Introduction

Introduction to the PlasmaSync 42VP4, 42VP4D Plasma Monitor

NEC's PlasmaSyncTM is a seamless blend of cutting-edge visual technology and sophisticated design. At 42 inches, with a 16:9 aspect ratio, the PlasmaSyncTM certainly makes a big impression. However, at a mere 89 mm thin, the monitor's sleek techno-art lines blend in well with your environment. PlasmaSync's crisp, vivid image quality will transform data from any graphic medium from PCs to DVD players- into art. NEC has made sure that a host of multimedia resources can be easily connected and displayed as brilliantly as intended on the PlasmaSyncTM monitor.

The features you'll enjoy include:

- 42 inch screen
- 16:9 aspect ratio
- Capsulated Color Filter (CCF) and black matrix
- The enhanced display in red uses a two-stage filtering system where AccucrimsonTM is combined with our special CCF.
- 42VP4: Installed AR (Anti-Reflection) Filter 42VP4D: Installed AG (Anti-Glare) Filter
- 42VP4, 42VP4D: 3.5 inch / 89 mm thin
- 42VP4, 42VP4D: 62.8 lbs/ 28.5 kg light
- 42VP4, 42VP4D: 853×480 pixels
- Flicker and warp free display provides excellent image geometry even in screen corners
- Not affected by magnetic fields, no color drift or edge distortion.
- VGA, SVGA, XGA, SXGA, UXGA computer signal compatibility
- NTSC, PAL, SECAM, composite and S-Video signal compatibility
- 480P, 1080I, 720P and HDTV signal compatibility
- PCs, VCRs, Laser Disc and DVD player source compatibility
- AccuBlend scan conversion automatically converts SVGA, XGA, SXGA and UXGA signals to the panel's native resolution
- Advanced Mass Area Sampling Progressive Scan method is employed.
- RGB (3*), Video (3), DVD/HD (2*), Audio input (3), External Control input (1)
- AccuColor control system provides user selectable onscreen color temperature settings
- New Drive Technology
- Component video input terminal for DVD, 15.75kHz (Y, CB, CR)
- Digital broadcasting source compatibility
- OSM menu-driven on screen control system that makes image adjustments a snap
- Seven languages (English, German, French, Italian, Spanish, Swedish, and Chinese)
- * You can set the 5BNC input to be used as an RGB or component input. When the 5BNC input is set for RGB, there are a total of three RGB inputs; when the 5BNC input is set for component there are a total of two DVD/HD inputs (see page 24).

Contents of the Package

- Plasma monitor
- Power cord
- Remote control with two AAA Batteries
- User's manual
- □ Safety metal fittings*
- □ Screws for safety metal fittings*
- \Box Ferrite core (small \times 2, large \times 2), bands
- Cable clamps
- * These are fittings for fastening the unit to a wall to prevent tipping due to external shock when using the stand (optional). Fasten the safety fittings to the holes in the back of the monitor using the safety fitting mount screws.

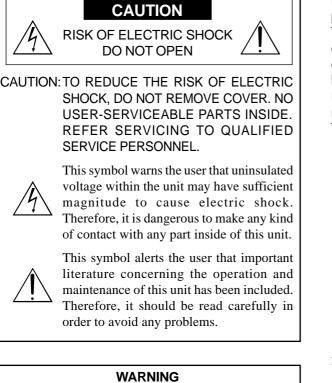

Options

- Wall mount unit
- Ceiling mount unit
- Tilt mount unit
- Stand
- Attachable speakers

Important Information

Precautions

Please read this manual carefully before using your plasma monitor and keep the manual handy for future reference.

TO PREVENT FIRE OR SHOCK HAZARDS, DO NOT EXPOSE THIS UNIT TO RAIN OR MOISTURE. ALSO DO NOT USE THIS UNIT'S POLARIZED PLUG WITHAN EXTENSION CORD RECEPTACLE OR OTHER OUTLETS, UNLESS THE PRONGS CAN BE FULLY INSERTED. REFRAIN FROM OPENING THE CABINET AS THERE ARE HIGH-VOLTAGE COMPONENTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

Warning

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Warnings and Safety Precaution

This plasma monitor is designed and manufactured to provide long, trouble-free service. No maintenance other than cleaning is required. Please see the section "Plasma monitor cleaning procedure" on the next page.

The plasma display panel consists of fine picture elements (cells) with more than 99.99 percent active cells. There may be some cells that do not produce light or remain lit.

For operating safety and to avoid damage to the unit, read carefully and observe the following instructions. To avoid shock and fire hazards:

1. Provide adequate space for ventilation to avoid internal heat build-up. Do not cover rear vents or install the unit in a closed cabinet or shelves.

If you install the unit in an enclosure, make sure there is adequate space at the top of the unit to allow hot air to rise and escape. If the monitor becomes too hot, the overheat protector will be activated and the monitor will be turned off. If this happens, turn off the power to the monitor and unplug the power cord. If the room where the monitor is installed is particularly hot, move the monitor to a cooler location, and wait for 60 minutes to cool the monitor. If the problem persists, contact your dealer for service.

- 2. Do not use this unit's polarized plug with extension cords or outlets unless the prongs can be completely inserted.
- 3. Do not expose the unit to water or moisture.
- 4. Avoid damage to the power cord, and do not attempt to modify the power cord.
- 5. Unplug the power cord during electrical storms or if the unit will not be used over a long period.
- 6. Do not open the cabinet which has potentially dangerous high voltage components inside. If the unit is damaged in this way the warranty will be void. Moreover, there is a serious risk of electric shock.
- 7. Do not attempt to service or repair the unit. The manufacturer is not liable for any bodily harm or damage caused if unqualified persons attempt service or open the back cover. Refer all service to authorized Service Centers.

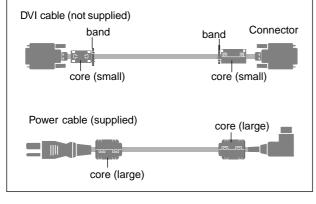

NOTE:

When you connect a computer to this monitor, use an RGB cable including the ferrite core on both ends of the cable. And regarding DVI and power cable, attach the supplied ferrite cores. If you do not do this, this monitor will not conform to mandatory FCC standards.

Attaching the ferrite cores:

Set the ferrite cores on both ends of the DVI cable (not supplied), and both ends of the power cable (supplied). Close the lid tightly until the clamps click.

Use the band to fasten the ferrite core (supplied) to the DVI cable.

To avoid damage and prolong operating life:

- 1. Use only with 120V 50/60Hz AC power supply. Continued operation at line voltages greater than 120 Volts AC will shorten the life of the unit, and might even cause a fire hazard.
- 2. Handle the unit carefully when installing it and do not drop.
- 3. Set the unit away from heat, excessive dust, and direct sunlight.
- 4. Protect the inside of the unit from liquids and small metal objects. In case of accident, unplug the power cord and have it serviced by an authorized Service Center.
- 5. Do not hit or scratch the panel surface as this causes flaws on the surface of the screen.
- 6. For correct installation and mounting it is strongly recommended to use a trained, authorized dealer.
- 7. As is the case with any phosphor-based display (like a CRT monitor, for example) light output will gradually decrease over the life of a Plasma Display Panel.
- 8. To avoid sulfurization it is strongly recommended not to place the unit in a dressing room in a public bath or hot spring bath.

Plasma monitor cleaning procedure:

- 1. Use a soft dry cloth to clean the front panel and bezel area. Never use solvents such as alcohol or thinner to clean these surfaces.
- 2. Clean plasma ventilation areas with a vacuum cleaner with a soft brush nozzle attachment.
- 3. To ensure proper ventilation, cleaning of the ventilation areas must be carried out monthly. More frequent cleaning may be necessary depending on the environment in which the plasma monitor is installed.

Recommendations to avoid or minimize phosphor burn-in: Like all phosphor-based display devices and all other gas plasma displays, plasma monitors can be susceptible to phosphor burn under certain circumstances. Certain operating conditions, such as the continuous display of a static image over a prolonged period of time, can result in phosphor burn if proper precautions are not taken. To protect your investment in this plasma monitor, please adhere to the following guidelines and recommendations for minimizing the occurrence of image burn:

- * Always enable and use your computer's screen saver function during use with a computer input source.
- * Display a moving image whenever possible.
- * Change the position of the menu display from time to time.
- * Always power down the monitor when you are finished using it.

If the plasma monitor is in long term use or continuous operation take the following measures to reduce the likelihood of phosphor burn:

- * Lower the Brightness and Contrast levels as much as possible without impairing image readability.
- * Display an image with many colors and color gradations (i.e. photographic or photo-realistic images).
- * Create image content with minimal contrast between light and dark areas, for example white characters on black backgrounds. Use complementary or pastel color whenever possible.
- * Avoid displaying images with few colors and distinct, sharply defined borders between colors.

* **Note:** Burn-in is not covered by the warranty.

Contact your dealer for other recommended procedures that will best suit your particular application needs.

Recommandations importantes

Précautions

Veuillez lire avec attention ce manuel avant d'utiliser le moniteur à plasma et le conserver accessible pour s'y référer ultérieurement.

AVERTISSEMENT

AFIN DE REDUIRE LES RISQUES D'INCENDIE OU D'ELECTROCUTION, NE PAS EXPOSER CET APPAREIL A LA PLUIE OU A L'HUMIDITE. AUSSI, NE PAS UTILISER LA FICHE POLARISEE AVEC UN PROLONGATEUR OU UNE AUTRE PRISE DE COURANT SAUF SI CES LAMES PEUVENT ETRE INSEREES A FOND. NE PAS OUVRIR LE COFFRET, DES COMPOSANTS HAUTE TENSION SE TROUVENT A L'INTERIEUR. LAISSER A UN PERSONNEL QUALIFIE LE SOIN DE REPARER CET APPAREIL.

DOC avis de conformation

Cet appareil numérigue de la classe A respecte toutes les exigences du Réglement sur le Matériel Brouilleur du Canada.

Mises en garde et précautions de sécurité

Ce moniteur à plasma a été conçu et fabriqué pour une utilisation fiable et durable. Il ne nécessite aucun entretien en dehors du nettoyage. Voir la section "Méthode de nettoyage du moniteur à plasma" plus loin. Le panneau à affichage plasma est constitué de fines particules d'images (cellules) dont plus de 99,99% sont actives. Certaines d'entre elles ne produisent pas de lumière ou restent allumées.

Pour des raisons de sécurité et pour éviter d'endommager l'appareil, lire attentivement les instructions suivantes.

Pour éviter les risques d'éléctrocution et d'incendie:

1. Laisser suffisament d'espace autour de l'appareil pour la ventilation et éviter toute augmentation excessive de la température interne. Ne pas couvrir les évents ou l'installer dans un endroit trop exigu.

Si vous installez l'appareil dans un espace clos, assurezvous qu'il y ait suffisamment d'espace au dessus pour permettre à l'air chaud de s'élever et de s'évacuer. Si la température du moniteur devient excessive, la protection contre les surchauffes entrera en action et coupera l'alimentation. Dans ce cas, éteindre l'appareil et débrancher le câble d'alimentation. Si la température de la pièce dans laquelle se trouve le moniteur est particulièrement élevée, déplacer celui-ci dans un endroit plus frais et attendre environ 60 minutes qu'il refroidisse. Si le problème persiste, prendre contact avec votre revendeur.

- 2. Ne pas raccorder la prise d'alimentation polarisée de ce périphérique à une rallonge ou une prise murale si les fiches ne peuvent pas être complètement insérées.
- 3. Ne pas exposer à L'eau ou à l'humidité.
- 4. Eviter d'endommager le cordon d'alimentation, et ne pas modifier le cordon d'alimentation.
- 5. Débrancher le câble d'alimentation électrique pendant les orages ou les longues périodes d'inactivité.
- 6. Ne pas ouvrir le coffret. Des composants de haute tension se trouvent à l'intérieur. Si l'appareil est endommagé de cette manière, la garantie devient caduque. De plus, il y a risque d'électrocution.
- 7. Ne pas essayer d'intervenir ou de réparer l'appareil. Le fabricant décline toute responsabilité en cas de blessure corporelle ou de dégâts matériels résultant d'une opération d'entretien quelconque effectuée par des personnes non qualifiées ou résultant de l'ouverture du couvercle arrière. S'adresser aux services après-vente autorisés.

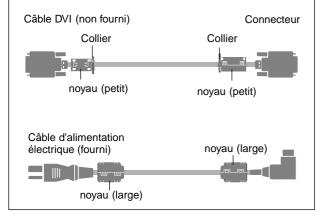

REMARQUE:

Pour raccorder un ordinateur à ce moniteur, procéder à l'aide d'un câble RGB à âme de ferrite aux deux extrémités. Sur les câbles DVI et les câbles d'alimentation électrique, fixer les âmes de ferrite fournies aux extrémités. Si vous ne le faîtes, le moniteur ne sera pas en conformité avec les exigences des standards FCC. Fixation des noyaux en ferrite.

Monter les tores en ferrite aux deux extrêmités du câble DVI (non fourni) et aux deux extrêmités du câble d'alimentation électrique (fourni).

Fermez doucement le couvercle jusqu'à ce que les crans se clipsent.

Fixer le tore en ferrite (fourni) au câble DVI à l'aide d'un collier.

Pour éviter des dommages et prolonger la durée de service de l'appareil:

- N'utiliser qu'une source d'alimentation de 120 V 50/ 60 Hz CA. Le fait d'utiliser l'appareil en continu à des tensions de ligne supérieures à 120 Volts CA réduit sa durée de vie et risque de provoquer un incendie.
- 2. Manipuler l'appareil avec soin pendant son déplacement et ne pas le faire tomber.
- 3. Eloigner l'appareil des endroits chauds, très poussiéreux et exposés en plein soleil.
- 4. Eviter que des liquides et des petits objets métalliques pénètrent à l'intérieur de l'appareil. En cas d'incident de ce genre, débrancher le câble d'alimentation électrique et confier le moniteur à un service après-vente agréé.
- 5. Ne pas frapper ou rayer la surface de la écran plasma, car des défauts risquent de se produire sur la surface de la écran plasma.
- 6. Pour un montage et une installation correcte, il est fortement recommandé de faire appel à un revendeur agréé et qualifié.
- 7. Comme c'est le cas pour tout affichage à base de phosphore (comme un moniteur CRT, par exemple), la puissance de lumière baisse graduellement au cours de la vie du Panneau d'Affichage à Plasma.
- 8. Pour éviter tout risque de sulfuration, il est fortement conseillé de ne pas installer l'appareil dans un vestiaire, un bain public ou un bain de source thermale.

Méthode de nettoyage du moniteur à plasma:

- Nettoyer le panneau avant et le cadre en procédant à l'aide d'un chiffon doux et sec. Ne jamais utiliser de solvents du type alcool ou diluant pour le nettoyage de ces surfaces.
- 2. Nettoyer les prises d'aération du plasma en procédant à l'aide d'une brosse à poils doux fixée à un aspirateur.
- 3. Pour garantir la bonne ventilation du moniteur, nettoyer les prises d'air tous les mois. Un nettoyage plus fréquent peut s'avérer nécessaire selon les conditions environnantes dans lesquelles le moniteur à plasma est utilisé.

Pour éviter les risques de brûlage du luminophore, les mesures suivantes sont recommandées:

Comme tous les périphériques d'affichage à base luminophore et tous les autres affichages gaz plasma, les moniteurs plasma peuvent être sujets au brûlage du luminophore dans certaines circonstances. Certaines conditions d'utilisation, telles que l'affichage continu d'une image statique pour une durée prolongée, peuvent causer le brûlage du luminophore si aucune précaution n'est prise. Pour protéger votre investissement dans ce moniteur à plasma, veuillez suivre les directives et les conseils suivantes pour minimiser l'occurence le marquage de l'écran:

- Assurez-vous de mettre en marche et d'utliser l'économisateur d'écran chaque fois que c'est possible lorsque vous l'utilisez avec une source d'entrée d'ordinateur.
- Affichez une image en mouvement aussi souvent que possible.
- Changer la position de l'affichage de menu de temps à autre.
- Coupez toujours l'alimentation lorsque vous avez terminé d'utiliser la moniteur.

Si le moniteur est en usage continu ou longue durée, prenez les mesures suivantes afin d'éviter l'occurence le brûlage du luminophore:

- Abaissez le niveau de l'image (contraste, luminosité) autant que possible, sans faire perdre la lisibilité de l'image.
- Affichez une image avec de nombreuses couleurs et graduations de couleur (par ex. des images photographiques ou photo-réalistes).
- Créez un contenu d'image avec un contraste minimal entre les zones sombres et les zones claires, par exemple, des caractères blancs sur un fond noir. Utilisez des couleurs complémentaires ou pastels le plus souvent possible.
- Évitez d'afficher des images avec peu de couleurs et des limites nettes et clairement définies entre les couleurs.

* **Remarque:** Le brûlage de l'écran n'est pas couvert par la garantie.

Contactez un revendeur agréé ou un revendeur de marque pour d'autres procédures qui conviendront le mieux à vos besoins particuliers.

How to Attach Options to the Plasma Monitor

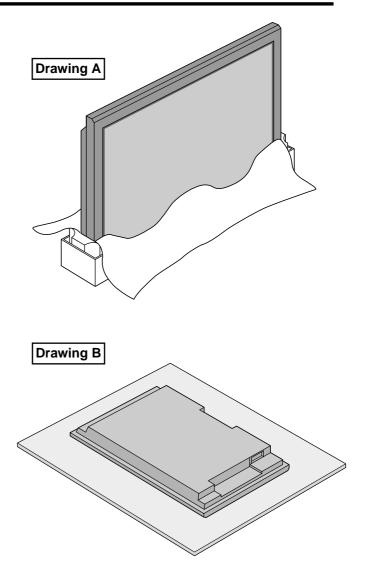

You can attach your optional mounts or stand to the plasma monitor in one of the following two ways:

- * While it is upright. (See Drawing A)
- * As it is laid down with the screen face down (See Drawing B). Lay the protective sheet, which was wrapped around the monitor when it was packaged, beneath the screen surface so as not to scratch the screen face.
- * Do not touch or hold the screen face when carrying the unit.
 - This device cannot be installed on its own. Be sure to use a stand or original mounting unit. (Wall mount unit, Stand, etc.)
 - * See the inside of the cover page.
 - For correct installation and mounting it is strongly recommended to use a trained, authorized dealer.

Failure to follow correct mounting procedures could result in damage to the equipment or injury to the installer.

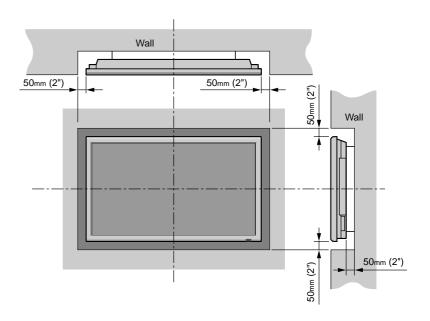

Product warranty does not cover damage caused by improper installation.

* Use only the mounting kit or stand provided by manufacturer and listed under Options.

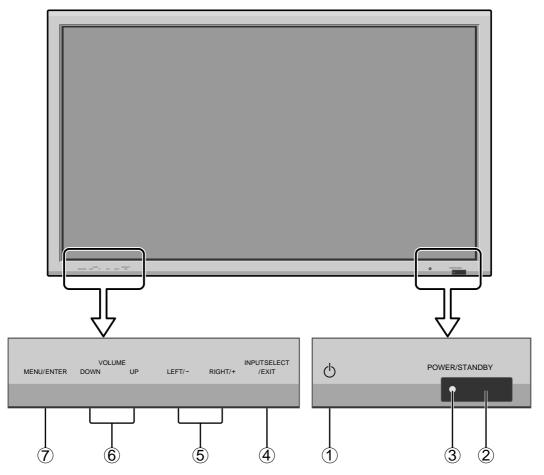

Ventilation Requirements for enclosure mounting

To allow heat to disperse, leave space between surrounding objects as shown on the diagram below when installing.

Part Names and Function

Front View

1) Power

Turns the monitor's power on and off.

2 Remote sensor window

Receives the signals from the remote control.

③ POWER/STANDBY indicator

When the power is on Lights green. When the power is in the standby mode ... Lights red.

(4) INPUT SELECT / EXIT

Switches the input, in the following order. The available inputs depend on the setting of "BNC INPUT".

 $RGB: \xrightarrow{\quad \forall \text{VIDEO1} \rightarrow \text{VIDEO2} \rightarrow \text{VIDEO3} \rightarrow \text{HD/DVD/DTV}}_{\text{RGB/PC3} \leftarrow \text{RGB/PC2} \leftarrow \text{RGB/PC1} \leftarrow \text{CONSTRUCT}}$

 $COMP:: \begin{array}{c} \label{eq:compara} \text{VIDEO1} \rightarrow \text{VIDEO2} \rightarrow \text{VIDEO3} \rightarrow \text{HD1/DVD1/DTV1} \\ \label{eq:compara} \text{RGB/PC2} \leftarrow \text{RGB/PC1} \leftarrow \text{HD2/DVD2/DTV2} \leftarrow ----- \end{array}$

Functions as the EXIT buttons in the On-Screen Menu (OSM) mode.

(5) LEFT/- and RIGHT/+

Enlarges or reduces the image. Functions as the CURSOR $(\blacktriangleleft / \blacktriangleright)$ buttons in the On-Screen Menu (OSM) mode.

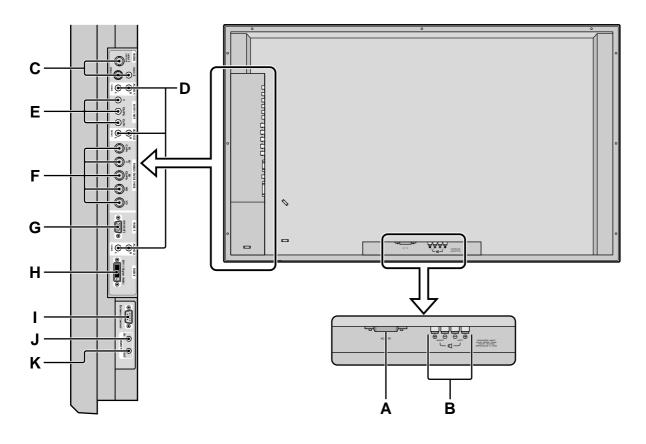

(6) VOLUME DOWN and UP

Adjusts the volume. Functions as the CURSOR (▲/ ▼) buttons in the On-Screen Menu (OSM) mode.

⑦ MENU/ENTER

Sets the On-Screen Menu (OSM) mode and displays the main menu.

Rear View/ Terminal Board

A AC IN

Connect the included power cord here.

В

Connect speakers (optional) here. Maintain the correct polarity.

Please refer to your speaker's owner's manual.

C VIDEO1, 2, 3 (BNC, RCA, S-Video)

Connect VCR's, DVD's or Video Cameras, etc. here. VIDEO1 can be used for Input or Output (see page 10).

D AUDIO1, AUDIO2, AUDIO3

These are audio input terminals. The input is selectable. Set which video image to allot them from the audio menu screen.

E DVD1/HD1

Connect DVD's, High Definition or Laser Discs, etc. here.

F RGB2/ DVD2/ HD2

RGB2:You can connect an analog RGB signal
and the syncronization signal.

DVD2/ HD2: You can connect DVDs, High Definition sources, Laser Discs, etc. here. This input can be set for use with an RGB or component source. (see page 24)

G RGB1 (mini D-Sub 15pin)

Connect an analog RGB signal from a computer, etc. here. This input can be used for Input or Output. (see page 10)

H RGB3 (DVI 24pin)

Connect a digital signal (TMDS) from a source with a DVI output. (see page 8)

I EXTERNAL CONTROL

This terminal is used when operating and controlling the monitor externally (by external control).

J REMOTE IN

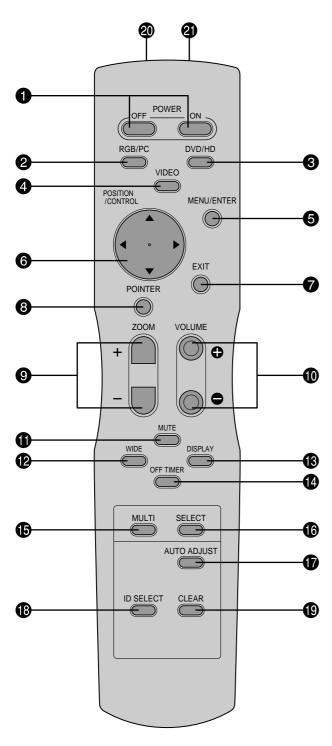

Connect the remote cable* to the remote control's remote jack to obtain wired remote control.

K REMOTE OUT

Connect the remote cable* to the REMOTE IN jack of the other display monitor to obtain wired remote control.

* The 1/8 Stereo Mini cable must be purchased separately.

Remote Control

1 POWER ON/OFF

Switches Power ON/OFF. (This does not operate when POWER/STANDBY

indicator of the main unit is off.)

2 RGB/PC

Press this button to select RGB/PC as the source. The available sources depend on the setting of "BNC INPUT".

 $COMP.: \quad \ \ \square \rightarrow \mathsf{RGB/PC1} \rightarrow \mathsf{RGB/PC3} -$

RGB/PC can also be selected using the INPUT SELECT button on the monitor.

3 DVD / HD

Press this button to select DVD/HD as the source. The available sources depend on the setting of "BNC INPUT".

RGB: HD/DVD/DTV

DVD/HD can also be selected using the INPUT SELECT button on the monitor.

4 VIDEO

Press this button to select VIDEO as the source.

 \rightarrow VIDEO1 \rightarrow VIDEO2 \rightarrow VIDEO3 -

VIDEO can also be selected using the INPUT SELECT button on the monitor.

6 MENU/ENTER

Press this button to access the OSM controls. Press this button during the display of the main menu to go to the sub menu.

6 CURSOR $(\blacktriangle / \blacktriangledown / \blacklozenge / \leftthreetimes)$

Use these buttons to select items or settings and to adjust settings or switch the display patterns.

7 EXIT

Press this button to exit the OSM controls in the main menu. Press this button during the display of the sub menu to return to the previous menu.

8 POINTER

Press this button to display the pointer.

9 ZOOM (+ /-)

Enlarges or reduces the image.

• VOLUME (+ /-)

Adjusts the audio volume.

1 MUTE

Mutes the sound.

WIDE

Automatically detects the signal and sets the aspect ratio. Wide button is not active for all signals.

B DISPLAY

Displays the source settings on the screen.

1 OFF TIMER

Activates the off timer for the unit.

b MULTI

Not functional for the models covered in this manual.

6 SELECT

Not functional for the models covered in this manual.

D AUTO ADJUST

Press this button to adjust Fine Picture, Picture ADJ, Position, and Contrast automatically, or to switch the screen size to ZOOM mode automatically with the superimposed caption displayed fully only when the picture contains dark areas above and below the picture.

1 ID SELECT

Set the ID number in the remote control. The remote control can then be used only for a display with the same ID number. When several displays are used together they can be controlled individually.

(P) CLEAR

Clears the number set by the ID SELECT button.

@ Remote control signal transmitter

Transmits the remote control signals.

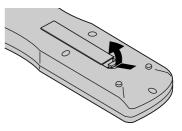

(2) Remote Jack

Insert the plug of the remote cable (The 1/8 Stereo Mini cable) here when using the supplied remote control in the wired condition.

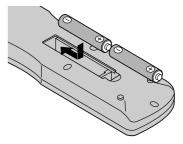

Battery Installation and Replacement

Insert the 2 "AAA" batteries, making sure to set them in with the proper polarity.

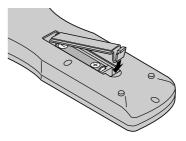

1. Press and open the cover.

2. Align the batteries according to the (+) and (-) indication inside the case.

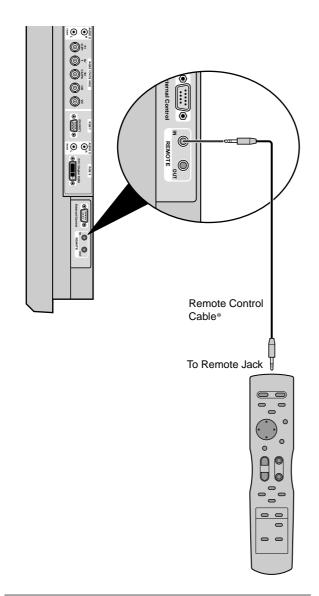

3.Replace the cover.

Using the wired remote control mode

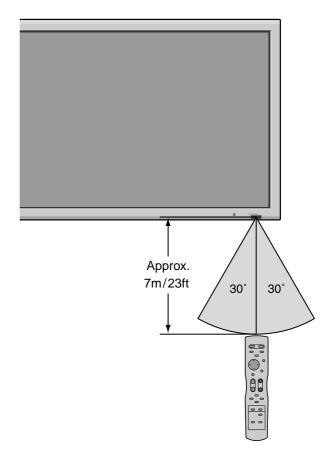

Connect the remote cable* to the remote control's remote jack and the "REMOTE IN" terminal on the monitor. When the cable is connected, the mode automatically switches to wired remote control. When the wired remote control mode is used, the remote control can be operated even if no batteries are loaded.

* The 1/8 Stereo Mini cable must be purchased separately.

Operating Range

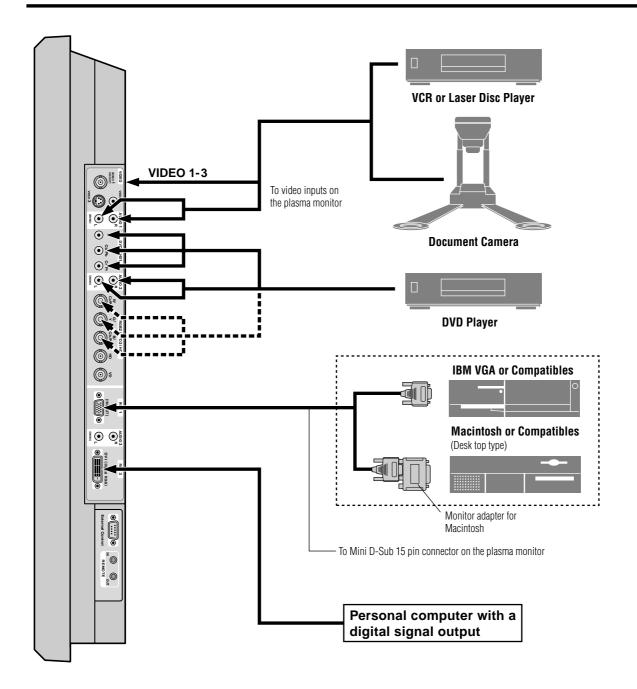

- * Use the remote control within a distance of about 7 m/ 23ft. from the front of the monitor's remote control sensor and at horizontal and vertical angles of up to approximately 30°.
- * The remote control operation may not function if the monitor's remote control sensor is exposed to direct sunlight or strong artificial light, or if there is an obstacle between the sensor and the remote control.

Handling the remote control

- Do not drop or mishandle the remote control.
- Do not get the remote control wet. If the remote control gets wet, wipe it dry immediately.
- Avoid heat and humidity.
- When not using the remote control for a long period, remove the batteries.
- · Do not use new and old batteries together, or use different types together.
- Do not take apart the batteries, heat them, or throw them into a fire.
- When using the remote control in the wireless condition, be sure to unplug the remote cable from the REMOTE IN terminal on the monitor.

Installation

Connecting Your PC or Macintosh Computer

Connecting your PC or Macintosh computer to your plasma monitor will enable you to display your computer's screen image for an impressive presentation. The plasma monitor supports the signals described on page 41.

To connect a PC, Macintosh or compatible graphics adapter, simply:

- 1. Turn off the power to your plasma monitor and computer.
- 2. If your PC does not support SXGA/XGA/SVGA/VGA you will need to install an SXGA/XGA/SVGA/VGA graphics board. Consult your computer's owner's manual for your SXGA/XGA/SVGA/VGA configuration. If you need to install a new board, see the manual that comes with your new graphics board for installation instructions.
- 3. This plasma monitor provides signal compatibility up to VESA 1600×1200 (UXGA). However, it is not recommended to use this resolution due to image readability on the monitor's native pixel resolution panel.
- 4. Use the signal cable to connect your PC or Macintosh computer to the plasma monitor. For Macintosh, use the monitor adapter to connect to your computer's video port, if necessary.
- 5. Turn on the plasma monitor and the computer.
- 6. If the plasma monitor goes blank after a period of inactivity, it may be caused by a screen saver installed on the computer you've connected to the plasma monitor.

When using a Macintosh with the plasma monitor, the following four display standards are supported using the Macintosh adapter :

- 13" fixed mode
- 16" fixed mode
- 19" fixed mode
- 21" fixed mode

The 13" fixed mode is recommended for your 42Wide VGA.

Connections with Equipment that have a Digital Interface

Connections can be made with equipment that is equipped with a digital interface compliant with the DVI (Digital Visual Interface) standard.

* Use a DVI 24-pin signal cable and the ferrite cores (supplied) when making connections to the RGB3 (DVI) connector of the main unit.

Note that the RGB3 (DVI) terminal does not support analog RGB input source.

Note:

- 1. Input TMDS signals conforming to DVI standards. The TMDS input corresponds to 1 link.
- 2. To maintain display quality, use a cable with a quality prescribed by DVI standards that is within 5 meters in length.

Connecting Your Document Camera

You can connect your plasma monitor to a document camera. To do so, simply:

- 1. Turn off the power to your plasma monitor and document camera.
- 2. Use a standard video cable to connect your document camera to the Video input on your plasma monitor.
- 3. Turn on the plasma monitor and the document camera.

Note: Refer to your document camera owner's manual for more information about your camera's video output requirements.

Connecting Your VCR or Laser Disc Player

Use common RCA cables (not provided) to connect your VCR or laser disc player to your plasma monitor. To make these connections, simply:

- 1. Turn off the power to your plasma monitor and VCR or laser disc player.
- 2. Connect one end of your RCA cable to the video output connector on the back of your VCR or laser disc player, connect the other end to the Video input on your plasma monitor. Use standard RCA audio patch cords to connect the audio from your VCR or laser disc player to your plasma monitor (if your VCR or laser disc player has this capability). Be careful to keep your right and left channel connections correct for stereo sound.
- 3. Turn on the plasma monitor and the VCR or laser disc player.

Note: Refer to your VCR or laser disc player owner's manual for more information about your equipment's video output requirements.

Connecting Your DVD Player

You can connect your plasma monitor to a DVD player. To do so, simply:

- 1. Turn off the power to your plasma monitor and DVD player.
- 2. Use a component video cable to connect your DVD player to the Y, Cb, and Cr inputs on your plasma monitor.

Or use the DVD-player's S-Video output. Use a standard S-Video cable to connect to the S-Video input on the plasma monitor.

3. Turn on the plasma monitor and the DVD player.

Creating a video wall

With buit-in matrix display capability, you can create a 2×2 or 3×3 video wall.

• Connect signal cables and remote cables as shown below.

Note:

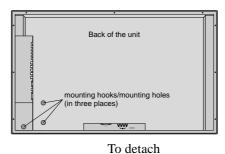

- 1. The VIDEO1 and RGB1 terminals can be used for either INPUT or OUTPUT. When LOOP OUT is ON, do not connect an OUTPUT signal from another unit, that will place an extraordinary load on the other unit and may damage it.
- 2. LOOP OUT can not be turned ON while signals are input to RGB1 terminal.
- 3. LOOP OUT can be turned ON while signals are input to RGB1 terminal if the POWER is switched ON.

Information

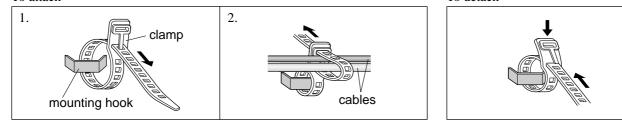

- To loop signals out to another plasma display, set the LOOP OUT to ON.
- To create a video wall, set the VIDEO WALL menu items properly.
- To connect monitors, please use a 1~2m (3.3~6.6 feet) BNC cable (any commercially available cable).
- If the image quality is poor, do not use the monitor's out terminal. Use a distribution amplifier (any commercially available distribution amplifier) to connect the split signals to the respective monitor INPUT terminals.
- Being used as a video wall function, maximaly 4-screen is rough-standard with lower than 1024×768 , 60Hz signal.
- A distribution amplifier is particularly recommended when using a 9-screen video wall.
- From the second monitor onward, connections require a BNC-RCA conversion cable or connector, a mini D-Sub 15 pin cable-BNC (×5) cable or a conversion connector.

Cable Management

Using the cable-clamps provided with the plasma display, bundle at the back of the unit the signal and audio cables connected to the display.

To attach

Basic Operations

POWER

To turn the unit ON and OFF:

- 1. Plug the power cord into an active AC power outlet.
- 2. Press the POWER ON button (on the remote control or control panel) to turn on the unit.

The monitor's POWER/STANDBY indicator will light up (green) when the unit is on.

3. Press the POWER OFF button (on the remote control or control panel) to turn off the unit.

The monitor's POWER/STANDBY indicator turns red and the standby mode is set (only when turning off the unit with the remote control).

VOLUME

To adjust the sound volume:

- 1. Press and hold the VOLUME ⊕ button (on the remote control or the unit) to increase to the desired level.
- 2. Press and hold the VOLUME ⊖ button (on the remote control or the unit) to decrease to the desired level.

MUTE

To cancel the sound:

Press the MUTE button on the remote control to cancel the sound; press again to restore.

DISPLAY

To check the settings:

- 1. The screen changes each time the DISPLAY button is pressed.
- 2. If the button is not pressed for approximately three seconds, the menu turns off.

DIGITAL ZOOM

Digital zoom specifies the picture position and enlarges the picture.

1. Press the POINTER button to display the pointer. ()

To change the size of the picture:

Press the ZOOM+ button and enlarge the picture. The pointer will change to resemble a magnifying glass. (\mathbb{Q})

A press of the ZOOM- button will reduce the picture and return it to its original size.

To change the picture position:

Select the position with the $\blacktriangle \lor \blacklozenge \lor$ buttons.

2. Press the POINTER button to delete the pointer.

AUTO ADJUST

To adjust the size or quality of the picture automatically:

Press the AUTO ADJUST button.

Information

AUTO ADJUST ON setting

When RGB (still picture) input is selected Fine Picture, Picture ADJ, Position, and Contrast will be adjusted

automatically.

When RGB (motion picture),

VIDEO, or Y/Pb/Pr (component) input

is selected The screen size switches to ZOOM mode automatically with the superimposed caption displayed fully only when the picture contains dark areas above and below the picture.

OFF TIMER

To set the off timer:

The off timer can be set to turn the power off after 30, 60, 90 or 120 minutes.

- 1. Press the OFF TIMER button to start the timer at 30 minutes.
- 2. Press the OFF TIMER button to the desired time.
- 3. The timer starts when the menu turns off.

 $\rightarrow 30 \rightarrow 60 \rightarrow 90 \rightarrow 120 \rightarrow 0$

To cancel the off timer:

- 1. Press the OFF TIMER button twice in a row.
- 2. The off timer is canceled.

OFF TIMER 0

Note:

After the power is turned off with the off timer ... A slight current is still supplied to the monitor. When you are leaving the room or do not plan to use the system for a long period of time, turn off the power of the monitor.

To check the remaining time:

- 1. Once the off timer has been set, press the OFF TIMER button once.
- 2. The remaining time is displayed, then turns off after a few seconds.
- 3. When five minutes remain the remaining time appears until it reaches zero.

WIDE Operations

Wide Screen Operation (manual)

With this function, you can select one of five screen sizes.

When viewing videos or digital video discs

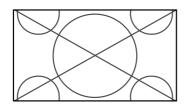

- 1. Press the WIDE button on the remote control.
- 2. Within 3 seconds ...

Press the WIDE button again.

The screen size switches as follows:

ightarrow ZOOM ightarrow NORMAL ightarrow FULL ightarrow STADIUM ightarrow 14:9 —

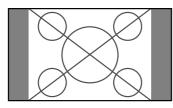

ZOOM size screen

The picture is expanded in the horizontal and vertical direction, maintaining the original proportions.

* Use this for theater size (wide) movies, etc.

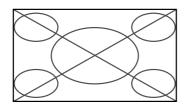

NORMAL size screen (4:3)

The normal size screen is displayed.

* The picture has the same size as video pictures with a 4 : 3 aspect ratio.

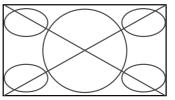

FULL size screen

The image is expanded in the horizontal direction.

* Images compressed in the horizontal direction ("squeezed images") are expanded in the horizontal direction and displayed on the entire screen with correct linearity. (Normal images are expanded in the horizontal direction.)

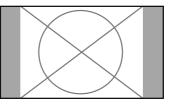

STADIUM size screen

The picture is expanded in the horizontal and vertical directions at different ratios.

* Use this for watching normal video programs (4:3) with a wide screen.

14:9 size screen

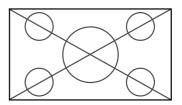

- The image is displayed at a 14:9 aspect ratio.
- * This feature is available when the input signal is video, component or RGB (525P or 625P signal from a scan converter).

When viewing a high definition video source

1. Press the WIDE button on the remote control.

FULL size screen (16:9)

The full size screen is displayed.

* The picture has the same size as video pictures (16:9).

Note: Do not allow the displayed in 4:3 mode for an extended period. This can cause a phosphor burn-in.

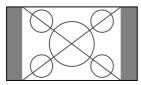

Wide Screen Operation with Computer Signals

Switch to the wide screen mode to expand the 4 : 3 image to fill the entire screen.

- 1. Press the WIDE button on the remote control.
- 2. Within 3 seconds ...

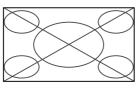

Press the WIDE button again. The screen size switches as follows: \rightarrow NORMAL \rightarrow FULL \rightarrow ZOOM \neg

NORMAL size screen (4:3 or SXGA 5:4)

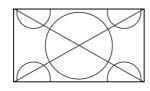

The picture has the same size as the normal computer image.

FULL size screen

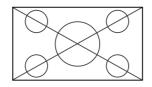

The image is expanded in the horizontal direction.

ZOOM size screen

When wide signals are input.

FULL size screen

Information

Supported resolution

See page 41 for details on the display output of the various VESA signal standards supported by the monitor.

■ When 852 (848) dot \times 480 line wide VGA* signals with a vertical frequency of 60 Hz and horizontal frequency of 31.7 (31.0) kHz are input

Select an appropriate setting for RGB SELECT mode referring to the "Table of Signals Supported" on page 41.

* "IBM PC/AT" and "VGA" are registered trademarks of IBM, Inc. of the United States.

Note: Do not allow the displayed in 4:3 mode for an extended period. This can cause a phosphor burn-in.

OSM(On Screen Menu) Controls

Menu Operations

The OSM window is displayed with respect to the screen as shown on the diagram.

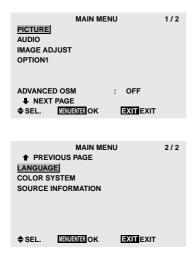

* Depending on the screen's mode, the OSM may be displayed differently.

In the explanation, the OSM section is shown close up.

The following describes how to use the menus and the selected items.

1. Press the MENU/ENTER button on the remote control to display the MAIN MENU.

- 2. Press the cursor buttons $\blacktriangle \nabla$ on the remote control to highlight the menu you wish to enter.
- 3. Press the MENU/ENTER button on the remote control to select a submenu or item.

PIC	CTURE 1/2
CONTRAST	•
BRIGHTNESS	•

♦SEL. ◀►	ADJ.	EXIT RETURN	

3. Use the \blacktriangleleft and \blacktriangleright buttons to adjust the contrast.

- * If neither the ◀or ► button is pressed within 5 seconds, the current setting is set and the previous screen reappears.
- 4. Once the adjustment is completed ...

Press the EXIT button to return to the main menu. To delete the main menu, press the EXIT button once more.

Note: If "CAN NOT ADJUST" appears ... When trying to enter the PICTURE submenu, make sure PICTURE MODE is not set to DEFAULT.

Information

Picture adjustment screen

 CONTRAST Changes the picture's white level.
 BRIGHTNESS .. Changes the picture's black level.
 SHARPNESS .. Changes the picture's sharpness. Adjusts picture detail of VIDEO display.
 COLOR Changes the color density.
 TINT Changes the picture's tint. Adjust for natural colored skin, background, etc.
 ■ Adjusting the computer image
 Only the contrast and brightness can be adjusted when a computer signal is connected.

Restoring the factory default settings

Select "DEFAULT" under the "PICTURE MODE" settings.

Setting the picture mode according to the brightness of the room

There are four picture modes that can be used effectively according to the environment in which you are viewing the display.

Example: Setting the "THEAT. 1" mode

Press the MENU/ENTER button on the remote control to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "PICTURE", then press the MENU/ENTER button. The "PICTURE" screen appears.
- 2. Use the ▲ and ▼ buttons to select "PICTURE MODE".

3. To set to "THEAT. 1" ...

Use the \blacktriangleleft and \blacktriangleright buttons to select "THEAT. 1". The mode switches as follows when the \blacktriangleleft and \triangleright buttons are pressed:

\rightarrow	NORMAL	\leftrightarrow THEAT.	$1 \leftrightarrow$	THEAT.	2 ↔	DEFAUL	Г ←

F	ICTURE MODE	 : THEAT. 1	•

- * If neither the ◀ or ► button is pressed within 5 seconds, the current selection is set and the previous screen reappears.
- 4. Once the adjustment is completed ...
 - Press the EXIT button to return to the main menu. To delete the main menu, press the EXIT button once more.

Information ■ Types of picture modes THEAT. 1, 2..... Set this mode when watching video in a dark room. This mode provides darker, finer pictures, like the screen in movie theaters. For a darker image, select THEAT. 2. NORMAL Set this mode when watching video in a bright room. This mode provides dynamic pictures with distinct differences between light and dark sections. DEFAULT Use this to reset the picture to the factory default settings.

18

Reducing noise in the picture

Use these settings if the picture has noise due to poor reception or when playing video tapes on which the picture quality is poor.

Example: Setting "NR-3"

Press the MENU/ENTER button on the remote control to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "PICTURE", then press the MENU/ENTER button. The "PICTURE" screen appears.
- 2. Use the \blacktriangle and \blacktriangledown buttons to select "NR".

♦SEL. ◀►AD	J. EXIT RETURN

Use the ◀ and ▶ buttons to select "NR-3".
 The mode switches as follows when the ◀ and ▶ buttons are pressed:

 $ightarrow \mathsf{OFF} \leftrightarrow \mathsf{NR-1} \leftrightarrow \mathsf{NR-2} \leftrightarrow \mathsf{NR-3} \leftarrow \mathsf{NR-3}$

- * If neither the ◀ or ► button is pressed within 5 seconds, the current selection is set and the previous screen reappears.
- 4. Once the setting is completed ...

Press the EXIT button to return to the main menu. To delete the main menu, press the EXIT button once more.

Information

NR

- * "NR" stands for Noise Reduction.
- * This function reduces noise in the picture.

Types of noise reduction

There are three types of noise reduction. Each has a different level of noise reduction.

The effect becomes stronger as the number increases (in the order NR-1 \rightarrow NR-2 \rightarrow NR-3).

OFF Turns the noise reduction function off.

Setting the color temperature

Use this procedure to set color tone produced by the plasma display.

Example: Setting "HIGH"

Press the MENU/ENTER button on the remote control to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "PICTURE", then press the MENU/ENTER button. The "PICTURE" screen appears.
- 2. Use the \blacktriangle and \blacktriangledown buttons to select "COLOR TEMP.".
- 3. Use the ◄ and ▶ buttons to select "HIGH". The mode switches as follows when the ◄ and ▶ buttons are pressed:

 $\vdash \mathsf{LOW} \leftrightarrow \mathsf{MID} \ \mathsf{LOW} \leftrightarrow \mathsf{MID} \leftrightarrow \mathsf{HIGH} \leftarrow$

* See below to set "WHITE BALANCE".

- * If neither the ◀ or ► button is pressed within 5 seconds, the current selection is set and the previous screen reappears.
- 4. Once the setting is completed...

Press the EXIT button to return to the main menu. To delete the main menu, press the EXIT button once more.

Information

Setting the color temperature

LOW	Redder
MID LOW	. Slightly redder
	Standard (slightly bluer)
HIGH	Bluer

Restoring the factory default settings

Select "ALL RESET" under the OPTION1 menu. Note that this also restores other settings to the factory defaults.

Adjusting the color to the desired level

Use this procedure to adjust the white balance for each color temperature to achieve the desired color quality.

Example: Adjusting the "GAIN RED" of "HIGH" color temperature

Set "ADVANCED OSM" to "ON" in the main menu (1/2), then perform the following operations.

Press the MENU/ENTER button on the remote control to display the MAIN MENU on the screen, then... Perform Steps 1-3 of COLOR TEMP., then...

4. Press the MENU/ENTER button. The "WHITE BALANCE" screen appears.

5. Use the \blacktriangle and \blacktriangledown buttons to select "GAIN RED".

≜SEL ▲►AD.I	EXIT	

4. Once the setting is completed...

Press the EXIT button to return to the main menu. To delete the main menu, press the EXIT button once more.

Information

LOW TONE settings

- AUTO Will automatically appraise the picture and make adjustments.
- 1Will apply the dither method suitable for still pictures.
- 2Will apply the dither method suitable for motion pictures.
- 3 Will apply the error diffusion method.

Restoring the factory default settings

Select "ALL RESET" under the OPTION1 menu. Note that this also restores other settings to the factory defaults.

Adjusting the colors

Use this procedure to adjust hue and color density for red, green, blue, yellow, magenta and cyan.

Such adjustments will not affect the other colors.

You can accentuate the green color of trees, the blue of the sky, etc.

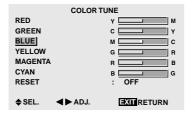

Example: Adjusting the color tune for blue

Set "ADVANCED OSM" to "ON" in the MAIN MENU (1/2), then perform the following operations.

Press the MENU/ENTER button on the remote control to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "PICTURE", then press the MENU/ENTER button. The "PICTURE" screen appears.
- 2. Use the ▲ and ▼ buttons to select "COLOR TUNE", then press the MENU/ENTER button. The "COLOR TUNE" screen appears.
- 3. Use the \blacktriangle and \blacktriangledown buttons to select "BLUE".

4. Adjust using the \triangleleft and \triangleright buttons.

* If neither the ◀or ► button is pressed within 5 seconds, the current selection is set and the previous screen reappears.

To continue making other adjustments... Repeat from step 3.

5. Once the setting is completed...

Press the EXIT button to return to the main menu. To delete the main menu, press the EXIT button once more.

Information

COLOR TUNE settings

RED	Makes red's adjustment

MAGENTA	Makes magenta's adjustment
CYAN	Makes cyan's adjustment
RESET	Resets settings to the factory default
	value. Use \blacktriangleleft and \blacktriangleright buttons to select
	"ON", then press the MENU/ENTER
	button.

Restoring the factory default settings

Select "ALL RESET" under the OPTION1 menu. Note that this also restores other settings to the factory defaults.

Audio Settings Menu

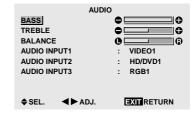

Adjusting the treble, bass and left/right balance and audio input select

The treble, bass and left/right balance can be adjusted to suit your tastes.

Example: Adjusting the bass

Press the MENU/ENTER button on the remote control to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "AUDIO", then press the MENU/ENTER button. The "AUDIO" screen appears.
- To adjust the bass ...
 Use the ▲ and ▼ buttons to select "BASS".
- 3. Adjust the bass using the \triangleleft and \triangleright buttons.

To continue adjusting the audio ... Repeat from step 2.

4. Once the adjustment is completed ...

Press the EXIT button to return to the main menu. To delete the main menu, press the EXIT button once more.

Note : If "CAN NOT ADJUST" appears... Set "AUDIO INPUT" on the AUDIO menu correctly.

Information

Audio settings menu

- BASS Controls the level of low frequency sound.
- TREBLE Controls the level of high frequency sound.
- BALANCE Controls the balance of the left and right channels.

Restoring the factory default settings

Select "ALL RESET" under the OPTION1 menu. Note that this also restores other settings to the factory defaults.

Setting the allocation of the audio connectors

Setting the AUDIO 1, 2, and 3 connectors to the desired input.

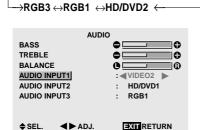

Example: Setting "AUDIO INPUT1" to "VIDEO 2"

Press the MENU/ENTER button on the remote control to display the MAIN MENU on the screen, then...

- 1. Use the \blacktriangle and \checkmark buttons to select "AUDIO", then press the MENU/ENTER button. The "AUDIO" screen appears.
- 2. Use the \blacktriangle and \checkmark buttons to select "AUDIO INPUT1".
- 3. To set the AUDIO INPUT1 to "VIDEO2"... Use the \triangleleft and \triangleright buttons to select "VIDEO2". The mode switches as follows each time the \blacktriangleleft or \blacktriangleright button is pressed:

The available sources depend on the setting of "BNC INPUT".

- \rightarrow VIDEO1 \leftrightarrow VIDEO2 \leftrightarrow VIDEO3 \leftrightarrow HD/DVD1 \leftrightarrow RGB: →RGB3 ↔RGB2 ↔RGB1 ←
- \rightarrow VIDEO1 \leftrightarrow VIDEO2 \leftrightarrow VIDEO3 \leftrightarrow HD/DVD1 \leftrightarrow COMP.:

4. Once the setting is completed...

≜ SEL

Press the EXIT button to return to the main menu. To delete the main menu, press the EXIT button once more

Information

AUDIO INPUT

A single audio input cannot be selected as the audio channel for more than one input terminal.

Restoring the factory default settings

Select "ALL RESET" under the OPTION1 menu. Note that this also restores other settings to the factory defaults.

Image Adjust Settings Menu

Adjusting the Position, Size, Fine Picture, Picture Adj The position of the image can be adjusted and flickering of the image can be corrected.

Example: Adjusting the vertical position in the normal mode

Press the MENU/ENTER button on the remote control to display the MAIN MENU on the screen, then...

1. Use the \blacktriangle and \triangledown buttons to select "IMAGE ADJUST", then press the MENU/ENTER button. The "IMAGE ADJUST" menu appears.

Default settings (when RGB/PC is selected)

Information

RGB SELECT modes

One of these 6 modes must be selected in order to display the following signals correctly.

- AUTO Select the suitable mode for the specifications of input signals as listed in the table "Computer input signals supported by this system" on page 41.
- STILL To display VESA standard signals. (Use this mode for a still image from a computer.)

MOTION...... The video signal (from a scan converter) will be converted to RGB signals to make the picture more easily viewable. (Use this mode for a motion image from a computer.)

- WIDE1..... When an 852 dot \times 480 line signal with a horizontal frequency of 31.7kHz is input, the image may be compressed horizontally. To prevent this, set RGB SELECT to WIDE1.
- WIDE2...... When an 848 dot \times 480 line signal with a horizontal frequency of 31.0 kHz is input, the image may be compressed horizontally. To prevent this, set RGB SELECT to WIDE2.

DTV Set this mode when watching digital broadcasting (480P).

See page 41 for the details of the above settings.

Restoring the factory default settings

Select "ALL RESET" under the OPTION1 menu. Note that this also restores other settings to the factory defaults.

Setting high definition images to the suitable screen size

Use this procedure to set whether the number of vertical lines of the input high definition image is 1035 or 1080.

Example: Setting the "1080B" mode to "1035I"

Press the MENU/ENTER button on the remote control to display the MAIN MENU on the screen, then...

- 1. Use the \blacktriangle and \triangledown buttons to select "OPTION1", then press the MENU/ENTER button. The "OPTION1" screen appears.
- 2. Use the \blacktriangle and \triangledown buttons to select "HD SELECT".
- 3. To set the HD SELECT mode to "1035I" ... Use the \triangleleft and \triangleright buttons to select "1035I". The mode switches as follows each time the \blacktriangleleft or \blacktriangleright button is pressed:

```
ightarrow1080B \leftrightarrow 1035I \leftrightarrow 1080A \epsilon

"SCREEN WIPER" mode starts.
SPEED Set the moving speed for the
"SCREEN WIPER". The speed
decreases as the number increases.
* The "WAITING TIME" can not be set when the
"WORKING TIME" is ON.
* THE "WORKING TIME" and "WAITING TIME" can
be set for up to 12 hours and 45 minutes in units of 3
minutes.

Setting the gray level for the sides of the screen

Use this procedure to set the gray level for the parts on the screen on which nothing is displayed when the screen is set to the 4:3 size.

Example: Adjusting the "GRAY LEVEL"

Set "ADVANCED OSM" to "ON" in the main menu (1/2), then perform the following operations.

Press the MENU/ENTER button on the remote control to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "OPTION2", then press the MENU/ENTER button. The "OPTION2" screen appears.
- 2. Use the \blacktriangle and \blacktriangledown buttons to select "GRAY LEVEL".
- To adjust the "GRAY LEVEL"... Use the ◀ and ▶ buttons to adjust the GRAY LEVEL.

NEXT PAGE	
♦SEL. ◀►ADJ.	EXIT

4. Once the setting is completed ...

Press the EXIT button to return to the main menu. To delete the main menu, press the EXIT button once more.

Information

GRAY LEVEL settings

This adjusts the brightness of the black (the gray level) for the sides of the screen.

The standard is 0 (black). The level can be adjusted from 0 to 15. The factory setting is 3 (dark gray).

Restoring the factory default settings

Select "ALL RESET" under the OPTION1 menu. Note that this also restores other settings to the factory defaults.

Option3 Settings Menu

Using the timer

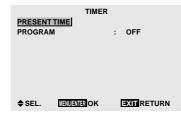

This function sets the monitor to turn ON/OFF automatically at a set time.

Set "ADVANCED OSM" to "ON" in the main menu (1/2), then perform the following operations.

Press the MENU/ENTER button on the remote control to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "OPTION3", then press the MENU/ENTER button. The "OPTION3" screen appears.
- 2. Use the ▲ and ▼ buttons to select "TIMER", then press the MENU/ENTER button.

The "TIMER" screen appears.

- Set the TIMER using ▲▼◀ and ▶ buttons. See page 31 to set PRESENT TIME. See page 32 to set PROGRAM.
- Once the setting is completed ... Press the EXIT button to return to the OPTION3 screen. To return to the main menu, press the EXIT button once more.

Information

Restoring the factory default settings

Select "ALL RESET" under the OPTION1 menu. Note that this also restores other settings to the factory defaults.

PRESENT TIME

This sets the day of the week and present time. Example: Setting "WEDNESDAY", "22:05"

Perform Steps 1-2 of TIMER, then...

3. Use the ▲ and ▼ buttons to select "PRESENT TIME", then press the MENU/ENTER button. The "PRESENT TIME" screen appears.

Use the ▲ and ▼ buttons to select the item, then adjust using the ◀ and ► buttons.

♦SEL. ◀►ADJ. EXITRETURN

The mode switches as follows each time the \blacktriangleleft or \blacktriangleright button is pressed:

- BLANK Corrects misalignment of combined screen portions and creates multiple screens

AUTO ID

This feature automatically sets the ID numbers of multiple displays connected to each other.

Example: Setting "ON"

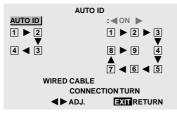

Set the ID number for the No. 1 display on ID NUMBER menu.

Perform Steps 1-2 of VIDEO WALL, then...

- 3. Use the \blacktriangle and \blacktriangledown buttons to select "AUTO ID".
- 4. Use the ◀ and ► buttons to select "ON", then press the MENU/ENTER button.

The mode switches as follows each time the \blacktriangleleft or \blacktriangleright button is pressed:

 $\mathbf{OFF}\leftrightarrow\mathbf{ON}$

Information

AUTO ID settings

ON Enables Auto ID function. In the case shown below, display 1 will be set as ID 1, display 2 as ID2, etc.

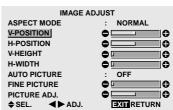

IMAGE ADJUST

The position of the image can be adjusted and flickering of the image can be corrected.

Example: Adjusting the vertical position

Perform Steps 1-2 of VIDEO WALL, then...

- 3. Use the ▲ and ▼ buttons to select "IMAGE ADJUST", then press the MENU/ENTER button. The "IMAGE ADJUST" screen appears.
- 4. Use the \blacktriangle and \blacktriangledown buttons to select "V-POSITION".

5. Adust using the \triangleleft and \triangleright buttons.

- * If neither the ◀ or ► button is pressed within 5 seconds, the current setting is set and the previous screen reappears.
- 6. Once the setting is completed...

Press the EXIT button to return to the VIDEO WALL screen.

Information

IMAGE ADJUST settings

These are the same functions as the IMAGE ADJUST menu on page 22.

P. ON DELAY (Power on delay)

Use this function to activate power-on delay. Turn on the AUTO ID before the following operations. Example: Setting "ON"

- Perform Steps 1-2 of VIDEO WALL, then...
- 3. Use the \blacktriangle and \blacktriangledown buttons to select "P. ON DELAY".
- 4. Use the \triangleleft and \triangleright buttons to select "ON".

The mode switches as follows each time the \blacktriangleleft or \blacktriangleright button is pressed:

 $\textbf{OFF}\leftrightarrow\textbf{ON}$

VIDEO	WALL
DIVIDER	: 1

Color System Settings Menu Setting the video signal format

Use these operations to set the color systems of composite

video signals or Y/C input signals.

Example: Setting the color system to "3.58 NTSC"

Press the MENU/ENTER button on the remote control to display the MAIN MENU on the screen, then...

- Use the ▲ and ▼ buttons to select "COLOR SYSTEM", then press the MENU/ENTER button. The "COLOR SYSTEM" screen appears.
- 2. To select " 3.58NTSC " ...

Use the \blacktriangleleft and \blacktriangleright buttons to select " 3.58NTSC ". The mode switches as follows when the \blacktriangleleft and \blacktriangleright buttons are pressed:

3. Once the setting is completed ...

Press the EXIT button to return to the main menu. To delete the main menu, press the EXIT button once more.

Information

Video signal formats

Different countries use different formats for video signals. Set to the color system used in your current	
country.	
AUTO The color systems are automatically	
identified and the format is set	
accordingly.	
PALThis is the standard format used	
mainly in the United Kingdom and	
Germany.	
SECAM This is the standard format used	
mainly in France and Russia.	
4.43 NTSC,	
PAL60 This format is used for videos in	
countries using PAL and SECAM	
video signals.	
3.58 NTSC This is the standard format used	
mainly in the United States and Japan.	
PAL-M This is the standard format used	
mainly in Brazil.	
PAL-NThis is the standard format used	
mainly in Argentina.	

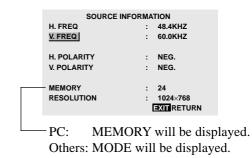

Source Information Menu

Checking the frequencies, polarities of input signals, and resolution

Use this function to check the frequencies and polarities of the signals currently being input from a computer, etc.

Press the MENU/ENTER button on the remote control to display the MAIN MENU on the screen, then...

- 1. Use the ▲ and ▼ buttons to select "SOURCE INFORMATION", then press the MENU/ENTER button.
- 2. The "SOURCE INFORMATION" is displayed.

 Once you have checked the frequency ... Press the EXIT button to return to the main menu. To delete the main menu, press the EXIT button once more.

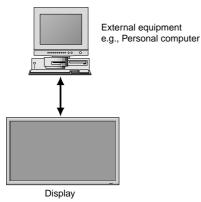

External Control

Application

These specifications cover the communications control of the plasma monitor by external equipment.

Connections

Connections are made as described below.

Connector on the plasma monitor side: EXTERNAL CONTROL connector.

Use a crossed (reverse) cable.

Type of connector: D-Sub 9-pin male

Pin No.	Pin Name
1	No Connection
2	RXD (Receive data)
3	TXD (Transmit data)
4	DTR (DTE side ready)
5	GND
6	DSR (DCE side ready)
7	RTS (Ready to send)
8	CTS (Clear to send)
9	No connection

Communication Parameters

(1) Communication system	Asynchronous
(2) Interface	RS-232C
(3) Baud rate	9600 bps
(4) Data length	8 bits
(5) Parity	Odd
(6) Stop bit	1 bit
(7) Communication code	Hex

Table of Signals Supported

■ 42VP4/42VP4D Supported resolution

- When the screen mode is NORMAL, each signal is converted to a 640 dots × 480 lines signal (42VP4/42VP4D). (Except for *².*⁴)
- When the screen mode is FULL, each signal is converted to a 853 dots × 480 lines signal (42VP4/42VP4D). (Except for *3)

*1 Only when using a graphic accelerator board that is capable of displaying 852×480 .

*2 Display only 400 lines (42VP4/42VP4D) with the screen center of the vertical orientation located at the center.

*3 42VP4/42VP4D: The picture is displayed in the original resolution. The picture will be compressed for other signals.

*4 Aspect ratio is 5:4. This signal is converted to the following signal (42VP4/42VP4D: 600 dots × 480 lines).

- *5 Normally the RGB select mode suite for the input signals is set automatically. If the picture is not displayed properly, set the RGB mode prepared for the input signals listed in the table above.
- *6 To connect the monitor to Macintosh computer, use the monitor adapter (D-Sub 15-pin) to your computer's video port.
- *7 Other screen modes (ZOOM and STADIUM) are available as well.

NOTE:

- While the input signals comply with the resolution listed in the table above, you may have to adjust the position and size of the picture or the fine picture because of errors in synchronization of your computer.
- This monitor has a resolution of 853 dots ×480 lines. It is recommended that the input signal be VGA, wide VGA or equivalent for 42VP4/42VP4D.
- With digital input some signals are not accepted.
- The sync may be disturbed when a nonstandard signal other than the aforementioned is input.
- If you are connecting a composite sync signal, use the HD terminal.

* "Apple Macintosh" is a registered trademark of Apple Computer, Inc. of the United States.

Troubleshooting

If the picture quality is poor or there is some other problem, check the adjustments, operations, etc., before requesting service.

Symptom	Checks	Remedy		
Picture is disturbed.	• Is a connected component set directly in	• Leave some space between the display and		
Sound is noisy. Remote control operates erroneously.	front or at the side of the display?	the connected components.		
The remote control does not work.	 Are the remote control's batteries worn out? 	Replace both batteries with new ones.		
	Is IR REMOTE set to ON?	• Set IR REMOTE OFF on OPTION3 menu.		
	Has an ID number been set for the main unit?	• Set an ID number with the ID SELECT button, or set the ID number to ALL.		
Monitor's power does not turn on when the remote control's power	 Is the monitor's power cord plugged into a power outlet? 	• Plug the monitor's power cord into a power outlet.		
button is pressed.	• Are all the monitor's indicators off?	Press the power button on the monitor to turn on the power.		
	Are the remote control's batteries worn out?	Replace both batteries with new ones.		
	Is IR REMOTE set to ON?	Set IR REMOTE OFF.		
	• Has an ID number been set for the main unit?	• Set an ID number with the ID SELECT button, or set the ID number to ALL.		
Monitor does not operate when the remote control's buttons are pressed.	 Is the remote control pointed at the monitor, or is there an obstacle between the remote control and the monitor? 	• Point the remote control at the monitor's remote control sensor when pressing buttons, or remove the obstacle.		
	 Is direct sunlight or strong artificial light shining on the monitor's remote control sensor? 	• Eliminate the light by closing curtains, pointing the light in a different direction, etc.		
	Are the remote control's batteries worn out?	Replace both batteries with new ones.		
	• The remote cable is plugged into the REMOTE IN terminal (Wired).	• Unplug the remote cable from the monitor.		
The front panel buttons of the main unit do not function.	 The front panel buttons do not function during Control Lock. 	Set the Control Lock to OFF.		
No sound or picture is produced.	 Is the monitor's power cord plugged into a power outlet? 	• Plug the monitor's power cord into a power outlet.		
Picture appears but no sound is	 Is the volume set at the minimum? 	Increase the volume.		
produced.	 Is the mute mode set? 	Press the remote control's MUTE button.		
	• Are the speakers properly connected?	Connect the speakers properly.		
	Is AUDIO INPUT set correctly?	Set AUDIO INPUT on the AUDIO menu correctly.		
Poor picture with VIDEO signal input.	 Improper control setting. Local interference. Cable interconnections. Input impedance is not correct level. 	 Adjust picture control as needed. Try another location for the monitor. Be sure all connections are secure. 		
Poor picture with RGB signal input.	Improper control setting. Incorrect 15 PIN connector pin connections.	Adjust picture controls as needed. Check pin assignments and connections.		
Tint is poor or colors are weak.	• Are the tint and colors properly adjusted?	• Adjust the tint and color (under PICTURE).		
Nothing appears on screen.	 Is the computer's power turned on? 	 Turn on the computer's power. 		
	Is a source connected?	Connect source to the monitor.		
	 Is the power management function in the standby or off mode? 	• Operate the computer (move the mouse, etc.).		
	Is LOOP OUT set to ON?	Set LOOP OUT OFF.		
Part of picture is cut off or picture is not centered.	 Is the position adjustment appropriate? 	Adjust the IMAGE ADJUST properly.		
Image is too large or too small.	 Is the screen size adjustment appropriate? 	Press the WIDE button on the remote control and adjust properly.		
Picture is unstable.	 Is the computer's resolution setting appropriate? 	Set to the proper resolution.		
POWER/STANDBY indicator is lighted in red.	 Horizontal and / or vertical sync signal is not present when the Intelligent Power Manager control is on. 	Check the input signal.		
POWER/STANDBY indicator is blinking in red.	• The temperature inside the main unit has become too high and has activated the protector.	• Promptly switch off the power of the main unit and wait until the internal temperature drops. See*1.		
POWER/STANDBY indicator is		• Prompty switch off the power of the main unit. See *2.		

*1 Overheat protector

If the monitor becomes too hot, the overheat protector will be activated and the monitor will be turned off. If this happens, turn off the power to the monitor and unplug the power cord. If the room where the monitor is installed is particularly hot, move the monitor to a cooler location and wait for the monitor to cool for 60 minutes. If the problem persists, contact your dealer.

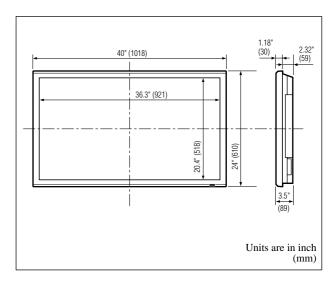

*2 In the following case, power off the monitor immediately and contact your dealer or authorized Service Center.

The monitor turns off 5 seconds after powering on and then the POWER/STANDBY indicator blinks. It indicates that the power supply circuit, plasma display panel or temperature sensor have been damaged.

Limited Warranty Plasma Monitors

NEC Solutions, Inc. (hereinafter NEC Solutions) warrants this product to be free from defects in material and workmanship under the following terms and, subject to the conditions set forth below, agrees to repair or replace (at NEC Solutions' sole option) any part of the enclosed unit which proves defective. Replacement parts or products may be new or refurbished and will meet specifications of the original parts or products.

HOW LONG IS THE WARRANTY?

Parts and labor are warranted for (1) one year from the date of the first customer purchase.

WHO IS PROTECTED?

This warranty may be enforced only by the first purchaser.

WHAT IS COVERED AND WHAT IS NOT COVERED

Except as specified below, this warranty covers all defects in material or workmanship in this product. The following are not covered by the warranty:

- 1. Any product which is not distributed in the U.S.A. or Canada by NEC Solutions or which is not purchased in the U.S.A. or Canada from an authorized NEC Solutions dealer.
- 2. Any product of which the serial number has been defaced, modified or removed.
- 3. Damage, deterioration or malfunction resulting from:
 - a. Accident, misuse, abuse, neglect, fire, water, lightning or other acts of nature, unauthorized product modification, or failure to follow instructions supplied with the product.
 - b. Repair or attempted repair by anyone not authorized by NEC Solutions.
 - c. Any shipment of the product (claims must be presented to the carrier).
 - d. Removal or installation of the product.
 - e. Any other cause which does not relate to a product defect.
 - f. Burns or residual images upon the phosphor of the panel.
- 4. Cartons, carrying cases, batteries, external cabinets, magnetic tapes, or any accessories used in connection with the product.
- 5. Service outside of the U.S.A. and Canada.

WHAT WE WILL PAY FOR AND WHAT WE WILL NOT PAY FOR

We will pay labor and material expenses for covered items, but we will not pay for the following:

- 1. Removal or installation charges.
- 2. Costs of initial technical adjustments (set-up), including adjustment of user controls. These costs are the responsibility of the NEC Solutions dealer from whom the product was purchased.
- 3. Shipping charges.

HOW YOU CAN GET WARRANTY SERVICE

- 1. To obtain service on your product, consult the dealer from whom you purchased the product.
- 2. Whenever warranty service is required, the original dated invoice (or a copy) must be presented as proof of warranty coverage. Please also include in any mailing your name, address and a description of the problem(s).
- 3. For the name of the nearest NEC Solutions authorized service center, call NEC Solutions at 800-836-0655.

LIMITATIONS OF LIABILITY

Except for the obligations specifically set forth in this warranty statement, we will not be liable for any direct, indirect, special, incidental, consequential, or other types of damages, whether based on contract, tort, or any other legal theory, whether or not we have been advised of the possibility of such damages. This warranty is in lieu of all other warranties expressed or implied, including, but not limited to, the implied warranties of merchantability or fitness for a particular purpose.

EXCLUSION OF DAMAGES

NEC Solutions' liability for any defective product is limited to the repair or replacement of the product at our option. NEC Solutions shall not be liable for:

- 1. Damage to other property caused by any defects in this product, damages based upon inconvenience, loss of use of the product, loss of time, commercial loss; or
- 2. Any other damages whether incidental, consequential or otherwise. Some states do not allow limitation on how long an implied warranty lasts and/or do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations and exclusions may not apply to you.

HOW STATE LAW RELATES TO THE WARRANTY

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

FOR MORE INFORMATION, TELEPHONE 800-836-0655 NEC SOLUTIONS (AMERICA), INC. 1250 N. Arlington Heights Road, Suite 500 Itasca, Illinois 60143-1248

Note: All products returned to NEC Solutions (America), Inc. for service MUST have prior approval. To get approval, call NEC Solutions (America), Inc. at 800-836-0655.
