## For your safety

### Laser radiation

The printer of this unit utilizes a laser. Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

### Fuser unit

During or immediately after printing, the fuser unit (①) gets hot. This is normal. Do not touch the fuser unit.

### Note:

- The area near the recording paper exit (②) may also get warm. This is normal.

## For best performance

### Toner cartridge and drum cartridge

- When replacing the toner cartridge or drum cartridge, do not allow dust, water, or liquids to come in contact with the drum. This may affect print quality.
- For optimal performance, genuine Panasonic toner cartridges and drum cartridges are recommended. We cannot be responsible for problems that may be caused by a non-Panasonic toner cartridge or drum cartridge:
  - Damage to the unit
  - Poor print quality
  - Improper operation

### Toner cartridge

- Do not leave the toner cartridge out of the protective bag for a long time. It will decrease the toner life.

### Drum cartridge

- Read the instructions on page 11 before you begin installation of the drum cartridge. After you have read

them, open the drum cartridge protective bag. The drum cartridge contains a photosensitive drum. Exposing it to light may damage the drum. Once you have opened the protective bag:

- Do not expose the drum cartridge to light for more than 3 minutes.
- Do not touch or scratch the black drum surface.
- Do not place the drum cartridge near dust or dirt, or in a high humidity area.
- Do not expose the drum cartridge to direct sunlight.
- To extend the life of the drum cartridge, the power switch should never be turned OFF immediately after printing. Leave the power turned ON for a minimum of 30 minutes after printing.

### Location

- To avoid malfunction, do not position the unit near appliances such as TVs or speakers which generate an intense magnetic field.

### Static electricity

- To prevent static electricity damage to the interface connectors or other electrical components inside the unit, touch a grounded metal surface before touching the components.

### Environment

- Keep the unit away from electrical noise generating devices, such as fluorescent lamps and motors.
- The unit should be kept free from dust, high temperature and vibration.
- The unit should not be exposed to direct sunlight.
- Do not place heavy objects on top of the unit. When you leave the unit unused for a long period of time, unplug this unit from the power outlet.
- The unit should be kept away from heat sources such as heaters, kitchen stoves, etc. Damp basements should also be avoided.
- During the printing process, heat is used to fuse toner onto the page. As a result, it is normal for the machine to produce an odor during and shortly after printing. Be sure to use this unit in an area with proper ventilation.

## Important Information

- Do not cover slots or openings on the unit. Inspect the air circulation vents regularly and remove any dust build-up with a vacuum cleaner (①).

### Routine care

- Wipe the outer surface of the unit with a soft cloth. Do not use benzene, thinner, or any abrasive powder.

## Moving the unit

The unit is heavy. It is highly recommended that two people handle this unit. When moving the unit, hold by the grips (②) on both sides.

- We cannot be responsible for any damage to the unit or degradation of print quality which may occur from the use of a non-Panasonic toner cartridge and drum cartridge.
- Do not add toner to the toner cartridge.

- 1 Remove the toner cartridge (①) and drum cartridge (②) from the protective bags.

- 2 Shake the toner cartridge horizontally more than 5 times.

- 3 Detach the protective cover (③) from the toner cartridge, and remove the protective sheet (④) from the drum cartridge.

- Make sure that the arrows (13) match to install the drum and toner unit correctly.

- 8 Close the left cover.

**When to replace the toner cartridge and the drum cartridge**

When the display shows the following, replace the toner cartridge.

- "Change Supplies Toner Low"
- "Change Supplies Toner Empty"

**Note:**

- To check the drum life and quality, please print the printer test list (page 103) and refer to page 105 for information on the drum life. If printing quality is still poor or "Replace Drum" appears on the display, replace the toner cartridge and drum cartridge.
- To ensure that the unit operates properly, we recommend the use of **Panasonic toner cartridge and drum cartridge**. See page 7 for accessory information.
- See page 104 for information on toner life and drum life.

---

**Cleaning the drum cartridge****Important:**

- If the groove of the drum cartridge is dirty, lines or dirty patterns may appear on printed sheets. Be sure to remove any toner remaining on the inside of the drum cartridge to maintain the print quality.
- A cleaner for the drum cartridge is supplied with the replacement toner cartridge. If you replace only the toner cartridge, clean the drum cartridge using the cleaner.
- Insert the cleaner (14) into the left groove (15) and move it from side to side at least 3 times to clean the inside of the drum cartridge. Repeat this for the right groove (16).

**Note:**

- Be sure to clean all the way to the edge of each groove.

---

**Waste disposal method**

Waste material should be disposed of under conditions which meet all national and local environmental regulations.

---

**Toner save feature**

If you want to reduce toner consumption, set the toner save setting to ON (feature #482 on page 61). The toner cartridge will last approximately 20 % longer. This feature may lower the print quality.

## 1.7 Recording paper

The standard input tray unit can hold:

- Up to 520 sheets of 75 g/m<sup>2</sup> (20 lb) paper.

● **The unit is set for printing letter-size plain paper by default.**

- **To use other paper sizes, change the recording paper size setting (feature #380 on page 59).**
- **To use thin or thick paper, change the recording paper type setting (feature #383 on page 60).**

**Note for recording paper:**

- We recommend that you test paper (especially special sizes and types of paper) on the unit before purchasing large quantities.

- Moist paper
- Inkjet paper
- Some paper is designed to be printed on only one side. Try printing on the other side of the paper if you are not happy with the print quality, or if misfeeding occurs.
- For proper paper feeding and best print quality, we recommend using long-grained paper.
- Do not use paper of different types or thicknesses at the same time. This may cause paper jams.
- Do not use paper printed from this unit for double-sided printing with other copiers or printers. This may cause paper jams.
- To avoid curling, do not open paper packs until you are ready to use the paper. Store unused paper in the original packaging, in a cool and dry location.
- For customers who live in high humidity areas: Please be sure to store paper in an air-conditioned room at all times. If you print using moist paper, it may cause paper jam.

- 1 Pull the standard input tray (①) until it clicks into place, then pull it completely out, lifting the front part of the tray.

- 2 Before loading a stack of paper, fan the paper to prevent paper jams.

- 3 Pinch the right side of the recording paper guide (②), then slide it to match the paper size mark. Pinch the front and back recording paper guides (③) at the same time, then slide them together to match the paper size mark.

- 4 Load the paper, print-side up (④).

## Important:

- Push down to lock the plate (⑤) in the standard input tray, if it has come up.

- Make sure that the recording paper guides (⑥) are at the paper size mark and the recording paper is under the paper limit mark (⑦). The paper should not be loaded over the tab (⑧).

- 5 Insert the standard input tray into the unit, lifting the front part of the tray. Then push it completely into the unit.

## Note:

- If the paper is not loaded correctly, re-adjust the paper guides, or the paper may jam.
- If the standard input tray does not close, the plate in the standard input tray may not be in the locked position. Push the paper down and make sure that the paper is lying flat in the standard input tray.

## Caution for the standard input tray

- Do not drop the standard input tray.

- Hold the standard input tray with both hands when removing or installing. The standard input tray weighs approximately 4.8 kg (10.6 lb) when fully loaded with recording paper.

#### Effective scanning area

## 2. Preparation

### 2.5.2 Using the automatic document feeder

- 1 Insert the document (up to 50 pages) FACE UP into the feeder until a single beep is heard.
- 2 Adjust the width of the document guides (①) to fit the actual size of the document.

#### Note:

- Confirm that there are no documents on the scanner glass.
- Confirm that any ink, paste or correction fluid has dried completely.
- Remove clips, staples or other fasteners.

- The attachment file formats that can be printed are as follows:
  - TIFF
  - JPEG
  - PDF (Image type only. Such as files scanned from the unit, files scanned from the computer using Quick Image Navigator/Multi-Function Viewer, or received fax documents saved as an email attachment.)
- Received emails and the attached files will be deleted automatically after printing.

① Send from a compatible multi-function unit (Example: “4.1.5 Scan to email address (LAN connection only)”, page 32)

### 7.1 Caller ID service

This unit is compatible with the Caller ID service offered by your local telephone company. To use this unit's Caller ID features, you must subscribe to a Caller ID service.

Make sure the following ring count is set to 2 or more rings beforehand.

- FAX ring count (feature #210 on page 59)

#### 7.1.1 How Caller ID is displayed

The calling party's name or telephone number will be displayed after the 1st ring. You have the option of whether or not to answer the call.

The unit will automatically store caller information (name, telephone number and date and time of the call) from the 30 most recent calls. It is possible to view caller information on the display (page 54) or print the entire Caller ID list (page 103).

- When caller information is received and it matches a telephone number stored in the unit's navigator directory, the stored name will be displayed.
- If the unit is connected to a PBX (Private Branch Exchange) system, caller information may not be received properly. Consult your PBX supplier.
- If the unit cannot receive caller information, the following will be displayed:
  - "Out of Area": The caller dialed from an area which does not provide Caller ID service.
  - "Private Caller": The caller requested not to send caller information.
  - "Long Distance": The caller made a long distance call.

## 8. Distinctive Ring

### 8.1 Distinctive Ring service

When a call is made to one of your phone numbers, the telephone company sends a ring pattern to your telephone line to indicate which number the call is intended for. By setting up this unit for Distinctive Ring, you can make the unit automatically start fax reception when a call comes to the fax number.

**To use this service, you must subscribe to the Distinctive Ring service offered by your local telephone company. Consult your local telephone company for availability.**

### 8.2 Using two or more phone numbers on a single telephone line

#### 8.2.1 Activating the Distinctive Ring feature

- 1 **[Menu]** → **[#][4][3][0]**
- 2 Press **[1]** to select “On”.
  - Press **[0]** to select “OFF”.
- 3 **[Set]** → **[Menu]**

**Note:**

- While the Distinctive Ring feature is activated, you cannot change the receiving mode.

#### How phone calls and faxes are received

If the incoming call is for the fax number, the unit will ring with the assigned ring pattern and automatically start fax reception.

If the incoming call is for the phone number, the unit will continue ringing.

- If an external telephone answering machine is connected, set the ring count of the answering machine to more than 2.

### 8.3 Using three or more phone numbers on a single telephone line

You may wish to use three or more phone numbers for a single telephone line. In order to distinguish which number the call was addressed to, a different ring pattern must be assigned for each number.

**Example: Using three phone numbers**

Telephone number	Ring pattern	Use
012 1234	Standard ring	Personal
012 5678	Double ring	Business
012 9876	Triple ring	Fax

To use one phone number for the fax, program the ring pattern assigned for the fax (feature #431 on page 56). In the example, the ring pattern assigned for fax is a triple ring, so you should program “c” (triple ring).

Ring pattern	Selection
Standard ring (one long ring)  1st ring                  2nd ring	<b>[1]</b> “A”
Double ring (two short rings)  1st ring                  2nd ring	<b>[2]</b> “B”
Triple ring (short-long-short rings)  1st ring                  2nd ring	<b>[3]</b> “C”
Other triple ring (short-short-long rings)  1st ring                  2nd ring	<b>[4]</b> “D”

**Note:**

- The default setting is **[5]** “B-D”. The fax will respond to all calls with ring tone patterns “B”, “C” and “D”.

### 8.4 Programming the ring pattern assigned for fax

#### Thick paper/Transparency/Label size:

Letter: 216 mm × 279 mm (8 $\frac{1}{2}$ " × 11")

A4: 210 mm × 297 mm (8 $\frac{1}{4}$ " × 11 $\frac{11}{16}$ ")

#### Recording paper weight:

Simplex: 64 g/m<sup>2</sup> to 165 g/m<sup>2</sup> (17 lb to 44 lb)

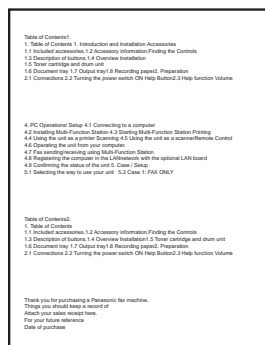

Duplex: 64 g/m<sup>2</sup> to 90 g/m<sup>2</sup> (17 lb to 24 lb)

### Toner life

Toner cartridge life depends on the amount of content in a printed document. Toner cartridge life varies in actual usage. The following is the approximate number of pages that the toner cartridge can print according to the various printing examples.

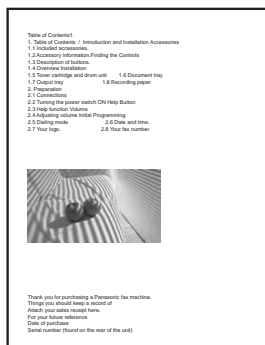

#### Example 1

Approx. 8,000 pages can be printed.

#### Example 2

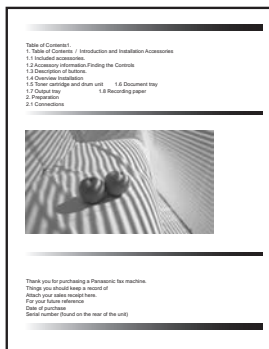

Approx. 4,000 pages can be printed.

**Example 3**

Approx. 2,600 pages can be printed.

**Note:**

- There are various factors that determine the actual toner cartridge life, such as temperature, humidity, type of paper and how much toner you use for the number of pages per print job. The actual number of pages your toner cartridge will print may be significantly less than this estimate if your unit is often used for printing small number of pages per job. Because many of the factors that determine the actual toner cartridge life cannot be controlled, we cannot guarantee a minimum number of pages that will be printed by your toner cartridge.
- The number of pages changes with the depth, thickness and size of the characters.
- If you turn on the toner save feature, the toner cartridge will last approx. 20 % longer.

**Drum life**

The drum cartridge needs to be replaced regularly. The maximum drum life is approx. 20,000 pages.

**Note:**

- There are various factors that determine the actual drum cartridge life, such as temperature, humidity, type of paper and how much toner you use for the number of pages per print job. The actual number of pages your drum cartridge will print may be significantly less than this estimate if your unit is often used for printing small number of pages per job. Because many of the factors that determine the actual drum cartridge life cannot be controlled, we cannot guarantee a minimum number of pages that will be printed by your drum cartridge.

**Waste disposal method**

Waste material should be disposed of under conditions which meet all national and local environmental regulations.
