• How to view the 3D images ► (p. 28)

## Warning

- Do not disassemble or modify the 3D Eyewear. Doing so may result in injury, or may cause the user to feel unwell.

## Caution

**To use 3D Eyewear safely and comfortably, please read these instructions fully.**

### 3D Eyewear

- Do not drop, exert pressure on, or step on the 3D Eyewear. Doing so may damage the glass section, which may result in injury.
- Be careful of the tips of the frame and the hinge section when putting on the 3D Eyewear. Failure to heed this warning may result in injury. Pay special attention when children are using this product.

### Viewing 3D Content

- Do not use the 3D Eyewear if you have a history of over-sensitivity to light, heart problems, or have any other existing medical condition. Using the 3D Eyewear may cause the symptoms to worsen.
- Stop using the 3D Eyewear immediately if you feel tired, discomfort, or any other abnormality. Continuing to use the 3D Eyewear in such cases may cause you to feel unwell. Please take the necessary rest before continuing use. When you set the effect by using [3D Adjustment], take into account that the vision of 3D images varies among different individuals.
- When using the 3D Eyewear, be careful not to strike the TV screen or other people by mistake. As the images are in 3D, the distance between the user and screen may be mistaken, causing the user to strike the screen which may result in injury.
- When using the 3D Eyewear, make sure your eyes are on an approximately horizontal level, and keep a position where you do not see double images.
- If you suffer from myopia (short-sightedness), hyperopia (far-sightedness), astigmatism, or have eyesight differences between the left and right eyes, please use corrective glasses or other such methods to correct your eyesight before putting on the 3D Eyewear.
- Stop using the 3D Eyewear if you can clearly see double images when viewing 3D content. Prolonged use may cause eyesight fatigue.
- View the screen at a distance at least 3 times further than the effective height of the screen.  
Recommended distance:  
For a 42-inch television, 1.6 m or more.  
For a 47-inch television, 1.8 m or more.  
For a 55-inch television, 2.1 m or more.  
Using the 3D Eyewear at a distance closer than the recommended distance may cause eyesight fatigue.

### 3D Eyewear Use

- Do not use the 3D Eyewear for any other purpose except viewing 3D images.
- As a guide, 3D Eyewear should not be used by children younger than 5 - 6 years old. As it is difficult to judge younger children's reactions to fatigue or discomfort, it may be difficult to prevent them from suddenly feeling unwell. When this product is being used by a child, the parent or guardian should check to ensure that the child's eyes are not becoming tired.
- Do not use if the 3D Eyewear is cracked or broken. Doing so may result in injury or eyesight fatigue.
- Stop using the 3D Eyewear immediately if your skin feels unusual. In rare cases, the paint or materials used in the 3D Eyewear may cause an allergic reaction.

## Note

- 3D Eyewear can be worn over vision correction glasses.

## Storing and cleaning the 3D Eyewear

- Clean using a soft, dry cloth.
- Wiping the 3D Eyewear with a soft cloth that is covered in dust or dirt may scratch the eyewear. Shake off any dust from the cloth before use.
- Do not use benzene, thinner, or wax on the 3D Eyewear, as doing so may cause the paint to peel off.
- Do not dunk the 3D Eyewear in liquid such as water when cleaning.
- Avoid storing the 3D Eyewear in hot or highly humid locations.

## Maintenance

First, remove the mains plug from the socket outlet.

### Display panel, Cabinet, Pedestal

#### Regular care:

Gently wipe the surface of the display panel, cabinet, or pedestal by using a soft cloth to clean the dirt or fingerprints.

#### For stubborn dirt:

First clean the dust on the surface. Dampen a soft cloth with clean water or diluted neutral detergent (1 part detergent to 100 parts water). Wring the cloth and wipe the surface. Finally, wipe away all the moisture.

#### Caution

- Do not use a hard cloth or rub the surface too hard, otherwise this may cause scratches on the surface.
- Take care not to subject the TV's surfaces to water or detergent. Liquid inside the TV could lead to product failure.
- Take care not to subject the surfaces to insect repellent, solvent, thinner or other volatile substances. This may degrade surface quality or cause peeling of the paint.
- The surface of the display panel is specially treated and may be easily damaged. Take care not to tap or scratch the surface with your fingernail or other hard objects.
- Do not allow the cabinet and pedestal to make contact with a rubber or PVC substance for a long time. This may degrade surface quality.

### Mains plug

Wipe the mains plug with a dry cloth at regular intervals. Moisture and dust may lead to fire or electrical shock.
