

# OMEGA... Your Source for Process Measurement and Control

## TEMPERATURE

- ☑ Thermocouple, RTD & Thermistor Probes, Connectors, Panels & Assemblies
- ☑ Wire: Thermocouple, RTD & Thermistor
- ☑ Calibrators & Ice Point References
- ☑ Recorders, Controllers & Process Monitors
- ☑ Infrared Pyrometers

## PRESSURE / STRAIN FORCE

- ☑ Transducers & Strain Gages
- ☑ Load Cells & Pressure Gauges
- ☑ Displacement Transducers
- ☑ Instrumentation & Accessories

## FLOW / LEVEL

- ☑ Rotameters, Gas Mass Flowmeters & Flow Computers
- ☑ Air Velocity Indicators
- ☑ Turbine / Paddlewheel Systems
- ☑ Totalizers & Batch Controllers

## pH / CONDUCTIVITY

- ☑ pH Electrodes, Testers & Accessories
- ☑ Benchtop / Laboratory Meters
- ☑ Controllers, Calibrators, Simulators & Pumps
- ☑ Industrial pH & Conductivity Equipment

## DATA ACQUISITION

- ☑ Data Acquisition and Engineering Software
- ☑ Communications-Based Acquisition Systems
- ☑ Plug-in Cards for Apple, IBM & Compatibles
- ☑ Datalogging Systems
- ☑ Recorders, Printers & Plotters

## HEATERS

- ☑ Heating Cable
- ☑ Cartridge & Strip Heaters
- ☑ Immersion & Band Heaters
- ☑ Flexible Heaters
- ☑ Laboratory Heaters

## ENVIRONMENTAL MONITORING AND CONTROL

- ☑ Metering & Control Instrumentation
- ☑ Refractometers
- ☑ Pumps & Tubing
- ☑ Air, Soil & Water Monitors
- ☑ Industrial Water & Wastewater Treatment
- ☑ pH, Conductivity & Dissolved Oxygen Instruments

# PHCN-410 pH Controller

Operator's Manual

M1811/0694

## Servicing USA and Canada: Call OMEGA Toll Free

### USA

One Omega Drive, Box 4047  
Stamford, CT 06907-0047 USA  
Telephone: (203) 359-1660  
FAX: (203) 359-7700

Sales Service: 1-800-826-6342 / 1-800-TC-OMEGA<sup>SM</sup>  
Customer Service: 1-800-622-2378 / 1-800-622-BEST<sup>SM</sup>  
Engineering Service: 1-806-872-9436 / 1-800-USA-WHEN<sup>SM</sup>  
TELEX: 996404 EASYLINK: 62968934 CABLE OMEGA

### Canada

976 Bergar  
Laval (Quebec) H7L 5A1  
Telephone: (514) 856-6928  
FAX: (514) 856-6886

## Servicing Europe: United Kingdom Sales and Distribution Center

25 Swannington Road, Broughton Astley, Leicestershire  
LE9 6TU, England  
Telephone: 44 (0455) 285520 FAX: 44 (0455) 283912

### RETURN REQUESTS / INQUIRIES

Direct all warranty and repair requests/inquiries to the OMEGA ENGINEERING Customer Service Department.  
Call toll free in the USA and Canada: 1-800-622-2378, FAX: 203-359-7811; International: 203-359-1660, FAX: 203-359-7807.

BEFORE RETURNING ANY PRODUCT(S) TO OMEGA, YOU MUST OBTAIN AN AUTHORIZED RETURN (AR) NUMBER FROM OUR CUSTOMER SERVICE DEPARTMENT (IN ORDER TO AVOID PROCESSING DELAYS). The assigned AR number should then be marked on the outside of the return package and on any correspondence.

FOR WARRANTY RETURNS, please have the following information available BEFORE contacting OMEGA:

1. P.O. number under which the product was PURCHASED.
2. Model and serial number of the product under warranty, and
3. Repair instructions and/or specific problems you are having with the product.

OMEGA's policy is to make running changes, not model changes, whenever an improvement is possible. This affords our customers the latest in technology and engineering.

## PHCN-410 pH Controller Operator's Manual

SECTION		PAGE
<b>Section 1 Getting Started</b>		
1.1	Unpacking the Controller.....	1-1
1.2	Controller Description.....	1-2
1.3	Keypad Description.....	1-3
1.4	Front Panel Displays.....	1-4
1.5	General Information.....	1-4
<b>Section 2 Installing the Controller</b>		
2.1	Mounting the Controller.....	2-1
2.2	Wiring the Controller.....	2-3
2.2.1	Connect ac Power.....	2-3
2.2.2	Making Input Connections.....	2-4
2.2.3	Making Output Connections.....	2-5
<b>Section 3 Calibrating the pH Electrode</b>		
3.1	Calibrating the pH Electrode.....	3-1

**Section 4 Operating the Controller**

4.1 Entering PHCN-410 Hi/Lo Setpoints ..... 4-1  
 4.1.1 To Enter the Hi Setpoint Value .....4-1  
 4.1.2 To Enter the Lo Setpoint Value .....4-1  
 4.2 Error Messages ..... 4-2

**Section 5 Specifications**

Section 5.1 Specifications .....5-1

**1.1 Unpacking the Controller**

Remove the Packing List and verify that you have received all equipment. If you have questions about the shipment, please call the OMEGA Customer Service Department at 1-800-622-2378 or (203) 359-1660.

Upon receipt of shipment, inspect the container and equipment for any signs of damage. Note any evidence of rough handling in transit. Immediately report any damage to the shipping agent.

**NOTE**

The carrier will not honor any claims unless all shipping material is saved for their examination. After examining and removing contents, save packing material in the event reshipment is necessary.

## 1.2 Controller Description

The OMEGA® PHCN-410 pH controller is a microprocessor-based pH controller with automatic temperature compensation, a 4-digit LED display, two SPDT mechanical relays, and a fixed 4-20 mA output.

Figure 1-1. Front Panel Display

## 1.3 Keypad Description

The PHCN-410 features four keys for entering all set-up parameters and performing calibration. (Refer to Figure 1-1).

Use This Key:

To:

SET/TEMP	Select setpoint relay modes (Lo and Hi)
CAL/ENTER	Initiate calibration procedure using standard pH buffers 7.00, 4.01 or 10.01 to enter selected setpoint values
◀	Select numerical position from right to left
▶	Select number from 0-9

### 1.4 Front Panel Displays

This Display:	Indicates:
pH	Controller in pH mode
CAL	pH calibration mode; display shows 7.00, 4.01, and 10.01; CAL annunciator off when calibration complete
Hi	High alarm relay activated
Lo	Low alarm relay activated

### 1.5 General Information

We recommend that you bench-test all equipment prior to installation. This requires wiring the equipment and checking relay and output functions as well as pH input (see section 2.2). This is also a good time to initially calibrate the pH electrode to the meter (see section 3).

## 2 Installing the Controller

### 2.1 Mounting the Controller

Refer to Figures 2-1 and 2-2 for panel cutout and meter dimensions.

Figure 2-1. Panel Cutout Dimensions

## 2.2 Wiring the Controller

### 2.2.1 Connect ac Power

Connect ac power to the proper terminals (refer to Figure 2-3). "D3" is hot, "D2" is neutral, and "D1" is ground. For 220 Vac operation, "D4" is hot, "D2" is neutral, and "D1" is ground.

Figure 2-3. Rear Panel Connections

Figure 2-2. Meter Dimensions

### 2.2.2 Making Input Connections

1. Connect the pH combination electrode to the BNC connector on the back of the unit.
2. If using Automatic Temperature Compensation (ATC), connect the 100 ohm Pt RTD leads of the temperature probe to Terminals 1 and 2 (no polarity - see Figure 2-3).

The 100 ohm Pt RTD temperature probe can be separate from the pH electrode, built into the body of the pH electrode or (in selected models) built into the mounting assembly of the pH electrode.

If an ATC input is not provided to the meter, the temperature reading will default to 25°C. If the process temperature is constant, but not 25°C, a precision resistor can be used to simulate the appropriate temperature value to the unit. For example, if the control process runs at 0°C, a resistor with a value of 100 ohms can be wired to Terminals 1 and 2. The temperature display will show approximately 0°C. For a complete temperature versus resistance table, consult the OMEGA Temperature Measurement Handbook and Encyclopedia®.

#### NOTE

The PHCN-410 features Automatic Temperature Compensation; however, the temperature value is not displayed.

### 2.2.3 Making Output Connections

For Hi and Lo Setpoint Relays:

Connect the proper load to the NO and COM terminals or the NC and COM terminals.

When the load is connected to the NO and COM, the relay is open until the setpoint is reached. When the load is connected to the NC and COM, the relay is closed until the setpoint is reached. The wiring configuration is application dependent.

The PHCN-410 has a fixed 4-20 mA output.

4. Remove the pH electrode from the pH buffer 7.00. Rinse the electrode with distilled water and place the electrode in standard pH buffer 4.01 or 10.01. Press the CAL Key.  
At this time the "CAL" annunciator light will appear. When the light goes off, the slope is calibrated.

#### 4.1 Entering PHCN-410 Hi/Lo Setpoints

##### 4.1.1 To Enter the Hi Setpoint Value:

1. Press the SET/TEMP keypad, until the Hi annunciator is lit on the front panel.
2. Use the ◀ and ▲ keys to change the displayed value to the desired value.
3. When the desired value is showing in the display, press the CAL/ENTER keypad to store this value into memory.

##### 4.1.2 To Enter the Lo Setpoint Value:

1. Press the SET/TEMP keypad, until the Lo annunciator is lit on the front panel.
2. Use the ◀ and ▲ keys to change the displayed value to the desired value.
3. When the desired value is showing in the display, press the CAL/ENTER keypad to store this value into memory.

**4.2 Error Messages**

- 7-E - The calibration standard 7.00 pH was not used or the pH electrode has failed.
- E - The pH/mV value is over range.

<b>Range:</b>	0.00 to 14.00 pH
<b>pH Resolution:</b>	0.01 pH
<b>Accuracy:</b>	±0.01 pH
<b>Temperature:</b>	0.0 to 100.0°C, Automatic or Manual
<b>Display:</b>	pH 0.80" LED 4 Digit Display
<b>Control:</b>	Two Mechanical Relays
<b>Contact:</b>	Two 12 Amp 120 Vac SPDT Mechanical Relays for High and Lo Setpoints
<b>Temperature Compensation:</b>	100 Ohm Pt RTD for ATC or Manual
<b>Operating Temperature:</b>	41 to 122°F (5 to 50°C)
<b>Power:</b>	110/220 Vac, 50/60 Hz
<b>Dimensions:</b>	1/4 DIN
<b>Weight:</b>	1.98 lbs. (0.9 Kg)
