Assembly Instructions for HTS1 Speaker Stand
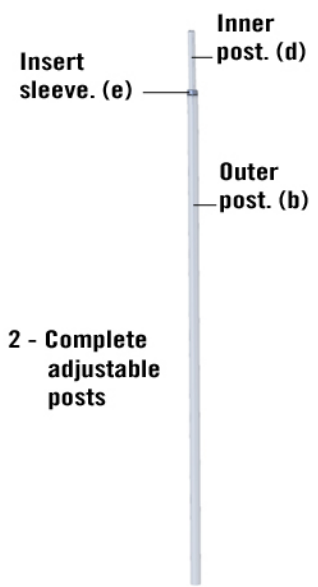

Parts List

2 - base. (a)

6 - Steel isolation spikes and adjustment nut. (c)

2 - M5 Threaded plug adapter. (f)

2 - L-bracket mounting plates. (h)

2 - 2"x2" Speaker mounting plate. (g)

2 - Adhesive mounting foam. (k)

2 - Mounting Screws. (j)

Insert sleeve. (e)

Inner post. (d)

Outer post. (b)

2 - Complete adjustable posts

Speaker to bracket mounting screws
1/4-20   5mm   4mm

STEP 1:
Place speaker stand base(a) upside down on ground and thread steel isolation spikes in the 3 holes. Turn the base over (isolation spikes can scratch floors, use caution) and thread the outer post(b) into the hole in the base. See Fig. 1
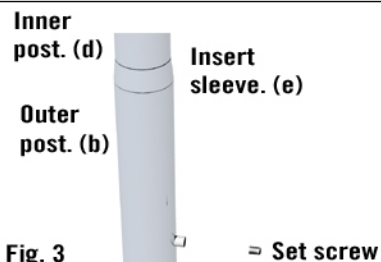

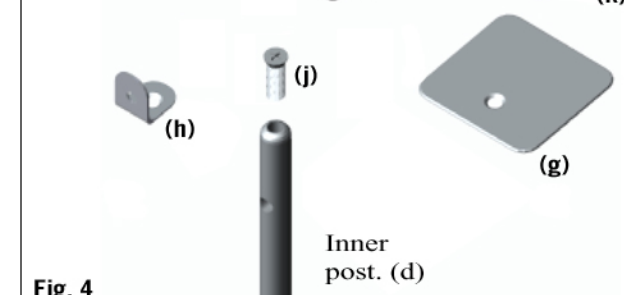

Fig. 1

Fig. 2

For use with JBL SCS & Harmon kardon.

For back of speaker mounting

For bottom of speaker mounting

Inner post. (d)

Insert sleeve. (e)

Outer post. (b)

⊃ Set screw

Fig. 4

(f)   (k)

(h)   (j)   (g)

Inner post. (d)

STEP 2:
Select Appropriate speaker adapter (Fig. 2) for your particular speaker application. If your speaker comes with a threaded insert in the back or bottom use bracket h or f. If your speaker does not come with a threaded insert you will need to use the adhesive foam(k) and mounting plate(g).

STEP 3:
Attach the adapter to the inner post(d) by using the 5mm mounting screw(j), see Fig 4. If you are using the mounting plate (g) you must first remove the backing paper so the adhesive is exposed. Then place the adhesive pad on the mounting plate. Peel back the other side of the backing paper on the mounting foam. Then place the speaker on the center of the mounting plate. If you are using brackets h or f then attach the speaker to the selected bracket using the provided hardware. Set to desired height by tightening the set screw in the outer post(b). See Fig. 3

STEP 4:
Route speaker wires through the hole in the back top of inner post(d) and out the bottom of the base.
