("EB" and "GS" area code models only)

For your safety, please read the following text carefully. This appliance is supplied with a moulded three pin mains plug for your safety and convenience. A 5-ampere fuse is fitted in this plug. Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362. Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced. If you lose the fuse cover the plug must not be used until a replacement cover is obtained. A replacement fuse cover can be purchased from your local dealer.

CAUTION!
IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY. THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as stated below. If in any doubt please consult a qualified electrician.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:
Blue: Neutral, Brown: Live.
As these colours may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:
The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured Black or Blue.
The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured Brown or Red.

WARNING: DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL WHICH IS MARKED WITH THE LETTER E, BY THE EARTH SYMBOL  OR COLOURED GREEN OR GREEN/YELLOW.

THIS PLUG IS NOT WATERPROOF—KEEP DRY.

Before use

Remove the connector cover.

How to replace the fuse

The location of the fuse differ according to the type of AC mains plug (figures A and B). Confirm the AC mains plug fitted and follow the instructions below.

Illustrations may differ from actual AC mains plug.

1. Open the fuse cover with a screwdriver.

2. Replace the fuse and close or attach the fuse cover.

 Please check and identify the supplied accessories. Use numbers indicated in parentheses when asking for replacement parts.

Caution for AC Mains Lead/Accessories

Simple setup

STEP 1

HT870

Make sure you have all the indicated components before starting the assembly, setup, and connection.

4 bases

4 pipes

2 front and 2 surround speaker units

4 large washer screws

8 small screws

4 mounting plates

Front and surround speaker assembly

Note

The front and surround speaker pairs as well as the pipe pairs are different.

- Check the label on the rear of the speaker before attaching the pipe (→ page 8).
- The pipe with the shorter cable is for the front speaker unit.

Preparation

- To prevent damage or scratches, lay a soft cloth and perform assembly on it.
- For assembly, use a Phillips-head screwdriver.

1 Attach the pipe to the base.

1 Thread the speaker cable through the base.

Lessen excess speaker cable.

2 Insert the pipe.

Insert the pipe while slightly pulling on the speaker cable.

3 Secure the pipe to the base.

Ensure the screw is securely fastened.

The supplied stands are specially designed for attachment to Panasonic SB-PF921 front speakers and SB-PS921 surround speakers. Only use as indicated in this setup.

2 Attach the stand to the front and surround speaker.

- There is no difference between the right and left speakers and stands.
- Using the polyfoam included with this unit may be convenient.

1 Remove the screw and separate the mounting plate into two parts.

2 Attach the plate A to the speaker.

Ensure the plate A is fastened on straight by lightly tightening the top and bottom screws alternately until fully tightened.

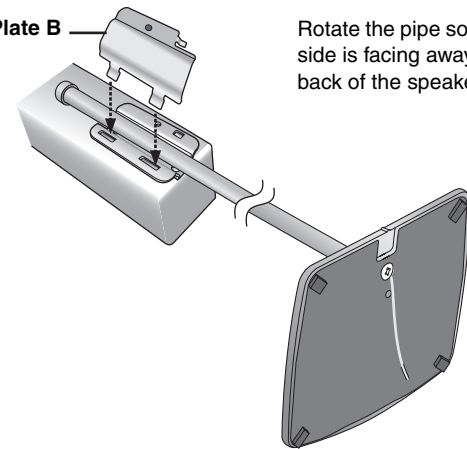

You can also attach to the upper rear of the speaker.

The height of the speaker is indicated in the diagram (→ page 5) when attaching the plate A to the upper rear or lower rear of the speaker.

3 Place the pipe on the plate A and attach the plate B.

Plate B

Rotate the pipe so that the flat side is facing away from the back of the speaker.

Fit the offset into the slot and slide the plate B into the locked position.

4 Secure the plate with the same screw removed in procedure 1.

■ Front and surround speaker height

(Assembled diagram)

3 Adjust the speaker height.

- Check the screws you tightened on page 4.

e.g. Attaching the stand to the lower rear of the speaker

- 1 Loosen the attached speaker mounting plate screw until the attached speaker is slightly loose and adjustable.

Be careful not to loosen the screw too much or the speaker may detach and fall.

- 2 With one hand on the base, and the other holding the speaker, adjust the height of the speaker up and down.
 - After adjusting the height, tighten the screw on the mounting plate securely.

Phillips-head screwdriver

Stopper screw

Screw to stop mounting plate from moving or sliding below this point.

For your reference

You can enjoy good acoustics by adjusting the height of the speaker with the height of the television so the center positions of both are approximately the same.

4 Connect the speaker cables.

- 1 Twist off the vinyl ends of the speaker cables.

- 2 Press the speaker cable into the groove.

If there is any excess speaker cable, detach the rubber cap on the top of the pipe and thread the speaker cable into the opening while pulling the speaker cable from the bottom of the base.

5 Fasten the speaker cable to the base.

- 1 Press the speaker cable and thread between the hooks.

Rear side of base

- 2 Fit the speaker cable into the base cover groove as far as possible.

Cable

■ Preventing the speakers from falling over (Front and surround speakers)

Preparation

Attach screw eyes (not included) to secure the speakers to the wall (→diagram right).

- You will need to obtain the appropriate screw eyes to match the walls and pillars to which the screw eyes are going to be fastened.
- Consult with a qualified housing contractor concerning the appropriate procedure when attaching to a concrete wall or a surface that may not have strong enough support. Improper attachment may result in damage to the wall or speakers.

- 1 Thread the string (not included) through the slot on the rear of the speaker to prevent it from falling over.
- 2 Loop the string through the screw eye and tie tightly.

STEP 1 HT878

Front and surround speaker assembly

Make sure you have all the indicated components before starting the assembly, setup, and connection.

4 speaker units

4 stands

4 bases

8 silver screws

4 speaker cables

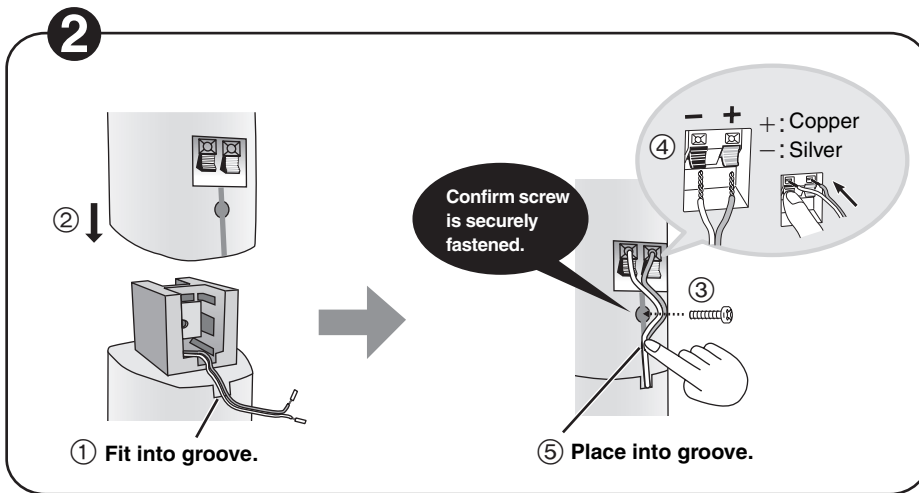

• 2×4-m cables:
For front speakers

• 2×10-m cables:
For surround speakers

Assembled

• You can attach the speakers directly to their bases (if you want to put them on shelves, for example).

■ Preventing the speakers from falling over (Front and surround speakers)

Note

Consult with a qualified housing contractor concerning the appropriate procedure when attaching to a concrete wall or a surface that may not have strong enough support. Improper attachment may result in damage to the wall or speakers.

Other speaker setup options

HT878 (Center speaker only) HT870 HT520

■ Attaching to a wall

- 1 Drive a screw (not included) into a wall.
- 2 Fit the speaker securely onto the screw(s) with the hole(s).

- The wall or pillar on which the speakers are to be attached should be capable of supporting 10 kg per screw. Consult a qualified building contractor when attaching the speakers to a wall. Improper attachment may result in damage to the wall and speakers.

HT870

- When mounting the front and surround speaker to a wall, we recommend using a string (not included) to prevent it from falling (→ page 5).
- Use of optional speaker cables are recommended for wall-mounted front and surround speakers. (You can also remove the speaker cables from the pipes supplied with this system.)

Front and surround speakers HT870

Center speaker HT520

So that the speaker fits up against the wall squarely, be sure to press the speaker cable down into the groove.

Center speaker HT878

Center speaker HT870

■ Fitting speaker stands (not included)

HT878 HT870 (Center speaker only) HT520

Ensure the stands meet these conditions before purchasing them.

Observe the diameter and length of the screws and the distance between screws as shown in the diagram.

- The stands must be able to support over 10 kg.
- The stands must be stable even if the speakers are in a high position.

e.g. HT520 Front speaker

STEP 2 Locating

HT878

How you set up your speakers can affect the bass and the sound field. Note the following points.

- Place speakers on flat secure bases.
- Placing speakers too close to floors, walls, and corners can result in excessive bass. Cover walls and windows with thick curtains.
- Place the front, center, and surround speakers at approximately the same distance from the seating position. The angles in the diagrams are approximate.

- The front left, right and surround speakers are all the same.

Setup example

HT870

Do not use a front speaker as a surround speaker or vice versa. Verify the type of speaker with the label on the rear of the speaker.

- The left and right speaker pairs are the same with respect to the front and surround speakers.

Setup example

• The front left, right and surround speakers are all the same.

Setup example

• Use only supplied speakers

Using other speakers can damage the unit and sound quality will be negatively affected.

- Set the speakers up on an even surface to prevent them from falling. Take proper precautions to prevent the speakers from falling if you cannot set them up on an even surface.

Main unit

Note

Keep your speakers at least 10 mm away from the system for proper ventilation.

Center speaker

- Vibration caused by the center speaker can disrupt the picture if it is placed directly on the television. Put the center speaker on a rack or shelf.
- To prevent the speakers from falling, do not place directly on top of the television.

Subwoofer

Place to the right or left of the television, on the floor or a sturdy shelf so that it won't cause vibration. Leave 10 cm at the rear for ventilation.

Caution

Hold the speakers by the sides. Applying pressure to the front net can damage the speaker.

e.g. HT520

Notes on speaker use

- You can damage your speakers and shorten their useful life if you play sound at high levels over extended periods.
- Reduce the volume in the following cases to avoid damage.
 - When playing distorted sound.
 - When the speakers are receiving howling from a record player, noise from FM broadcasts, or continuous signals from an oscillator, test disc, or electronic instrument.
 - When adjusting the sound quality.
 - When turning the unit on or off.

If irregular coloring occurs on your television

The supplied speakers are designed to be used close to a television, but the picture may be affected with some televisions and setup combinations.

If this occurs, turn the television off for about 30 minutes.

The television's demagnetizing function should correct the problem. If it persists, move the speakers farther away from the television.

Caution

- The main unit and supplied speakers are to be used only as indicated in this setup. Failure to do so may lead to damage to the amplifier and/or the speakers, and may result in the risk of fire. Consult a qualified service person if damage has occurred or if you experience a sudden change in performance.
- Do not attempt to attach these speakers to walls using methods other than those described in this manual.

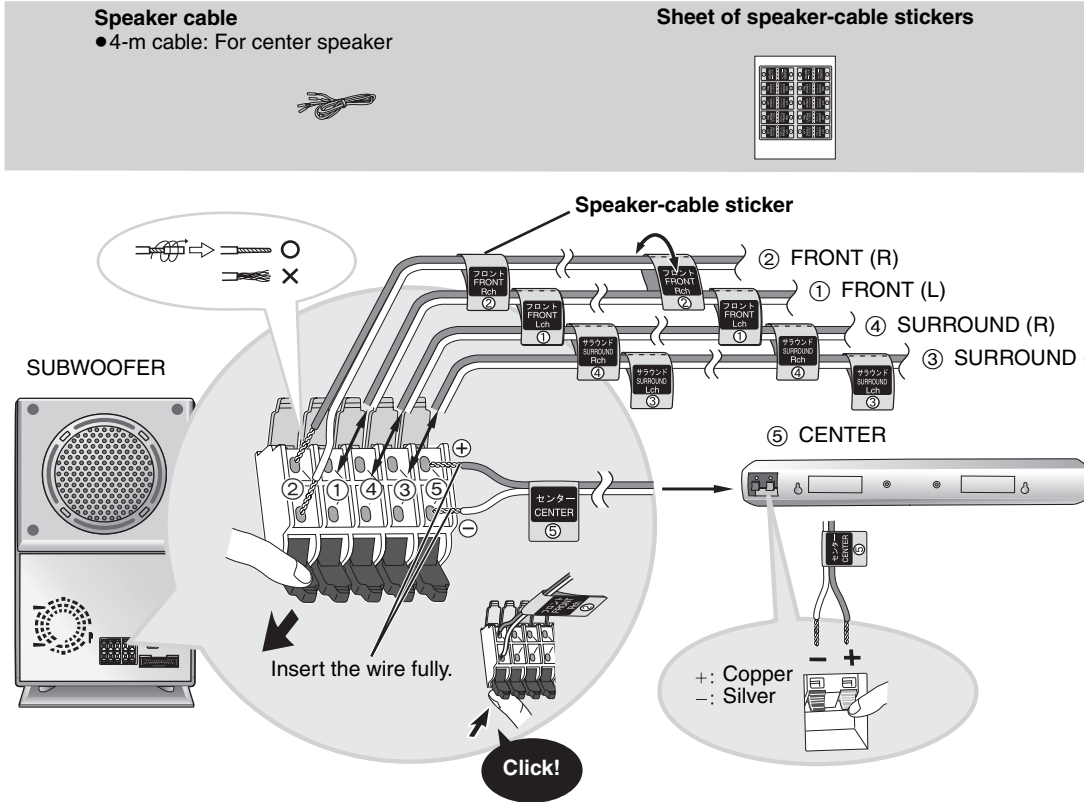

STEP 3 Connecting speakers with the subwoofer

Attach the speaker-cable stickers to make connection easier.

Note

- Never short-circuit positive (+) and negative (-) speaker wires.
- Be sure to connect only positive (copper) wires to positive (+) terminals and negative (silver) wires to negative (-) terminals. Incorrect connection can damage the speakers.

HT878

HT870

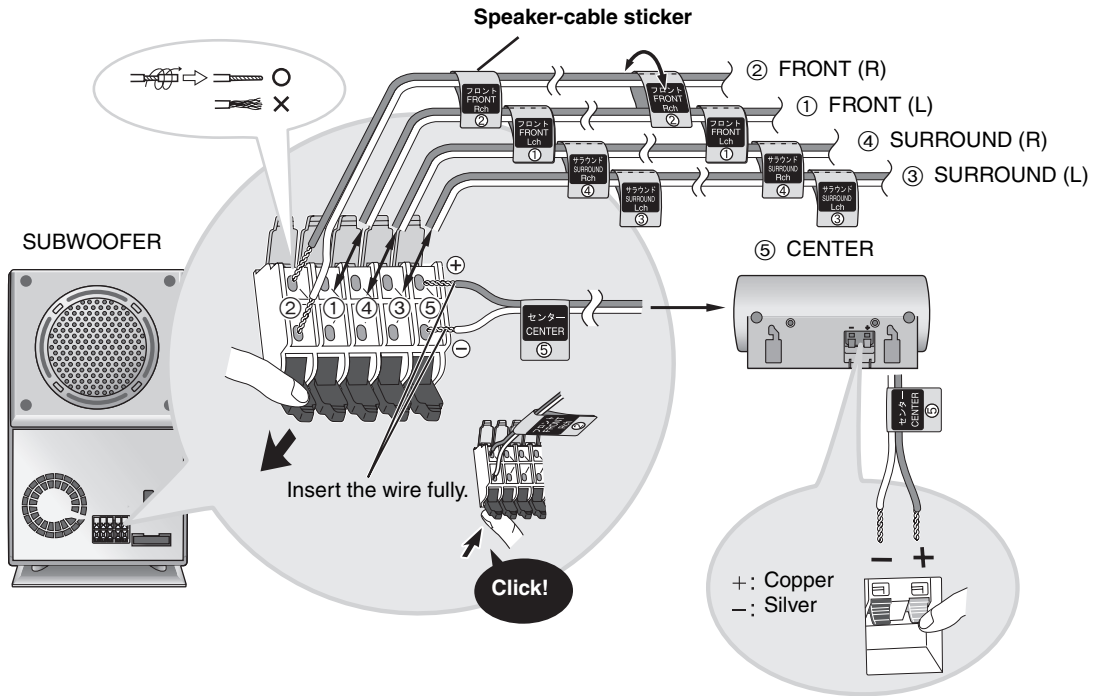

5 speaker cables

- 3×4-m cables: For front and center speakers

- 2×10-m cables: For surround speakers

Sheet of speaker-cable stickers

STEP 4 Video connections

- **Do not connect through the video cassette recorder.**
Due to copy guard protection, the picture may not display properly.
- Turn the television off before connecting, and refer to the television's operating instructions.

■ Television with a VIDEO IN terminal

■ Television with an S-VIDEO IN terminal

S-VIDEO OUT terminal

The S-VIDEO OUT terminal achieves a more vivid picture than the VIDEO OUT terminal by separating the chrominance (C) and luminance (Y) signals. (Actual results depend on the television.)

COMPONENT VIDEO OUT terminals

These terminals can be used for either interlace or progressive output and provide a purer picture than the S-VIDEO OUT terminal. Connection using these terminals outputs the color difference signals (P_B/P_R) and luminance signal (Y) separately in order to achieve high fidelity in reproducing colors.

- The description of the component video input terminals depends on the television or monitor (e.g. Y/P_B/P_R, Y/B-Y/R-Y, Y/C_B/C_R). Connect to terminals of the same color.

The United Kingdom, Continental Europe and Russia

- When making this connection, select "Video/Y PB PR" or "S-Video/Y PB PR" from QUICK SETUP (→ page 14).

SCART (AV) terminal

To improve picture quality, you can change the video signal output from the SCART (AV) terminal from "Video" to either "S-Video" or "RGB" to suit the type of television you are using. Select "S-Video/ Y PB PR" or "RGB/No Output" from QUICK SETUP (→ page 14).

Video cable

■ Television with COMPONENT VIDEO IN terminals

The United Kingdom, Continental Europe and Russia

■ Television with SCART terminal

To enjoy progressive video

- Connect to the component video input terminals on a 480P compatible television. (Video will not be displayed correctly if connected to an incompatible television.)
- When playing NTSC discs, change video output mode to "480P" (→ page 23) or press [PROGRESSIVE] on the main unit so "PROG." appears on the display.

All Panasonic televisions that have 480P input connectors are compatible. Consult the manufacturer if you have another brand of television.

Note

Output from this unit is interlace if you have connected to the television through the VIDEO OUT, S-VIDEO OUT or SCART (AV) terminal or when playing PAL discs, even if "PROG." is on the display.

STEP 5 Radio and system connection

- Connect the AC mains lead after all other connections are complete.
- Optional antenna connections (→ page 27).

Conserving power

The main unit consumes a small amount of power, even when it is turned off (For the United Kingdom, Continental Europe, Russia, Australia and N.Z.: approx. 0.7 W or for Southeast Asia, the Middle East, South Africa, Saudi Arabia and Kuwait: approx. 0.9 W). To save power when the unit is not to be used for a long time, unplug it from the household mains socket. You will need to reset some memory items after plugging in the unit.

The United Kingdom, Saudi Arabia and Kuwait
BE SURE TO READ THE CAUTION FOR THE AC MAINS LEAD ON PAGE 3 BEFORE CONNECTION.

STEP 6 The remote control

Do not:

- mix old and new batteries.
 - use different types at the same time.
 - heat or expose to flame.
 - take apart or short circuit.
 - attempt to recharge alkaline or manganese batteries.
 - use batteries if the covering has been peeled off.
- Mishandling of batteries can cause electrolyte leakage which can damage items the fluid contacts and may cause a fire.

Remove if the remote control is not going to be used for a long period of time. Store in a cool, dark place.

Use

Aim at the sensor (→ page 14), avoiding obstacles, at a maximum range of 7 m directly in front of the unit.

STEP 7 QUICK SETUP

The QUICK SETUP screen assists you to make necessary settings.

Turn on the television and select the appropriate video input on the television.

<p>1</p>  <p>Turn the unit on.</p>	<p>2</p>  <p>Select "DVD/CD".</p>	<p>3</p>  <p>Shows QUICK SETUP screen.</p>	<p>4</p>  <p>Follow the messages and make the settings.</p>	<p>5</p>  <p>Press to finish QUICK SETUP.</p>	<p>6</p>  <p>Press to exit.</p>

Tips for making WMA/MP3 and JPEG discs (For CD-R, CD-RW)

- Discs must conform to ISO9660 level 1 or 2 (except for extended formats).
- This unit is compatible with multi-session but if there are a lot of sessions it takes more time for play to start. Keep the number of sessions to a minimum to avoid this.

Naming folders and files

At the time of recording, prefix folder and file names with 3-digit numbers in the order you want to play them (this may not work at times).

Files must have the extension:

“.WMA” or “.wma”

“.MP3” or “.mp3”

“.JPG”, “.jpg”, “.JPEG” or “.jpeg”

WMA

- You cannot play WMA files that are copy protected.

MP3

- This unit is not compatible with ID3 tags.
- Compatible sampling rate: 8, 11.02, 12, 16, 22.05, 24, 32, 44.1 and 48 kHz

JPEG

- To view JPEG files on this unit:
 - Take them on a digital camera that meets the DCF Standard (Design rule for Camera File system) Version 1.0. Some digital cameras have functions that are not supported by the DCF Standard Version 1.0 like automatic picture rotation which may render a picture un-viewable.
 - Do not alter the files in any way or save them under a different name.
- This unit cannot display moving pictures, MOTION JPEG and other such formats, still pictures other than JPEG (e.g. TIFF) or play associated sound.

To check the current setting

Press [SFC].

Super Surround

Press [SUPER SRND].

Each time you press the button:

- MUSIC:** Adds surround effects to stereo sources.
- MOVIE:** Use this mode when playing movie software.
- PARTY:** Sound is in stereo regardless of the direction you are facing.
- (off): Cancel

- You can adjust the volume of the surround speakers to get the best surround effect (→ page 29, Speaker level adjustments).
- Super Surround does not work when playing a DVD recorded with Dolby Digital or DTS.
- When Super Surround is on, Dolby Pro Logic II (→ right) turns off.

Center Focus

(Discs where the dialogue is recorded in the center channel)

You can make the sound of the center speaker seem like it is coming from within the television.

Press [SHIFT]+[C.FOCUS].

CENTER FOCUS ON ↔ CENTER FOCUS OFF

- This does not work when Super Surround is turned on.
- This will also work when Dolby Pro Logic II is turned on.

Dolby Pro Logic II

Dolby Pro Logic II is an advanced decoder that derives 5-channel surround (Left and Right Front, Center, Left and Right Surround) from any stereo program material, whether or not it has been specifically Dolby Surround encoded.

Press [DOLBII].

Each time you press the button:
MOVIE: Movie software, recorded in Dolby Surround.

MUSIC: Stereo sources
OFF: Cancel

- This works only in DVD/CD mode.
- "DOLBII" lights when there is effect.

Speaker level adjustments

See below for details.

Speaker level adjustments

This is one of the ways to get appropriate surround effects. Adjust the speaker level to the same level as the front speakers.

Preparation

Press [DVD/CD].

- 1 While stopped**
Press [SHIFT]+ [TEST] to output a test signal.
 L: Front left
 C: Center
 R: Front right
 RS: Right surround
 LS: Left surround
- 2 Press [VOLUME, +] or [-] to set the volume level normally used for listening.**
- 3 Press [▲] (increase) or [▼] (decrease) to adjust the speaker level for each speaker.**
 C, RS, LS: -6 dB to +6 dB
 (L, R: Only the balance is adjustable.)
 • **To adjust the balance of the front speakers**
 While outputting the test signal, press [◀ ▶].

To stop the test signal

Press [SHIFT]+[TEST] again.

Note

There is no output from SW (subwoofer) channel.

■ To adjust speaker level during play (Effective when playing multi-channel audio or Dolby Pro Logic II is on.)

- 1 Press [CH SELECT] to select the speaker.**
 L → C → R → RS → LS → SW
 ↑
 SW: Subwoofer
 • You can adjust SW only if the disc includes a subwoofer channel.
 • SW does not appear on the display and is not adjustable when Dolby Pro Logic II is turned on.
 • S appears instead of RS and LS on the display when "MUSIC" or "MOVIE" is selected with Super Surround (→ page 28). In this case, you can adjust both surround speaker levels at the same time.
 S: -6 dB to +6 dB
- 2 Press [▲] (increase) or [▼] (decrease) to adjust the speaker level for each speaker.**
 C, RS, LS, SW: -6 dB to +6 dB
 (L, R: Only the balance is adjustable.)
 • **To adjust the balance of the front speakers**
 During play, press [◀ ▶].

Down-mixing

Down-mixes multi-channel signals to 2 channels.

Subwoofer level

Adjusts the amount of bass.

Custom Sound Memory

Stores up to 30 sound settings (one setting per disc).

See below for details.

Sound field and sound quality

Down-mixing

You can output the down-mixed 2 channel signals when necessary (e.g. when you intend to record 5.1 ch sound on other recording equipment).

Press **[SHIFT]**+**[MIX 2CH]**.

MIX 2CH ON ↔ MIX 2CH OFF

Note

When "D.MIX" flashes on the display, the disc contains multiple-channel signals that cannot be down-mixed. **DVD-A**

LR: Vocals and accompaniment

L: Accompaniment only

R: Vocals only

Select "L" for karaoke. (R and L may be reversed on some discs.)

Muting

Press [MUTING].

"MUTING" flashes on the unit's display.

To cancel

- Press [MUTING] again or reduce the volume to minimum (— dB), then raise it to the required level.

- Muting is canceled when you switch the unit to standby.

Using headphones

1 Reduce the volume and connect the headphones (not included).

Headphone plug type: 3.5 mm stereo

2 Adjust headphone volume with [VOLUME].

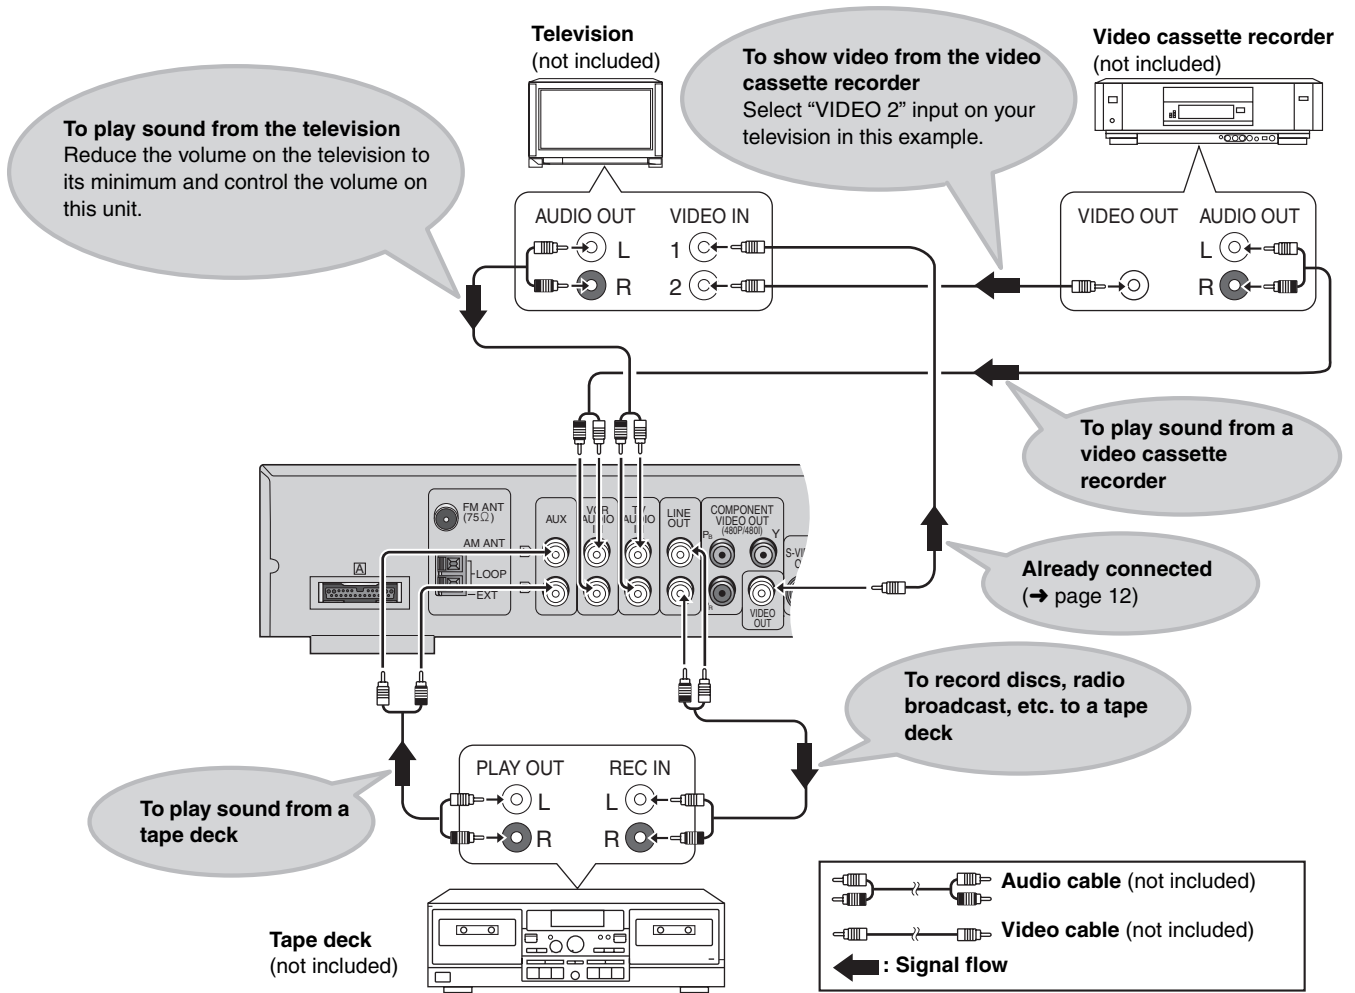

- Audio is automatically switched to stereo (2-channel).

Note

Avoid listening for prolonged periods of time to prevent hearing damage.

Operating other equipment

■ Connection example

Operating other equipment

Operating the television and the video cassette recorder

You can use the remote control to operate a Panasonic television or a video cassette recorder. Connect your equipment referring to "Connection example" (→ page 32).

Note

The remote control may not work properly with some models.

Television

Preparation

- Aim the remote control at the unit and press [TV] to light up the button.
- Aim the remote control at the television for the following operations.

Turning the television on/off

Press [⏻ AV SYSTEM].

Switching the television's video input mode

Press [TV/AV].

Changing channels

Press [∇ CH] or [∧ CH].

Adjusting the volume

Press [TV VOL-] or [TV VOL+].

Changing the remote control code

HT878 HT870

This remote control can also operate some other brands of televisions, video cassette recorders. Change the code to operate such equipment (→ below).

Aim the remote control at the equipment.

While pressing [TV] or [VCR/AUX]

Press a numbered button to enter the first digit, and then the second digit.

The remote control outputs the on/off signal. If the code is correct, the equipment turns on or off. If it doesn't, try entering another code.

Note

Reenter the codes after you change the batteries.

Video cassette recorder

Preparation

- Change the video input mode on the television ("VIDEO 2" in the example).
- Aim the remote control at the unit and press [VCR/AUX] to light up the button.
- Aim the remote control at the video cassette recorder for the following operations.

Turning the video cassette recorder on/off

Press [⏻ AV SYSTEM].

Play, pause and stop

Press [▶] (play), [⏸] or [■].

Fast forward and rewind

Press [◀◀] or [▶▶].

Connecting a laser disc or record player

Connect instead of a video cassette recorder (→ page 32) and select "VCR" as the source.

We recommend using a record player with a built-in phono equalizer. If your player doesn't have a built-in equalizer, connect it first to a separate equalizer and then to the unit.

Operating the tape deck

Listening to the tape deck

Press [VCR/AUX] several times to select "AUX" as the source.

Recording to the tape deck

- 1 Press [DVD/CD] to select "DVD/CD".
or
Press [TUNER/BAND] to select "FM" or "AM".
- 2 Start recording and play.

Placement

Set the unit up on an even surface away from direct sunlight, high temperatures, high humidity, and excessive vibration. These conditions can damage the cabinet and other components, thereby shortening the unit's service life.

Do not place heavy items on the unit.

Voltage

Do not use high voltage power sources. This can overload the unit and cause a fire.

Do not use a DC power source. Check the source carefully when setting the unit up on a ship or other places where DC is used.

AC mains lead protection

Ensure the AC mains lead is connected correctly and not damaged. Poor connection and lead damage can cause fire or electric shock. Do not pull, bend, or place heavy items on the lead.

Grasp the plug firmly when unplugging the lead. Pulling the AC mains lead can cause electric shock.

Do not handle the plug with wet hands. This can cause electric shock.

Foreign matter

Do not let metal objects fall inside the unit. This can cause electric shock or malfunction.

Do not let liquids get into the unit. This can cause electric shock or malfunction. If this occurs, immediately disconnect the unit from the power supply and contact your dealer.

Do not spray insecticides onto or into the unit. They contain flammable gases which can ignite if sprayed into the unit.

Service

Do not attempt to repair this unit by yourself. If sound is interrupted, indicators fail to light, smoke appears, or any other problem that is not covered in these instructions occurs, disconnect the AC mains lead and contact your dealer or an authorized service center. Electric shock or damage to the unit can occur if the unit is repaired, disassembled or reconstructed by unqualified persons.

Extend operating life by disconnecting the unit from the power source if it is not to be used for a long time.

Maintenance

Clean this unit with a soft, dry cloth.

- Never use alcohol, paint thinner or benzine to clean this unit.
- Before using chemically treated cloth, read the instructions that came with the cloth carefully.

Before moving the unit, ensure the disc tray is empty.

Failure to do so will risk severely damaging the disc and the unit.

Decoder

A decoder restores the coded audio signals on DVDs to normal. This is called decoding.

Dolby Digital

This is a method of coding digital signals developed by Dolby Laboratories. Apart from stereo (2-channel) audio, these signals can also be multi-channel audio. A large amount of audio information can be recorded on one disc using this method.

DTS (Digital Theater Systems)

This surround system is used in many movie theaters around the world. There is good separation between the channels, so realistic sound effects are possible.

Dynamic range

Dynamic range is the difference between the lowest level of sound that can be heard above the noise of the equipment and the highest level of sound before distortion occurs.

Frame still and field still

Frames are the still pictures that go together to make a moving picture. There are about 30 frames shown each second. One frame is made up of two fields. A regular television shows these fields one after the other to create frames. A still is shown when you pause a moving picture. A frame still is made up of two alternating fields, so the picture may appear blurred, but overall quality is high. A field still is not blurred, but it has only half the information of a frame still so picture quality is lower.

I/P/B

MPEG 2, the video compression standard adopted for use with DVD-Video, codes frames using these 3 picture types.

I: Intra coded picture

This picture has the best quality and is the best to use when adjusting the picture.

P: Predictive coded picture

This picture is calculated based on past I or P-pictures.

B: Bidirectionally-predictive coded picture

This picture is calculated by comparing past and future I and P-pictures so it has the lowest volume of information.

Linear PCM (pulse code modulation)

These are uncompressed digital signals, similar to those found on CDs.

Playback control (PBC)

If a Video CD has playback control, you can select scenes and information with menus.

Sampling frequency

Sampling is the process of converting the heights of sound wave (analog signal) samples taken at set periods into digits (digital encoding). Sampling frequency is the number of samples taken per second, so larger numbers mean more faithful reproduction of the original sound.

No power.	●Insert the AC mains lead and system cable securely.	13
The unit is automatically switched to the standby mode.	●The Sleep timer activated.	31

Unresponsive or inoperable function

No response when any button is pressed.	●This unit cannot play discs other than the ones listed in these operating instructions. ●The unit may not be operating properly due to lightning, static electricity or some other external factor. Turn the unit off and then back to ON. Alternatively, turn the unit off, disconnect the AC mains lead, and then reconnect it. ●Condensation has formed: Wait 1 to 2 hours for it to evaporate.	15 — —
No response when remote control buttons are pressed.	●Check that the batteries are installed correctly. ●The batteries are depleted. Replace them with new ones. ●Aim the remote control at the remote control sensor and operate.	13 13 14
No picture or sound.	●Check the video or audio connection. ●Check the power or input setting of the connected equipment. ●Check that the DVD-RAM has something recorded on it.	10–12, 32 — —
You have forgotten your ratings password. Reset all the settings to Factory Preset.	●While stopped and “DVD/CD” is the source, press and hold [■] on the main unit and [≥10] on the remote control until “Initialized” disappears from the television. Turn the unit off and on again. All settings will return to the default values.	—

Specific operation undesirable or unexpected

It takes time before play starts. MP3	●Play may take time to begin when an MP3 track has still picture data. Even after the track starts, the correct play time will not be displayed, however this is normal.	—
Folders deeper than the eighth layer on a data CD are not displayed correctly. WMA MP3 JPEG	●Folders deeper than the eighth layer are displayed as the eighth layer.	—
A menu screen appears during skip or search. VCD	●This is normal for Video CDs.	—
Programmed items are not played. DVD-V	●Some items cannot be played even if you have programmed them.	—
The on-screen menu shows “2” as a soundtrack option when [AUDIO] is pressed, but the audio does not change. DVD-A	●Even if a second soundtrack isn't recorded, two numbers will normally be shown.	—
Play restarts from the beginning of the track when soundtrack is changed. DVD-A	●This is normal for DVD-Audio.	—

Subtitle

Subtitle position is wrong.	●Adjust the position. (“Subtitle Position” in Display Menu)	23
