaker test	<input type="radio"/>
2		VESA MODE TEST	VESA mode test	<input type="radio"/>
3	CPU (CPU related)	A20 GATE TEST	Address A20 line	<input type="radio"/>
4		CACHE ON/OFF TEST	Cache memory on/off test	<input type="radio"/>
5		NPU OPERAND TEST	Floating point processor function test	<input type="radio"/>
6	RAM (Memory related)	RAM STANDARD TEST	Memory standard test	<input type="radio"/>
7	CONTROL (Control ICs on the main board, etc.)	DMA PAGE REG TEST	DMA page register test	<input type="radio"/>
8		DMA REGISTER TEST	DAM register test	<input type="radio"/>
9		DMAC TRANSFER TEST	DAM transfer test	<input type="radio"/>
10		PIC HALT INSTRUCTION TEST	Interrupt controller halt instruction test	<input type="radio"/>
11		PIC REGISTER TEST	Interrupt controller register test	<input type="radio"/>
12		RTC CMOS RAM TEST	Real time clock CMOS test	<input type="radio"/>
13		RTC TEST	Real time clock test	<input type="radio"/>
14		PIT CH0 TEST	interrupt timer CH0	<input type="radio"/>
15		PIT CH1 TEST	interrupt timer CH1	<input type="radio"/>
16	PIT CH2 TEST	interrupt timer CH2	<input type="radio"/>	
17	IO (Input-output)	KEYBOARD REG TEST	Keyboard test	<input type="radio"/>
18		PS/2 MOUSE REG	Mouse registration test	<input type="radio"/>
19	COMMUNICATION	SERIAL WRAP TEST	Serial loop back (jig required)	—
20		SERIAL ALL INTERNAL TEST	Serial port interior test	<input type="radio"/>
21		PARALLEL REGISTER R/W	Parallel register R/W test	<input type="radio"/>
22	AUX (Auxiliary functions)	PCIC ALL TEST	PCIC test	<input type="radio"/>
23		Card Bus Reg	Card Bus register test	<input type="radio"/>
24		USB Reg	USB register test	<input type="radio"/>
25	VIDEO (Display related)	VGA ALL TEST	VGA test	<input type="radio"/>
26		SVGA RAM TEST	SVGA RAM test	<input type="radio"/>
27	DISK (FDD, HDD)	FD WT/RD/WP TEST	FD WT, RD WP test	—
28		HDD ALL TEST	Only HDD lead test selected	<input type="radio"/>
29	UNIQUE (Individual functions)	ECP REGISTER R/W	ECP register R/W test	<input type="radio"/>
30		EPP REGISTER R/W	EPP register R/W test	<input type="radio"/>
31		EXT. CMOS R/W TEST	Extension CMOS R/W test	<input type="radio"/>

	Test function settings	Test condition save/play	Following file command
		Test automatic execute	Test executed on run settings by selecting command
		Error display (Paging style)	Select displayed items Error, Log, Option

5.2. Automatic Test

Test execution

From the menu screen shown below For Celeron models Select and press Enter for DIAG on FD

```

1. DIAG on FD (CF-18 XP/2000 Model)
2. DIAG on FD (CF-18 Tablet Model)
3. LAN Test
4. Modem Test
5. Wireless LAN test (Wireless LAN Model only)
6. Button Test
Q. Quit
Select please [ 1, 2, 3, 4, 5, 6, Q ] ?
    
```

menu screen

Speaker test, VESA test

The speaker test involves listening to music and choosing OK or Not okay. The VESA test involves looking at the display to see if it is satisfactory then choosing OK or Not okay.

Serial loop back test

The Automatic test's initial settings are set so that the serial loop back test will be executed. Connect the serial loop back jig and then perform the test.

(This test is not executed on default mode)

Diagnostics result

If no errors occur. The screen shows the word "Pass" in large letters.

If errors occur. The test is stopped when an error occurs and the error message is displayed.

For explanations of error messages, see Error Messages and Problem Categories (section 5.5).

Quitting the test

At the screen shown below, simultaneously press the ALT and X keys.

Input screen

5.3. Peripheral Test

Test execution

From the menu screen shown below, be sure to choose the following items and press Enter.

menu screen

3. LAN Test

4. Modem Test

5. Wireless LAN Test

(Wireless LAN Model only.)

This test checks for internal LAN device.

Choose LAN test and press Enter.

5 .4. Test Selection

Starting up the input menu

1. From the menu screen shown below, choose Quit and press Enter.

```
1. DIAG on FD (CF-18 XP/2000 Model)
2. DIAG on FD (CF-18 Tablet Model)
3. LAN Test
4. Modem Test
5. Wireless LAN test (Wireless LAN Model only)
6. Button Test
Q. Quit
Select please [ 1, 2, 3, 4, 5, 6, Q ] ?
```

menu screen

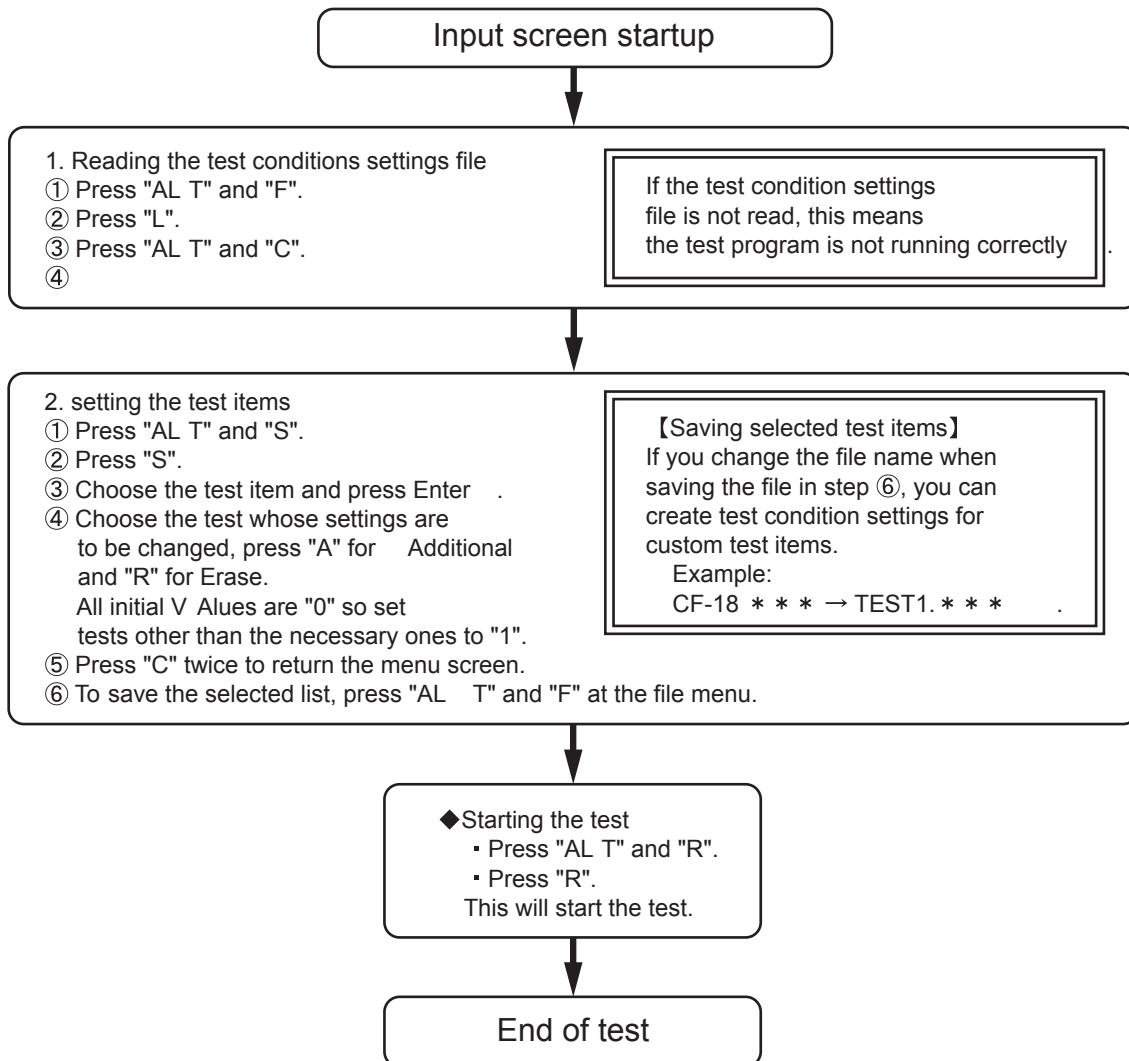

2. When A: \DIAG appears, input "JDG_185" and press Enter.
3. The input screen shown below will appear.
To choose menu items, hold down "ALT" and press the selection key.

Example:
 "AL T" + "F" brings up the File menu.

Input screen

Order of test flow selection

5.5. Error Messages and Troubleshooting

The table below explains the parts that may be faulty or damaged should an error message occur while performing the various test items of the self diagnostics program.

	Test classification	Screen display test items	Contents
1	CPU (CPU related)	A20 GATE TEST	Address 20 line
2		CACHE ON/OFF	Cache memory on/off
3		NPU OPERAND TEST	Floating point processor function
4	RAM (Memory related)	RAM STANDARD	Memory standard
5	CONTROL (Control ICs on the main board, etc.)	DMA PAGE REG TEST	DMA page register
6		DMA REGISTER TEST	DAM register
7		DMAC Transfer TEST	DAM transfer test
8		PIC HALT INSTRUCTION TEST	Interrupt controller
9		PIC REGISTER TEST	Interrupt controller
10		RTC CMOS RAM TEST	Real time clock CMOS
11			
12		SPEAKER TEST	Speaker
13		PIT CH0 TEST	Interrupt timer CH0
14	PIT CH1 TEST	Interrupt timer CH1	
15	PIT CH2 TEST	Interrupt timer CH2	
16	IO (Input-output)	KEYBOARD REG TEST	Keyboard
17		PS/2 MOUSE REG	Mouse
18	COMMUNICATION	SERIAL WRAP TEST	Serial loop back (jig required)
19		SERIAL ALL INTERNAL TEST	Serial port
20		PARALLEL REGISTER R/W	Parallel register
21	AUX (Auxiliary functions)	PCIC ALL TEST	PCIC
		Card Bus REG	Card Bus port
		USB REG	USB port
22	VIDEO (Display related)	VGA ALL TEST	VGA
23		SVGA RAM TEST	SVGA RAM
24		VESA MODE TEST	VESA mode
25	DISK (FDD, HDD)	FD WT/RD/WP TEST	FD write/read/write protection
26		HDD ALL TEST	Only HDD lead selected
27	UNIQUE (Individual functions)	ECP REGISTER R/W	Parallel port
28		EPP REGISTER R/W	Parallel port
29		EXT. CMOS R/W TEST	Extension CMOS R/W test

6 Wiring Connection Diagram

7 Disassembly/Reassembly

Note:

Power off the computer. Do not shut down to the Suspend or hibernation mode.

Do not add peripherals while the computer is in the Suspend or hibernation mode; abnormal operation may result.

7.1. Disassembly Instructions

7.1.1. Preparation

Before disassembling, be sure to make the following preparations.

- Shut down Windows and turn off the power.
- Disconnect the AC adaptor.
- Remove the optional DIMM memory card and PCMCIA card if they are connected.
- Remove other devices if they are connected.

Attention:

- Please execute writing BIOS ID when you exchange the Main Board.
- Parts (Sheet and rubber) etc. related various the Conductive Cloth and Heat Spreader cannot be recycled. Use new parts.

7.1.2. Removing the Battery Pack and HDD Pack

1. Open the Battery Cover.
2. Remove the Battery Pack.
3. Open the HDD Cover.

4. Remove the HDD Pack.

5. Remove the two Screws <A>.
6. Remove the HDD Case A and the HDD Case B.
7. Remove the HDD.

Screws <A>:DFHE5025XA

7.1.3. Removing the Touch Pad and Keyboard

1. Remove the Palm Rest Ass'y.

Note:

The Palm Rest Ass'y is firmly fixed with two-sided tape.

Carefully remove the Palm Top Cover Sheet not to damage it.

2. Remove the four Screws .

3. Remove the KBD Plate.

4. Lift the far side of the Keyboard and slide it to backward, and then turn the Keyboard over frontward.

5. Remove the three Screws <C>.

6. Remove the KBD Connector Cover.

7. Disconnect the Cable from Connector (CN18).

8. Remove the Keyboard.

9. Remove the TP Tape.

10. Disconnect the Cable from Connector (CN800).

11. Remove the Touch Pad and Click Button Plate.

Screws :DRSB2+5FKL

Screws <C>:DFHE5025XA

7.1.4. Removing the Speaker Angle and DIMM Lid

1. Remove the four Screws <D>.

2. Disconnect the Cable from Connector (CN37).

3. Remove the DIMM Lid.

4. Remove the two Screws <E>.

5. Remove the Speaker Angle.

Screws <D>: DRQT2+D2FKL

Screws <E>: DRHM5025YA

7.1.5. Removing the Rear Cabinet

1. Remove the thirteen Screws <F>.

2. Open the LID Rubbers.

3. Remove the Rear Cabinet.

Screws <F>:DRHM0061ZA

7.1.6. Removing the DU Lid Unit

1. Remove the five Screws <G>.
2. Remove the DU Lid Angle and DU Lid.

Screws <G>:DRHM5025YA

7.1.7. Removing the Audio PCB

1. Remove the two Screws <H>.
2. Disconnect the Cable from a Connector (CN901).
3. Remove the Audio PCB.

Screws <H>:DRSB2+5FKL

7.1.8. Removing the Wireless Module, Port PCB and Modem

Note:

This procedure is not necessary if the computer is not equipped with Wireless Module or Modem PCB.

1. Disconnect the two Antenna Cables from two Connectors (J5, J6).
2. Remove the Wireless Module.
3. Remove the three Screws <I>.
4. Remove the Port PCB.
5. Remove the two Screws <J>.
6. Remove the Modem.
7. Disconnect the Modem cable from the connector.
8. Remove the two Screws <K>.
9. Remove the BAT CON angle.

Screws <I>:DRSB2+5FKL

Screws <J>:XSB2+4FNL

Screws <K>:DRSB2+5FKL

7.1.9. Removing the SD PCB

1. Disconnect the Cable from Connector(CN21).
2. Remove the three Screws <h>
3. Remove the SD PCB.

Screws <h>:DXQN2+A22FNL

7.1.10. Removing the Main PCB and Lithium Battery

1. Disconnect the Cable from Connector(CN3).
2. Remove the Lithium Battery.
3. Disconnect the seven Cables from seven Connectors (CN9, CN12, CN14, CN23, CN30, CN35, CN36).
4. Remove the Screw <L>.
5. Remove the two Screws <M>.
6. Disconnect the two Cables from two Connectors (CN8, CN17).
7. Remove the four Screws <N>.
8. Remove the Main PCB.
9. Remove the PCMCIA Unit.

Screw <L>:DRSB2+5FKL
Screws <M>:DXYN2+J12FNL
Screws <N>:DXYN2+J18FNL

7.1.11. Removing the PAD PCB and I/O PCB

1. Disconnect the Cable from Connector (CN801).
2. Remove the three Screws <O>.
3. Remove the PAD PCB.
4. Remove the four Screws <P>.

5. Remove the two Screws <Q>.
6. Remove the I/O PCB.

Screws <O>:DFHE5025XA
Screws <P>:DFHE5058ZB
Screws <Q>:DRSB2+5FKL

7.1.12. Removing LED PCB and Switch PCB

1. Remove the LED Waterproof Sheet.
2. Remove the LED PCB.
3. Remove the Switch PCB.
4. Remove the Power Switch.

7.1.13. Removing the CPU Heat Plate

1. Remove the three Screws <R>.
2. Remove the CPU Heat Plate.

Screws <R>:DFHE5025XA

7.1.14. Removing the Display unit

1. Remove the four Screws <S>.
2. Remove the LCD Hinge Cover.

3. Display unit is half-rotated and removes the two Screws <T>.
4. Remove the four Screws <U>.

5. Turn the computer over.
6. Remove the Display Unit.

Screws <S> : DFHE5025XA
 Screws <T> : DRSB2+5FKL
 Screws <U> : DXYN4+J8FNL

7.1.15. Removing the LCD Rear Case

1. Remove the eight Screws <V> on the front side of Display unit.
2. Remove the eight Screws <V> on the back side of Display unit.
3. Remove Antenna Cover and Tablet Latch Cover.
4. Remove the two Screws <W>.
5. Remove the ten Screws <X>.
6. Remove the LCD Rear Case.

Screws <V> : DRQT26+E5FKL
 Screws <W> : DXYN3+J10FNL
 Screws <X> : DXYN2+J6FNL

7.1.16. Removing the LCD Hinge

1. Remove the Cable Holder.
2. Remove the two Screws <Y>.
3. Remove the Cable Holder Plate and LCD Hinge.

Screws <Y> : DXYN3+J8FNL

7.1.17. Removing Inverter PCB and LCD Unit

1. Disconnect the two Cables from two Connectors (CN1, CN2).
2. Remove the Inverter Case and Inverter PCB.
3. Disconnect the two Cable from two connector (CN900, CN901).
4. Remove the TS PS2 PCB, then remove the LCD unit.

7.1.18. Removing GPRS Antenna PCB, LAN1-BT PCB, LAN2-BT PCB, Wide Area Aux PCB and Pen Holder

1. Remove the two Screws <a>.
2. Remove the GPRS Antenna PCB
3. Remove the two Screws <a>.
4. Remove the LAN1-BT PCB.
5. Remove the two Screws <a>.
6. Remove the LAN2-BT PCB.
7. Remove the two Screws <a>.
8. Remove the Wide Area Aux PCB.
9. Remove the Pen
10. Remove the two Screws .
11. Remove the Pen Holder.

Screws <a> : DFHE5025XA
Screws : DRHM5025YA

7.1.19. Removing the Each Cover Unit

1. Remove the 12 Screws <f>.
2. Remove the Modem/LAN LID Rubber, LAN LID Rubber, USB LID Rubber, DC IN LID Rubber, Serial LID Rubber, RGB LID Rubber and Audio LID Rubber.
3. Remove the Rear Cabinet.
(Refer to 7.1.5 Removing the Rear Cabinet)
4. Remove the six Screws <e>.
5. Remove the Battery LID ASS'Y, HDD LID ASS'Y and PCMCIA LID ASS'Y.

Screws <e>:DRQT26+D3FKL
Screws <f>:DRHM5025YA

7.2. Reassembly Instructions

7.2.1. Attention when CF-18 series is repaired

- Please execute writing BIOS ID when you exchange the Main Board.
- Parts (Sheet and rubber) etc. related various the Conductive Cloth and Heat Spreader cannot be recycled. Use new parts.

7.2.2. Setting up the LCD UNIT

1. Set the LCD UNIT to the LCD FRONT CABINET/TS PANEL.
2. Fix the LCD Back Damper using the 2 Screws. <Z>
3. Set the TS PS2 PCB on the LCD Back Damper, and connect the 2 Cables to the Connectors (CN900 and CN901).
4. Set the INVERTER PCB to the LCD Back Damper, and connect the 2 Cables to the Connectors (CN1 and CN2).

Screws <Z> :DXHM0042ZA

■ Assembly of LCD Back Damper (Applicable Model : Touch Screen Model)

■ Assembly of LCD Back Damper (Applicable Model : Digitizer Model)

■ Assembly of Inverter PCB (Applicable Model : Touch Screen Model)

■ Assembly of Glass (Applicable Model : Digitizer Model)

7.2.3. Assembling GPRS Antenna PCB, LAN1-BT PCB, LAN2-BT PCB, Wide Area Aux PCB, and Pen Holder

1. Fix the Pen Holder using the 2 Screws.
2. Fix the Wide Area Aux PCB using the 2 Screws. <a>
3. Fix the LAN2-BT PCB using the 2 Screws. <a>
4. Fix the LAN1-BT PCB using the 2 Screws. <a>
5. Fix the GPRS Antenna PCB using the 2 Screws. <a>

Screws <a> : DFHE5025XA
 Screws : DRHM5025YA

Line processing of Antenna Cable

7.2.4. Setting up the LCD Hinge

1. Wind the Cable coming out of the LCD Unit counterclockwise to the LCD Hinge.
2. Set the Lock Plate and the Hinge Top Cover, and rotate the LCD Hinge to turn the Display Unit to front
3. Put the LCD Cable and the Antenna Cable in the Cable Holder.
4. Fit another Cable Holder and clamp the Cable Holders in the LCD Hinge.
5. Fix the LCD Hinge using the 2 Screws <Y> and the 2 Cable Holder Plates.

Screws <Y> : DXYN3+J8FNL

■ Assembly of LCD Hinge

Avoid catching the Cable (when repairing or when not using the jig).
Temporarily fix the both sides ("A") of the Hinge using the Screw <W>, and fix the Cable Hold Plate.
After fixing the Cable Hold Plate, remove the Screw <W> from the both sides ("A").
Cable Hold Plate is installed after it is kept in A temporarily.(using Screw<W>)

Line processing of Antenna Cable and LCD Cable

7.2.5. Assembling the Antenna Cover, the Tablet Latch Cover and the LCD Rear Case

1. Fix the LCD Rear Case using the 10 Screws <X> and the 2 Screws <W>.
2. Attach the Antenna Covers and the Tablet Latch Cover to the Display Unit.
3. Tighten the 8 Screws <V> on the back of the Display Unit.
4. Turn the Display Unit over, and tighten the 8 Screws. <V>

Screws <V> : DRQT26+E5FKL

Screws <W> : DXYN3+J10FNL

Screws <X> : DXYN2+J6FNL

■ Assembly of LCD Front Case

■ Assembly of LCD Rear Case (Applicable Model : Touch Screen Model)

■ Assembly of LCD Rear Case (Applicable Model : Digitizer Model)

■ Assembly of Tablet Latch Cover and Antenna Cover

7.2.6. Setting the Display Unit

1. Fix the Display Unit using the 2 Screws <T>.

2. Close the Display Unit and turn the computer over, and then fix the Display Unit using the 4 Screws <U>.

3. Turn the computer over and fix the LCD Hinge Cover using the 2 Screws <S>.

4. Open the Display Unit and fix the LCD Hinge Cover using the 2 Screws <S>.

Screws <S> : DFHE5025XA

Screws <T> : DRSB2+5FKL

Screws <U> : XYN4+J8FNL

■ Assembly of Display Unit

Safety Working

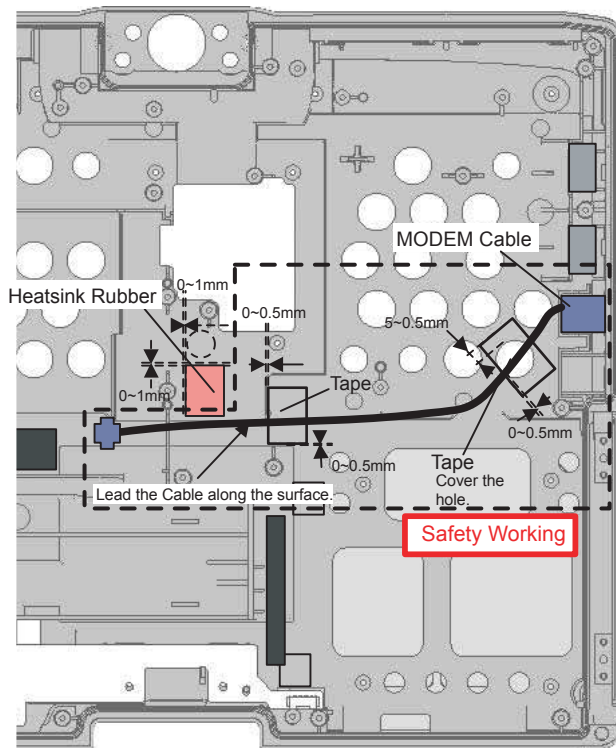

7.2.7. Setting the CPU Heat Plate

1. Fix the CPU Heat Plate using the three Screws<R>.

Screws <R>:DFHE5025XA

■ Line Processing of the Modem Cable, and putting of the Heatsink Rubber.

7.2.8. Setting the LED PCB and the Switch PCB

1. Set the Power Switch.
2. Set the Switch PCB.
3. Set the LED PCB.
4. Attach the new LED Waterproof Sheet.

■ Assembly of the LED PCB and the Switch PCB

7.2.9. Setting the PAD PCB and the I/O PCB

1. Fix the I/O PCB using the four Screws<P> and the two Screws<Q>.
2. Fix the PAD PCB using the three Screws<O>.
3. Connect the SW Cable to the Connector (CN801) of the PAD PCB.

Screws <O>:DFHE5025XA

Screws <P>:DFHE5058ZB

Screws <Q>:DRSB2+5FKL

■ Assembly of PAD PCB

7.2.10. Setting the Main PCB and the Lithium Battery

1. Set the PCMCIA Unit to Main PCB
2. Mount the HDD Guide Plate and set the Main PCB.
3. Fix the Main PCB using the four Screws <N> and the two Screws <M>.
4. Fix the Main PCB using the Screw <L>.
5. Connect the seven Cables to the corresponding Connectors (CN9,CN12,CN14,CN23,CN30,CN35,CN36).
6. Turn the computer over and connect the two Cables to the corresponding Connectors (CN8, CN17).
7. Connect the Cable to the Connector (CN3), and fix the Lithium Battery.

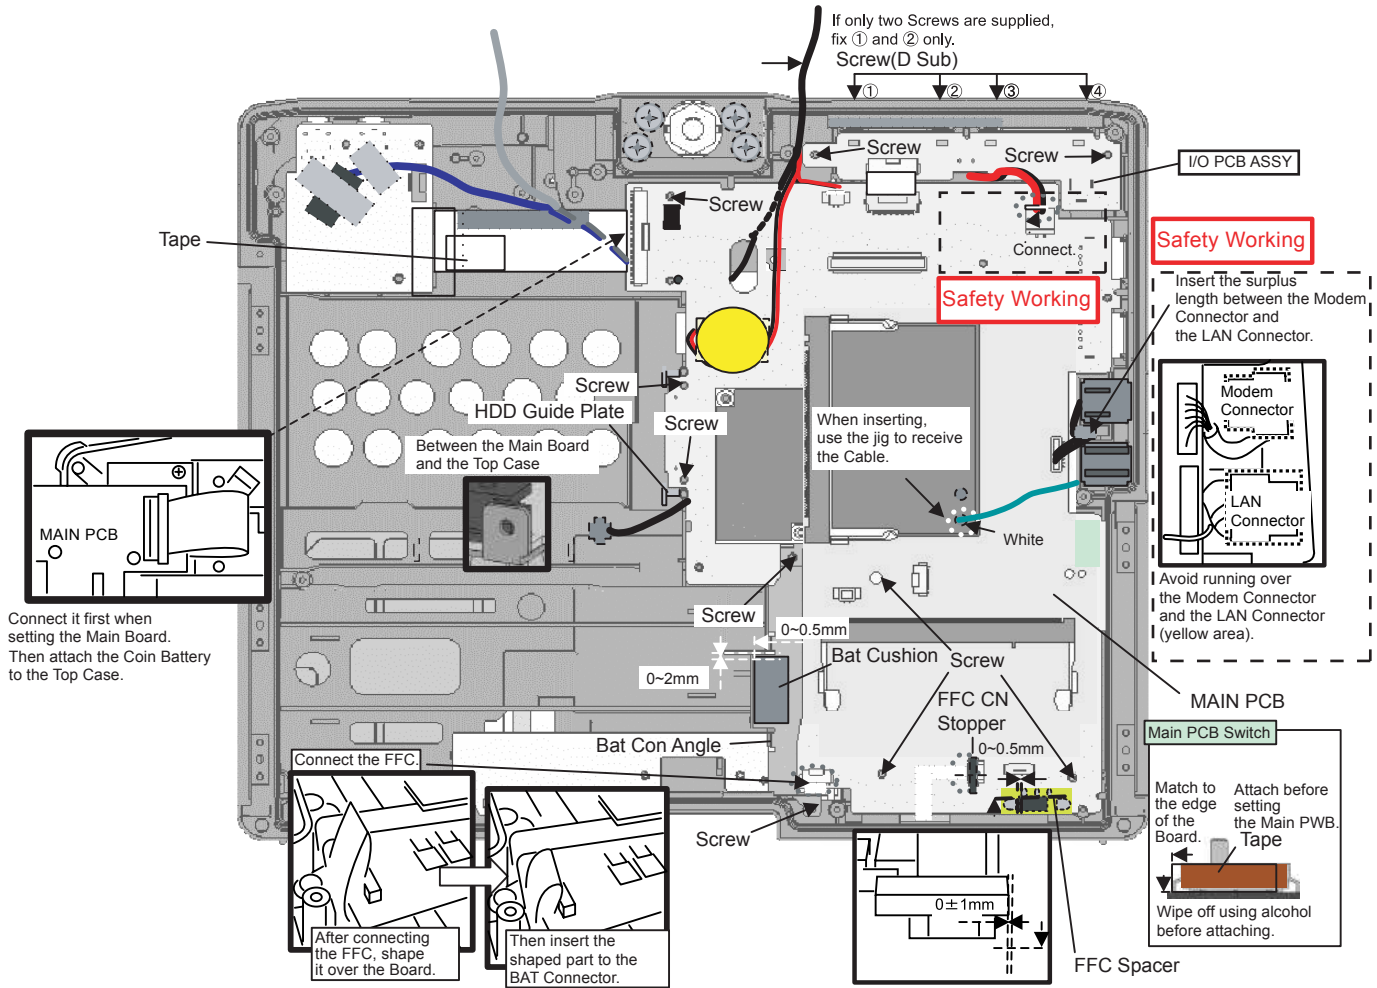

Screw <L>:DRSB2+5FKL
 Screws <M>:DXYN2+J12FNL
 Screws <N>:DXYN2+J18FNL

■ Line Processing of the Antenna Cable

Line Processing of Main Unit

Line Processing of the Lithium Battery

● Lithium Battery

Connect the Cable to the Connector CN3 of the Board. (Right angle type)

- After attaching the Cushion for Lithium Battery, set the Lithium Battery as shown below.

Attach the Lithium Battery on the Cushion. Draw the Lead Wire toward the end of the Board. Arrange the surplus length of the Lead Wire as shown below.

Safety Working

● Cushion for Lithium Battery

Attach on the IC14 (Super I/O). Attach the white adhesive surface to the IC side.

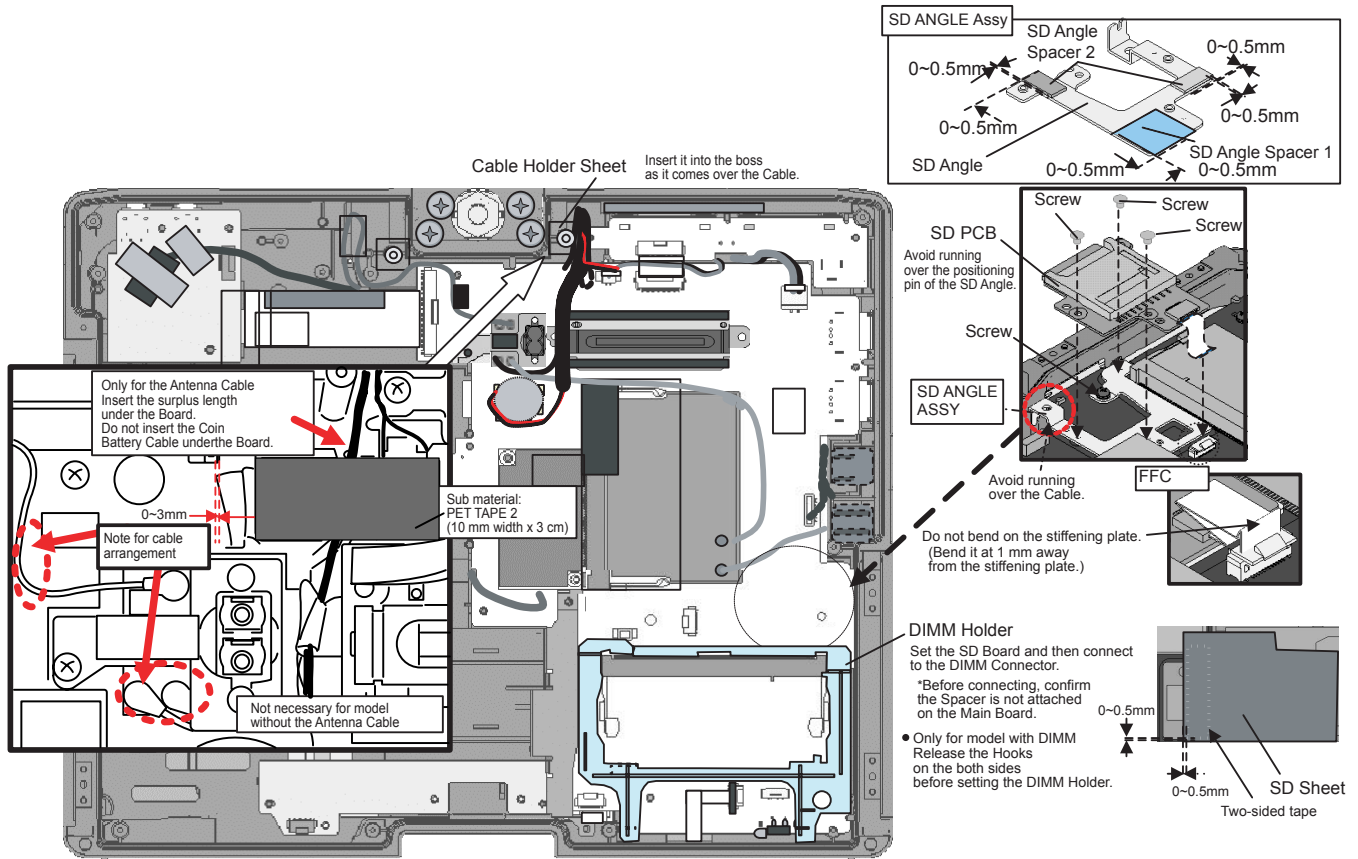

7.2.11. Setting the SD PCB

1. Fix the SD PCB using the three Screws <h>.
2. Connect the Cable to the Connector (CN21).

Screws<h>:DXQN2+A22FNL

■ Assembly of SD PCB

7.2.12. Setting the Wireless Module, the Port PCB, and the Modem

1. Fix the Battery Connect Angle using the two Screws <K>.
2. Connect the Modem cable to the Connector, and fix the Modem on the Main PCB using the two Screws <J>.
3. Fix the Port PCB on the Main PCB using the three Screws <I>.
4. Connect the Wireless Module to the Main PCB, and connect the two Antenna Cables (J5, J6) to the Wireless Module.

Screws <I>:DRSB2+5FKL

Screws <J>:XSB2+4FNL

Screws <K>:DRSB2+5FKL

■ Assembly of the Port PCB

Line Processing of the Wireless Module, Port PCB and Modem

7.2.13. Setting the Audio PCB

1. Connect the Cable to the Connector of the Audio PCB (CN901), and fix the Audio PCB using the two Screws<H>.

Screws<H>:DRSB2+5FKL

■ Putting of the Sheet

7.2.14. Assembling the DU Lid Unit

1. Fix the DU Lid Angle and the DU Lid using the five Screws<G>.

Screws <G>:DRHM5025YA

7.2.15. Setting the Rear Cabinet

1. Fix the Rear Cabinet on the computer using the 13 Screws <F>. No1 to No13
2. Close the LID Rubbers.

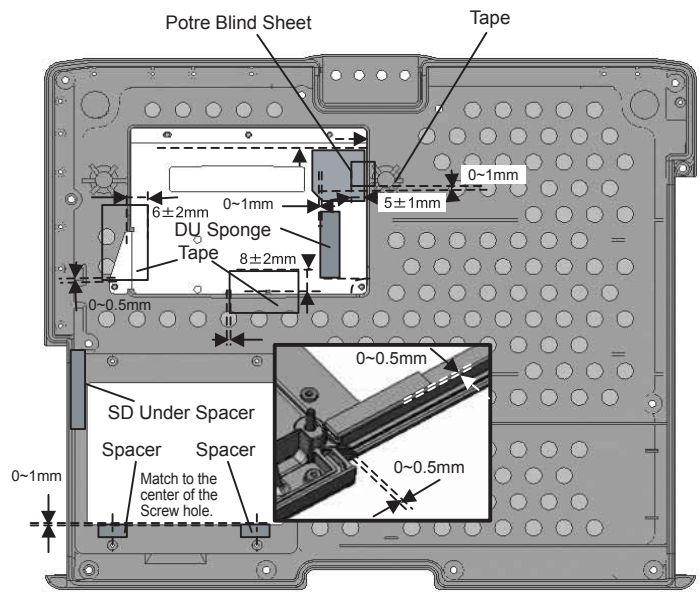

Note:

Tighten the Screws in the numbered order (No1 to No13).

Screws<F>:DRHM0061ZA

■ Cautions for Setting the Rear Cabinet

7.2.16. Setting the Speaker and Dimm Lit

1. Fix the Speaker Angle to the DIMM Lit using the two Screws <E>.
2. Connect the Speaker Cable to the Connector (CN37) of the Main PCB.
3. Fix the DIMM Lit using the four Screws<D>. No1 to No4

Screws<D>:DRQT2+D2FKL

Screws<E>:DRHM5025YA

■ Cautions for Setting the DIMM Lit

When removing the Bottom Case Assy, be sure to remove the DIMM Lid Assy.

7.2.17. Setting the Touch Pad and the Keyboard

1. Connect the Cable to the Connector (CN800), and attach the Touch Pad to the computer.
2. Set the Click Button Plate.
3. Attach the new TP Tape over the Touch Pad.
4. Attach the Palm Rest Ass'y on the computer.

5. Connect the Cable of the Keyboard to the Connector (CN18) on the Main PCB.
6. Fix the KBD Connector Cover using the three Screws<C>.

7. Set the Keyboard to the computer.

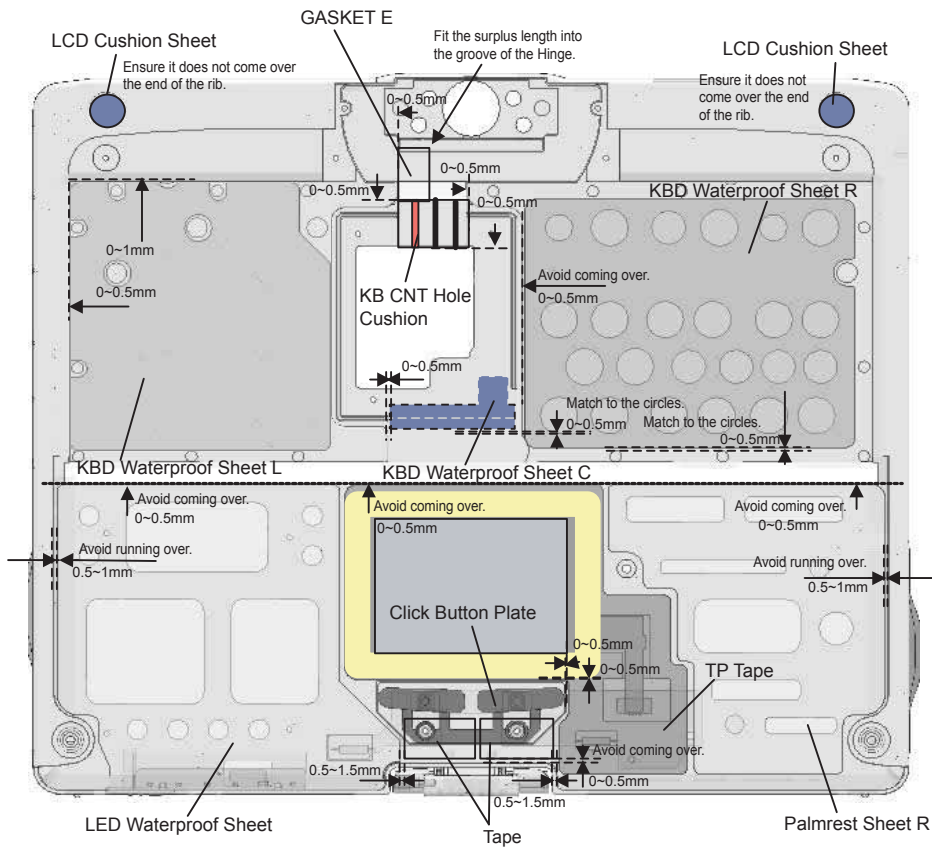

8. Fix the KBD Plate using the four Screws.

Screws:DRSB2+5FKL
Screws<C>:DFHE5025XA

■ Putting of the Sheet

■ Cautions for Setting the Keyboard

■ Putting of the Palm Rest ASSY

7.2.18. Setting the Battery Pack and the HDD Pack

1. Set the HDD in the HDD Case and fix it using the two Screws<A>.

3. Open the Battery Cover and set the Battery.

Screws<A>: DFHE5025XA

2. Open the HDD Cover and set the HDD Pack.

■ Assembly of the HDD ASSY

7.2.19. Assembling the Each Cover

1. Fix the Battery LID Ass'y, the HDD LID Ass'y, and the PCMCIA LID Ass'y using the six Screws<e>.
2. Set the Rear Cabinet.
3. Fix the Modem/LAN LID Rubber, the LAN LID Rubber, the USB LID Rubber, the DC IN LID Rubber, the Serial LID Rubber, the RGB LID Rubber, and the Audio LID Rubber using the 12 Screws<f>. No1 to No12

Note:

Tighten the Screws in the numbered order (No1 to No12).

Screws <e>:DRQT26+D3FKL

Screws <f>:DRHM5025YA

Replacement Parts List

Note: Important Safety Notice

Components identified by  mark have special characteristics important for safety.
When replacing any of these components use only manufacturer's specified parts.

CF-18NHHZXBM
