

Halogen lamps

Low-voltage aluminium reflector ALUline Pro 37 mm and 56 mm

Aluminium reflector lamps consisting of a low-voltage halogen burner optically positioned in a lightweight, highly glossy anodised aluminium reflector with an integral protective front glass. The range has a clear or frosted front glass. Aluminium reflector lamps are high-intensity, safe light sources for use in all kinds of accent and decorative lighting without the need for an external reflector. The optical positioning of the burner at the focal point of the reflector results in a high-intensity beam with a clearly defined beam spread.

Like all halogen lamps, they emit a continuous spectrum of crisp white light, are dimmable and offer immediate ignition. Universal burning position.

Applications

- Spot lighting of merchandise, display lighting in shops, museums and exhibitions.
- Accent lighting in the home, restaurants, bars, discoteques and night clubs.
- Task lighting for precision work and for reading.
