3. When uninstallation is completed properly, reboot the computer.

## **Startup the Software**

#### Preparation:

• First of all, perform setup according to the installation manual enclosed with NP03Wi.

If the computer and the camera unit are not connected by a USB cable, the message at right would be displayed on and the software would not be started up.

If Microsoft .NET Framework is not installed on the computer, visit the website of Microsoft for download and install it on the computer.

#### 1. Double click the IWB icon on the desktop.

Driver installation message is displayed on.

Click "OK" and follow the displayed instructions for the sequel operations.

When driver installation is completed properly, IWB Setup Software is automatically launched and 🧟 icon is created in the task tray. Clicking this icon, IWB setup menu is displayed on the screen.

#### **Calibration Menu Display**

Right click 💐 icon in the task tray and select [Exit] for finishing IWB.

Before starting to use the stylus pen, make sure to perform calibration in order to make the computer to recognize exact position of the stylus pen.

Automatic calibration	Automatically calibrate the stylus pen position. Recommend this when easy calibration is preferred.
Manual calibration	Manually calibrate the stylus pen position. Recommend this for installing the projector permanently or when precise calibration is preferred.

#### Perform Calibration Automatically [Automatic Calibration]

Click the [Start Automatic] button on the displayed calibration menu.

Projected image on the screen will be switched to the Automatic Calibration Screen.

After five to eight seconds, calibration will be completed and the screen will return to display the projected image.

#### Note:

• If the message in below is displayed on the screen, refer to the Troubleshooting on page 7 and check if the screen is installed within the recognition area of the camera and if the camera and the screen get influence of external light.

#### Perform Calibration Manually [Manual Calibration]

1. Click [Start Manual] button on the displayed calibration menu.

Projected image on the screen is switched to the Manual Calibration Screen and red dot 💽 is indicated at the top left on the screen.

2. Press the center of the red dot with the stylus pen.

The red dot is indicated at 25 points in order on the screen.

When all points indicated by the red dot are pressed by the stylus pen, calibration is completed and the calibration completion message is displayed on.

3. Touch 🛃 icon in the task tray by the stylus pen.

This message is popped up when calibration is completed properly.

#### Note:

- When "Auto Run" in the troubleshooting screen is checked, the software starts automatically when the computer is started up.
- Drawing software is required to use the interactive white board function. Drawing software cannot be downloaded from our projector support page, prepare commercially available drawing

software.

You can check the installation condition of the camera unit when the troubleshooting in the IWB setup menu is displayed on.

#### **Troubleshooting screen**

🛃 IWB Setup Soft	ware	
🖋 connected 🛛 🖨		
Switch to the calibration menu	Troubleshooting	
Enable/disable the Auto Run function. When this function is checked, the software starts automatically when the computer is started up.	pause calibration	<ul> <li>Change the stylus pen status.</li> <li>If clicking / pressing this by the mouse / the stylus pen when PAUSE CALIBRATION is indicated on this button, the stylus pen becomes unavailable.</li> <li>If clicking this by the mouse when RESUME CALIBRATION is indicated on this button, the stylus pen becomes ready to use.</li> </ul>

Check the camera recognition area

Press four corners of the projection screen by the stylus pen.

A red square is indicated on the troubleshooting screen and it can be checked all area of the screen surface is in the camera recognition area.

• Check influence of external light

If the camera and/or the screen is exposed to strong light, it may cause of malfunction because the computer cannot recognize the stylus pen. If a red square is indicated on the screen without touching the screen by the stylus pen, it means the camera and/or the screen get influence of external light. In this case, change the place to install them avoiding to receive direct sunshine or strong light.

#### Others

The stylus pen does not work.	<ul> <li>Have the driver and the calibration software been installed on the computer?</li> <li>Is the USB cable connected between the computer (type A USB port) and the camera unit (type B USB port)?</li> <li>Does the stylus pen have proper charge? If red LED is not turned on by pressing the pen tip, charge the stylus pen.</li> </ul>
Lines traced with the stylus pen do not match lines indicated on the screen.	<ul> <li>Has calibration performed properly?</li> <li>If it does not solve the problem by performing automatic calibration, try to perform manual calibration.</li> </ul>
