Before operating this equipment, please read these instructions completely and keep these operating instructions for future reference.

IMPORTANT INFORMATION

When requesting information, supplies or service always refer to the model and serial number of your machine. The model and serial number plate (Main Name Plate) is located on the machine as shown below. For your convenience, space is provided below to record information you may need in the future.

Model No.
Serial No.
Date of Purchase
Dealer
Address
Telephone Number

CE

Declaration of Conformity (DoC)

"Hereby Matsushita Graphic Communication Systems, Inc./ Panasonic Testing Centre (Europe) GmbH (PTC), declares that this (G3 Facsimile Equippment) is in compliance with the essential requirements and other relevant provisions of the Directive 1999/5/EC"

Hint:

If you want to get a copy of the original DoC of our products which relates to the R&TTE, please contact to our web address: http://doc.panasonic-tc.de.

Network Compatibility

This product, Model DP-2500/3000 with DA-FG230/FG231-** (** means country suffixes as table below), is designed as to work with an analogue Public Switched Telephone Network (PSTN) in the each country.

**	Country	**	Country	**	Country	**	Country
AA	Austria	AJ	Spain	EE	Italy	AB	U.K./Ireland
AD	Denmark	AM	Switzerland	AR	Belgium	AG	Germany
AF	Finland	AN	Norway	AS	Sweden	YG	Greece
AH	The Netherlands	AP	Portugal	AV	France		

denotes a potential hazard that could result in serious injury or death.

- TO PREVENT FIRE OR SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR ANY TYPE OF MOISTURE.
- TO MINIMIZE THE POSSIBILITY OF SHOCK OR DAMAGE TO THE MACHINE, IT MUST BE PROPERLY GROUNDED.
- THIS PRODUCT CONTAINS HAZARDOUS RADIATION. IF YOU DO NOT FOLLOW THESE INSTRUCTIONS OR USE CONTROLS, MAKE ADJUSTMENTS OR PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN, YOU MAY EXPOSE YOURSELF TO HAZARDOUS RADIATION.
- WHEN YOU OPERATE THIS EQUIPMENT, THE SOCKET-OUTLET SHOULD BE NEAR THE EQUIPMENT AND BE EASILY ACCESSIBLE.
- MAKE SURE THAT THE MACHINE IS INSTALLED IN A SPACIOUS OR WELL VENTILATED ROOM SO AS NOT TO INCREASE THE AMOUNT OF OZONE IN THE AIR. SINCE OZONE IS HEAVIER THAN AIR, IT IS RECOMMENDED THAT AIR AT FLOOR LEVEL BE VENTILATED.
- PLUG POWER SUPPLY CORD INTO ORDINARY AC OUTLET BEFORE CONNECTING TELEPHONE LINE CORD. DISCONNECT TELEPHONE LINE CORD BEFORE UNPLUGGING POWER SUPPLY CORD FROM AC OUTLET.
- DISCONNECT THE EQUIPMENT IMMEDIATELY SHOULD IT EVER SUFFER PHYSICAL DAMAGE WHICH RESULTS IN THE INTERNAL PARTS BECOMING ACCESSIBLE IN NORMAL USE. IN THIS INSTANCE USERS SHOULD HAVE THE EQUIPMENT REPAIRED OR DISPOSE OF.
- IF THE POWER SUPPLY CORD AND/OR TELEPHONE LINE CORD OF THIS EQUIPMENT ARE DAMAGED, THEY MUST BE REPLACED BY THE SPECIAL CORDS SUPPLIED BY AN AUTHORIZED PANASONIC SERVICE CENTRE.

denotes hazards that could result in minor injury or damage to the machine.

- THIS PRODUCT CONTAINS A LITHIUM BATTERY. DANGER OF EXPLOSION IF BATTERY IS INCORRECTLY REPLACED. REPLACE ONLY WITH THE SAME OR EQUIVALENT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS OF YOUR LOCAL SOLID WASTE OFFICIALS.
- WHEN YOU KNOW THAT A THUNDERSTORM IS COMING, WE RECOMMEND THAT YOU:

(1) UNPLUG THE TELEPHONE LINE CORD FROM THE PHONE JACK.(2) TURN OFF THE POWER AND UNPLUG THE POWER SUPPLY CORD FROM AC OUTLET.

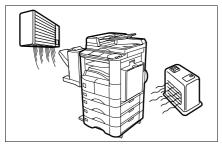

- THIS EQUIPMENT MAY NOT NECESSARILY PROVIDE FOR THE EFFECTIVE HAND-OVER OF A CALL TO OR FROM A TELEPHONE CONNECTED TO THE SAME LINE.
- THE OPERATION OF THIS EQUIPMENT ON THE SAME LINE AS TELEPHONES OR OTHER EQUIPMENT WITH AUDIBLE WARNING DEVICES OR AUTOMATIC RING DETECTORS WILL GIVE RISE TO BELL TINKLE OR NOISE AND MAY CAUSE FALSE TRIPPING OF THE RING DETECTOR. SHOULD SUCH PROBLEM OCCUR, THE USER IS NOT TO CONTACT TELECOM (TELEPHONE COMPANY) FAULTS SERVICE.
- TO REDUCE THE RISK OF SHOCK OR FIRE, USE ONLY NO. 26 AWG OR LARGER TELEPHONE LINE CABLE.
- DISCONNECT ALL POWER TO THE MACHINE BEFORE COVER(S) ARE REMOVED. REPLACE THE COVER(S) BEFORE THE UNIT IS RE-ENERGIZED.

▲ IMPORTANT SAFETY INSTRUCTIONS

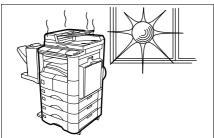

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

- DO NOT USE THIS PRODUCT NEAR WATER, FOR EXAMPLE, NEAR A BATH TUB, WASH BOWL, KITCHEN SINK OR LAUNDRY TUB, IN A WET BASEMENT OR NEAR A SWIMMING POOL.
- AVOID USING A TELEPHONE (OTHER THAN A CORDLESS TYPE) DURING AN ELECTRICAL STORM. THERE MAY BE A REMOTE RISK OF ELECTRIC SHOCK FROM LIGHTNING.
- DO NOT USE THE TELEPHONE TO REPORT A GAS LEAK IN THE VICINITY OF THE LEAK.
- USE ONLY THE POWER CORD AND BATTERIES INDICATED IN THIS MANUAL. DO NOT DISPOSE OF BATTERIES IN A FIRE, THEY MAY EXPLODE. CHECK WITH LOCAL CODES FOR POSSIBLE SPECIAL DISPOSAL INSTRUCTIONS.

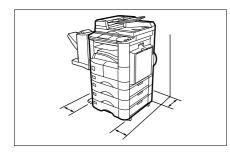

denotes hazards that could result in minor injury or damage to the machine.

Do not install the machine near heating or an air conditioning unit.

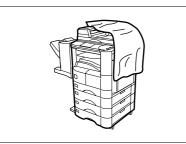

Avoid exposure to direct sunlight.

Install the machine on a flat surface, leave at least 10 cm of space between the machine and other objects.

Do not block the ventilation openings.

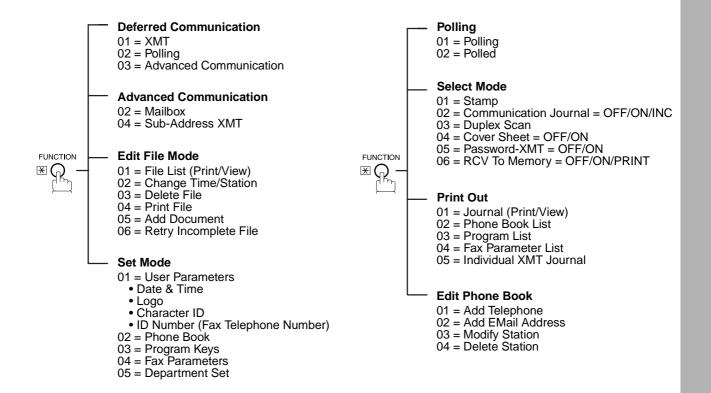

Do not place heavy objects or spill liquids on the machine.

Function Key

Any function can be started by first pressing **FUNCTION** and then select the desired function on the display.

External View

WARNING FOR FLEXIBLE CORD

If the fitted moulded plug is unsuitable for the socket outlet in your home then the fuse should be removed and the plug cut off and disposed of safely.

There is a danger of several electrical shock if the cut off plug is in serted into a live socket outolet. If a new plug is to be fitted please observe the wiring code as below. If in any doubt please consult a qualified electrician. Use a fuse as approved by ASTA or BSI to BS1362.

Always replace the fuse cover, never use the plug with the fuse cover omitted.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code.

Green or Green & Yellow = Earth.

Blue = Neutral. Brown = Live.

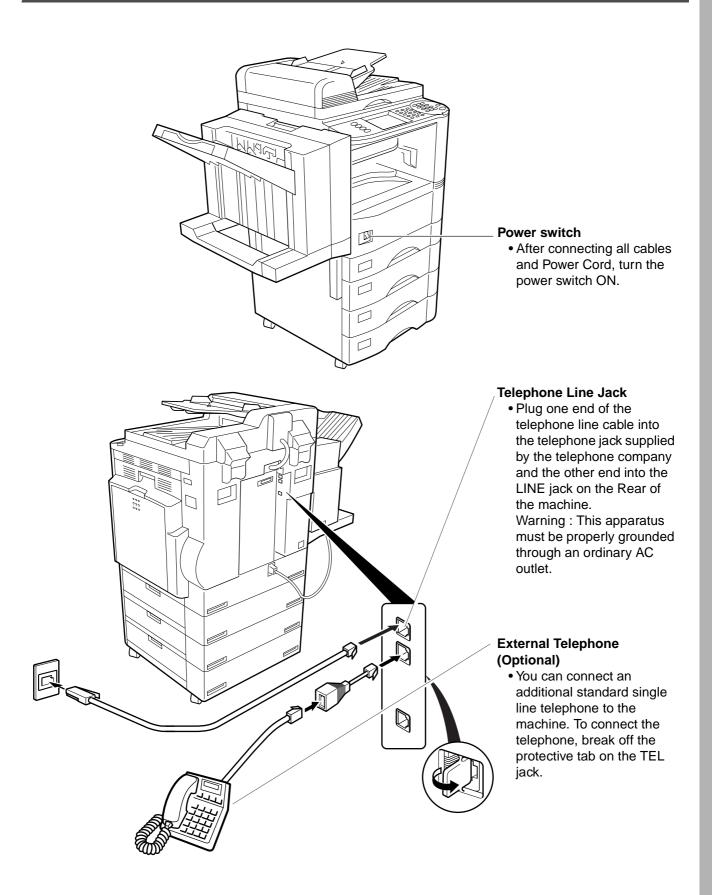

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug. Proceed as follows.

The wire which is coloured green or green & yellow must be connected to the terminal in the plug which is marked with the letter E or by the earth symbol \perp or coloured green of green & yellow.

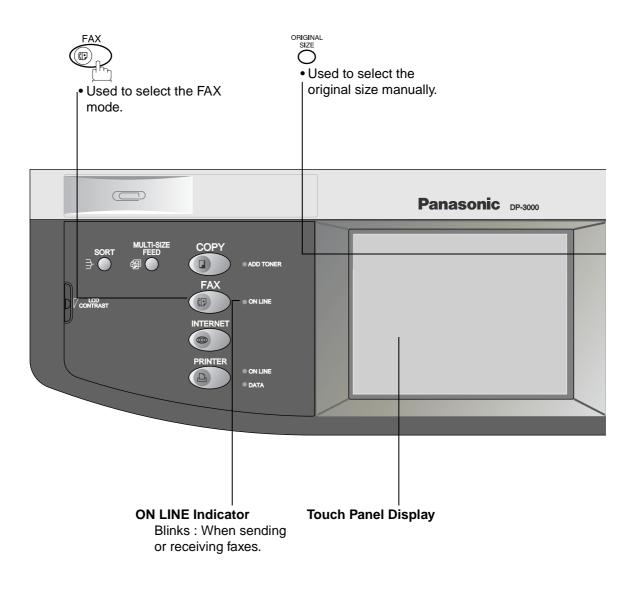

The wire which is coloured blue must be connected to the terminal which is marked with the letter \mathbf{N} or coloured black or blue.

The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red or brown.

Fax Parameter.

086 RINGER VOLUME

NOTE

1. You can also adjust the volume of the key touch tone and the volume of the buzzer in the Fax Parameter No. 010 (KEY/BUZZER VOLUME). (See page 33)

Adjusting the Volume

Setting the Monitor Volume

Make sure that the FAX lamp is ON. If not, press

) to select the "FAX MODE".

FAX

You will hear the dial tone through the speaker.

2

1

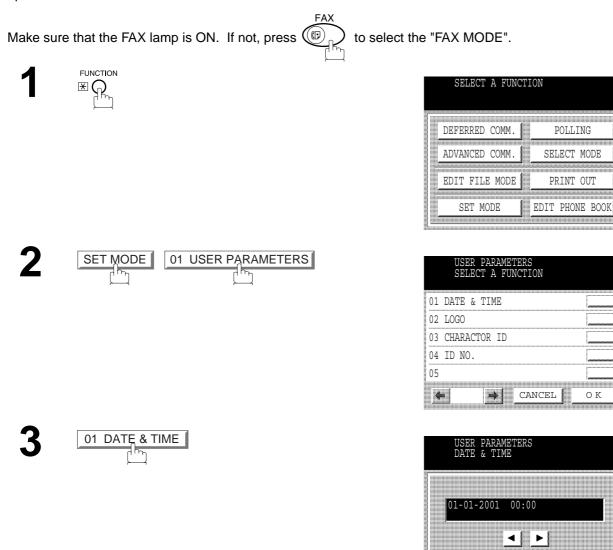

Press \blacksquare or \blacktriangleright repeatedly to raise or lower the Volume.

Your facsimile machine has several basic settings (User Parameters) to help you keep records of the documents you send or receive. For example, the built-in clock keeps the current date and time, and your LOGO and ID Number help to identify you when you send or receive documents.

Setting the Date and Time

At standby the display will show the date and time. Once the standby display is set, it will automatically be updated.

CANCEL

ΟK

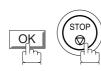

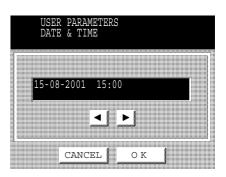

5

Enter the new date and time.

Ex: (1) (5)	Date	: 15th
08	Month	: August
2001	Year	: 2001
1500	Time	: 3:00 PM

If you make a mistake, use \blacksquare or \blacktriangleright to move the cursor over the incorrect number, then overwrite it with a correct one.

Setting Your LOGO

When you send a document, your LOGO appears on the top of the copy printed out at the other station.

The LOGO helps to identify you to someone who receives your transmission.

Make sure that the FAX lamp is ON. If not, press (P) to select the "FAX MODE".

 If the Phone Book dialling number has been used for a communication reservation, the settings cannot be changed or erased until the communication has finished.
 To change or erase the settings, cancell the communication first by Edit File Mode. (See page 93)

Your facsimile machine has a variety of adjustable Fax Parameters. These parameters, listed in the Parameter Table, are preset for you and do not need to be changed. If you do want to make a change, read the table carefully. Some parameters, such as the Resolution, Contrast, and Verification Stamp parameters, can be temporarily changed by simple key operation just before a transmission is made. When the transmission ends, however, these parameters return to their preset values (Home position). Other parameters can only be changed by the procedure described below.

Setting the Fax Parameters

Press or to scroll the display to the desired Fax Parameter. (See pages 33 to 36)

Ex: 004 STAMP

Enter the new setting value.

00	04 STAM	P		
OFF		ON		
		CANC	EL	ок 📘

5

To set another parameter, press CANCELL to return to Step 3 or press STOP to return to standby.

NOTE

- 1. To scroll the display to the desired Fax Parameters in Step 3, press \blacksquare or \blacktriangleright .
- 2. To print out a Fax Parameter List, see page 164.

Fax Parameter Table

No.	Parameter	Setting Number	Setting	Comments

099	MEMORY SIZE (Flash Memory)	-	-	Displays the amount of base and optional memory installed. (Base Memory + Optional Memory)

- 1. The standard settings are printed on the Fax Parameter List. To print out Fax Parameter List, see page 164.
- 2. This parameter is available only when the Parallel Port Interface Option is installed.
- 3. This parameter is available only when the G3 Communication Port Option is installed.

Loading Originals

How To Load Originals

1. On the ADF / Inverting ADF

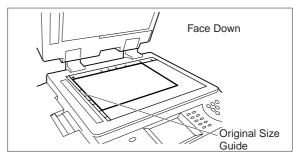

• Place the original(s) Face Up on the ADF until the leading edge placed into the machine stops.

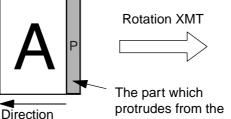

Sending Non-Standard Size Originals

When transmitting non-standard size document(s), the machine may perform Rotate Transmission automatically and not transmit the portion of the document that exceeds the standard size ("P" portion).

2. On the Platen Glass

• Place a book or an original Face Down on the Platen Glass, aligning it with the arrow mark on the original size guides.

Fixed size is not sent.

Flatbed Scanning

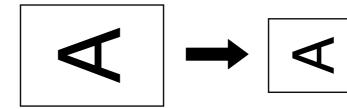

When a book or an original is placed on the Platen Glass, the message "ANOTHER ORIGINAL?" is shown on the LCD display when START is pressed and the scanning is completed.

- If you wish to store another page, press YES and place another original, then press START.
- If NO is pressed, the machine starts to dial the telephone number.

NOTE

1. When an oversized original is sent to another machine, sometimes, it is reduced in accordance with the other party's recording paper size.

EX:

A3 size

A4 size

You can temporarily change the transmission settings either before or after you place the original on the ADF. These settings are as follows:

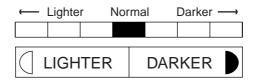

- Contrast
- Resolution
- Original (Text/Photo)
- Stamp

- Communication Journal
- Duplex Scan
- Cover Sheet
- Password-XMT

After the document(s) have been sent, your machine will automatically return to the preset settings.

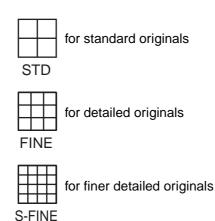

Contrast

Your machine is preset to **Normal** contrast. If you wish to send an original with lighter contrast, change the setting to **Lighter**. If you wish to send a original with darker contrast, change the setting to **Darker**.

Resolution

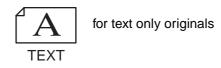

Your machine is preset to Standard resolution, which is suitable for most originals. If you want to send it with more detail, change the setting to Fine or Super-Fine.

- 1. To change the preset Contrast position, change the setting of Fax Parameter No. 001. (See page 33)
- 2. To change the preset Resolution position, change the setting of Fax Parameter No. 002. (See page 33)
- 3. If you send a photographic original with gray tones, set the Resolution to Fine or S-Fine (406 x 391 dpi) and the Original setting to Text/Photo or Photo. The reproduction of the received document will be determined by the capability of the remote station.

Original (Text/Photo)

The Original setting is useful when sending photographs or illustrations with gray tones. Your machine is preset to "TEXT". You can select either "TEXT/PHOTO" or "PHOTO" mode.

for text and photo originals

for photo or illustration originals

Verification Stamp

The Verification Stamp helps you to confirm successful transmissions by stamping the bottom of each successfully transmitted page with a small \otimes mark.

You can temporarily change the stamp setting to either "Off" or "On" by using the Select Mode (FUNCTION

SELECT MODE 01 STAMP).

- 1. When you store document(s) into memory, the Verification Stamp will stamp on the original if it is successfully stored into memory. In this case the Verification Stamp is not a confirmation that the document was successfully transmitted. If you wish to disable the use of the Verification Stamp when storing document(s) into memory, change the setting of Fax Parameter No. 028. (See page 34)
- 2. To change the preset Verification Stamp setting, change the Fax Parameter No. 004. (See page 33)

Communication Journal (Comm. Journal)

A Communication Journal lets you verify if the transmission was successful. You can select the condition to print the Communication Journal as follows.

When COMM. JOURNAL = OFF	:	a Communication Journal will not print.
When COMM. JOURNAL = ON	:	a Communication Journal will print automatically after every communication.
When COMM. JOURNAL = INC.	:	a Communication Journal will print only if the communication has failed.

Make sure that the FAX lamp is ON. If not, press (I) to select the "FAX MODE".

005 MEMORY	
← 01/20 → CANCEL	O K

Press (or) to scroll the display to the desired Fax Parameter.

012 COMM. JOURNAL

OFF	ALWAYS	INC.ONLY

Select the desired setting.

You can choose either Memory or Direct Transmission.

Use Memory Transmission if:

- You want to send the document(s) to multiple stations.
- You have to retrieve the original immediately.
- You want to take advantage of Multi-Tasking function.
- You want to take advantage of Batch Transmission.

Use Direct Transmission if:

- The memory is full.
- You want to send the document(s) immediately.

Use Voice Mode Transmission if:

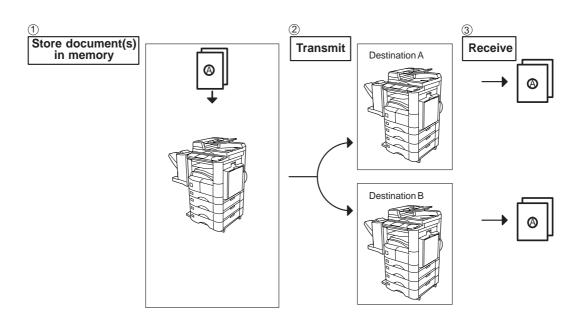

- You want to send the document(s) after talking with the other party first.
- You want to send the document(s) after listening to a voice prompting.

Memory Transmission

Your machine quickly stores the document(s) into the machine's memory.

Then, starts to dial the telephone number.

If the transmission fails, your machine will re-transmit the remaining unsuccessful page(s) automatically.

NOTE

1. While storing the File Number of the document(s) being stored is shown at the upper right corner of the display. It is also printed on the Communication Journal (COMM. JOURNAL), Transaction Journal and File List. The percentage of memory used is shown on the lower right corner of the display after each page is stored.

MEMORY XMT	NO.026
PAGE 01	00%
5551234	

2. If memory overflow occurs while storing the document(s), the page will be ejected. The machine will show "MEMORY FULL" on the display. You will need to reload the last page that was ejected back on the ADF and send the remaining document(s) again when the memory becomes available.

If Fax Parameter No. 082 (Quick Memory XMT) is set to "Invalid", the machine stores all the document(s) into memory first before transmitting.

After storing each document, the machine checks the available memory to prevent memory overflow and stops storing additional documents if the stored data approaches a certain percentage* (around 80%).

Then the machine dials and sends the memory stored document(s) first and continues the transmission of the remaining document(s) from the ADF during the same phone call.

If transmitting to multiple stations or if memory overflows while storing a document, the machine prompts you whether to transmit the successfully stored documents or to cancell the transmission. Press (1) to cancell or press (2) to transmit.

For image memory capacity, see the Specifications page. (See page 173)

If no action is taken within 10 seconds, the machine will start transmitting the stored documents.

* The percentage varies and is dependent on the type of documents you are storing, machine settings or whether an optional memory card is installed.

3. An Information Code will be displayed if the transmission has failed or no answer at the receiving side after the last automatic redial.

The document(s) stored for this transmission will be erased from the memory automatically and an information code is printed for the transmission on the Communication Journal (COMM. JOURNAL).

If you need to retain the incomplete document(s) even after the last redial, change Fax Parameter No. 031 (INC. FILE SAVE) to "Valid" in advance. (See page 34) To retry the incomplete document(s), refer to page 99.

4. To stop the transmission, press STOP. The display shows:

MEMORY XMT		NO.020
COMMUNICATION	STOP	?
1:YES 2:NO		

Press (1) to stop the transmission. The document(s) you stored will be erased automatically.

If you do not want to erase the document(s), change the setting of Fax Parameter No. 031 (INC. FILE SAVE) to "Valid" in advance. (See page 34)

Then the following display will appear and you can select whether to save the file as an incomplete file for editing and/or retry later, or delete the file manually.

MEMORY XMT	NO.020
SAVE AS INCOMP.	FILE?
1:YES 2:NO	

5. If you would like to print a Communication Journal (COMM. JOURNAL) after stopping a transmission, press (1) when the display shows:

MEMORY XMT	NO.020
PRINT COMM.	JOURNAL?
1:YES 2:NO	

Manual Number Dialling

To dial the telephone number manually, follow the steps below.

Make sure that the FAX lamp is ON. If not, press

Place original(s) face up on the ADF.

ABC	DEF	GHI	JKL	MNO	►

- 1. If you want to specify two or more destinations, <u>SET</u> after completing the full telephone number so you can select another destination.
- If you need a special access number to get an outside line, dial it first then press PAUSE to enter a pause (represented by a "-") before dialling the full number.
 Ex: 9 PAUSE 5551234
- 3. This feature is called "**Quick Memory Transmission**". If you wish to store All the original(s) into memory first before transmitting, change the Fax Parameter No. 082 (QUICK MEMORY XMT) to "Invalid". (See page 35)
- 4. This field (AUTO, Line-1 or Line-2) appears only when the 2nd G3 Fax Communication Port Kit is installed.

Phone Book Dialling

Phone Book dialling allows you to dial a full telephone number by pressing a key name that was preprogrammed in the Phone Book. If you want to send the same document(s) to multiple stations, you can save time in feeding the document(s) by using memory transmission. That is, you can store the document(s) into memory and then send it to the desired station(s) automatically.

Make sure that the FAX lamp is ON. If not, press (\mathbb{P}_{A}) to select the "FAX MODE".

Place original(s) face up on the ADF.

Place a book or an original face down on the Platen Glass.

or

2

Make sure that "MEMORY XMT" is displayed, if "DIRECT XMT" appears, press [XMT MODE] to change to Memory Transmission.

Redialling Automatic Redialling

If a busy line is detected, the machine will redial the number up to 3 times at 3 minute interval. However, if a busy line is not detected, the machine will redial only one time. During that time, a message will appear as shown to the right.

A file number is shown in the upper right hand corner of the display if it is a memory transmission file.

WZ	EMORY AIT TO ALES I) DIAL		NO	.014		
ABC	DEF	GHI	Jk	(L	MNO		►

APOLLC)	CANADA					*
JOB STATUS	MENORY XMT M	XMT (A ODE ORIO	J H GINAI		LIGHTER	DARF	(ER D

Manual Redialling

You can also redial the last dialled number manually by pressing REDIAL key.

REDIAL/

Set original(s) face down.

2

XMT MODE

Make sure that "MEMORY XMT" is displayed, if "DIRECT XMT" appears, press XMT MODE to change to Memory Transmission.

Δ

The document(s) are stored into memory with a file number. Then the machine dials the last dialled number.

NOTE

1. While the unit is displaying "WAIT TO DIAL", you can press REDIAL to start redialling immediately.

BASIC OPERATIONS

Receiving Documents

Your machine is provided with both automatic and manual reception modes. The selection of either reception mode is made with Fax Parameter No. 017 (RECEIVE MODE).

Automatic Reception

Your machine will receive documets automatically if the Fax Parameter No. 017 (RECEIVE MODE) is set to "Auto". (See page 34)

Manual Reception

You may wish to receive documents manually if you use the telephone line in your office primarily as a personal telephone and occasionally for your facsimile machine.

To receive documents manually, change the Fax Parameter No. 017 (RECEIVE MODE) to "Manual" (See page 34) and the following message will be shown on the display.

15-AUG-2001 15:00 00% READY TO FAX MANUAL RCV

Hang up the telephone.

- 1. Your machine requires an optional fax handset or an external telephone connected to the TEL jack on the rear of the machine.
- 2. If you receive a document in Super Fine resolution (406 x 391 dpi), it might be divided into multiple pages with no reduction.

Print Reduction

This machine can use each Fixed size plain paper for recording. Sometimes, oversized documents sent to you by the other parties cannot be printed within a single page. When this occurs, the document will be divided into separate pages.

This machine is equipped with a Print Reduction function to solve this problem. You may select the most appropriate setting from the selections described below.

1.Automatic Reduction

Each received document is first stored in memory. Based on the document length, your machine will automatically calculate a suitable reduction ratio (Letter & A4: 70% to 100%, Ledger & A3: 80% to 100%) to print the entire document on a single page. If the received document is extremely long (over 39% longer than the recording paper), the original will be divided into separate pages and will print without reduction.

2. Fixed Reduction

You can pre-determine the reduction ratio from 70% to 100% in 1% steps. The received document(s) will be reduced to the fixed ratio regardless of size.

Selecting the Print Reduction Mode

- Set the Fax Parameters as shown below. (See page 34)
- 1. To set the Automatic Reduction mode.
 - (1) No. 024 Print Reduction set to "Auto".
- 2. To set the Fixed Reduction mode.
 - (1) No. 024 Print Reduction set to "Fixed".
 - (2) No. 025 Reduction Ratio set to any number between 70% through 100%. (See Note 1)
 - EX: A4 to A4 96%

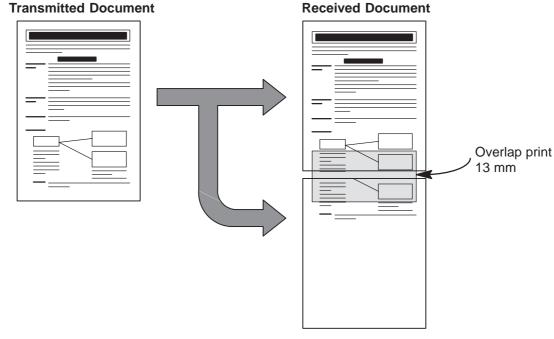

A4 to Letter - 90% Letter to Letter - 96% Legal to Letter - 75%

NOTE

1. If the sending side is set to print the header on the outside of the copy area, more reduction ratio will be required.

Receiving Oversize Documents

If the received document is extremely long (over 39% longer than the recording paper), the document will be divided into separate pages. When printing on separate pages, the bottom 13 mm of first page will be overlapped on top of the next page.

The received document is divided into two sheets with overlap printing.

NOTE

1. If the reduction method is set to Automatic Reduction mode, the document prints with no reduction when printing separate pages. If the reduction method is set to Fixed Reduction mode, the printed document is reduced by the ratio set in Fax Parameter No. 025.

Substitute Memory Reception

If the recording paper runs out or jams or if the toner runs out during reception, the machine automatically starts receiving documents into its image data memory. Stored documents are printed automatically after replacing the recording paper or the toner cartridge. (See Note 1 and 2)

When the machine finishes the memory reception and there is no recording paper or toner, add Paper or Out of Toner Indicator appears on the display.

	EADY T	2001 15 O FAX IN MEN			01%

- 1. If the memory overflows, the machine will stop receiving and release the communication line. The document(s) stored in the memory up to that moment will be printed.
- 2. If you wish to turn off the substitute reception function, change the setting of Fax Parameter No. 022 to "Invalid". (See page 34)

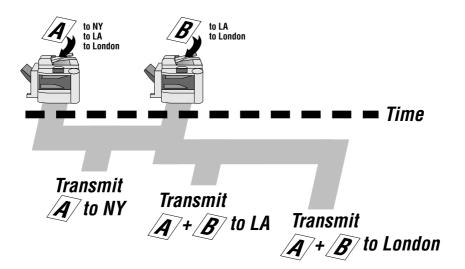

This page is intentionally left blank.

Batch Transmission

To reduce transmission time and cost, this feature allows your machine to accumulate different documents for the same destination(s) to be transmitted in a single phone call.

Real-Time Batch Transmission

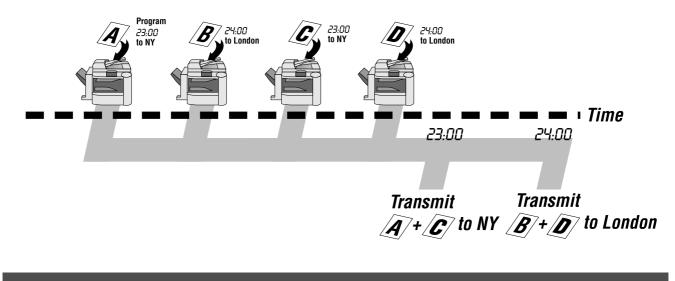

During memory transmission, your machine searches its memory for reserved files (up to 5 files) to transmit to the same destination, automatically batching and transmitting them in a single phone call. The following is an example of Real-time Batch Transmission. (See Note 1)

Delayed Batch Transmission

Assign a time for batch transmission to a Program Key in advance. All transmission(s) using the Program Key are batched and transmitted at the reserved time.

The following is an example of Delayed Batch Transmission.

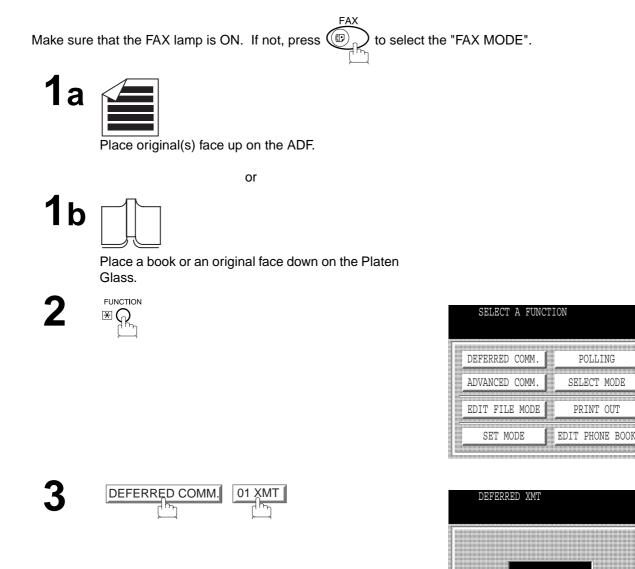

NOTE

1. The machine can not Batch to a file(s) that is/are Waiting to Redial or is currently being sent, but it will Batch to files that are pending to dial.

You can send document(s) to one or multiple stations at any preset time within the next 24 hours. Up to 50* builtin timers can be set for deferred transmission, deferred polling and deferred Advanced Communications.

Deferred Transmission

CANCEL

ΟK

Enter the start time from the keypad and press OK. (Use a 4-digit, 24-hour clock) **Ex:** (2) (3) (3) (0) (11:30 p.m.) and press OK.

Enter the start time from the keypad and press OK.

Ex: (2) (3) (3) (0) (11:30 p.m.) and press OK

ADVANCED FEATURES

Polling

Polling means calling other station(s) to retrieve document(s). The other station must know in advance that you will call and must have the document(s) set on the ADF or stored in the memory. You may need to set a polling password, shared by the other station, to ensure security.

Preparing to be Polled

In order to let other stations poll your machine, you must prepare your machine with a document(s) stored in memory. Be sure to set the polling password before storing the document(s) into memory. After being polled, the document(s) stored in memory will be erased automatically. To retain the document(s) in memory so that they can be polled repeatedly change Fax Parameter No. 027 (POLLED FILE SAVE) to "Valid".

Place original(s) face up on the ADF.

or

NOTE

1. If a password is not set in the polled station, you may poll the other station even though your machine has a password.

Your fax machine has special Program Keys. These keys are useful if you frequently need to send or poll the same group of stations. You can use these keys to store a One group key, a sequence of stations to be polled, a deferred transmission or polling sequence or an additional Phone Book Dialling station.

Dial the station(s) you wish to send the document(s) to.

Ex: PANASONIC START

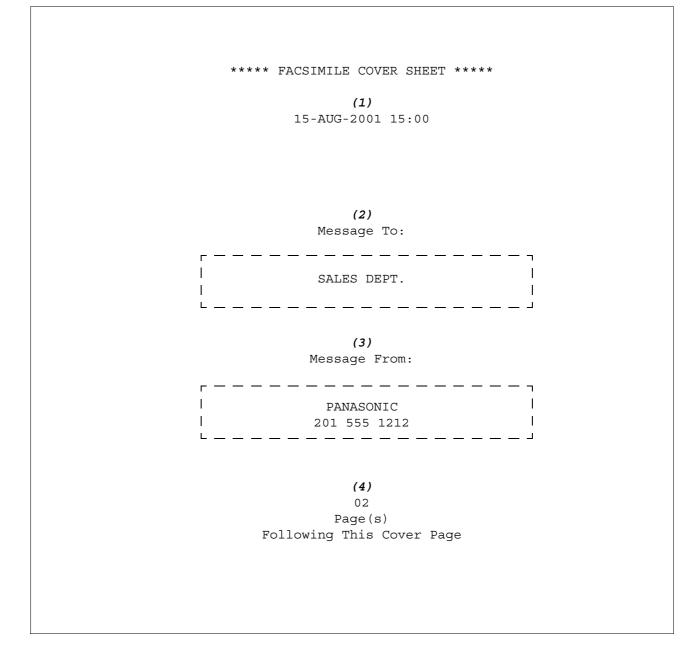

NOTE

- 1. To change the preset Fax Cover Sheet Setting, change the setting of Fax Parameter No. 056 (See page 35).
- 2. This function is available for memory or direct transmission modes.
- 3. The Fax Cover Sheet is not counted in the number of pages column of the journals.

107

Fax Cover Sheet

Fax Cover Sheet Sample

Explanation of contents

- (1) Starting time of communication.
- (2) Recorded name in the Phone Book or dialled telephone number.
- (3) Your LOGO (up to 25 characters) and ID Number. (Up to 20 digits)
- (4) The number of pages to follow. This information is not shown when transmitting by Direct Transmission Mode.

General Description

This operation requires the user to input a preset 4-digit Department Code before transmission. The Department Name of the selected Department Code is printed on the Header of each page sent, Cover Sheet, COMM. Journal and Individual Transmission Journal. When the Department Code is set, the Transaction Journal will be sorted by the Department Code number (01 - 50) when it is printed.

Setting the Department Code

Selective Reception

Your machine has a special feature, Selective Reception, which can prevent the receiving of unnecessary documents (i.e. junk fax, direct mail, etc.).

Before receiving the document(s), the last 4 digits of the ID Number received from the sending machine will be compared with the last 4 digits of the telephone number programmed in each Phone Book station. When a match is found, your machine will start receiving the document(s). If a match is not found, your machine will cancell the reception and an Information Code 406 will be recorded on the Journal.

Setting the Selective Reception

Make sure that the FAX lamp is ON. If not, press

NOTE

- 1. When the Selective Reception is set, your machine can receive only from those stations which are programmed in the Phone Book.
- 2. If your ID number has not been set, your machine might not be able to receive from some models. To set your ID number, see page 23.

General Description

Password Communications, including Password Transmission and Password Reception will prevent your machine from sending a fax to a wrong station or receiving a fax from an unauthorized stations. You can set Password Transmission and Password Reception independently, or both together.

To use Password Transmission, you must set a 4-digit transmission password in advance. The password must be shared with other compatible Panafax machine(s). If the transmission password in your machine does not match the transmission password in the other compatible Panafax machine(s), the transmission will fail. You can select password transmission by setting using FUNCTION - SELECT MODE - 05 (PASSWORD-XMT) to "ON" when you send an original.

To use Password Reception, you must set a 4-digit receiving password in advance. The password must be shared with the other compatible Panafax machine(s). If the password in your machine does not match the receiving password in the other compatible Panafax machine(s), the reception will fail. Once you set password reception and set the parameter to "**ON**", it stays until you change the setting to "**OFF**".

Compatibility with Other Machines

You can only use password transmission and reception with another Panafax compatible machine(s) listed below.

Model	Special Settings
DF-1100 DP-2000 DP-2500 DP-3000 FP-D250F FP-D350F UF-160 UF-160 UF-260 UF-270 UF-270 UF-270 UF-270M UF-280M UF-300 UF-312 UF-322 UF-550 UF-550 UF-585 UF-595 UF-595 UF-595 UF-650 UF-733 UF-744 UF-745 UF-750 UF-750 UF-755 UF-755e UF-755e UF-755e UF-766 UF-770 UF-788 UF-885 UF-885 UF-895 UF-895 UF-895	Required. 003 ORIGINAL (HOME) 004 STAMP	
004 STAMP	
005 MEMORY	
● 01/20 ● CANCEL	ОК

3

Press (or) to scroll the display to the desired Fax Parameter.

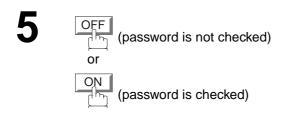

044 PASSWORD-RCV

Enter a 4-digit Receiving Password and press OK. Ex: (1) (2) (3) (4) and OK.

044 PZ PZ	ASSWORD-RCV ASSWORD=1234	
OFF	ON	
.	CANCE	LOK

NOTE

- 1. Once you set the parameter, you cannot select the parameter, "**OFF**" or "**ON**", for each reception. It is always "**OFF**" or "**ON**" until you change the setting.
- 2. To change the password, press CLEAR in Step 4. Then re-enter a new one.

Using Password Transmission

To use Password Transmission, you can set the PASSWORD-XMT "OFF" or "ON" for each Transmission by following the procedure below.

Make sure that the FAX lamp is ON. If not, press (PAX) to select the "FAX MODE".

Place original(s) face up on the ADF.

or

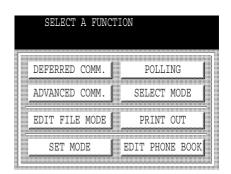

Place a book or an original face down on the Platen Glass.

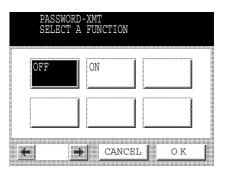

05 PASSWORD-XMT

- Dial by any combination of the following methods:
- Manual Number Dialling, press <u>SET</u> after each station is entered (up to 70 stations)
- Phone Book Dialling (up to 200 stations)

Ex: PANASONIC

6

If your machine's Transmission Password coincides with the other station's Transmission Password, your machine starts sending the documents. When transmission is completed, PASSWORD-XMT returns to the original setting ("**OFF**" or "**ON**").

Using Password Reception

There is no additional operation required once you set the parameter by following the procedure on page 130. The parameter, "**OFF**" or "**ON**", cannot be selected for each reception. It is always "**OFF**" or "**ON**" until you change the setting.

Your machine is equipped with two Confidential Communication features which ensure that the Confidential information you send is received only by the person with the correct confidential code.

Confidential Mailbox

The confidential mailbox feature can be used as a mailbox to communicate with other compatible models using a 4-digit confidential code. The Confidential Mailbox feature receives document(s) with a confidential code into memory. These documents can only be printed by the person who has the correct confidential code.

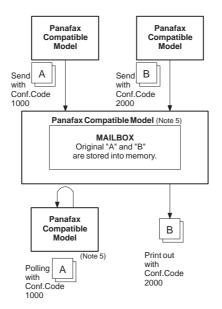

Figure 1 : Confidential Mailbox

Compatibility with Other Machines

Table 1 shows a list of compatible Panafax models which have the Confidential Mailbox feature. It also shows whether or not special settings are required.

Table 1 : Confidential Mailbox Requirement

		Со	mpatible M	odel			Special Settings
DF-1100 UF-332 UF-595 UF-770	DP-2000 UF-333 UF-733 UF-788	DP-2500 UF-342 UF-744 UF-880	DP-3000 UF-344 UF-745 UF-885	UF-280M UF-550 UF-755 UF-895	UF-312 UF-560 UF-755e	UF-322 UF-585 UF-766	Not Required.

NOTE

- 1. If your machine receives two confidential faxes with same confidential code, both documents are stored together in the same confidential mailbox.
- 2. Up to 20 Mailbox files can be stored in memory. So, you can receive the confidential fax using 20 different confidential codes.
- 3. If the memory overflows, the machine will stop receiving and release the line.
- 4. We recommend that optional flash memory card be installed when this function is used. (See page 174) on Image Memory Capacity.
- 5. If confidential faxes were received in the mailbox of UF-733, you cannot poll those documents. The UF-733 is designed to print the received confidential document(s) locally only.

Sending a Confidential Document to a Remote Station's Mailbox

Make sure that the FAX lamp is ON. If not, press (PAX) to select the "FAX MODE".

Place original(s) face up on the ADF.

or

Place a book or an original face down on the Platen Glass.

NOTE

1. The confidential file will be erased automatically at the center station after being polled.

Receiving a Confidential Document into Your Machine's Mailbox

No special setting is required, your machine comes with this feature ready to use. Your machine receives a confidential fax the same way it receives a normal fax message. When receiving the confidential fax, the display shows the following message (CONF. RCV REPORT) and prints the Confidential Receive Report.

Sample CONF. RCV Report

*********	*******-CONF. RCV	REPORT- ******	****DATE 15	-AUG-2001	****TIM	E 15:00 *********	*

General Description

The Sub-Addressing function allows you further routing, forwarding or relaying of document(s) to the desired recipient(s) when used in combination with the Networking version of LaserFAX software. This function conforms to the ITU-T recommendation for T. Routing-Facsimile Routing utilizing the Sub-Address.

Compatibility with Other Machines

 Sub-Addressing Transmission:DF-1100/DP-2000/DP-2500/DP-3000/DX-1000/2000/FP-D250F/D350F/UF-332/333/342/344/550/560/585/595/770/788/880/885/895 (see Note 2)

• Sub-Addressing Reception: DX-1000/2000 and DF-1100/UF-342/344/550/560/585/595/770/788/880 with PC Interface using the Networking version of LaserFAX software.

Sub-Addressing Transmission Methods

You can send a document with Sub-Address information to the desired recipient by the following methods.

- By registering the Sub-Address information into the Phone Book Numbers.
- By specifying the Sub-Address information in the Manual Number Dialling Mode.

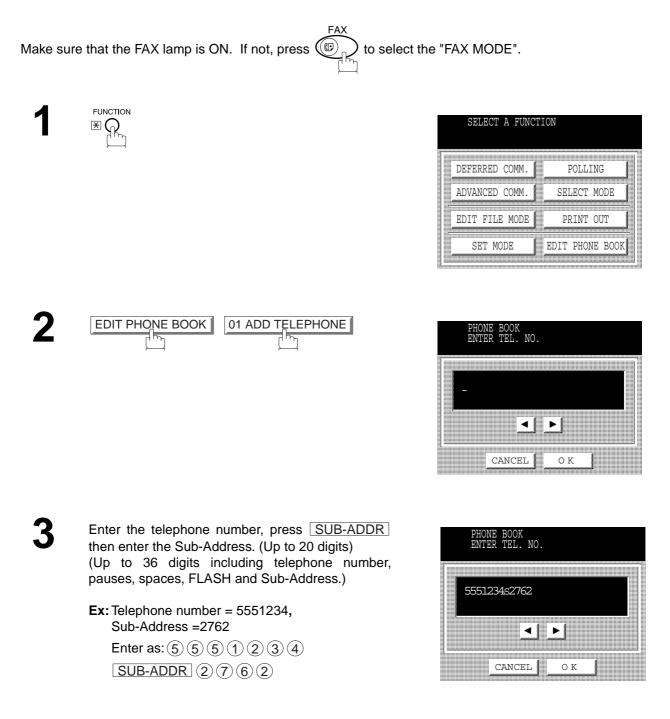

Setting of Routing, Forwarding or Relaying

You can customize the Automatic Routing to any combination of LAN (Local Area Network), PSTN (Public Switched Telephone Network) or PBX Extension with LaserFAX Routing Table (please refer to the LaserFAX User Manual).

NOTE

- 1. LaserFAX is trademarks of Wordcraft International Ltd.
- 2. UF-788 with PC Interface Option or the Option ROM installed.

Setting the Sub-Address into a Phone Book Numbers

Δ

And then continue to enter the station name and key name.

	Dr. P.N. Cundall, Wining Surveys Ltd								
	Arlations of print density of cause the photocell to generate an analogous electrical video signal. This signal is used to modulate a carrier, which is transmitted to a remote destination over a radio or cable communications link. At the remote terminal, demodulation reconstructs the video signal, which is used to modulate the density of print produced by a printing device. This device is scanning in a raster scan synchronised with that at the transmitting terminal. As a result, a facsimile copy of the subject document is produced.								
		Pro	bably you	1 have uses for t	his faci	lity in your	organis	ation.	

Yours sincerely,

Phil.

P.J. CROSS Group Leader - Facsimile Research

Explanation of contents

- (1) Indicates the communication mode
- (2) Start time of communication
- (3) End time of communication
- (4) File number
- : 001 to 999 (When the communication is stored into memory, a file number is assigned for each communication.) (5) Station number : Sequential number of the Stations. (6) Communication result : "OK" indicates that the communication was successful. "BUSY" indicates that the communication has failed because of busy line. "STOP" indicates that STOP was pressed during communication. "B-OK" indicates that the Batch Transmission was successful.
- "M-OK" indicates that the substitute reception message in memory was not printed. "P-OK" indicates that memory overflow or original misfeeding occurred while storing the document(s) into memory for transmission but successfully stored document(s) was sent. "R-OK" indicates that the Relayed XMT or Confidential Communication was successful. "3-digit Info Code" (See page 169) indicates that the communication has failed. In this case, the machine will print the attached report with first page of your document as shown on the previous page. : The mark indicates dialled by direct number dial. (7) Abbreviated number or **a** mark
- (8) Recorded name in One-Touch, ABBR. or direct dialling number
- (9) Number of pages transmitted or received
- : The 3-digit number is the number of pages successfully transmitted or received. When the documents are stored into memory, two 3-digit numbers will appear. The first 3-digit number represents the number of pages successfully transmitted. The second 3-digit number represents the total number of pages that were attempted to be transmitted.
- (10) Duration of Communication

Phone Book List

To print a Phone Book List of the telephone numbers you have stored

Make sure that the FAX lamp is ON. If not, press (PAX) to select the "FAX MODE".

Explanation of contents

- (1) The first letter of key name recorded in your machine
- (2) Key name recorded in the machine
- (3) Station name recorded in the machine
- (4) Telephone number recorded in the machine
- (5) Number of recorded Phone Book numbers
- (6) Telephone Line used

- : Up to 10 characters
- : Up to 15 characters
- : Up to 36 digits
- : AUTO, L-1, L-2 (Indicates the Telephone Line (L-1 = Line-1, L-2 = Line-2) that was used for the communication.)

Group and Program List

To print a Group and Program List of the Dialling Patterns that you have previously entered into the Program Keys.

Make sure that the FAX lamp is ON. If not, press (P_{r}) to select the "FAX MODE".

Sample FAX Parameter List

Explanation of contents

(1) Parameter number		(4) Current setting	: "" indicates code or password is not set. When the code or password is set, it is shown in parenthesis.
(2) Description	: "(HOME)" means home position setting.	(5) Standard setting	: Factory preset standard setting
(3) Selection		(6) Memory size	: (Base memory + option memory)
		(7) Changed setting	: "*" indicates that the Factory preset setting was changed.

If You Have Any of These Problems

Mode	Symptom	Cause / Action	Page
During Transmission	Document doesn't feed/multiple feeds	 Check that your document is free of staples and paper clips, and that it is not greasy or torn. Check that your document is the right type to send through an ADF by consulting the list on "Originals You Cannot Send". If your document has the characteristics listed, use the Platen instead. Check that the document is loaded properly. 	37
	Does not stamp	Check Fax Parameter No. 004 and No. 028 settings.	33, 34
	Stamp too light	Replace stamp or refill ink.	169
Transmission Copy	Vertical lines on the transmitted document	Check own copy quality. If copy is OK, your machine has no problem, report to the receiving party that they have a problem. If copy is NG, clean the Scanning Area.	
Quality	Transmitted document is blank		
	i Add Paper	Replenish the recording paper.	
	Recording paper misfeed	Remove the misfed paper. (See Operating Instructions (for Copier page 58))	
	Recording paper doesn't advance into machine	Make sure that there is paper in the Paper Tray(s). Follow the instructions for loading paper.	
During Reception	Recording paper doesn't eject after printing	Check to see if the recording paper has misfed inside of the machine.	
	Document auto reduction doesn't work	Check Print Reduction settings.	67
	K : Add Toner	Replace the Toner Cartridge.	
	I No Waste Toner Box	Install the Waste Toner Box.	

Mode	Symptom	Cause / Action	Page
	No dial tone	 Check the connection of the telephone line. Check the telephone line. 	9
Communication	No auto answer	 Check the connection of the telephone line. Check the Reception mode setting. If the Fax Parameter No. 013 (AUTO JOURNAL PRINT) is set to "Valid" (default setting) and the machine is printing the received document(s) from memory, which also happens to be the 100th transaction, the machine will not auto answer until the Transaction Journal completes printing. 	171 65
	Cannot transmit or receive	An information code will be shown on the display. Refer to the information code table to find out the trouble.	169
No Unit Operation	No unit operation	To reset the machine, turn-off the Power Switch for a few seconds then turn it on again.	9

Information Codes

When something unusual occurs, the display may show one of the Information Codes listed below. These will help you to identify and correct the problem.

Info. Code	Meaning	Action	Page
400	During initial handshake, receiving station did not respond or communication error occurred.	 Check with the other party. Reload the document(s) and send again. 	
401	Remote station required a Receiving Password to receive the original. Remote station does not have Confidential Mailbox.	Check the remote station.	
402	During initial handshake, communication error occurred.	Reload the document(s) and send again.	
403	No polling capability at the remote side.	Ask remote side to set "POLLED=ON".	
404/405	During initial handshake, communication error occurred.	Reload the document(s) and send again.	
406	Transmission Password does not match. Receiving Password does not match. Received from an unauthorized station in Selective Reception mode.	Check the password or the telephone number in the Phone Book.	125 128 130
407	No confirmation from the receiving station for the previous page sent.	Wait a few minutes and send again.	
408/409	Remote side confirmation of previous page is illegible.	Wait a few minutes and send again.	
410	Communication aborted on the transmitting side.	Check with the other party.	
411	Polling password does not match.	Check the polling password.	34
412	No data from the transmitting side.	Check with the other party.	
414	Polling password does not match.	Check the polling password.	34
415	Polling transmission error.	Check the polling password.	34
416/417 418/419	Received data has too many errors.	Check with the other party.	
420/421	Machine goes to receiving mode, but receives no command from the transmitting side.	 Remote side misdial. Check with the other party. 	
422/427	Interface is incompatible.	Check with the other party.	
430/434	Communication error occurred while receiving.	Check with the other party.	
436/490	Received data has too many errors.	Check with the other party.	
456	 Unit received a confidential document or was requested to be polled of a confidential document under any of following conditions. 1) Not enough space in memory to receive the confidential document. 2) Confidential Mailbox is full. 3) While printing received document(s). 		89
492/493 494	 Unit was requested to relay a document. Communication error occurred while receiving. 	Check with the other party.	
495	Telephone line disconnected.	Check with the other party.	
100		chock war alo onlor party.	

Info. Code	Meaning	Action	Page
501/502	Communication error occurred using the internal V.34 Modem.	Check with the other party.	
540/541 542 543/544	Communication error occurred while transmitting.	 Reload the document(s) and send again. Check with the other party. 	
550	Telephone line disconnected.	Check with the other party.	
552/553 554/555	Communication error occurred while receiving.	Check with the other party.	
580	Sub-Address transmission to a unit that has no Sub- Address function.	Check the remote station.	145
581	Sub-Address Password transmission to a unit that has no Password Sub-Address function.	Check the remote station.	145
630	Redial was not successful due to a busy line.	Reload the document(s) and send again.	
631	During dialling, STOP was pressed.	Reload the document(s) and send again.	
634	Redial was not successful due to no response from the called station or wrong number dailled. Note: If busy tone was not detected, the machine will	Check the telephone number and send again.	
	only redial once.		
638	Power failure occurred during the communication.	Check the power cord and plug.	
870	Memory overflow occurred while storing document(s) into memory for transmission.	 Transmit document(s) without storing into memory. Install Optional Memory Card. 	48

NOTE

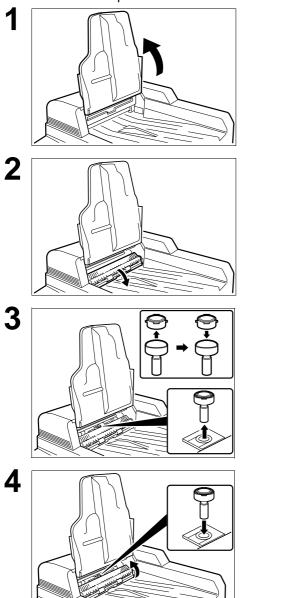

(For mechanical failures, see the Troubleshooting section in the Operating Instructions (For Copier page 66))

^{1.} After identifying the problem and verifying the recommended action, if the Information Codes keep reoccurring or for help on Information Codes that appear on your machine but are not listed above, please contact your local Authorized Panasonic Dealer.

Verification Stamp

The Verification Stamp contains ink. When the stamp mark appears faded or hard to see, the stamp should be replaced.

To remove the stamp

Open the ADF Input Tray.

Open the ADF Exit Cover.

- (1) Remove by pulling the Stamp Assembly upward.
- (2) Remove the Stamp. Replace the stamp with a new one.

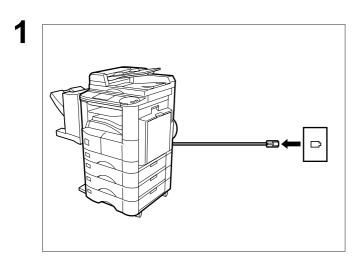

Reinstall the Stamp Assembly.

NOTE

1. Please contact your local Authorized Panasonic Dealer to purchase a new stamp. See page 72 of the Operating Instructions (For Copier) for order number.

2

If you do not hear a dial tone when the MONITOR key is pressed or the incoming call does not ring on your machine (No automatic receive).

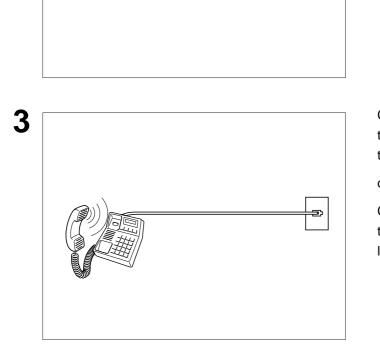

Unplug the Telephone Line Cable from the telephone jack that was supplied by the telephone company.

Plug a different regular telephone into the same telephone jack.

Check for dial tone through the handset. If there is still no dial tone, report it to your local telephone company.

or

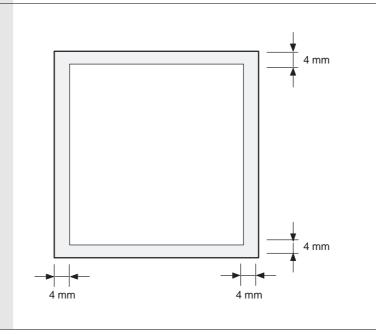

Call from another telephone to this number. If the telephone does not ring, report it to your local telephone company.

Specifications

Compatibility	ITU-T Group 3	
Coding Scheme	JBIG, MH, MR, MMR (Conforms to ITU-T Recommendations)	
Modem Type	ITU-T V.34, V.17, V.33, V.29, V.27ter and V.21	
Modem Speed	33600 - 2400 bps	
Original Size	A3/FLS•B4/A4/A5	
Original Thickness	0.07 mm (50g/m ²) - 0.15 mm (110 g/m ²)	
ADF Capacity (Automatic Document Feeder)	Up to 50 sheets (A4, A5 : 64 g/m ²) Up to 30 sheets (A3, FLS•B4 : 64 g/m ²)	
Scanning Method	Sheet Feeding or Flatbed with CCD type image sensor	
Effective Scanning Width	292 mm	
Scanner Resolution	Horizontal: 8 pels/mm : Standard and Fine Resolution : 16 pels/mm : Super Fine Resolution Vertical : 3.85 lines/mm : Standard Resolution : 7.7 lines/mm : Fine Resolution : 15.4 lines/mm : Super Fine Resolution	

Specifications

Phone Book Memory Capacity	200 stations Each station can register up to 36 digits for each telephone number (including pauses and spaces) and up to 15 characters for each station name		
Image Memory Capacity			
	Base Memory	120 pages	
	with 4 MB Flash Memory Card	440 pages	
	with 8 MB Flash Memory Card	760 pages	
	Based on ITU-T Image No. 1 chart,	using Standard Resolution)	
Power Consumption	Normal Operation Mode:Approx.Energy-Saver Mode:Approx.Sleep Mode:Approx.Maximum:Approx.	3.5 Wh	

Options and Supplies

The DP-2500/3000 is a digital photocopier which can produce images with great clarity. Furthermore, its copying functionality can also be greatly enhanced by the addition of specially selected options and supplies. For a list of available options and supplies, see the Operating Instructions (For Copier).

175

ADF (Automatic Original Feeder)	The mechanism that delivers a stack of original pages to the scanner one page at a time.
Automatic Reception	The mode that allows you to receive fax documents without user intervention.
Auto Print Reduction	The method of automatically reducing a received document so that it can be printed onto a standard size piece of plain paper. For example, your machine will reduce an incoming legal size page to 75% of its original size so it could fit on a letter size page.
Batch Transmission	The ability to accumulate different document files for the same destination(s) to be transmitted in a single phone call.
BPS (Bits Per Second)	The amount of data that is transmitted over the phone line. Your machine can start at the Max. Modem speed and automatically steps down to suitable speed depending on the phone line condition and the receiving machines capabilities. (Max. Modem Speed is 33600 BPS)
C.C.I.T.T.	Consultative Committee on International Telegraph and Telephone. This organization has presently developed four groups of industry standards that insure facsimile compatibility.
Character ID	A programmed proprietary code name that allows up to 16 alphanumeric characters identifying your facsimile machine.
Coding Scheme	The data compression method used by facsimile machines. Your machine utilizes Modified Huffman (MH), Modified Read (MR), Modified Modified Read (MMR) and Joint Bi-level Experts Group (JBIG) coding schemes.
Comm. Journal	Refers to either the Communication Journal, Relay Transmission Report, or the Confidential XMT Report.
Confidential RCV Report	The report that gives you information about a confidential document(s) that is held in your machine's memory.
Contrast	Signifies the scanning sensitivity in terms of lightness and darkness of your original transmitting pages.
Cover Sheet	A Fax Cover Sheet can be attached to your transmit document(s) that shows the recipient's name, originator's name and number of pages attached.
DDD (Direct Distance Dialling)	A telephone service that allows unassisted dialling, no operator assistance is required.
Deferred Polling	The ability to retrieve documents from other stations at a later time.
Deferred Transmission	The ability to send documents to other stations at a later time.
Department Code	This operation require the user to input a preset 4-digit Department Code before transmission. The Department Name of selected Department Code is printed on the Header of each page sent, Cover Sheet, Comm. Journal and Individual Transmission Journal.
Direct Dialling	The method of dialling where you enter the entire telephone number through the keypad.
DTMF (Dual Tone Multi- Frequency)	Dialling method that sends a different set of frequencies for each digit of the telephone keypad. Commonly refers to touch tone dialling.

Duplex Scan	The ability to scan both sides of 2-sided original(s) for transmission.
ECM (Error Correction Mode)	The ability to correct transmission errors as detected during the transmitting phone call.
End Receiving Station	In a relay network, the final station designated to receive the document(s).
FAX Parameter List	The list that contains the home Fax Parameter settings that you have programmed into your machine.
F.C.C.	Federal Communications Commission. The U.S. Government organization that regulates communications originating or terminating in the United States.
File	A task that has been stored into the memory of your unit. Examples are deferred transactions.
Fixed Print Reduction	The method that allows you to determine one reduction rate, such as 75%, for all incoming documents.
Function	The control panel key that will be utilized to begin an operation or configuration of a feature.
G3 Mode (Group 3)	Refers to the standards and transmission capabilities of the current generation of facsimile machines.
Group Dialling	The ability to program many telephone numbers into a single station so that many locations can be dialled in sequence utilizing a single keystroke.
Handshaking	The exchange of a group of control signals that communicate between the transmitter and receiver. These signals determine the condition at which communication can occur.
Header	A row of information that is transmitted by the sending machine and printed on the top of each page by the receiving unit. This identifies the transmitting unit and information about the transmission, such as time and date.
ITU-T	International Telecommunication Union - Telecommunication, formerly known as C.C.I.T.T.
ITU-T Image No. 1	An industry standard original that allows comparisons of the transmission speeds and capabilities of facsimile machines.
ID	A programmable address of up to 20 digits identifying your machine.
Image Memory Capacity	This signifies the amount of memory available in your machine for storing pages of documents. All page units of measure are based on the ITU-T Image No.1.
Index Keys	A series of alphabetized keys for easy access to the stations programmed in the Phone Book.
Individual Transmission Journal	A report that is printed by the transmitting unit stating information regarding the last document transaction.
Industry Canada (D.O.C)	Department of Communications. The Canadian Government organization that regulates communications originating or terminating in Canada.
Information Code	A code that is internally generated by your Fax machine stating a specific operational error or machine failure.

177

Initial Sending Station	In a relay network, the station that is originating the original transmission.
Journal	A report that is printed by your unit listing the last 100 transactions.
Key Name	An alternate to the station name that can be programmed for each Phone Book dialling number key. (By default it displays the first 10-characters of the station Name)
Keypad	A group of numeric keys located on your control panel.
LCD	Liquid Crystal Display. The display area of your machine.
Manual Reception	A mode that requires operator intervention to receive an incoming document.
Memory Transmission	The documents are scanned into memory before actual connection to the phone line for transmission.
Modem	A device that converts signals from your fax machine into signals that can be transmitted over telephone lines.
Multi-Station Transmission	The ability to broadcast the same set of documents to a programmed number of locations.
Off-Hook Dialling	The direct dialling of a telephone number with the optional handset out of the cradle or "off the hook."
On-Hook Dialling	The direct dialling of a telephone number with the optional handset in the cradle or "on the hook."
Overlap Printing	Documents too long to be reduced are automatically printed on two pages with approximately 13 mm overlap.
Panasonic Super Smoothing	An electronic image enhancement (Panasonic Super Smoothing) that will create a particular pattern for the improvement of copy quality.
Phone Book Number	The ability to store full phone numbers into the dialer and then utilizing a single keystroke to speed dial that number in the future.
Photo	A scanning technique to distinguish levels of gray from black and white. Your machine can detect up to 256 levels of gray in photo mode.
Polling	The ability to retrieve document(s) from another facsimile machine.
Polling Password	A 4-digit programmed code that enables the security of document(s) being polled.
Print Reduction Modes	The methods used to determine how an incoming document will be reduced to print onto the paper loaded in your machine.
Program Keys	Keys that are defined for storing a sequence of stations to be dialled or polled.
Protocol	A protocol is the special set of rules for communicating that the end points in a telecommunication connection use when they send signals back and forth. Both end points must recognize and observe the protocol.
PSTN	Public Switched Telephone Network. Network of interconnected switching equipment and transmission facilities.
Qwerty Keyboard	A keyboard on the Touch Panel Display that is used to enter letters and symbols for various programming functions.

Receiving Password	A 4-digit password that is checked before a document is received.
Relay Transmission Report	A report that contains information regarding the last document transmission to a relay station.
Rotation XMT	The document is set as ((), the image is rotated by 90° and then transmitted as (() .
Selective Reception	A function that can be set so that your unit will receive from only those machines programmed into your dialer.
Station Name	Alphanumeric ID which can be programmed for each Phone Book dialling number.
Stored Originals	Documents that have been scanned and now are stored in your machine's memory.
Sub-Address	ITU-T recommendation for further routing, forwarding or relaying of incoming faxes.
Sub-Address Password	ITU-T recommendation for additional security that corresponds to the Sub-Address.
Substitute Memory Reception	Your machine's ability to store an incoming document into its memory, when it runs out of recording paper or toner.
Transmission Reservation	The ability to preset a telephone number so that you may reserve a transmission while your unit is performing another function.
Transmission Password	A 4-digit password that is checked when a document is transmitted.
User Parameter	Programmed parameters that provide information to other stations. Examples are logo, character ID, date and time.
Verification Stamp	A user selectable transmission verification stamp that stamps an "X" mark on the scanned documents that are successfully transmitted or stored in memory.
View Mode - File List	Allows you to view the brief contents of the memory files through the LCD display without having to print the Memory File List.
View Mode - Journal	Allows you to view the brief contents of the journal through the LCD display without having to print the journal.
