## Important notes for users in the U.K.

### Mains plug

This apparatus is fitted with an approved 13 Amp plug. To change a fuse in this type of plug proceed as follows:

- 1 Remove fuse cover and fuse.
- 2 Fix new fuse which should be a BS1362 5 Amp, A.S.T.A. or BSI approved type.
- 3 Refit the fuse cover.

If the fitted plug is not suitable for your socket outlets, it should be cut off and an appropriate plug fitted in its place.

If the mains plug contains a fuse, this should have a value of 5 Amp. If a plug without a fuse is used, the fuse at the distribution board should not be greater than 5 Amp.

*Note: The severed plug must be disposed of to avoid a possible shock hazard should it be inserted into a 13 Amp socket elsewhere.*

### How to connect a plug

The wires in the mains lead are coloured with the following code: blue = neutral (N), brown = live (L).

- As these colours may not correspond with the colour markings identifying the terminals in your plug, proceed as follows:
  - Connect the blue wire to the terminal marked N or coloured black.
  - Connect the brown wire to the terminal marked L or coloured red.
  - Do not connect either wire to the earth terminal in the plug, marked E (or e) or coloured green (or green and yellow).

Before replacing the plug cover, make certain that the cord grip is clamped over the sheath of the lead - not simply over the two wires.

## General Information

### **WARNING!**

This product does not contain any user-serviceable parts. Please leave all maintenance work to qualified personnel.

### **Setup precautions**

#### **Finding a suitable location**

- Place this product on a flat, hard and stable surface. Never place the product on a carpet.
- Never place this product on top of other equipment that might heat it up (e.g., receiver or amplifier).
- Never put anything under this product (e.g., CDs, magazines).
- Never place any equipment or heavy objects on top of this product.
- Install this product near the AC outlet where the AC power plug can be easily reached.

#### **Space for ventilation**

- Place this product in a location with adequate ventilation to prevent internal heat build up. Allow at least 10 cm (4") clearance from the rear and the top of this product and 5cm (2") from the left and right to prevent overheating.

#### **Avoid high temperature, moisture, water and dust**

- This product must not be exposed to dripping or splashing.
- Never place any object or items that can damage this product (e.g., liquid filled objects, lighted candles).

### **Accessories supplied**

- 1 Remote control with batteries
- 1 Audio/Video cable
- 1 Quick Start Guide

### **Cleaning discs**

To clean a disc, use a micro fiber cleaning cloth and wipe the disc from the centre to the edge in a straight line.

### **CAUTION!**

Never use solvents such as benzene, thinner, commercially available cleaners, or anti-static sprays intended for discs.

### **About recycling**

These operating instructions have been printed on non-polluting paper. The electronic equipment contains a large number of materials that can be recycled. If you are disposing of an old machine, please take it to a recycling centre. Please observe the local regulations regarding disposal of packaging materials, exhausted batteries and old equipment.

## **BDP7100 Blu-ray Disc player**

---

---

Watch movies in the highest picture quality available for your HDTV. The BDP7100 Blu-ray Disc player offers full high-definition video playback up to 1080p resolution for an amazing viewing experience. A highly detailed picture and increased sharpness delivers a more true-to-life picture.

### **Upconvert DVDs for enhanced picture quality**

Your current DVDs will look even better than before thanks to video upconversion. Upconversion will increase the resolution of standard definition DVDs to high definition up to 1080p over an HDMI connection. The picture will be less jagged and more realistic for a near high-definition experience.

### **Enjoy your content on different kinds of media**

Full backwards compatibility with DVDs, CDs ensures that you can continue to enjoy your current audio-video collection. Additionally, you can view JPEG digital pictures or listen to MP3 music files.

### **Listen to rich uncompressed multi-channel surround sound**

The BDP7100 supports 5.1 channels of uncompressed audio, which realizes real-to-life sound and makes you feel that you are really there.

### **Intuitive User interface and Remote control**

The Philips logical user interface allows you to easily navigate through your content and settings, so you can quickly find what you are looking for.

### **Easy and simple connection to your HDTV via HDMI**

Connect your BDP7100 to your HDTV with one single HDMI (High Definition Multimedia Interface) cable. The high definition video output signal will be transferred to your HDTV without conversion to analogue signals, so you will get an excellent picture and sound quality, completely free from noise. Thanks to other multiple outputs, you can also easily connect to your home theater system or amplifier.

### **About HDMI CEC (Consumer Electronics Control)**

HDMI CEC allows linked functions of this player with HDMI CEC compliant TVs.

#### **Note:**

Philips does not guarantee 100% interoperability with all HDMI CEC devices.

- 3 Plug the other end of the component video cable into the TV.

- 4 Take the supplied audio cable.
- 5 Plug one end of the audio cable into the **AUDIO-L** and **AUDIO-R** sockets.
- 6 Plug the other end of the audio cable into the TV.

### Option 4 - Composite video (standard quality)

- 1 Take the supplied composite video cable.
- 2 Plug one end of the composite video cable into the **VIDEO** socket.
- 3 Plug the other end of the composite video cable into the TV.

- 4 Take the supplied audio cable.
- 5 Plug one end of the audio cable into the **AUDIO-L** and **AUDIO-R** sockets.
- 6 Plug the other end of the audio cable into the TV.

## Connect (continued)

### Option 5 - S-Video (standard quality)

- 1 Take an S-Video cable (not supplied).
- 2 Plug one end of the S-Video cable into the **S-VIDEO** socket.
- 3 Plug the other end of the S-Video cable into the TV.

- 4 Take the supplied audio cable.
- 5 Plug one end of the audio cable into the **AUDIO-L** and **AUDIO-R** sockets.
- 6 Plug the other end of the audio cable into the TV.

### Connect to the audio system (optional)

#### Need help?

Refer to the documentation that came with your audio system for information about:

- The devices that you can connect to your audio system.
- The type of cables that you can connect to your audio system.

### Option 1 - Digital audio, optical connection (good quality)

- 1 Take an optical audio cable (not supplied).
- 2 Plug one end of the optical audio cable into the **OPTICAL** socket.
- 3 Plug the other end of the optical audio cable into the audio system.

## Connect (continued)

### Option 2 - Digital audio, coaxial connection (good quality)

- 1 Take a coaxial audio cable (not supplied).
- 2 Plug one end of the coaxial audio cable into the **COAXIAL** socket.
- 3 Plug the other end of the coaxial audio cable into the audio system.

### Option 3 - 5.1 analogue audio (standard quality)

- 1 If you connected the TV to the **COMPONENT OUT, VIDEO** or **S-VIDEO** sockets or used a HDMI-DVI cable, remove the audio cable between the Blu-ray Disc player and the TV.

- 2 Take the supplied audio cable.
- 3 Take another two audio cables (not supplied).
- 4 Plug the three audio cables into the **5.1CH ANALOG AUDIO OUT** sockets.
- 5 Plug the other ends of the three audio cables into the audio system.

## Connect (continued)

### Option 4 - Stereo analogue audio (standard quality)

- 1 If you connected the TV to the **COMPONENT OUT**, **VIDEO** or **S-VIDEO** sockets or used a HDMI-DVI cable, unplug the audio cable on the TV.
