## User's Manual

## L-1 6

## 16-CHANNEL COMPACT INTEGRATED LIVE SOUND MIXER WITH DIGITAL EFFECTS

## SAFETY RELATED SYMBOLS

This symbol, wherever used, alerts you to the presence of un-insulated and dangerous voltages within the product enclosure. These are voltages that may be sufficient to constitute the risk of electric shock or death.

This symbol, wherever used, alerts you to important operating and maintenance instructions. Please read.

## Protective Ground Terminal

~ AC mains (Alternating Current)
4 Hazardous Live Terminal
ON: Denotes the product is turned on.
OFF: Denotes the product is turned off.

## WARNING

Describes precautions that should be observed to prevent the possibility of death or injury to the user.

## CAUTION

Describes precautions that should be observed to prevent damage to the product.

## WARNING

## - Power Supply

Ensure that the mains source voltage (AC outlet) matches the voltage rating of the product. Failure to do so could result in damage to the product and possibly the user. Unplug the product before electrical storms occur and when unused for long periods of time to reduce the risk of electric shock or fire.

## - External Connection

Always use proper ready-made insulated mains cabling (power cord). Failure to do so could result in shock/death or fire. If in doubt, seek advice from a registered electrician.

## - Do Not Remove Any Covers

Within the product are areas where high voltages may present. To reduce the risk of electric shock do not remove any covers unless the AC mains power cord is removed.
Covers should be removed by qualified service personnel only.

No user serviceable parts inside.

## - Fuse

To prevent fire and damage to the product, use only
the recommended fuse type as indicated in this manual. Do not short-circuit the fuse holder. Before replacing the fuse, make sure that the product is OFF and disconnected from the AC outlet.

## - Protective Ground

Before turning the product ON, make sure that it is connected to Ground. This is to prevent the risk of electric shock.

Never cut internal or external Ground wires. Likewise, never remove Ground wiring from the Protective Ground Terminal.

## - Operating Conditions

Always install in accordance with the manufacturer's instructions.

To avoid the risk of electric shock and damage, do not subject this product to any liquid/rain or moisture. Do not use this product when in close proximity to water.
Do not install this product near any direct heat source.
Do not block areas of ventilation. Failure to do so could result in fire.

Keep product away from naked flames.

## IMPORTANT SAFETY INSTRUCTIONS

Read these instructions
Follow all instructions
Keep these instructions. Do not discard.
Heed all warnings.
Only use attachments/accessories specified by the manufacturer.

## - Power Cord and Plug

Do not tamper with the power cord or plug. These are designed for your safety.

Do not remove Ground connections!
If the plug does not fit your AC outlet seek advice from a qualified electrician.
Protect the power cord and plug from any physical stress to avoid risk of electric shock.
Do not place heavy objects on the power cord. This could cause electric shock or fire.

## - Cleaning

When required, either blow off dust from the product or use a dry cloth.

Do not use any solvents such as Benzol or Alcohol. For safety, keep product clean and free from dust.

## - Servicing

Refer all servicing to qualified service personnel only. Do not perform any servicing other than those instructions contained within the User's Manual.

## PREFACE

Dear Customer:
Thank you for choosing the $\boldsymbol{\Delta}$ LTO L-16 16-Channel Compact Integrated Live Sound Mixer with Digital Effects, which is the result of our $\triangle$ LTO AUDIO TEAM's endeavours.

For the $\triangle$ LTO AUDIO TEAM, music and audio are more than a profession, it is a passion and an obsession!

We have, in fact, been designing professional audio products for a number of years in cooperation with many of the world's major brands.
The $\boldsymbol{\Delta L T O}$ line represents unparalleled analogue and digital products made by musicians, for musicians. With our design centres in Italy, the Netherlands, and the United Kingdom we provide you with world-class designs, while our software development teams continue to develop an impressive range of audio specific algorithms.

By purchasing our $\operatorname{\Delta LTO}$ products you become the most important member of our $\operatorname{ALTO}$ AUDIO TEAM. We would like to share with you our passion for what we design and invite you to make suggestions, which will aid us in developing future products for you. We guarantee you our commitment for quality, continual research and development, and of course the best prices.

The $\boldsymbol{\Delta L T O}$ L-16 is an extremely flexible, ultra-low noise 16-channel compact integrated live sound mixer with Digital Effects, configured with 8 mono and 4 stereo input channels, each channel is equipped with a variety of key features including a warm, natural sounding EQ, Peak LEDs and PAN/BAL control etc.. Besides, the L-16 is equipped with the miraculous 24 bit digital stereo effect processor with 256 presets. Seeing is believing, let's meet the $\mathbf{\Delta L T O}$ L-16.

We would like to thank all the people who made the $\mathbf{~ L T O ~ L - 1 6 ~ 1 6 - C h a n n e l ~ C o m p a c t ~ I n t e g r a t e d ~ L i v e ~ S o u n d ~ M i x e r ~}$ with Digital Effects possible, especially to our designers and $\boldsymbol{\Delta L T O}$ staff. It is their passion for music and professional audio that has made it possible for us to offer you, our most important team member, our continued support.

Thank you very much
ALTO AUDIO TEAM

## 1. INTRODUCTION

Thank you very much for expressing your confidence in $\mathbf{\Delta L T O}$ products by purchasing $\mathbf{\Delta L T O}$ L-16 16 Channel Compact Integrated Mixer with Digital Effects. The L-16 is a professional compact mixer. You will get the smooth, accurate more natural and open sound from this apparatus, it is really ideal for large gigs, recording and fixed PA installations.

The L-16 16 Channel Compact Integrated Mixer with Digital Effects is packed with features that can not be found in other consoles of its size: 10 mono (these are provided with Ultra Low Noise microphone pre-amplifiers and Phantom Power at +48 Volt) and 4 stereo input channels, and each of them is provided with warm, natural EQ (channel1-8 are mono channels and equipped with 3 band MID sweep EQ; channel 9-16 are stereo channels and equipped with 4 band fixed frequency EQ); 24 bits digital stereo effect processor with 256 presets ( 16 presets $\times 16$ variations); 4-AUX sends; separate level control on each channel; highly accurate 12 -segment bar graph meters; 2 -Track inputs assignable to main mix, control room / headphone outputs and subgroups output.

Your L-16 is very easy to operate but we advise you to go through each Section of this Manual carefully. In this way you will get the best out of your L-16.

## 2. FEATURES

The L-16 16 Channel Compact Integrated Mixer with Digital Effects is designed for professional appliance. It will provide the following features:

- 10 MIC input channels with gold plated XLRs and balanced LINE inputs
- 4 Stereo input channels with balanced TRS jacks
- Ultra-low noise discrete Mic Preamps with +48V Phantom Power
- Extremely high headroom offering more dynamic range
- 60 mm high precision faders
- Each input channel with Mute, SOLO function, Overload \& signal present LEDs and low cut filters (except for stereo channel)
- SUB 1-2, SUB 3-4 and MAIN L-R signal assignment switch
- 4 AUX sends per channel: 2 PRE/POST faders switch-able for monitoring application and effects \& sound processor input; 2 POST faders for internal digital DFX or as external send
- 4-band fixed EQ on stereo line channels
- 3-band EQ with swept mid on microphone channels
- Channel inserts and direct outputs on each mono channel plus main mix insert for flexible connection of outboard equipment
- 24-bit DSP effect
- 256 effects (16 presets $\times 16$ variations)
- Stereo 9-band graphic EQ
- TNC socket for connecting lamp
- Control room/phones matrix
- 2-TRACK IN assignable to main mix, control room/headphone outputs
- Highly accurate 12 segment output level meters

## 3. READY TO START?

3.1 Please check the AC Voltage available in your Country before connecting your L-16 to the AC socket.
3.2 Be sure that the main power switch is turned off before connecting the Mixer to the AC socket. Also, you should make sure that all Input and Output Controls are turned down. This will avoid damages to your speakers and avoid excessive noise.
3.3 Before turning on the L-16 you shall connect it to a power amplifier and turn-on the mixer BEFORE the power amplifier. Once you have finished your working session you shall turn the mixer off AFTER the power amplifier.
3.4 Before disconnecting the L-16 always turn-off the Power switch.
3.5 Do not use solvents to clean your L-16. A dry and clean cloth will be OK.

## 4. CONTROL ELEMENTS

### 4.1 The MONO MIC/LINE Channels

These are Channel 1 through Channel 8. You can connect balanced, low impedance microphones to the XLR socket. On the $1 / 4$ " phone jack you can connect either a microphone or a line level instrument. You shall never connect an unbalanced microphone to the XLR socket if you do not want to damage both the Microphone and the Mixer.

48 Volt phantom power
It is available only to the XLR Mic sockets. Never plug in a microphone when phantom power is already on. Before turning phantom power on, make sure that all faders are all the way down. In this way you will protect your Stage Monitors and Main Loudspeakers.

### 4.2 INPUT LEVEL Setting

## 2

This Control is provided with 2 different indication rings: One is for the Microphone and the other for the Line levels. When you use a microphone you shall read the OUTSIDE ring ( $0 \sim 60 \mathrm{~dB}$ ), When you use a Line level instrument you shall read the INSIDE ring (+15~-45 dB). For optimum operation you shall set this control in a way that the peak LED will blink occasionally in order to avoid

MIC 1

LINE IN 1
 distortion on the input channel.

### 4.3 MONO Channel INSERT

### 4.4 LOW-CUT FILTER

By pressing this button you will activate a 75 Hz low frequency filter with a slope of 18 dB per octave. You can use this function to reduce hum and stage rumble when using microphones.

### 4.5 STEREO INPUTS

These are Channel 9 through 16. They are organised in stereo pair (9/10 and 11/12 pairs also feature XLR Mic inputs 9 and 10) and they are provided with $1 / 4$ " TRS phone sockets.

If you connect only the left jack, the input will operate in mono mode.

Your L-16 also provides the practical input level setting: MIC GAIN (the adjustable range is from 0dB to 60dB) for MIC 9/MIC 10 and LINE GAIN (the adjustable range is from -20dB to +20dB) for LINE IN 13/14 and LINE IN 15/16.

### 4.6 EQUALISER

The mono input channels (channel 1- channel 8) are equipped with 3 band MID sweep EQ: HI band, MID band and LOW band; And the stereo channels (channel 9-channel 16) are equipped with 4 band fixed frequency equalization: HI band, HI-MID band, MID-LOW band and LOW band. All bands provide up to 15 dB of boost or cut.

### 4.6.1 HI 7

This is the Treble control. You can use it to get rid of high frequency noises or to boost the sound of cymbals or the high harmonics of the human voice. The gain range goes from -15 dB to +15 dB with a center frequency of 12 kHz .

### 4.6.2 MID

This is the Midrange control. It provides 15 dB of boost or cut, flat at the center detent and the FREQ knob sets the center frequency, the adjustable range is from 100 Hz to 8 kHz . It can affect most fundamental frequencies of all musical instruments and human voice. An attentive use of this control will give you a very wide panorama of sound effects.

### 4.6.3 HI-MID <br> 9

This control gives you up to 15 dB boost or cut at 3 kHz . It is useful for controlling voice. It can accurately polish your performance via adjusting this knob.

This control gives you up to 15 dB boost or cut at 500 Hz .

### 4.6.5 LOW

## 11

This is the Bass control. Boost male voice or kickdrum and bass guitar. Your system will sound much bigger than what it is. The gain range goes from -15 dB to +15 dB and the center frequency is 80 Hz .

### 4.7 AUX SENDS Level Control

## 12

These four controls are used to adjust the level of the signal sent to AUX buses, and their adjustable range goes from $-\infty$ to +15 dB .
AUX1 and AUX2 can be switched to PRE/POST-FADER via the PRE/POST button, so, generally, they can be used for monitor application and effects \& sound processors input.

AUX3 and AUX4 are configured as POST-Faders.
In this typical compact unit, excluding sending out directly to the external effect or processor equipment, AUX SEND 4 can also be assigned to the internal onboard effect module.

### 4.8 PAN/BAL Control

13
The PANORAMA control for MONO channels, and the BALANCE control for STEREO channels. Rotate the control to determine the amount of channel signal sent to left/right of MAIN MIX when Main L-R push-button is pressed. Keep the control in center position and your signal will be positioned in the middle of stage. Turn the control fully counterclockwise, the signal will be present only on the left of MAIN MIX and vice-versa.

Besides, the PAN or BAL control has the same affection to SUB 1-2 and SUB 3-4 if the SUB 1-2 or SUB 3-4 push-button is pressed.

### 4.9 SGIPEAK LED

14
Inside your L-16 the audio signal is monitored in several different stages and then sent to the SG/PEAK LED. When the LED shows green, it indicates that there present signal on corresponding channel; When the LED turns into red, it warns you that you are reaching signal saturation and possible distortion, then you should reduce the input level for avoiding distortion.

### 4.9 MUTE Switch <br> 15

Each channel is equipped with the MUTE switch. Pressing this switch is equal to turning the fader down, which can mute the corresponding channel output except for the PRE AUX sends, channel INSERT send and SOLO (in PFL mode), and the MUTE LED will illuminate.

This Fader will adjust the overall level of this channel and set the amount of signal sent to the Main output or the corresponding subgroup output.

### 4.11 ASSIGNMENT Control

## 17

Each channel provides four push-buttons: SUB1-2, SUB3-4, MAIN L-R and SOLO.

Pressing the SOLO button, the corresponding SOLO LED will illuminate and the SOLO signal will replace other signals sent to the headphone/CONTROL ROOM and meters.
Usually use the SOLO function in live work to preview channels before they are let into the mix. It is useful to set an instrument's input level and EQ, and you can also solo any channel that you want to. The SOLO switch never affects any mix other than the CONTROL ROOM.

The other three buttons can be considered as signal assignment switches. Pressing the SUB 1-2 will assign the channel signal to
 Subgroup1/2, you can depend on the PAN/BAL switch to adjust the amount of channel signal sent to the SUB1 versus SUB2, when turns the PAN/BAL to completely left, then the signal can be only controlled by Subgroup1 and vice-versa.

In the same way, pressing the SUB 3-4 or MAIN L/R will assign the channel signal to Subgroup3/4 or MAIN MIX L/R, and will also be affected by PAN/BAL control.

### 4.12 MASTER Section

## - CONTROL ROOM SOURCE

You can choose to monitor any combination of MAIN MIX, SUB1-2, SUB 3-4 and 2TK IN via these MATRIX switches. Engaging these switches, these stereo signals will be delivered to the PHONES, CONTROL ROOM and METERS display.

Note: When any SOLO switch was engaged, the SOLO signal will replace other signals, and also be sent to the CONTROL ROOM, PHONES and METERS.

## - PHONES/CTRL ROOM

Rotate these knobs to adjust the stereo level of CTRL ROOM and PHONES outputs separately, which can be varied from $-\infty$ to MAX.

The four switches are used to determine the master AUX SEND levels, which can be varied from $-\infty$ to +15 dB .

When the external effect unit connected to mixer has no input gain control, you can get a further +15 dB gain available form these AUX SEND outputs.
As to the AUX4, it can also provide the lovable level adjustment for the internal effect signal.

## - SOLO

21
The function of these SOLO buttons are the same as the channel SOLO button, they can also be affected by SOLO MODE switch.
Press the SOLO button, the corresponding AUX send will be routed to CTRL ROOM/ PHONES outputs and METERS display.

## - Master STEREO AUX RETURNS

These four controls set the level of effects that received from the stereo AUX RETURN connectors, which can be varied from $-\infty$ to +15 dB . They are used to provide the further gain for low level effects.

## - TO AUX SEND1/2

23
The both rotary knobs assign the AUX RETURN signals to their respective AUX SEND outputs: The TO AUX SEND1 assign the signal from AUX RETURN1 to AUX SEND1 bus, and TO AUX SEND2 assign the signal from AUX RETURN2 to AUX SEND2 bus.
The adjustable range goes from $-\infty$ to +15 dB .

- MAIN MIX / CTRL/R

AUX RETURN3 is equipped with the MAIN MIX / CTRL/R button. Release the button to send the stereo signal from AUX RETURN3 to MAIN MIX buses; Engage the button, then the stereo signal will be sent to CTRL/R output.

These three buttons are configured for AUX RETURN4, they can be regarded as the signal assignment switches. Engage the SUB1-2 button to assign the stereo signal from AUX RETURN4 to Submix1/2; in the same way, SUB3-4 for Submix3/4, MAIN MIX for MAIN MIX buses.

## - AUX RETURN SOLO

## 26

The function of AUX RETURN SOLO is like the channel SOLO button. Engaging it sends the signal from AUX RETURN (1-4) to the CTRL OUT, PHONES outputs and METERS display. It can also be affected by SOLO mode button, and the LED next the button will illuminate.

## - SUBGROUPS ASSIGN TO MAIN MIX

Through these switches, you can operate the subgroup faders as a master control for assigning the subgroups to MAIN MIX. Engage the LEFT switch to send the corresponding subgroup signal to MAIN MIX L, and the RIGHT switch for MAIN MIX R. When engaging the both switches, the signal will be sent to L/R of MAIN MIX.

## - SUBGROUPS

These faders are used to control the levels of signals sent to the SUBGROUPS OUT, the adjustable range is from $-\infty$ to +10 dB . Any channel that is assigned to the subgroups, not muted and not turned down will be assigned to the SUB OUTS.

## - MAIN MIX LEVEL

This fader sets the amount of signal sent either to the Main Mix Output sockets or to the Tape Output.

## - LED METER

The stereo 12 segments LED Meter will indicate the signal level sent to CTRL ROOM and PHONE outputs.

## - 2TK TO MIX 31

Engaging this switch allows you to combine the 2 TRACK Output with the MAIN MIX. In other words, feeds the 2TRACK IN signals into MAIN L/R output.

## - SOLO MODE

This button provides two modes: up for PFL (Pre-Fader-Listen) mode, and down for AFL (After-Fader-Listen) mode.
Engage the button, the soloed signal will output following the LEVEL control, otherwise, release the button will output the soloed signal before the level control

Please note that the SOLO function can never affect the mix at main recording output, and also can't be affected by channel's MUTE switch.

## - 24 BIT DIGITAL EFFECTS

## PRESETS

## 33

Adjust this knob to select the right effect you wish to perform. There are total 16 options for you: several kinds of reverb, mono and stereo delay, effects with modulation, and versatile two-effect combination.

36

TAPE IN
Use the Tape input if you wish to listen to your Mix from a Taper Recorder or DAT. You can assign the signal coming from the Taper Recorder either to a pair of studio monitor using the Control Room assignment on the front panel or you can also send the signal directly to the Main Mix.

TAPE OUT
These RCA jacks will route the main mix into a tape recorder.

- LAMP

44
This lovable LAMP is very convenient for your operation, it is located in the top right corner of the front panel, and provides the 12 V socket that can drive any standard TNC-type lamp. Please use the customized gooseneck lamps, the GL-SQ and GL-RO are both options.

## - PHONES

These sockets will send out the monitor signal to a pair of headphones.

### 4.12 REAR PANEL Description

- POWER ON/OFF switch

46
This switch is used to turn the Main Power ON and OFF.

## - PHANTOM ON/OFF switch

This switch will apply +48 Volt Phantom Power only to the 10 XLR microphone inputs. Never connect microphones when the Phantom Power is on already.

## - AC inlet with fuse holder

## 47

Use it to connect your L-16 to the Main AC with the supplied AC cord. Please check the Voltage available in your Country and how the Voltage for your L-16 is configured before attempting to connect your L-16 to the Main AC.

## - MAIN MIX OUTPUT

This stereo output is supplied with both the XLR and $1 / 4$ " phone sockets and it is controlled by the Main Mix Level.

## - MAIN OUTPUT LEVEL

This button sets the main mix output level to match the input of the device that you are ready to connect. Engage this button to reduce the output level from MAIN MIX OUTPUT by 30 dBu , it used to match the semipro -30 dBu device, on the contrary, to match the professional +4 dBu device.

## - MAIN INSERT

These two $1 / 4$ " phone sockets are stereo insert points and used to connect processors such as compressors, equalisers etc.. When insert a external processor into the jack, the Main stereo signal will be taken out after the EQ and returned into the MAIN MIX output before the MAIN MIX fader.

## - MONO OUTPUT

 51This $1 / 4$ " phone socket is balanced/unbalanced mono mix output connector, it can be regarded as a sum output of the left and right of MAIN MIX.

## - MONO LEVEL

This knob sets the level of mono mix output signal, which can be varied from $-\infty$ to +15 dB .

- CTRL OUT

These $1 / 4$ " phone sockets will be used to send the control room signal to the Studio Monitor speakers or a second set of PA.

## - DFX OUT

This $1 / 4$ " phone socket is used to output the effect signal that comes from internal DSP module and the signal can be controlled in level by EFFECTS OUT control.

## - FOOTSWITCH

This $1 / 4$ " phone socket can be used to connect an external footswitch to turn on/off the onboard effect module.

- AUX SENDS

56
These $1 / 4$ " phone sockets are used to send out the signal from the AUX Bus to external devices such as effects.

## - AUX RETURNS

Use these stereo 1/4" phone sockets to return the sound of an effect unit to the Main Mix. You can also use them as an extra auxiliary input.

Each MONO MIC/LINE channel ( $\mathrm{CH} 1-\mathrm{CH} 8$ ) is equipped the $1 / 4$ " phone socket for direct output. These jacks are used to send the signal from the channel path to external device for recording function etc..

## - SUBGROUPS OUT <br> 59

These $1 / 4$ " phone sockets are used to connect the inputs of deck or available for a complicated PA live sound system. You will find it is the best tool when you operate the SUBGROUPS OUT.

- SUBGROUPS INSERT

These $1 / 4^{\prime \prime}$ phone sockets are insert points. They are used to connect processors such as compressor, limiter, EQ etc.. When insert external processor into these jacks, the subgroup stereo signal will be taken out, then returned to before subgroups fader. Of course, these jacks used must be stereo (Tip Send/Ring Return).

## 5. INSTALLATION AND CONNECTION

Ok, you have got to this point and you are now in the position to successfully operate your L-16. However, we advise you to read carefully the following section to be the real Master of your own Mix. Not paying attention enough to the input signal level, to the routing of the signal and the assignment of the signal will result in unwanted distortion, a corrupted signal or no sound at all. So you should follow this procedure for every single channel:

- Turn down all Input and Output Gain Controls.
- Connect phantom powered microphones before switching on the +48 Volt Phantom Power switch.
- If you have a power amplifier connected to your L-16 set the Level of the amplifier at no more than $75 \%$.
- Now, set the CONTROL ROOM/PHONES level at no more than $50 \%$. In this way you will be able to hear later what you are doing connecting a pair of headphones or a pair of powered studio monitor speakers.
- Position EQ controls on middle position.
- Position panoramic (PAN) control on center position.
- With a headphone or studio monitor speakers connected apply a Line Level input signal so that the PEAK LED does not light up.
- At this point increase the input gain so that the PEAK LED will blink occasionally. In this way you will maintain good headroom and ideal dynamic range.
- Now connect a microphone and ask the singer to sing loud into the microphone. Turn slowly the Gain Control clockwise and have the PEAK LED blink only occasionally.
- Now repeat the same sequence for all input channels. The Main LED Meter could move up into the red section. In this case you can adjust the overall output level through the MAIN MIX control.

### 5.1 SOME FINAL TIPS ON WIRING CONFIGURATION

You can connect unbalanced equipment to balanced inputs and outputs. Simply follow these schematics.

'Tapped' Connection Direct Output Lead
(Enables the Insert to be used as a Direct Output
while maintaining the channel signal flow)

Y-Stereo lead for insert Connection
(To be used when the processor does not employ a single jack connection for the In/Out Connections)

## 7. SYSTEM BLOCK DIAGRAMS

## 8. TECHNICAL SPECIFICATION

| Mono input channels |  |  |
| :---: | :---: | :---: |
|  | Microphone input | electronically balanced, discrete input configuration |
|  | Frequency response | 10 Hz to $55 \mathrm{kHz},+/-3 \mathrm{~dB}$ |
|  | Distortion (THD \& N) | 0.005\% at $+4 \mathrm{dBu}, 1 \mathrm{kHz}$ |
|  | Gain range | 0dB to 60dB (MIC) |
|  | SNR (Signal to Noise Ratio) | 115 dB |
|  | Line input | electronically balanced |
|  | Frequency response | 10 Hz to $55 \mathrm{kHz},+/-3 \mathrm{~dB}$ |
|  | Distortion (THD \& N) | 0.005\% at +4dBu, 1kHz |
|  | Sensitivity range | +15 dBu to -45 dBu |
| Stereo input channels |  |  |
|  | Line input | Balanced/unbalanced |
|  | Frequency response | 10 Hz to $55 \mathrm{kHz},+/-3 \mathrm{~dB}$ |
|  | Distortion (THD \& N) | $0.005 \%$ at $+4 \mathrm{dBu}, 1 \mathrm{kHz}$ |
| Impedances |  |  |
|  | Microphone input | 1.4 kOhm |
|  | Channel Insert return | 2.5 kOhm |
|  | All other inputs | 10kOhm or greater |
|  | Tape out | 1 kOhm |
|  | All other output | 1200hm |
| Equalization |  |  |
|  | Hi shelving | +/-15dB @12kHz |
|  | Mid bell (mono) | +/-15dB @100Hz to 8kHz |
|  | Hi Mid (stereo) | +/ - 15dB @ 3kHz |
|  | Mid low (stereo) | +/-15dB @ 500 Hz |
|  | Low shelving | +/ - 15dB @80Hz |
|  | Low Cut filter | 75Hz, 18dB/oct. |
| DSP Section |  |  |
|  | A/D and D/A converters | 24 bit |
|  | DSP resolution | 24 bit |
|  | Type of effects | Hall, Room, Vocal \& Plate REVERBS |

## 9. WARRANTY

## 1. WARRANTY REGISTRATION CARD

To obtain Warranty Service, the buyer should first fill out and return the enclosed Warranty Registration Card within 10 days of the Purchase Date.
All the information presented in this Warranty Registration Card gives the manufacturer a better understanding of the sales status, so as to purport a more effective and efficient after-sales warranty service.

Please fill out all the information carefully and genuinely, miswriting or absence of this card will void your warranty service.

## 2. RETURN NOTICE

2.1 In case of return for any warranty service, please make sure that the product is well packed in its original shipping carton, and it can protect your unit from any other extra damage.
2.2 Please provide a copy of your sales receipt or other proof of purchase with the returned machine, and give detail information about your return address and contact telephone number.
2.3 A brief description of the defect will be appreciated.
2.4 Please prepay all the costs involved in the return shipping, handling and insurance.

## 3. TERMS AND CONDITIONS

3.1 $\boldsymbol{L}$ LTO warrants that this product will be free from any defects in materials and/or workmanship for a period of 1 year from the purchase date if you have completed the Warranty Registration Card in time.
3.2 The warranty service is only available to the original consumer, who purchased this product directly from the retail dealer, and it can not be transferred.
3.3 During the warranty service, $\mathbf{~ L L T O ~ m a y ~ r e p a i r ~ o r ~ r e p l a c e ~ t h i s ~ p r o d u c t ~ a t ~ i t s ~ o w n ~ o p t i o n ~ a t ~ n o ~ c h a r g e ~ t o ~ y o u ~ f o r ~}$ parts or for labor in accordance with the right side of this limited warranty.
3.4 This warranty does not apply to the damages to this product that occurred as the following conditions:

- Instead of operating in accordance with the user's manual thoroughly, any abuse or misuse of this product.
- Normal tear and wear.
- The product has been altered or modified in any way.
- Damage which may have been caused either directly or indirectly by another product / force / etc.
- Abnormal service or repairing by anyone other than the qualified personnel or technician.

And in such cases, all the expenses will be charged to the buyer.
3.5 In no event shall $\boldsymbol{A}$ LTO be liable for any incidental or consequential damages. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusion or limitation may not apply to you.
3.6 This warranty gives you the specific rights, and these rights are compatible with the state laws, you may also have other statutory rights that may vary from state to state.
