# MSI brand story

## How it all started

In 1986, Mr. Joseph Hsu, the founder of MSI, realized great opportunities in the IT industry and convinced four friends (Frank Lin, Jeans Huang, Henry Lu and Kenny Yu) with similar interest and professional skills to establish Micro-Star International - the birth of a legend in Taiwan's IT industry. The five founders all started

from scratch with R&D production, marketing, services, product packaging and even shipping. Based on these revolutionary sentiments, MSI's management team has a tacit understanding of business, successfully navigating the industry for over 23 years.

MSI's constant innovation. To achieve the best user experience, every component is essential. Therefore, in the past 25 years, "Insist on the Best" has been MSI's motto. By thinking from the users' perspective and dedicate full attention on every little detail, this philosophy makes MSI stand out as the most desirable product.

## Insist on the best

MSI believes that superior digital technology can improve life and is passionate about exploring the potential of a digital world by developing cutting edge tools; tools that easily and quickly utilize information, enabling users to freely express their own styles. Creating fantastic user experiences is the drive behind

## Innovation and style

In 2010, MSI established two additional core values: Innovation and Style. "Innovation" is a value that speaks for MSI's commitment to superior product performance and reliability. The idea of innovation is consisted throughout every product's entire life span. At the same time, we give serious consideration to the perfection of quality. "Style" is another value that brings freedom and expresses personal identity. MSI has taken the lead on portable and lightweight digital products that truly realizes user mobility and creativity.

It also strives to showcase a type of art piece that represent one's uniqueness - such as the sleekness of a business professional, the elegance of a trendsetter and the power of a gamer.

## Where are we going from here

For over twenty years, MSI had been making components for the big PC brands; the guts - the stuff inside the box. Over time, we realized we had great ideas and great designs of our own. Our motherboards and graphic cards are some of the best performing and widely used by enthusiasts. MSI's award-winning line of Notebooks and All-in-One PC's are examples of what we can do now that we're outside the box. And with many new innovations on the horizon, our future looks brighter.

## Gaming Notebook

*The MSI G-series notebooks are the choice notebooks for gamers everywhere, especially the professional gamers here at FnaticMSI.*

*The G-series notebooks are specially designed for the best game-play while on the run and at home, featuring larger screens, durable airbrushed steel housing, full sized keyboards and top of the line hardware to ensure the smoothest game-play.*

*The G-series notebooks are the perfect solution for anyone who is constantly traveling, whether it be to LAN events, traveling on vacation or business or anywhere else.*

*Wherever you go, you will never have to sacrifice your gaming experience; MSI's got you covered.*

FnaticMSI gaming team

## TDE (Turbo Drive Engine technology)

When a speed boost is needed to outreach the competition or just to tear through the virtual world, there is no need to reboot. Just simply press the Turbo button located above the keyboard to boost the processing speed and to increase performance rapidly.

## Dynaudio

MSI and Dynaudio lead the trend on notebook audio experience. Dynaudio, the specialist for an extraordinary sound experience, proudly announced their cooperation with MSI in PC sound entertainment at the Cebit 2010. Dynaudio speakers deliver 'authentic fidelity' audio to let you enjoy music and games in the best audio performance. Let the Dynaudio speakers impress you exclusively on MSI gaming notebooks!

## THX TruStudio PRO™

THX TruStudio Pro is specially designed to bring the same great audio experience found in live performances, films, and recording studios - to the notebook. This technology deliver the fullest audio experience for music, movies and games, while remaining true to the source and intention of the artists who created it.

## Cooler Boost technology

Exclusive Cooler Boost technology provides powerful cooling capabilities and receives real-time notification of the gaming notebook core temperature variations and fan speed for an even better performance.

## USB 3.0

USB 3.0 delivers a 10x faster transfer speed compared to USB2.0 for fast file transfers from multimedia devices to your notebook like games, music and movies.

## Highlighted gaming keys

Gamers can find the direction keys (W,A,S,D) quickly when the action gets hot and heavy, giving them an extra edge when fractions of a second matter to beat an opponent.

MSI recommends Windows® 7.

Sascha Faber – MSI Marketing Manager

## MSI GPU boost powered by NVIDIA Optimus

MSI GPU Boost technology with NVIDIA Optimus delivers the ideal balance between multimedia performance and battery efficiency. When using applications that require high performance image processing, this feature automatically switches graphics from integrated to discrete graphics to receive the needed multimedia performance. When high graphics performance is no longer needed and extended battery life is a priority, this feature switches the graphics back from discrete to integrated graphics.

## THX TruStudio PRO™

THX TruStudio Pro is specially designed to bring the same great audio experience found in live performances, films, and recording studios - to the notebook. This technology deliver the fullest audio experience for music, movies and games, while remaining true to the source and intention of the artists who created it.

## Powerful DirectX 11 graphics

MSI F-Series notebooks with DirectX 11 offer the latest in computer graphics and performance. Thanks to technologies such as Tessellation games are much more detailed and life-like, offering interactive and dynamic environments at a higher speed than before. With MSI F-Series notebooks with DirectX11 graphics you are ready for the future of realistic effects in the latest games.

## Fast USB 3.0 file transfers

USB 3.0 delivers a 10x faster transfer speed compared to USB2.0 for fast file transfers from multimedia devices to the notebook like games, music and movies.

## HD webcam

Enjoy real-life images and fluid 1280x720p high-definition (HD) video with 30 fps for high quality images and natural smooth video conversations with your friends or family.

MSI recommends Windows® 7.

## Classic Notebook

---

*By designing MSI C-Series, we try to provide more than a classical notebook, we offer the latest technologies plus MSI exclusive innovations in the best design, within a limited budget.*

*Because we understand that daily computing needs efficiency, our C-Series offer all functionalities to make your life easier: ECO function for a longer battery life, a Numeric Keypad for easy typing and a Time stamp to back up your data on the fly.*

*Moreover, all those smart innovations come in a very-well designed and elegant chassis that makes you proud to take out of your bag. We put so much more in our C-Series for a lot less than you'd expect.*

---

Frédéric Oster – MSI Business Development Director

## MSI GPU boost powered by NVIDIA Optimus\*

MSI GPU Boost technology with NVIDIA Optimus delivers the ideal balance between multimedia performance and battery efficiency. When using applications that require high performance image processing, this feature automatically switches graphics from integrated to discrete graphics to receive the needed multimedia performance. When high graphics performance is no longer needed and extended battery life is a priority, this feature switches the graphics back from discrete to integrated graphics.

*\* for all CX-models*

## ECO Engine power management

With this function the power can be managed manually, so that less power is used to provide a longer battery life. By simply touching the MSI ECO touch sensor, one of the 5 different modes can be chosen for saving power: Gaming mode, Movie mode, Presentation mode, Office mode, and Turbo Battery mode.

## Fast USB 3.0 file transfers

USB 3.0 delivers a 10x faster transfer speed compared to USB2.0 for fast file transfers from multimedia devices to the notebook like games, music and movies.

## Cinema Pro technology

This technology improves the viewing and sound quality of the notebook by only one push on the Cinema Pro button for having a theatrical movie experience.

## SRS Premium sound technology

SRS Premium Sound technology delivers an accurate and virtual surround while watching movies, listening to music or playing games. Furthermore, this technology boosts the overall audio volume and enriches the bass quality.

## Wind Notebook

---

*I really like the MSI U-Series. They are light and therefore easy to carry around. Normally customers associate light with slow but these little things are real powerhouses! Totally what you don't expect of such a small device. Next to that, the power usage is very low so the battery life is much longer than normal notebooks. Since you want to carry these around and bring to other places MSI also looked at the design of the notebook. It's not boring and very 2011.*

*All together, the U-Series are perfect if you want to walk around with a nice looking, light and long battery life device.*

*P.S. I also love to sell them, they are so affordable!*

---

Gerard Moneta – MSI Retail Manager

## Ultra portable, lightweight and a long battery life

MSI U-series are the ideal solution for an on-the-go notebook. These netbooks are extremely light, ultra-portable and have an amazing long battery life for easy mobility and an overall work pleasure.

MSI recommends Windows® 7.

## Ergonomic de-stress keyboard and extra wide touchpad

MSI U-series are equipped with an ergonomic de-stress keyboard which benefits an easier and more comfortable typing experience. Next to this, all models have an extra wide touchpad which allows your fingers to move around more freely.

## ECO Engine power management

With this function the power can be managed manually, so that less power is used to provide a longer battery life. By simply touching the MSI ECO touch sensor, one of the 5 different modes can be chosen for saving power: Gaming mode, Movie mode, Presentation mode, Office mode, and Turbo Battery mode.

## TDE (Turbo Drive Engine technology)

When a speed boost is needed to outreach the competition or just to tear through the virtual world, there is no need to reboot. Just simply press the Turbo button located above the keyboard to boost the processor speed and to increase performance rapidly.

## LED backlight technology

LED backlight is a power efficient technology which benefits into saving battery life of your U-series model and enriches the brightness of the screen for a better viewing quality.

6 cell, 4800mAh	for 15"~17" (M6XX, PR6XX, VX6XX, VR6XX, VR7XX, EX6XX, GX62X, GX63X, GX72X, GX73X, GT62X, GT72X, GT73X)	black	957-14XXXP-103
9 cell, 6600mAh	for 15" and 17" (L7XX, M5XX)	black	957-1016T-006
9 cell, 7200mAh	for 15"~17" (M6XX, PR6XX, VX6XX, VR6XX, VR7XX, EX6XX, GX62X, GX63X, GX72X, GX73X, GT62X, GT72X, GT73X)	black	957-167XXP-107 / 957-14XXXP-107

## Notebook power adapters

40W	for 8.9", 10" and X Series	black	957-N0111P-001
90W	for all 12"~17" models (not Gaming Series)	black	957-16511P-102
120W	only for Gaming Series	black	957-163A1P-103
150W	only for GT66X and GX66X	black	957-163A1P-113

## DIGIVOX Mini Hybrid

DVB-T Analog/Digital Hybrid TV Tuner Dongle (USB 2.0 interface)  
 Supports both analog & (free-to-air) digital TV signal (HDTV 1080i)  
 Supports Time-Shifting and Schedule Recording functions  
 Easy installation, plug & play

## DIGIVOX Slim HD

Super slim DVB-T TV Tuner Dongle (USB 2.0 interface)  
 Supports free-to-air digital TV (HDTV 1080i) and digital radio (not DAB)  
 Supports Time-Shifting and Schedule Recording functions  
 Easy installation, plug & play

## Homeplug ePower 1000HD kit

1000Mbit/s Gigabit Powerline Adapter (set of 2pcs)  
 Speed: up to 1000Mbps; Range: up to 200 meters  
 Ideal networking for games consoles, NAS, Media Player  
 128 bit AES data encryption at the push of the button

## RG300EX Lite

802.11n (draft) Wireless Router  
 Data transmissions speed up to 150mbit  
 Simple data encryption at the push of a button  
 Backwards compatible with older Wireless standards

## Starbox

2.5" HDD enclosure  
 Suitable for hard disks with SATA connection  
 Support Windows XP, Vista, 7 and MAC OS  
 Coming soon: USB 3.0 interface with multiple-color options

## StarReader USB 3.0

All in 1 card reader (USB 3.0 interface)  
 Plug and play  
 Powered by USB, no external power necessary

---

*"One for all and All-In-One"*

*I am proud that MSI has a complete portfolio of these reinvented desktop computers. This new PC form factor can be used in many different business branches as well for home use.*

*The combination of style, space saving design, latest technology and energy compliance, the All-in-One PC meets all demands for customers and business usage. Besides the touch function on almost all AE-series we have listened to our users from different branches and implemented various multimedia features like the Super Charge function for example. At MSI we continue to improve our design and customer needs for a 'best fit' All-in-One PC for everyone.*

*We like you to join us and challenge this new way of working with these great products.*

---

Erik Massink – MSI Senior Product Manager

AE Series

All-in-One PC

## Elegant and space saving design

MSI AE-series are suitable for every environment thanks to its space saving design compared to normal space consuming desktop PC's. Next to this, all AE-series are VESA wall mount compatible for an even more space saving and elegant look.

## Fast USB 3.0 file transfers

All new MSI AE-series are equipped with USB3.0. USB3.0 delivers 10x faster transfer speeds compared to USB2.0 for fast file transfers from multimedia devices to the All-in-One PC like games, music and movies.

## THX TruStudio Pro™

THX TruStudio Pro is specially designed to bring the same great audio experience found in live performances, movies, and recording studios - to the All-in-One PC. This technology deliver the fullest audio experience for music, movies and games, while remaining true to the source and intention of the artists who created it.

## USB Super Charger

MSI AE-series utilizes Super Charger technology, which not only lets a USB device recharge while the computer is turned off using a single USB port, but also reduces charging time up to 40%. No need to start up your All-in-One just to charge a device - marking an convenience increase in your life.

## Exclusive software

MSI AE-series comes with several exclusive software utilities like for example Wind Touch for easily navigating your PC by touch, ArtRage3 to give you the chance to be the next Picasso and Roxio Cineplayer 3D which enables you to enrich the All-in-One experience with the best in high-definition and 3D entertainment playback.

## AP Series All-in-One PC

---

*Our AP-series are specially designed for the multi-purpose business environments like for example a pharmacy, hotel, shop, factory or a car showroom.*

*These All-in-One PC's give you desired freedom and reward with ultra-low consumption and operating noise, space saving design and provide you with all the I/O comfort needed. Furthermore, MSI's AP2000 model is equipped with unique and exclusive COM port connectivity to connect your cash register, printer, barcode scanner and other unique business related devices without any obstacles.*

*Unite your workplace, unite your hardware configuration and enjoy the simple management.*

*Follow the innovators, follow MSI.*

---

Richard Slama – MSI Public Relations Specialist

## Space saving and business-look design

Thanks to its professional and space saving design, MSI AP-series are suitable for every business environment. Next to this, all AP-series can be easily attached to walls thanks to the VESA wall mount compatibility. This delivers an even more space saving and professional look.

Look for  
Intel  
Inside®

## Silent and low power consuming

Enjoy a silent working environment with the MSI AP-series. Next to the low noise design, these All-in-One PC's are very energy efficient. Creating the most comfortable working environment.

## Exclusive software

MSI AP-series is equipped with all-new exclusive touch software and games like MSI Easy Viewer and MSI YouPaint. MSI Easy Viewer gives users the possibility to easily browse through photos. MSI YouPaint allows user to create virtual paintings on the All-in-One PC to become the next Picasso.

MSI recommends Windows® 7.

## Convenient POS system connectivity

MSI AP2000 is compatible with most POS system requirements. For example barcode readers, credit card readers and slip printers can easily be connected to this All-in-One PC thanks to the two COM ports provided.

## WindBox Desktop PC

---

*If you are seeking for a small tower PC which saves more space and power, MSI Wind Box series is the perfect choice for you. It combines spacesaving with high performance. Great for example for watching Full-HD movies in your living room. With a HDMI output and a high-end audio solution it generates my home into a movie theater.*

*MSI Wind Box series, a great value with excellent entertainment experience.*

---

Steven Yang – MSI Product Manager

## Convenient and compact design

Thanks to its compact design, the MSI Wind Nettop PC's are suitable for every environment. You can practically put it anywhere, on the table, on the bookshelf or next to the television where they match your home decoration.

Look for  
Intel  
Inside®

## Silent and low power consumption

Enjoy a silent environment with the MSI Wind Box series. Next to the low noise design, these devices are very energy efficient, creating the most comfortable environment.

## Full I/O connectivity

Even with the space saving design, these models can easily be attached to larger screens. Movies can be watched in a Full-HD resolution thanks to the HDMI out. Next to this, all models are equipped with a card-reader, USB ports and a VGA / DVI port for easy connecting other devices or for transferring files. Altogether, this makes MSI Wind Box series ideal for transferring files and/or watching movies for every living environment.
