Operating Instructions

IMPORTANT

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

CAUTION

RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION:
TO PREVENT THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

IMPORTANT SAFETY INSTRUCTIONS

H003 En

READ INSTRUCTIONS — All the safety and operating instructions should be read before the product is operated.

RETAIN INSTRUCTIONS — The safety and operating instructions should be retained for future reference.

HEED WARNINGS — All warnings on the product and in the operating instructions should be adhered to.

FOLLOW INSTRUCTIONS — All operating and use instructions should be followed.

CLEANING — Unplug this product from the wall outlet before cleaning. The product should be cleaned only with a polishing cloth or a soft dry cloth. Never clean with furniture wax, benzene, insecticides or other volatile liquids since they may corrode the cabinet.

ATTACHMENTS — Do not use attachments not recommended by the product manufacturer as they may cause hazards.

WATER AND MOISTURE — Do not use this product near water — for example, near a bathtub, wash bowl, kitchen sink, or laundry tub; in a wet basement; or near a swimming pool; and the like.

ACCESSORIES — Do not place this product on an unstable cart, stand, tripod, bracket, or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the product. Any mounting of the product should follow the manufacturer's instructions, and should use a mounting accessory recommended by the manufacturer.

CART — A product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.

VENTILATION — Slots and openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer's instructions have been adhered to.

POWER SOURCES — This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company.

LOCATION — The appliance should be installed in a stable location.

NONUSE PERIODS — The power cord of the appliance should be unplugged from the outlet when left unused for a long period of time.

GROUNDING OR POLARIZATION

• If this product is equipped with a polarized alternating current line plug (a plug having one blade wider than the other), it will fit into the outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.

• If this product is equipped with a three-wire grounding type plug, a plug having a third (grounding) pin, it will only fit into a grounding type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the grounding type plug.

POWER-CORD PROTECTION — Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.

OUTDOOR ANTENNA GROUNDING — If an outside antenna or cable system is connected to the product, be sure the antenna or cable system is grounded so as to provide some protection against voltage surges and built-up static charges. Article 810 of the National Electrical Code, ANSI/NFPA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna-discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See Figure A.

LIGHTNING — For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the product due to lightning and power-line surges.

POWER LINES — An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to keep from touching such power lines or circuits as contact with them might be fatal.

OVERLOADING — Do not overload wall outlets, extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock.

OBJECT AND LIQUID ENTRY — Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

SERVICING — Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

DAMAGE REQUIRING SERVICE — Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:

- When the power-supply cord or plug is damaged.
- If liquid has been spilled, or objects have fallen into the product.
- If the product has been exposed to rain or water.
- If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to its normal operation.
- If the product has been dropped or damaged in any way.
- When the product exhibits a distinct change in performance — this indicates a need for service.

REPLACEMENT PARTS — When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.

SAFETY CHECK — Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.

WALL OR CEILING MOUNTING — The product should not be mounted to a wall or ceiling.

HEAT — The product should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.

CONGRATULATIONS ON YOUR PURCHASE OF THIS FINE PIONEER PRODUCT.

Pioneer is on the leading edge of DVD research for consumer products and this unit incorporates the latest technological developments.

We are sure you will be fully satisfied with the DVD player.

Thank you for your support.

Please read through these operating instructions so you will know how to operate your model properly. After you have finished reading the instructions, put them away in a safe place for future reference.

• This player is not suitable for commercial use.

Use of this copyright protection technology must be authorized by Macrovision Corporation, and is intended for home and other limited viewing uses only unless otherwise authorized by Macrovision Corporation. Reverse engineering or disassembly is prohibited.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

H010 En

Information to User

Alteration or modifications carried out without appropriate authorization may invalidate the user's right to operate the equipment.

H011 En

CAUTION:

This product satisfies FCC regulations when shielded cables and connectors are used to connect the unit to other equipment. To prevent electromagnetic interference with electric appliances such as radios and televisions, use shielded cables and connectors for connections.

H012 En

WARNING: BEFORE PLUGGING IN THE UNIT FOR THE FIRST TIME, READ THE FOLLOWING SECTION CAREFULLY. THE VOLTAGE OF THE AVAILABLE POWER SUPPLY DIFFERS ACCORDING TO COUNTRY OR REGION, BE SURE THAT THE POWER SUPPLY VOLTAGE OF THE AREA WHERE THIS UNIT WILL BE USED MEETS THE REQUIRED VOLTAGE (E.G., 230V OR 120V) WRITTEN ON THE REAR PANEL.

H041 En

CAUTION:

THE STANDBY/ON BUTTON IS SECONDARY CONNECTED AND THEREFORE DOES NOT SEPARATE THE UNIT FROM MAINS POWER IN STANDBY POSITION. THEREFORE INSTALL THE UNIT SUITABLE PLACES EASY TO DISCONNECT THE MAINS PLUG IN CASE OF THE ACCIDENT. THE MAINS PLUG OF UNIT SHOULD BE UNPLUGGED FROM THE WALL SOCKET WHEN LEFT UNUSED FOR A LONG PERIOD OF TIME.

Features of This Player

Compatible with DVD, Super VCD/ Video CD and CD formats

DVD, Super VCD/Video CD and CD discs that display the logos shown below can be played back on PIONEER DVD players. For more information on discs compatible with this player, refer to the table below.

Types of playable discs and their marks	Diameter/Playable sides	Playback time	
 	DVD VIDEO	Digital audio Digital video (MPEG 2)	
	12 cm (5 in.)/ single-sided	1 layer 2 layer	133 min. 242 min.
	12 cm (5 in.)/ double-sided	1 layer 2 layer	266 min. 484 min.
	DVD VIDEO	Digital audio Digital video (MPEG 2)	
	Super VCD	Digital audio (MPEG 1) Digital video (MPEG 2) 40 min.	
	12 cm (5 in.)/ single-sided		
	Super VCD single	Digital audio (MPEG 1) Digital video (MPEG 2) 10 min.	
	8 cm (3 in.)/ single-sided		
	VIDEO CD	Digital audio Digital video (MPEG 1) Max. 74 minutes	
	12 cm (5 in.)/ single-sided		
	VIDEO CD single	Digital audio Digital video (MPEG 1) Max. 20 minutes	
	8 cm (3 in.)/ single-sided		
  	CD	Digital audio	
	12 cm (5 in.)/ single-sided		Max. 74 minutes
 	CD single	Digital audio	
	8 cm (3 in.)/ single-sided		Max. 20 minutes

The disc format logos shown above are found on disc labels or on disc jackets.

- To prevent malfunction, do not use an 8 cm (3 in.) adaptor (for CDs).
- Discs other than the ones indicated above cannot be played on this unit.
- DVDs that have incompatible region numbers, DVD-Audio, DVD-ROM, and DVD-RAM cannot be played on this unit. The region number of the player can be found on the rear panel.

*1Playing recordable CDs

This unit can play CD-R and CD-RW discs recorded in CD Audio or Video CD format, or with MP3 audio files.

MP3 compatibility information

- The CD-ROM must be ISO 9660 compatible.
- Files should be MPEG1 Audio Layer 3 format, 44.1 or 48kHz. Incompatible files will not play and "UNPLAYABLE MP3 FORMAT" will be displayed.
- Not compatible with some variable bit-rate (VBR) files.
- VBR files may not show play times correctly.
- This player only plays tracks that are named with the file extension ".mp3" or ".MP3".
- This player is not compatible with multi-session discs. If you try and play a multi-session disc, only the first session will be played.
- Use CD-R or CD-RW media for recording your MP3 files. The disc must be finalized in order to play.
- Audio encoded at 128Kbps should sound close to regular audio CD quality. Although this player will play lower bit-rate MP3 tracks, the sound quality becomes noticeably worse at lower bit-rates.
- Only the first 8 characters of folder and track names (excluding the ".mp3" extension) are displayed.
- This player can recognize a maximum of 250 folders and 250 tracks. Discs containing more than 250 folders or tracks will play, but only the first 250 folders/tracks.

Caution!

- CD-R/RW discs recorded using a personal computer or a CD recorder may not play if the disc is damaged or dirty, or if there is dirt or condensation on the player's lens.
- If you record a disc using a personal computer, even if it is recorded in a compatible format, there are cases in which it may not play because of the settings of the application software used to create the disc. (Check with the software publisher for more detailed information.)
- Unfinalized CD-R/RW discs can be played, but not all time information (playing time, etc.) will be displayed.
- For more information on using CD-R/RW discs, see 'Disc care' starting on **page 56**.

What is Super VCD? (DV-533 and DV-533K only)

This player supports the IEC's Super VCD standard. Compared to the Video CD standard, Super VCD offers superior picture quality, and allows two stereo soundtracks to be recorded. Super VCD also supports the widescreen size.

Compatible with a wide range of DVD digital audio output formats

DVDs are recorded in one of four types of digital audio formats (as of October 1998). The digital audio output jacks of this player output Dolby*2 Digital, DTS*3, MPEG, and linear PCM digital bitstreams.

This player has a function that converts Dolby Digital and MPEG audio formats into the linear PCM format. This allows playback of DVDs recorded in Dolby Digital and MPEG without the need for a decoder.

TruSurround

TruSurround*4 uses technology that simulates multichannel surround sound using only two speakers. TruSurround works in conjunction with 2 channel audio sources to create a realistic surround sound.

MP3 compatibility

This player is compatible with CD-R, CD-RW and CD-ROM discs that contain MP3 audio tracks.

Video adjust function

[Fine Focus], [Contrast], [Sharpness], [Chroma level] and [Hue] picture quality adjustment settings are available. You can memorize up to three sets of picture quality settings (pages 31, 32).

Easy setup and adjustment using on-screen menus

Press **SETUP** on the remote control to open the Setup screen and you'll find setting up and adjusting the system easy to do with on-screen menus conveniently organized and arranged. Additionally, on-screen information (ⓐ) appears to clarify the functions and explain the options available. Below are just a few examples.

Answer a few questions and have all the necessary audio, video, and on-screen language adjustments set automatically by the player using the Setup Navigator (pages 17, 18).

Select the type of TV screen you are using and the preferred screen format you'd like to use when watching DVDs in the **Video 1** menu (page 29).

Wide range of DVD viewing options

Multi-Angle (page 33)*

You can view scenes from different camera angles when watching movies or other media with multiple angle playback available.

Multiple Languages (page 34)*

You can select the language on when watching movies or other media that have multiple language and/or audio soundtracks recorded on them.

Multi-Language Subtitles (page 36)*

You can select a subtitle language or turn subtitles off when watching movies or other media with subtitles available.

★ This mark indicates this may not be possible with certain discs.

24-bit/192kHz compatible DAC delivers higher-than-CD quality audio.

The DAC used to convert digital audio to analog in this player is fully 24-bit/192kHz compatible.

Karaoke microphone input and mixing controls (DV-533K only)

With this player, it is possible to sing along with karaoke discs or your favorite CD. You can also control the vocal mix using the volume and digital echo effect controls.

Energy-saving design

This unit is designed to use less than 1 W of energy when this player is in standby mode.

Differences in Disc Composition

DVD

All discs are divided up into smaller, more manageable sections so that you can find specific content more easily.

DVD discs are divided into one or more titles. Each title may be further divided into several chapters.

Occasionally, a chapter may contain index points, effectively dividing the chapter up into several parts, too.

Super VCD/Video CD/CD

Super VCD/Video CDs and CDs are divided into a number of tracks. In rare cases, a track may contain a number of index points, effectively dividing the track up into several parts.

MP3

MP3 (MPEG1 audio layer 3) is a compressed audio file format. Files are recognized by their file extension ".mp3" or ".MP3". Folders that contain mp3 files are automatically numbered F_001, F_002, etc. Tracks within folders are automatically numbered T_001, T_002, etc.

How to Proceed in This Manual

DVD is an incredible format that presents the highest quality digital audio and video available today. Because using the DVD player and DVDs may be confusing at first, following the order below should help you get through the important stages of getting set up so you can start using your player as soon as possible.

Get familiar with the player.

Refer to the section '*Before Using*' on page 8 to confirm that all the accessories were included with the player. If you are new to DVD, it might be beneficial for you to go through the '*Names and Functions*' section starting on page 9 to get familiar with the parts and buttons on the main unit and remote control as they will be referred to throughout this manual.

There is also a list of terms that can be found on page 61 if you are having trouble understanding some of the terminology associated with DVD.

Make the necessary connections.

No entertainment system seems to be set up exactly the same way. The '*Making Connections*' section starting on page 14 shows how video and audio connections may be made to suit your home entertainment system.

Set up the necessary player menus.

Before you can begin to enjoy the benefits of the DVD format, it is first necessary to set up the player to output the video and audio information that corresponds to your system. The section '*Setting Up the Player*' starting on page 17 explains how to use the Setup Navigator, a function that automatically sets up the player corresponding to the answers given in a multiple-choice on-screen procedure. The Setup screen menus, described in the section starting on page 24, are also used in a number of other functions. Learning the procedure for operating these menus will make using this player much easier and more enjoyable.

Play a disc.

When all the connections and setups have been made, you are ready to play a DVD, Super VCD/Video CD, CD, or MP3 with the player. The section '*Getting Started Using Your DVD Player*' starting on page 20 outlines the basic player operations.

Enjoy the many features available.

Once you are comfortable using the basic player functions, you are ready to take advantage of the various options DVD and this player have to offer. The section '*Advanced Functions*' starting on page 39 describes how to use the features available on many DVDs.

Before Using

Checking Accessories

Please confirm that the following were received with the player.

Audio cord

Video cord

Power cord

Remote control unit

AA (R6P) dry cell batteries

When disposing of used batteries, please comply with governmental regulations or environmental public instruction's rules that apply in your country or area. H048 En

Operating instructions (this manual)

Preparing the Remote Control

Inserting batteries into the remote control

- 1 While pushing the tab on the battery compartment cover toward the center of the remote, pull out in the direction indicated by the arrow.

- 2 Insert batteries.

Make sure to match the plus (+) and minus (-) polarity guides on the batteries with the marks inside the battery compartment.

- 3 Close the cover.

Notes

- Do not mix old and new batteries.
- When replacing batteries, use all new batteries.
- When not using the remote control for a long period of time (over 1 month), remove the batteries to avoid possible damage from battery corrosion. If battery leakage occurs, wipe the battery liquid from the battery component, then insert new batteries.

Remote control operation

When operating the remote control, point it at the remote sensor (📡) located on the player's front panel. The remote control can be used up to 7 m (23 feet) from the player and within a 30° angle on each side of the sensor.

Notes

- Exposing the remote sensor to direct sunlight or strong light may cause faulty operation.
- If the **CONTROL IN** jack on the player's rear panel is connected to the **CONTROL OUT** jack of another component, point the remote control at the other component to operate the player. Operation will not be possible when pointed at this player (page 16).

Names and Functions

Front Panel

- ① **STANDBY/ON button**
Press to switch the player on or to put in standby (pages 20, 23).
- ② **Disc tray**
When loading a disc, place discs in the disc tray with the label side facing up (pages 20, 23).
- ③ **Remote sensor**
Point the remote control toward the remote sensor to operate the player (page 8).
- ④ **Display window**
Displays system information (page 10).
- ⑤ **Karaoke controls (DV-533K only)**
MIC input jack
Use to connect a microphone (not supplied) to the player to use the karaoke function. The karaoke function is active when a microphone is connected (page 50).
VOLUME control
Turn to adjust the volume of the vocals when using the karaoke function (page 50).
ECHO control
Turn to adjust the amount of digital echo effect to add to the vocals when using the karaoke function (page 50).
- ⑥ **(open/close) button**
Press to open and close the disc tray (pages 20, 23).
- ⑦ **◀◀◀ (reverse) button**
Press to go back to previous chapters/tracks. Press and hold to perform reverse playback scanning (pages 22).
- ⑧ **▶▶▶ (forward) button**
Press to advance to chapters/tracks. Press and hold to perform fast-forward scanning (page 22).
- ⑨ **■ (stop) button**
Press to stop playback. Pressing once enables playback to resume from a point shortly before the location where it stopped. Pressing twice causes the disc to return to the beginning of the disc if playback starts again (page 23).
- ⑩ **⏸ (pause) button**
Press during playback to pause. Press again to resume playback (page 39).
- ⑪ **▶ (play) button**
Press to start or resume playback (pages 20, 23).

Display Window

- ① **DTS indicator**
Indicates DTS audio playback.
- ② **GUI indicator**
Indicates an on-screen menu operation is being performed (**pages 17, 24**).
- ③ **Indicator**
Indicates Multi-Angle playback is in progress (**page 33**).
- ④ **TITLE indicator**
Indicates a title number is being displayed.
- ⑤ **● indicator**
Indicates that TruSurround is selected (**page 28**).
- ⑥ **TRK indicator**
Indicates a track number is being displayed.
- ⑦ **CHP indicator**
Indicates a chapter number is being displayed.
- ⑧ **LAST indicator**
Indicates the Last Memory location is recorded in memory for the currently loaded DVD or Super VCD/ Video CD (**page 48**).
- ⑨ **COND. indicator**
Indicates that Condition Memory settings are memorized for the currently loaded DVD (**page 49**).
- ⑩ **TOTAL indicator**
Indicates that the disc in the player is stopped and **DISPLAY** has been pressed (**page 55**).
- ⑪ **REMAIN indicator**
Indicates that the remaining playback time of a title or chapter/track is being displayed.
- ⑫ **D D indicator**
Indicates Dolby Digital audio playback.
- ⑬ **▶ indicator**
Indicates when a disc is playing.
- ⑭ **|| indicator**
Indicates when a disc is paused.
- ⑮ **Counter display**
Displays the playback mode, type of disc, title/folder and chapter/track numbers, playback time, etc.

Rear Panel

DV-533K (Taiwanese model)

① CONTROL IN jack

Use to connect this player to another component bearing the Pioneer  mark. This lets you control this unit as though it were a component in a system. Player operations are then performed by pointing the remote control at the component that the player is connect to (page 16).

② COMPONENT VIDEO OUT jacks

If your TV or monitor has component video inputs, you can produce a higher quality picture on your TV or monitor by connecting to the component video outputs on this unit (page 16).

③ AUDIO OUT jacks

Use to output two-channel audio (analog) to the audio stereo inputs on a TV or stereo amplifier. If you are connecting to a receiver that has both digital and analog input jacks for DVD player connection, it may be beneficial to make both connections (pages 14, 15).

④ AC IN power cord connection terminal

Use to connect the power cord to the wall outlet (page 14).

⑤ S-VIDEO OUT jack

If your TV or monitor has an S-video input, clear picture reproduction is possible by connecting the player to your TV or monitor via the S-Video jack (page 16).

You can switch between [S1] and [S2] S-video output from the Setup menu (page 30).

⑥ VIDEO OUT jack

Connect to the video input on a TV or monitor or AV amplifier or receiver with video input capability (pages 14, 16).

⑦ DIGITAL OUT OPTICAL jack

Use to output the digital audio signal recorded on discs. You can output the digital signal via the optical output jack to an AV amplifier or receiver (page 15).

⑧ DIGITAL OUT COAXIAL jack

Use to output the digital audio signal recorded on discs. You can output the digital signal via the coaxial output jack to an AV amplifier or receiver (page 15).

Remote Control

(Buttons indicated with * are used for menu operation.)

① **LAST MEMORY button**

You can resume DVD or Super VCD/Video CD playback from the point you last watched even if the disc is removed from the player. Press **LAST MEMORY** during playback to set a Last Memory point. When you want to resume playback of that disc, press **LAST MEMORY** in the stop mode and playback starts from the memorized point. Last Memory locations can be stored for up to 5 DVDs and 1 Super VCD/Video CD (page 48).

② **⏻ (standby/on) button**

Press to switch the player on or to put in standby (pages 20, 23).

③ **AUDIO button**

Press repeatedly to select one of the audio languages programmed on a DVD (pages 34, 35). For Video CD, CD and MP3, each press changes the audio output as follows.

→ Stereo → 1/L (Left) → 2/R (Right) ←

For Super VCD, each press changes the audio output as follows.

→ 1 Stereo → 1L → 1R
2R ← 2L ← 2 Stereo ←

④ **SUBTITLE button**

Press repeatedly to select one of the subtitle languages programmed on a DVD or to turn the subtitles off (page 36).

⑤ **SETUP button***

Press when the player is in either play or stop mode to open and close the Setup screen (pages 18, 24).

⑥ **MENU button***

Use to display or close the DVD menu or MP3 Navigator screen (pages 21, 41).

⑦ **DISPLAY button**

Press during playback to display statistical disc information. Press repeatedly to display different information (page 54).

⑧ **Cursor buttons (◀/▶/▲/▼)***

Use to move through the options on menu screens and to change settings.

⑨ **ENTER button***

Use to implement settings selected with the cursor buttons or to set items highlighted in a menu.

⑩ **PREV ◀◀ (previous) button**

During playback, press **PREV ◀◀** to go back to a previous chapter/track (page 22).

- ⑪ **STOP ■ button**
Press to stop playback. Pressing once enables playback to resume from a point shortly before the location where it was stopped. Pressing twice causes the disc to return to the beginning of the disc when playback starts again (page 23).
- ⑫ **STEP/SLOW ◀II/II▶ buttons**
Press **STEP/SLOW ◀II** or **II▶** during playback to view still frame. Press and hold **STEP/SLOW ◀II** or **II▶** during playback to view slow playback. In still frame, press **STEP/SLOW II▶** to advance DVDs and Video CDs frame by frame and **STEP/SLOW ◀II** to back up a few frames at a time (DVD only) (page 39).
- ⑬ **Number buttons (1-9, 0, +10)***
Use to perform direct title and chapter/track searches, and to input numerical values.
- ⑭ **RANDOM button**
Press to play title and chapters/tracks in random order (page 43).
- ⑮ **PROGRAM button**
You can program titles, chapters, or tracks to play back in a desired order. Programs can be a maximum of 24 steps. Additionally, DVD programs for up to 24 discs can be stored in the player's memory for future use (pages 44-47).
- ⑯ **CONDITION MEMORY button**
You can store in memory the settings for up to 15 DVDs. Press **CONDITION MEMORY** during DVD playback to memorize the settings (page 49).
- ⑰ **OPEN/CLOSE button**
Press to open or close the disc tray (pages 20, 23).
- ⑱ **ANGLE button**
Some DVDs are recorded with various camera angle playback options. Press **ANGLE** repeatedly to display different camera angles (page 33).
- ⑲ **REPEAT button**
Use to set the repeat mode (page 42).
- ⑳ **REPEAT A-B button**
Press at the beginning and end of the section you want to repeat or to mark a location you want to return to (page 42).
- ㉑ **TOP MENU button***
Press to call up the top menu programmed on the DVD. Depending on the DVD, the top menu may be identical to the DVD menu (page 21).
- ㉒ **RETURN button***
Use to go one menu back (current settings are maintained). Use **RETURN** when you do not want to change the option setting in a menu.
- ㉓ **NEXT ▶▶I button**
During playback, press **NEXT ▶▶I** to advance to the next chapter/track (page 22).
- ㉔ **PLAY ▶ button**
Press to start or resume playback (pages 20, 23).
- ㉕ **PAUSE II button**
Press to pause playback of a disc. Press again to resume playback (page 39).
- ㉖ **REV ◀◀/FWD ▶▶ (fast reverse/forward) buttons**
During playback of DVD and Super VCD/Video CD, press **FWD ▶▶** to perform fast forward scanning. Press **REV ◀◀** to perform fast reverse scanning of DVD and Super VCD/Video CD. When a CD or MP3 is loaded, audio scanning is performed (page 22).
- ㉗ **CLEAR button**
Works in conjunction with a number of player functions. Use to cancel repeat and random playback, and to edit programs.
- ㉘ **SEARCH MODE button**
Press to perform a title/folder, chapter/track or elapsed time search (page 40).

Making Connections

Connecting Your DVD Player

Unlike any other audiovisual media format, DVD offers a wide array of audio and video output options which allows playback to be enjoyed in any number of system configurations from a standard TV with stereo audio input to a home theater system with a TV or monitor and full surround sound capabilities.

Connection Guide

The illustration on this page shows the basic setup using the audio and video cords included with this player. Use this illustration as a guide to setting up your home system.

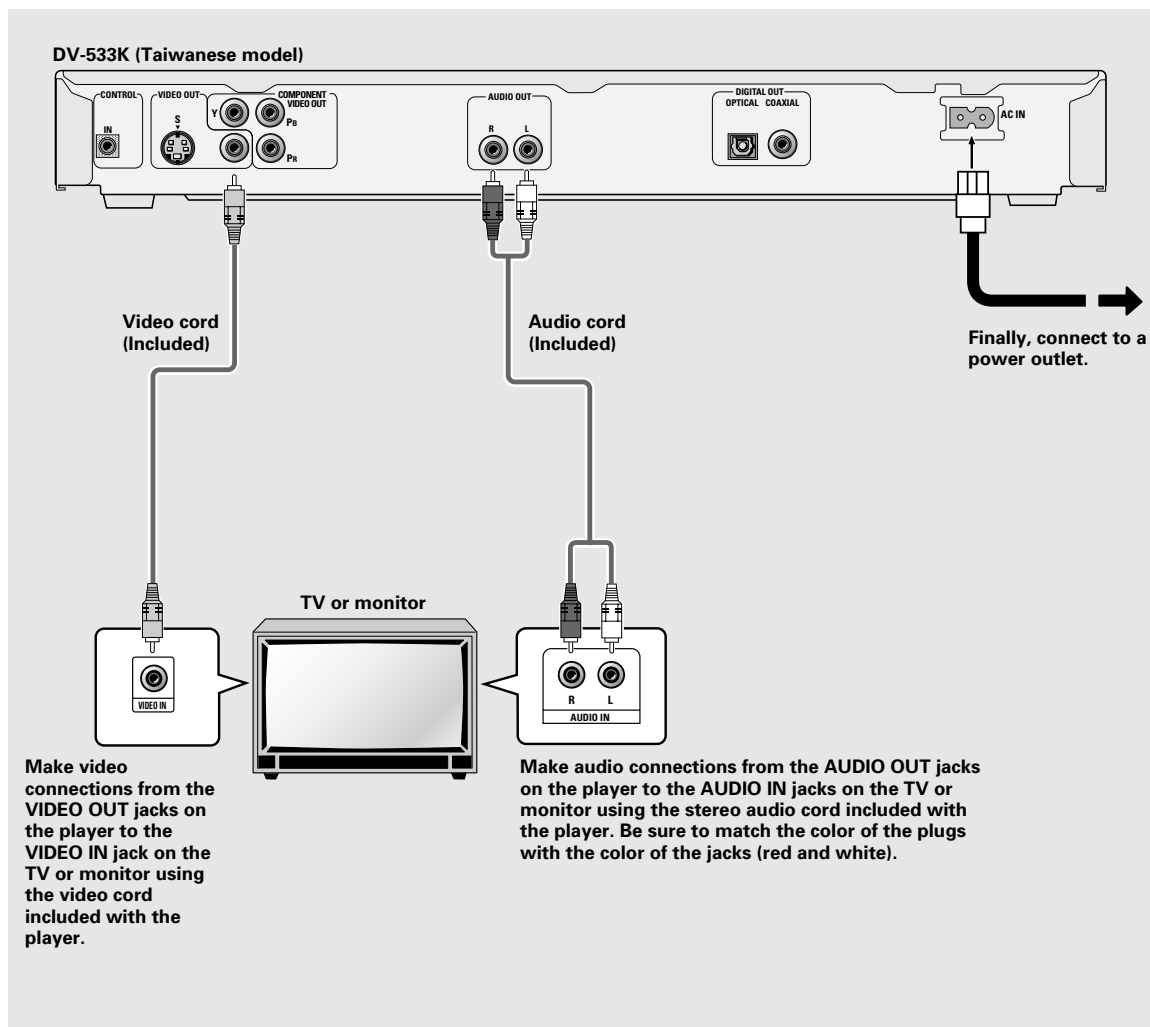

An explanation of each type of audio and video connection available can be found on **pages 15 to 16**. To determine the best audio and video connection setup for your system, refer to the manuals supplied with the components you are making connections to.

In addition to making physical connections to your TV or monitor, it is also necessary to assign the TV screen size. You can use the **[Setup Navigator]** in the Setup screen **General** menu to set whether you are using a wide screen or standard size TV or monitor (**page 18**).

Additionally, you can use the **[TV Screen]** setting in the Setup screen **Video 1** menu (**page 29**).

Notes

- When making connections to this unit or when changing connections, check that the unit is off by pressing **⏻ STANDBY/ON** and unplug the power cord from the power outlet.
- The video output on this player uses copy protect circuitry to prevent the video playback on DVDs from being copied. If you connect the player to a TV via a VCR, or record and play back the contents of a disc with a VCR, the playback picture may not be normal.

Audio Connections

This player features two digital (optical and coaxial) and also analog audio output formats.

Digital Audio Connections

You can enjoy the digital audio recorded on DVD discs from both optical digital and coaxial digital output jacks.

When making digital audio connections, do not make connections from both the coaxial and optical digital outputs to the same component.

When a DVD recorded in Dolby Digital, DTS, or MPEG is loaded, noise will be output if you have made connections via the digital audio jacks to a receiver or amplifier that cannot decode a Dolby Digital, DTS, or MPEG digital bitstream. In this case, be sure to set up the Setup Navigator audio settings to best reflect the type of system you are using (page 19). Additionally, the digital audio settings can be adjusted manually in the Setup screen **Audio 1** menu (pages 26, 27).

DIGITAL OUT OPTICAL

The digital signal is transmitted as light pulses through a fiber-optic cable.

- Use to connect to an AV amplifier or receiver with built-in Dolby Digital, DTS, or MPEG decoder.
- Use a fiber-optic cable (not supplied) to connect the **DIGITAL OUT OPTICAL** (digital optical output) on the player to the digital optical input on an AV amplifier or receiver.

DIGITAL OUT COAXIAL

The digital signal is transmitted electronically through a coaxial cable.

- Use to connect to an AV amplifier or receiver with built-in Dolby Digital, DTS, or MPEG decoder.
- Use a coaxial cable (not supplied) to connect the **DIGITAL OUT COAXIAL** (coaxial digital output) on the player to the coaxial digital input on an AV amplifier or receiver.

Analog Audio Connection

- When using a microphone, connect like this.
- Make analog audio connections to a stereo amplifier or receiver.
- Analog audio connections can also be made to a TV or monitor with stereo input jacks.
- Use the supplied audio cord to connect the **AUDIO OUT** on the player to the audio input on the stereo amplifier or receiver.
- When making analog audio connections, be sure to match the color of the plugs with the color of the jacks (red and white).

Video Connections

This player features S-video, composite, and component video output possibilities.

Check the manual supplied with your TV or monitor to determine the best possible connection for your system. In addition to making physical connections to your TV or monitor, it is also necessary to assign the TV screen size. You can use the [Setup Navigator] in the Setup screen **General** to set whether you are using a wide screen or standard size TV or monitor (page 18). Additionally, you can use the [TV Screen] setting in the Setup screen **Video 1** menu (page 29).

S-VIDEO OUT

- Make S-video connections to a TV or monitor with S-video input to produce a high quality video image.
- Use an S-video cable (not supplied) to connect the **S-VIDEO OUT** jack on the player to S-video input on the TV or monitor.

VIDEO OUT

- Make composite video connections to a standard TV or monitor with a video input jack.
- Use the supplied video cable to connect one of the **VIDEO OUT** jack on the player to the video input on the TV or monitor.
- Be sure to match the color of the plug with the color of the jack (yellow).

COMPONENT VIDEO OUT

- Make component video connections to a TV or monitor with component inputs to produce a higher quality video image.
- Use a component video cable or 3 video cords (not supplied) to connect the **COMPONENT VIDEO OUT** jacks on the player to the component jacks on the monitor.

System Control Connections

Using a commercially available cord with a mini plug (3.5 mm dia. with no resistance) to connect this player's **CONTROL IN** jack to the **CONTROL OUT** jack of another PIONEER component bearing the  mark, you can control the player as though it were a component in a system (system control).

- If you connect for system control, you cannot operate the player directly. Point the remote control unit at the component (AV amplifier, etc.) connected to the **CONTROL OUT** jack to operate.
- When controlling as a system, be sure to make a connection to the amplifier **using an audio or video cord**, even when using only digital components.
- For details, refer to the operation manuals of the connected components.

Setting Up the Player

Setting the TV System (except for DV-533K Taiwanese model and DV-440)

The default setting of this player is **AUTO**, and unless you notice that the picture is distorted when playing some discs, you should leave it set to **AUTO**.

If you experience picture distortion with some discs, set the TV system to match your country or region's system. Doing this, however, may restrict the kinds of disc you can watch. The table below shows what kinds of disc are compatible with each setting (**AUTO**, **PAL** and **NTSC**).

Disc		Output format		
Type	Format	Position of TV SYSTEM mode		
		NTSC	PAL	AUTO
DVD	NTSC	NTSC	MOD.PAL	NTSC
	PAL	—	PAL	PAL
Video CD	NTSC	NTSC	MOD.PAL	NTSC
	PAL	NTSC	PAL	PAL
Super VCD	NTSC	NTSC	MOD.PAL	NTSC
	PAL	—	PAL	PAL
CD, No disc		NTSC	PAL	NTSC or PAL

1 Switch the player into standby.

2 Hold down **▶▶▶▶▶** then press **⏻** **STANDBY/ON** to switch the TV system.

The TV system changes as follows:

AUTO → **NTSC**

NTSC → **PAL**

PAL → **AUTO**

The display indicates the new setting.

Note that you have to switch the player into standby before each change.

About MOD. (Modulation) PAL

- **SHRINK**
Most models of the newly developed countdown PAL TV system detect 50 Hz (PAL)/60 Hz (NTSC) and automatically switch vertical amplitude, resulting in a display without vertical shrinkage.
- If your PAL TV does not have a V-Hold control, you may not be able to view NTSC disc because the picture may roll. If the TV has a V-Hold control, adjust it until the picture stops rolling. On some TVs, the picture may shrink vertically, leaving black bands at the top and bottom of the screen. This is not a malfunction; it is caused by the NTSC → PAL conversion.

Using the Setup Navigator

The Setup Navigator has been designed to simplify the process of getting the DVD player ready to perform. Designed as a series of on-screen multiple-choice questions, the Setup Navigator automatically sets the audio, video, and language settings according to how the questions are answered. Once this procedure is complete, it will be possible to begin using the DVD player to enjoy DVDs. The procedure on this page describes the operations necessary to function within the Setup Navigator screens. A detailed description of the contents of each question that appears on the screen can be found on the following pages.

When setting up for the first time

Some DVDs start playing automatically when loaded in the player. Because the Setup Navigator cannot be used if a disc is playing, it is recommended to set up the player using the Setup Navigator before loading a DVD for the first time. If a DVD has been loaded, be sure to press **STOP** **■** before proceeding.

1 Press \odot (\odot STANDBY/ON on the front panel).

If there's already a disc loaded and it starts to play, press **STOP** \blacksquare to stop it.

2 Press SETUP.

When **SETUP** is pressed for the first time, the following screen appears. Though the Setup Navigator may be used more than once, this screen only appears the first time **SETUP** is pressed.

3 Use the cursor buttons (\blacktriangle / \blacktriangledown) to make a selection.

- If you are going to use the Setup Navigator, it is not necessary to change the setting on the first screen. Please proceed to the next step.
- **If you do not want to set up the player using the Setup Navigator, use the cursor button (\blacktriangledown) to select [Auto Start Off] at this time.** The Setup Navigator function may still be used at a later time in manual Setup screen menu operation (page 24).

4 Press ENTER.

The selection is entered and the next Setup Navigator screen appears.

Use steps 3 and 4 as a basis for entering selections on all of the Setup Navigator screens described on the following pages.

To change the answer to a prior question

Use the **cursor button** (\blacktriangleleft) to return to previous screens. Please note, however, that you cannot go forward using the **cursor button** (\blacktriangleright), so it will be necessary to answer all the questions that occur after the screen that was returned to.

To exit the Setup Navigator

Press **SETUP** while on any of the screens to exit the Setup Navigator. Please note that if the Setup Navigator is exited before all the questions are answered, no settings are changed.

Setting the OSD Language (On-Screen Display Language)

The **[OSD Language]** screen establishes the OSD language, or on-screen display language, which refers to the language that is used by the player in menus and on-screen messages. Additionally, the language that is established at this setting will also be used for the default audio and subtitle language.

Settings: **English***
français
Deutsch
Italiano
Español

Taiwanese model only:
English*
汉语

*Factory setting

Notes

- The languages that can be selected may be different from those shown above.
- In addition to setting the **[OSD Language]**, the audio and subtitle language are also set at this time. If you wish to change the audio or subtitle language to a different language, make changes in the Setup screen **Language** menu **[Audio Language]** and **[Subtitle Language]** as needed (pages 35, 36).

Setting the TV screen size

The **[TV Type]** screen establishes the size, or more appropriately the width to height ratio of your television or monitor. The width-to-height ratio of conventional TVs is 4:3, while the width-to-height ratio of wide screen and high-definition TVs is 16:9. This width-to-height ratio is called the aspect ratio.

Settings: **Widescreen (16:9)***
Standard (4:3)

*Factory setting

Note

There are two screen formats that can be used to display wide-screen format DVDs: letter box and pan & scan. When **[Standard (4:3)]** is selected in the Setup Navigator, the letter box screen format is automatically selected. To switch the preference to the pan & scan format, make changes in the Setup screen **Video 1** menu **[TV Screen]** setting (page 28).

Setting digital audio connections to an AV amplifier or decoder

The **[Digital Jack]** screen establishes whether digital connections have been made to an AV amplifier, receiver, or external decoder. As there are numerous options available, please refer to the instructions supplied with the component the player is connected to determine what digital audio formats can be decoded. If you have made no digital connections, select **[Not Connected]**.

Settings: **Dolby Digital***

Dolby Digital/DTS

Dolby Digital/MPEG

Dolby D/DTS/MPEG

PCM

Not Connected

*Factory setting

Setting compatibility with 96 kHz output

The **[96 kHz PCM Audio]** screen establishes whether or not the AV component the player is connected to is capable of processing an audio signal with a sampling rate of 96 kHz. This screen only appears if connections have been made to an external AV component as determined in previous screens.

Settings: **No***

Select if the connected AV component cannot process an audio signal with a sampling rate of 96 kHz.

Yes

Select if the connected AV component can process an audio signal with a sampling rate of 96 kHz.

Don't Know

Select if you are uncertain whether the connected AV component can process an audio signal with a sampling rate of 96 kHz.

*Factory setting

Confirming the settings

The **[Exit Setup Navigator]** is the final screen in the Setup Navigator.

Settings: **Save Changes***

Select to have the player make all of the necessary audio, video and language settings according to your responses in the Setup Navigator.

Delete Changes

Select to exit the Setup Navigator without changing any of the system settings.

Start Again

Select to return to the **[OSD Language]** screen of the Setup Navigator and do the settings again.

*Factory setting

To change other player settings in the Setup screen menus

The procedure for changing the settings in the Setup screen menus is described on **page 24**.

Getting Started Using Your DVD Player

Playing DVDs, Super VCDs/ Video CDs, CDs and MP3s

– DVD/Super VCD/VideoCD/CD/MP3

Before you can start to enjoy the digital audio and video on DVDs, be sure that you have either performed the Setup Navigator procedure described in the previous section or made the necessary settings in the Setup screen menus as outlined in the next section to set up the player to correspond to your home system. Having made these settings, you are now ready to start using the player to enjoy DVDs, Super VCDs/Video CDs, CDs and MP3s.

1 Press (⏻ STANDBY/ON on the front panel).

2 Press OPEN/CLOSE () on the front panel). The disc tray comes out.

3 Load a disc.

Load a disc with the label side facing up, using the disc tray guide to align the disc.

4 Press PLAY () on the front panel).

- The disc tray closes, and playback begins.
- MP3 only: It may take a few seconds for the player to locate the track on the disc, depending on the complexity of the file structure. During this time, **"Please wait a moment"** is displayed.
- Depending on the disc, a menu may be displayed. If a menu is displayed, proceed to step 5.

5 Select the item you want to view.

- When a DVD is loaded: Select the item with the cursor buttons (, , ,) or the number buttons then press ENTER.
- When a Super VCD/Video CD is loaded: Use the number buttons to select the item.

Notes

- Noise is output if you make digital audio connections to a receiver or amplifier that does not have a built-in decoder. Check that the digital audio output format selected in the **Audio 1** menu corresponds to the audio components you have made connections to (pages 26, 27).
- The TV screen size is factory set to present the wide screen format (16:9 aspect ratio). If you have a standard TV screen (4:3 aspect ratio), this setting can be changed to match your TV screen size in the **Video 1** menu (page 29).

When an operation is prohibited

There are times when you are using the player and attempt to perform an operation, but for some reason it cannot be performed. When this occurs, one of the two following icons appears on the screen.

The operation is prohibited by the player.

The operation is prohibited by the programming on the disc.

When a Menu Screen is Displayed—DVD/Super VCD/Video CD

Menu screens are displayed for DVDs that have menu screens or Super VCDs/Video CDs that include Playback Control (PBC). DVDs often contain extra information that can be accessed in the DVD menu and sometimes makes navigating DVD menu screens as enjoyable as watching the feature presentation.

Example: When a DVD that has menu screens is loaded

Example: When a Super VCD/Video CD that has Playback Control is loaded

To navigate a menu screen

- Although individual DVD titles may differ, when a menu screen is displayed, use the **cursor buttons** (◀/▶/▲/▼) and **ENTER** on the remote control. The **cursor buttons** are used to move around the options on the screen and **ENTER** is used for selection.
- Occasionally, the **number buttons** may also be used to make selections. If this is possible, using **number buttons** serves to directly select an option on a menu screen. Only **number buttons** are used to make selections on Super VCD/Video CD menu screens.
- When the Super VCD/Video CD has more than one menu, pages can be advanced to or returned to with **PREV** ◀◀ or **NEXT** ▶▶.

To Open or Return To the DVD or Super VCD/Video CD Menu Screen

Although this differs depending on the disc, pressing **MENU**, **TOP MENU**, or **RETURN** during DVD playback or **RETURN** during Super VCD/Video CD playback displays the menu screen. Refer to the DVD or Super VCD/Video CD disc jacket and accompanying documentation for more information.

To play Super VCDs/Video CDs without displaying menu screens

Super VCD/Video CDs with Playback Control (PBC) display a menu screen when play is started. It is possible, however, to play back Super VCDs/Video CDs without displaying menu screens.

When a Super VCD/Video CD with PBC is loaded, press **STOP** ■, and then the **number button** of the track you want to play.

Chapter (Track) Skip Forward/ Skip Back – DVD/Super VCD/Video CD/CD/MP3

Advancing to the next chapter (track)

Press **NEXT** ►► (►► ►► on the front panel).

- Press to skip forward to the next chapter (track).
- You can advance more than one chapter (track) forward by pressing and holding **NEXT** ►► and releasing when the desired chapter (track) number appears in the display.

Skipping back to the previous chapter (track)

Press **PREV** ◄◄ (◄◄ ◄◄ on the front panel).

- Press once to skip back to the start of the chapter (track) currently playing.
- Press twice to skip back to the start of the previous chapter (track).
- You can skip back to previous chapters (tracks) by pressing and holding **PREV** ◄◄ and releasing when the desired chapter (track) number appears in the display.

Forward and Reverse Scanning – DVD/Super VCD/Video CD/CD/MP3

Fast forward and reverse scanning

Press and hold **FWD** ►► or **REV** ◄◄ (►► ►► or ◄◄ ◄◄ on the front panel) during playback to scan forwards or backwards.

While "►► 1" or "◄◄ 1" is displayed on-screen blinking, release the button to resume normal playback.

Variable speed scanning

- 1 Press (but don't hold) **FWD** ►► or **REV** ◄◄ during playback to start scanning. "►► 1" or "◄◄ 1" appears on screen.
- 2 Depending on the type of disc playing, you can increase the scanning speed by pressing **FWD** ►► or **REV** ◄◄. The scan speed is shown on-screen.
 - DVD discs have three scanning speeds;** 1, 2 and 3.
 - CD and Video CDs have two scanning speeds;** 1 and 2.
 - MP3 have only one scanning speed.
- 3 Press **PLAY** ► to resume normal playback.

Resuming playback from where you stopped

– DVD/Super VCD/Video CD

Use the resume feature to restart playback from the point that the disc was stopped last time. This feature cannot be used with MP3s and CDs.

Press **STOP** ■ once.

The display shows “RESUME” and the stop position is memorized.

- The resume position remains memorized as long as the disc is in the player — even if you switch the power off.
- Pressing **STOP** ■ twice causes the disc to return to the beginning when **PLAY** ► is pressed again. The display shows the disc type (DVDs or Super VCDs/Video CDs).

Press **PLAY** ►.

Playback starts from the resume position.

Notes

- The actual restart position may be slightly before or after the resume position.
- If you want to remove the disc, but still want to resume playback from the last stopped position, use the **LAST MEMORY** feature instead (page 48).

Stopping Playback and Switching Power Off

– DVD/Super VCD/Video CD/CD/MP3

1 Press **STOP** ■ (■ on the front panel).

Playback stops.

2 Press **OPEN/CLOSE** (▲ on the front panel).

The disc tray comes out.

3 Remove the disc.

4 Press **STANDBY/ON** (⏻ on the front panel).

The disc tray goes back in.

Adjusting Audio and Video Settings

Using the Setup Screen Menus

The procedure on this page describes how to operate the menus on the Setup screen. These menus are used to set and adjust a number of system settings. The various functions that can be adjusted are covered throughout this manual. The procedure on this page provides a basic outline for using the Setup screen menus.

When setting up for the first time

It is recommended to set up player using the Setup Navigator (page 17). If you selected **[Auto Start Off]** when the Setup Navigator appeared, you may still set up the player using the Setup Navigator in the **General** menu screen.

If you choose not to use the Setup Navigator, be sure to make the necessary settings in the Setup screen

Audio 1, Audio 2, Video 1, Video 2 and **Language** menus as described on the following pages.

Some DVDs start playing automatically when loaded in the player. If a DVD has been loaded, be sure to press **STOP ■** before proceeding.

1 Press (**STANDBY/ON** on the front panel).

2 Press **SETUP**.

The Setup screen appears.

Example

3 Use the cursor buttons (/▶) **to select the menu you want.**

As each menu is selected with the cursor, the settings appear below the menu heading.

4 Use the cursor buttons () **to enter the menu.**

The top item within the menu becomes highlighted.

Example

5 Use the cursor buttons () to select the setting you want to change.

The options available for each setting appear to the right when the setting is selected. The current setting appears with the setting indicator lit.

6 Use the cursor buttons (▶) **to enter the setting options.**

Example

- Not all menu options can be changed while a disc is playing. In these cases, the options appear grayed out on the screen and cannot be adjusted. To change these settings, press **STOP ■** first before pressing **SETUP**.
- Operating the menu after pressing **STOP ■** may cancel the resume function.
- Some menu options are not immediately effective if set while a disc is playing. To make these settings effective, stop playback and then start again, or change the settings while the disc is stopped.

IMPORTANT

Changing to the Setup Screen "Expert" Menu Mode

The Setup screen menus are divided into two levels, **[Basic]** and **[Expert]**, to make this unit more convenient to operate for different levels of users. The **[Basic]** menu mode contains functions that may be considered necessary for the basic operations of this player and helpful on-screen information identified by the **i** mark. The **[Expert]** menu mode adds to the **[Basic]** menu mode additional functions of the player that can be adjusted to further personalize performance of the player.

In this manual, functions that are contained in the **[Expert]** menu mode are identified by the **[Expert]** icon. Make changes to the **[Setup Menu Mode]** setting in the Setup screen **General** menu.

- 7** Use the cursor buttons (▲/▼) to select a new setting and press ENTER to set the new setting in memory. Press RETURN or the cursor button (◀) to exit the options without making any changes.
- 8** Press RETURN or the cursor button (◀) to go back to the main menu bar to select another menu.
- 9** Press SETUP to close the Setup screen. The Setup screen closes.

Note

The next time you press **SETUP**, you'll see the menu screen that you exited from last time.

How to interpret the setting indicator colors in the Setup screen menus

When setting up the system, or when making adjustments, it is convenient to know what settings are applicable to the different disc formats. When the settings appear for each menu option, the currently selected setting appears with the setting indicator highlighted in one of three colors: blue, green or yellow. These colors correspond to what formats the menu option effects as shown in the table below.

Color of indicator	Disc format(s)
Blue	DVD only
Yellow	DVD/Super VCD/Video CD
Green	All compatible formats

Notes

- If a setting applicable only to DVDs is changed while a Super VCD/Video CD or CD is loaded, a blue DVD icon appears in the upper right hand corner of the screen to indicate that the setting is not applicable to the currently loaded disc. The setting will be effective the next time a DVD is loaded.
- The blue indicator is shown for the **[TV Screen]**, but the aspect can be switched for Super VCD.

Download from Www.Somanuals.com. All Manuals Search And Download.

Settings: **Expert**

Basic*

*Factory setting

Note

On-screen information only appears in the **[Basic]** menu mode.

Adjusting the Dynamic Range of the Audio Soundtrack – DVD

Audio DRC stands for Audio Dynamic Range Compression. When Audio DRC is on, soft sounds such as dialog can be heard more clearly without making loud sounds even louder. When Audio DRC is set to **[Off]**, there is no effect on the audio source.

Make changes to the **[Audio DRC]** setting in the Setup screen **Audio 1** menu.

Settings: **Off***
On

*Factory setting

Notes

- Audio DRC is only effective with Dolby Digital audio sources.
- If you have set the player to convert Dolby Digital audio to PCM, also make sure that you set the **[Digital Out]** to **[On]** to hear the Audio DRC effect.
- The effect of Audio DRC depends on your speakers and AV amplifier settings.

Setting the Digital Audio Output To Be Compatible with Your AV Component – DVD

This player is capable of digital audio output for Dolby Digital, DTS, MPEG, and signals with a sampling rate of 96 kHz. Make settings in the Setup screen **Audio 1** menu to reflect the capabilities of the components that you have made digital connections to.

Notes

- If you have already completed the Setup Navigator screen operations, the settings on this page have already been set by the player.
- If you have made only stereo line connections (analog) using the supplied audio cord, it is not necessary to make any changes in this menu.

Dolby Digital Out

This player is capable of outputting the Dolby Digital surround sound audio signal. When the player is connected to an AV component that has a built-in Dolby Digital decoder, select **[Dolby Digital]**. This player can also convert the Dolby Digital signal to a digital Linear PCM signal, the same digital signal output from a CD. Select **[Dolby Digital ► PCM]** when you have made connections to an amplifier or receiver with a Dolby Pro Logic decoder or a Digital Analog Converter (DAC).

Settings: **Dolby Digital***

Dolby Digital ► PCM

*Factory setting

DTS Out

This player is capable of outputting DTS digital audio for DVDs recorded in DTS. When this player is connected to an AV component that has a built-in DTS decoder, select **[DTS]**. If your system is not equipped to decode DTS, select **[Off]**. Refer to the operating instructions supplied with your audio components if you are unsure about compatibility with DTS.

Settings: **Off***
DTS

*Factory setting

Note

If you have made digital audio connections to component(s) not equipped to decode the DTS digital bitstream, be sure to select **[Off]**. If a DTS signal is output without decoding, the output is digital noise that could potentially cause damage to your speakers.

96 kHz PCM Out

This player is capable of outputting digital signals with a sampling frequency of 96 kHz. If you have made connections to a component capable of processing this signal rate, select **[96 kHz]** for the signal to be output as is. As some components are incapable of processing digital signal input with sampling rates of 96 kHz, selecting **[96 kHz ▶ 48 kHz]** compresses the signal to a standard signal with a sampling rate of 48 kHz.

Settings: **96 kHz ▶ 48 kHz***
96 kHz

*Factory setting

Note

On DVDs that contain copy protection, the 96 kHz signal may only be output from the analog audio jacks.

MPEG Out

This player is capable of outputting the MPEG digital bitstream. When the player is connected to an AV component that has a built-in MPEG decoder, select the **[MPEG]** setting. Otherwise, select **[MPEG ▶ PCM]** to convert the digital signal to the PCM signal, the digital signal output from a CD.

Settings: **MPEG**
MPEG ▶ PCM*

*Factory setting

Digital Out Expert

– DVD/Super VCD/VCD/CD

Depending on your preferences and the type of digital connections made, you may opt not to have the digital audio signal output at all. When this setting is set to **[Off]** there is no signal output from the digital audio output jacks.

Make changes to the **[Digital Out]** setting in the Setup screen **Audio 1** menu in the **[Expert]** menu mode ([page 25](#)).

Settings: **On* (Digital bitstream is output)**
Off (Digital bitstream is not output)

*Factory setting

Getting Surround Sound from Stereo Speakers – DVD/Video CD

TruSurround (stereo audio sources) to produce a surround sound effect from stereo speakers.

This function works only when connections are made to the AUDIO OUT jacks.

Settings: **Off***

TruSurround

* Factory setting

Notes

- There is no effect when the audio source is either DTS or 96 kHz LPCM or during CD or MP3 playback.
- The digital audio output level is reduced when playing 2 channel Dolby Digital DVDs or Video CDs with TruSurround selected. If you play a multichannel Dolby Digital DVD with Dolby Digital to PCM conversion (see **page 26**) and TruSurround selected, there is no digital output.
- How good the surround effect is varies with the disc.

TruSurround

TruSurround uses technology that simulates multichannel surround sound using only two speakers.

TruSurround™
by SRS (S)®

Setting the TV Screen Size

– DVD/Super VCD

The width-to-height ratio of conventional TVs is 4:3, while the width-to-height ratio of wide screen and high-definition TVs is 16:9. This width-to-height ratio is called the aspect ratio.

When viewing software recorded in different aspect ratios, the image's height to width ratio can be switched to match the TV or monitor being used.

Make changes to the TV screen size in the **[TV Screen]** setting in the Setup screen **Video 1** menu. Please note that changes to the **[TV Screen]** setting cannot be made when a disc is playing. Stop playback of the disc before attempting to make any changes.

Settings: **4:3 (Letter Box)**

4:3 (Pan & Scan)

16:9 (Wide)*

*Factory setting

Notes

- If **[Standard (4:3)]** is selected in the Setup Navigator screen, **[4:3 (Letter Box)]** is selected on this screen. If you prefer the pan&scan format, change the settings on this screen.
- Whether the aspect can be switched or not depends on the disc. Please refer to the information written on the disc jacket, etc.
- Some discs may not include the screen format selected in the **[TV Screen]** setting. When this occurs, the standard TV screen format available on the disc is automatically selected.

Differences in screen sizes and DVD/Super VCD formats

The number of screen size formats currently available can be somewhat confusing. If set incorrectly, the video presentation may not appear as it should. The following diagrams and descriptions are intended to help you set your TV screen size in a way that will allow you to fully enjoy the digital video of DVD/Super VCD.

The settings in the **[TV Screen]** setting are perhaps most applicable when the DVD/Super VCD you are watching is programmed in the wide screen format. If you have a standard TV, select either **[4:3 (Letter Box)]** or **[4:3 (Pan & Scan)]** based on your personal preference. If you have a wide screen TV, select **[16:9 (Wide)]**.

Note

When playing Super VCDs, even if **[4:3 (Letter Box)]** is selected in the **[TV Screen]** setting, the disc will be shown in Pan & Scan format.

When viewing a wide screen TV or monitor	
DVD/Super VCD screen size format	Setting and Appearance
Wide screen format DVD/Super VCD Please note that there are some wide screen letter box formats that place black bars at the top and bottom of the screen. This is not a malfunction.	 <p>"Wide" setting</p>
Standard screen format DVD/Super VCD When viewing a standard screen format DVD/Super VCD on a wide screen TV, black bars may be automatically placed at the side of the screen to adjust to the DVD format.	 <p>"Wide" setting</p>
Standard screen format DVD/Super VCD (unnatural stretched effect) If you are viewing a standard screen format DVD/Super VCD on a wide screen TV, the picture may appear 'stretched' on the screen. To remedy this condition, change your wide screen TV to display a standard (4:3) screen. Refer to the instructions supplied with your wide screen TV or monitor for more information.	 <p>"Wide" setting</p>

When viewing a standard size TV or monitor	
DVD/Super VCD screen size format	Setting and Appearance
Wide screen format DVD The Letter box presentation places black bars at the top and bottom portions of the screen to provide the full wide screen presentation of a movie on a standard TV (4:3 aspect ratio).	 <p>"Letter Box" setting</p>
Wide screen format DVD/Super VCD The Pan & Scan presentation crops both sides of the wide screen presentation to use the full standard TV screen.	 <p>"Pan & Scan" setting</p>
Standard screen format DVD/Super VCD If you have a standard TV, the standard screen format will be presented regardless of the setting.	 <p>Any setting</p>
Wide screen format DVD/Super VCD (unnatural squeezed effect) If you are viewing a wide screen format DVD/Super VCD on a standard TV and the [TV Screen] setting is set to [16:9 (Wide)] , the picture may appear 'squeezed' on the screen. To remedy this condition, select either [4:3 (Letter Box)] or [4:3 (Pan & Scan)] .	 <p>"Wide" setting</p>

Switching the S-Video Output

Expert – DVD

You can Switch the kind of S-Video signal output from the S-Video outputs. If you connected your TV with an S-Video cord, in rare cases the TV picture may appear stretched. In this case switch the output from **[S2]** to **[S1]**.

Make changes in the **[S-Video Out]** in the Setup screen **Video 1** menu in the **[Expert]** menu mode (page 25).

Settings: **S1**
S2*

*Factory Setting

Selecting the Type of Paused Image to Display

Expert

This function lets you view a clear still-image when DVD playback is paused.

Make changes in the **[Still Picture]** setting in the Setup screen **Video 2** menu in the **[Expert]** menu mode (page 25).

Settings: **Field**
(Picture shake will be eliminated during a paused picture.)

Frame
(Select to obtain higher picture quality.)

Auto*
(Selects **[Field]** or **[Frame]** automatically according to the disc.)

*Factory setting

Setting the Position of the On-screen Display

Expert

When watching conventional software on a wide screen TV, the operation display is at the very top of the screen, and may be difficult to see. Changing the position of the display lets you see operation indicators clearly even on a wide screen TV.

Alternatively, you can choose to turn them off completely with the **[Off]** setting.

Make changes in the **[On Screen Display]** in the Setup screen **Video 2** menu in the **[Expert]** menu mode (page 25).

Settings: **Position-Wide**
Position-Normal*
Off

*Factory setting

Note

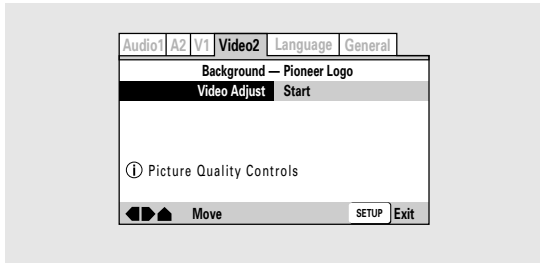

This setting is only effective with DVDs that contain a 4:3 aspect ratio video presentation.

Adjusting the Video Quality

– DVD/Super VCD/Video CD

You can either select a preprogrammed setting designed to match certain program types or make adjustments to match your own preferences and save them in the player's memory.

Make changes to the **[Video Adjust]** setting in the Setup screen **Video 2** menu.

Selecting a preprogrammed setting

1 Use the cursor button (▶) to select **[Start]** then press ENTER.

2 Press ENTER.

Standard*

Presents the video with no effect added.

Cinema

Delivers a cinema-like picture.

Animation

Provides images with bright clear colors.

Memory1, Memory2, and Memory3

These are user programmable settings. See *'Adjusting the picture quality settings'* on page 32 for more information.

*Factory Setting

3 Use the cursor buttons (◀/▶/▲/▼) to select one of the preprogrammed picture quality settings.

If there is a DVD or Super VCD/Video CD playing, the effects of each setting can be viewed while it is highlighted on the screen. This may be useful in selecting an appropriate setting.

4 Press ENTER.

The new selection is set.

Notes

- Each picture quality setting is defined by a number of individual settings, described in *'Adjusting the picture quality settings'* on page 32.
- Depending on the disc and the TV/monitor, you may not see the effect clearly.

Adjusting the picture quality settings

To create your own setting (1)

- 1 Use the cursor button (▶) to select [Start] then press ENTER.

- 2 Use the cursor button (▼) to select [Video Setup] then press ENTER.

- 3 Use the cursor buttons (◀/▶) to select the setting to [On] or [Off].

- 4 Use the cursor buttons (▲/▼) to select the setting to adjust.

You can adjust any or all of the following picture quality factors:

Fine Focus

Switch on to reveal greater detail (higher resolution) in the picture.

Contrast

Adjusts the contrast of the elements in the picture.

Sharpness

Adjusts the sharpness of the mid-frequency (less detailed) elements in the picture. (This setting is only effective when [Fine Focus] is [On].)

Chroma Level

Adjusts how saturated colours appear.

Hue

Adjusts the overall colour balance between red and green. (This is only effective when the player is connected using the VIDEO OUT or S-VIDEO OUT jacks.)

- 5 Use the cursor buttons (◀/▶) to adjust the settings.

Adjust these while a disc is playing to see the effect of changes immediately.

- 6 Repeat steps 4 and 5 to make adjustments to other settings.

If you would like to save the settings in the player's memory, be sure to select either [1], [2], or [3] in the [Memory] setting to establish which memory location to save the new settings in. Please note that if you select a location where settings have already been saved, the old settings will be replaced by the new ones.

- 7 When you are finished making adjustments, press ENTER to establish the new settings.

To create your own setting (2)

- 1 Use the cursor button (▶) to select [Start] then press ENTER.

- 2 Use the cursor button (▼) to select [Video Setup] and press ENTER.

- 3 Press DISPLAY.

- 4 Use the cursor buttons (▲/▼) to select the setting and use the cursor buttons (◀/▶) to adjust the settings.

Adjust these while a disc is playing to see the effect of changes immediately.

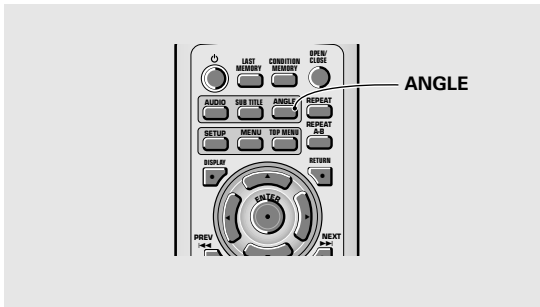

- 5 To memorize the setting, select [Memory1, 2, 3], then press ENTER.

The previous setting will be erased.

Viewing from a Desired Camera Angle (Multi-Angle)

– DVD

You can select a camera angle when viewing DVDs with the multi-angle option.

Press ANGLE during playback.

The camera angle changes each time you press the button.

Notes

- You can use the Multi-Angle function only with discs featuring recordings of images shot from different camera angles.
- During Multi-Angle playback, the  indicator in the display lights.
- For some discs, selection can be made using the DVD menu. In this case, press **MENU** to display the DVD menu screen and then make your selection.

To check whether or not a disc is recorded with angles

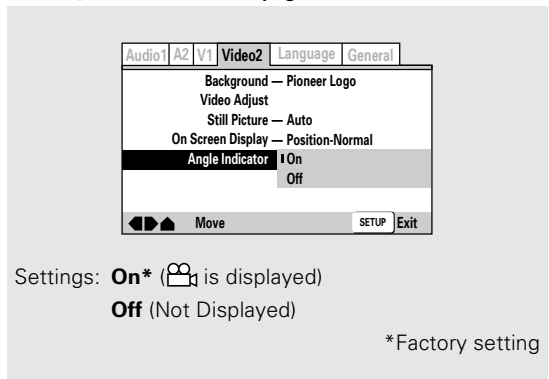

The jacket of discs that are recorded with angles will be marked with . When locations on discs that are recorded with angles are played back, the  indicator can be displayed.

To cancel the angle mark, set **[Angle Indicator]** to **[Off]** in the Setup screen **Video 2** menu described in the section below.

Turning the angle indicator on and off Expert

When a picture recorded in different angles is played back  is displayed on the screen. This setting lets you see clearly whether the playback picture is recorded in multiple angles or not.

Turn the angle indicator on or off in the **[Angle Indicator]** setting in the Setup screen **Video 2** menu in the **[Expert]** menu mode (page 25).

Note

Even when the **[Angle Indicator]** setting is set to **[Off]**, the  indicator in the display panel of the player lights during multi-angle playback. Therefore, it is possible to know when the multi-angle function can be used without having to display the icon on the screen.

Setting the Language Options

DVDs have the capacity to contain a great deal of audio information, which includes the ability to hold up to 8 different language tracks and subtitle information in as many as 32 different languages. This section outlines the variety of audio language and subtitle options available with this player.

Please note that if you have completed the Setup Navigator, the audio and subtitle language options have automatically been set in accordance with the **[OSD Language]** (the language that appears on the screen).

Note

DVDs differ in content and do not all contain multiple language or subtitle information. Therefore making settings in this section may have no effect on some DVDs.

Setting the On-screen Display (OSD) Language

This setting is used to establish the language that operation indicators and on-screen messages and operations display. Change this setting in the Setup screen **Language** menu **[OSD Language]** setting.

Settings: **English***
français
Deutsch
Italiano
Español

Taiwanese model only:
English*
 汉语

* Factory setting

Notes

- The menu settings may be different from those shown above.
- The **[OSD Language]** setting is factory set to **[English]**. If you want English to be displayed, it is not necessary to adjust this setting.

Changing the Audio Language (Multi-Language Function) – DVD

Dolby Digital, PCM, and other audio data can be recorded on DVDs in a number of languages or audio tracks, letting you choose the desired language or audio.

Press AUDIO repeatedly to select the desired language.

Pressing **AUDIO** once displays the currently selected language. Subsequent presses rotate through the audio languages available on the DVD.

Notes

- You cannot switch languages if there is only one language recorded on the disc.
- Switching the audio language may not be possible with some titles. In this case, the  mark is displayed.
- For some titles, selection can be made using the DVD menu. In these cases, press **MENU** to display the DVD menu screen and then make your selection.

Changing Audio Type

– Super VCD/Video CD/CD/MP3

For enjoyment of karaoke or similar format Super VCDs/ Video CDs, CDs and MP3s, it is possible to select stereo audio, or either right or left channel mono depending on the requirements of the source.

Video CD/CD/MP3

Press AUDIO repeatedly during playback to switch the audio type.

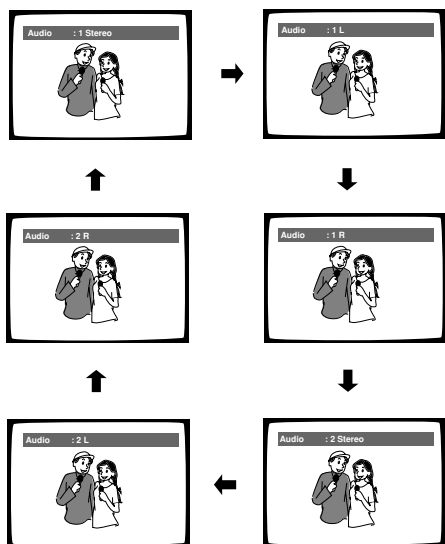

Audio output changes from **[1/L]** (Left channel) to **[2/R]** (Right channel) to **[Stereo]**.

Super VCD

Press AUDIO repeatedly during playback to switch the audio type. Choose the audio type that lets you hear the soundtrack (the sound may not be audible with some audio types).

The audio changes according to the diagram above.

Note

With karaoke and other discs, set the appropriate audio type for singing and accompaniment after referring to information on the disc jacket or accompanying material.

Selecting an audio language preference

The audio language that you normally listen to can be selected from the various audio languages on a DVD. Even when the audio language is changed during playback by pressing **AUDIO**, the language selected at this setting will be selected as the default when the DVD is changed.

Make changes to the **[Audio Language]** setting in the Setup screen **Language** menu.

You cannot make this setting with a disc playing.

Settings: **English***

French

German

Italian

Spanish

Other

Taiwanese model only:

English*

Chinese

Other

(For details on how to select other languages, see 'When [Other] is selected' on page 37.)

*Factory setting

Note

The menu settings may be different from those shown above.

Selecting a Subtitle Language (Multi-Language Subtitles)

– DVD

You can select a desired subtitle language with DVDs that have subtitle data in multiple languages recorded on them.

Press SUBTITLE repeatedly during playback.

Pressing **SUBTITLE** once displays the currently selected subtitle language. Subsequent presses rotates through the subtitle languages available on the DVD.

Notes

- The subtitle language cannot be switched if the subtitle language is not recorded, or if only one language is recorded.
- Switching the subtitle language may not be possible with some discs. In this case, the  mark will be displayed.
- To clear subtitles during playback, press **SUBTITLE** and then press **CLEAR**, or press **SUBTITLE** until **[Off]** appears.
- For some discs, subtitle language selection can be made using the menu on the DVD. In this case, press **MENU** to display the DVD menu screen and then make your selection.

Selecting a subtitle language preference

The subtitle language that you will normally display can be selected from the subtitles programmed on a disc. Even when the subtitle language is changed during playback by pressing **SUBTITLE**, the language selected at this setting will be selected when the disc is changed. Make changes to the **[Subtitle Language]** setting in the Setup screen **Language** menu.

You cannot make this setting with a disc playing.

Settings: **English***

French

German

Italian

Spanish

Other

Taiwanese model only:

English*

Chinese

Other

(For details on how to select other languages, see 'When [Other] is selected' on [page 37](#).)

*Factory setting

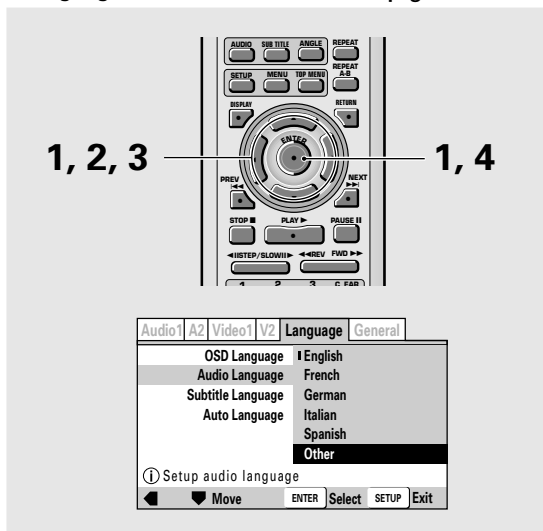

Note

The menu settings may be different from those shown above.

When [Other] is selected

When you want to select one of the 136 languages as the main audio language, follow the steps below when the following screen appears.

A language code list can be found on page 58.

If you select "Code", use the cursor buttons (▲/▼) to input the numbers of the input code.

Use the **cursor buttons** (◀/▶) to change the position of the cursor. You can also use the **number buttons** to enter the code.

Code (0~2)

4 Press ENTER to set the new language.

To exit the screen without making any changes, press **RETURN**.

Setting Auto Language to control subtitle and audio language based on program content

When the Auto Language function is used, foreign movies are shown with the original audio soundtrack and subtitles in the language selected in the **[Subtitle Language]** menu option. Domestic films are shown with the original audio soundtrack and no subtitles. (This setting may not be effective with all DVD discs.) Make changes to the **[Auto Language]** setting in the Setup screen **Language** menu. You cannot make this setting with a disc playing.

1 Use the cursor buttons to select [Other] and press ENTER.

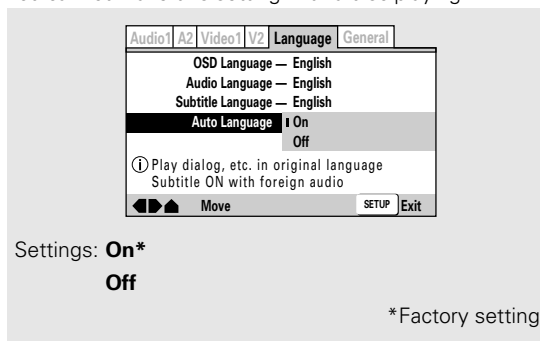

The language selection screen appears.

2 Use the cursor buttons (◀/▶) to select either "List of Languages" or "Code".

3 If you select "List of Languages", use the cursor buttons (▲/▼) to select the language.

For languages which are only shown as a code, please refer to 'Language Code List' on page 58.

Note

The Auto Language function operates only when this function is set to **[On]**, and the language set for the **[Audio Language]** and **[Subtitle Language]** settings is the same.

Selecting a DVD menu language preference Expert

In addition to containing different audio languages, DVD may also contain menu screens in different languages as well. Setting a DVD language preference, sets the selected language as a default when DVDs with menu information in that language are encountered.

Selecting **[w/ Subtitle Language]** automatically assigns the language selected in the **[Subtitle Language]** setting.

Make changes to the **[DVD Language]** setting in the Setup screen **Language** menu in the **[Expert]** menu mode (**page 25**).

You cannot make this setting with a disc playing.

Settings:

w/ Subtitle Language*	Taiwanese model only:
English	English*
French	Chinese
German	Other
Italian	
Spanish	
Other	

(For details on how to select other languages, see *'When [Other] is selected'* on **page 37**.)

*Factory setting

Notes

- The menu settings may look different from the one shown above.
- If this function is not effective, the languages that can be selected may also be selected in the DVD menu. Press **MENU** to open the DVD menu and make your selection accordingly.

Selecting subtitles, assist subtitles or no subtitles Expert

Use this function to turn the subtitles on or off.

Additionally, some DVDs provide assist subtitles that provide additional explanations of scenes in addition to the standard subtitles for viewers who are hard of hearing. Select **[Assist Subtitle]** to display these subtitles on DVDs where this function is offered.

Make changes to the **[Subtitle Display]** setting in the Setup screen **Language** menu in the **[Expert]** menu mode (**page 25**).

You cannot make this setting with a disc playing.

Settings: **On***

Off

Assist Subtitle

*Factory setting

Notes

- If there is no subtitle information recorded on the DVD, no subtitles are displayed even if this function is set to **[On]**.
- This setting serves as a default as whether or not to display subtitles. Even if this option is set to **[Off]**, subtitles can be displayed by pressing **SUBTITLE**. Similarly, if this option is set to **[On]**, the subtitles can be turned off by pressing **SUBTITLE** and then **CLEAR**.

Forcing subtitles to be displayed Expert

Even when the subtitles are turned off, some DVDs will nevertheless display them on the screen. This setting allows you to select the language of the subtitles to be displayed with this type of DVD.

Select **[With Audio]** to display the subtitles in the same language as the currently selected **Audio Language**.

Select **[Selected Subtitle]** to display the subtitles in the language set in the **[Subtitle Language]** setting.

Make changes to the **[Subtitle Off]** setting in the Setup screen **Language** menu in the **[Expert]** menu mode (**page 25**).

You cannot make this setting with a disc playing.

Settings: **With Audio**

Selected Subtitle*

*Factory setting

Advanced Functions

This player is compatible with MP3s, DVD, Super VCD/Video CD, and CD formats. Users already familiar with Super VCD/Video CD or CD will already be familiar with some of the functions the player is capable of performing. With DVD, an even greater number of possibilities and functions are available.

Note

DVDs differ in content and do not all contain the same information. Therefore some functions in this section may not work or have no effect on some DVDs.

Still Frame/Slow Play/Frame Advance Playback – DVD/Super VCD/Video CD

The video images on DVD and Super VCD/Video CD can be viewed as a still frame, played back at slow speeds and even advanced frame by frame.

Viewing a still frame

Press **PAUSE II**, **STEP/SLOW** ◀|| or ||▶.

When viewing a DVD, if the paused picture shakes, select the **[Field]** setting in the Setup screen **Video 1** menu **[Still Picture]** setting as described in the section on **page 30**.

To return to normal playback

When viewing a still frame playback, pressing **PAUSE II** or **PLAY** ▶ restores normal playback operation.

Viewing slow playback

You can't use slow reverse play with Super VCD/Video CDs.

1 During still frame playback, press and hold **STEP/SLOW** ◀|| or ||▶ during playback.

2 Press **STEP/SLOW** ◀|| or ||▶ repeatedly to change the slow-motion speed.

There are four forward slow-motion play speeds:

There are two reverse slow-motion play speeds:

Slow 1 ↔ **Slow 2**

To return to normal playback

When viewing a slow playback, pressing **PLAY** ▶ restores normal playback operation.

Frame by frame advance playback: Viewing one frame at a time

You can't use frame review (◀||) with Super VCD/Video CDs.

1 Press **PAUSE II**, **STEP/SLOW** ◀|| or ||▶.

2 Press **STEP/SLOW** ◀|| or ||▶.

STEP/SLOW ||▶: The picture advances one frame each time the button is pressed.

STEP/SLOW ◀||: The picture backs up a DVD a few frames each time the button is pressed.

To return to normal playback

When viewing frame by frame playback, pressing **PAUSE II** or **PLAY** ▶ restores normal playback operation.

Notes

- There is no sound when viewing still frames or slow playback, or when advancing one frame at a time.
- Still frame, slow play, or frame advance playback may not be possible with certain titles. In this case, the  mark is displayed.

Searching for a Title, Folder, Chapter, Track, or Location on a Disc – DVD/Super VCD/Video CD/CD/MP3

This player offers different ways of accessing the information on a DVD, Super VCD/Video CD, CD or MP3. Using **SEARCH MODE**, you can search for titles or chapters on a DVD, tracks on a Super VCD/Video CD, CD or folders or tracks on a MP3 and even select the point in time to start playback.

1 Press SEARCH MODE repeatedly to select the type of search.

The type of search changes which each press as follows.

DVD

Super VCD/Video CD

CD

MP3

2 Press the number button(s) of the desired title, chapter or track or of the specific time where you would like to begin playback.

- To select number 3, press **3**.
- To select number 10, press **1** and **0**.
- To select number 87, press **8** and **7**.

When performing a time search:

- To select 21 minutes, 43 seconds, press **2, 1, 4,** and **3**.
- To select 1 hour, 14 minutes, press **7, 4, 0,** and **0**.

3 Press PLAY ►.

Playback of the selected title, folder, chapter or track starts. When a time search is performed, playback begins at the appointed time.

Notes

- For some discs, selection can be made using the top menu on the DVD. In this case, press **TOP MENU** to display the menu screen and then make your selection.
- With some DVDs, the search operation may not be possible and may stop shortly after being performed. In this case, the mark is displayed.
- Time search is not possible with Super VCDs, CDs and MP3s.
- When performing DVD time search, playback may start from a slightly different time than that specified.
- Time search is not possible during when the disc is stopped.
- Search using time search is not possible during PBC playback of Super VCDs/Video CDs.

To perform a direct title or chapter/track search using the number buttons

- Press the number buttons while the disc is stopped to select a title or track number.
- Press the number buttons while the disc is playing to select a chapter or track number.
 - To select number 3, press **3**.
 - To select number 10, press **+10** and **0**.
 - To select number 37, press **+10, +10, +10** and **7**.

Using the MP3 Navigator – MP3

Use the MP3 Navigator to make searching for the track(s) you want to play easier. You can also use it to add or clear tracks from the program list.

1 Load a CD-ROM containing MP3 tracks.

2 Press MENU to enter the MP3 Navigator screen.

- The left side of the screen shows a list of folders containing MP3 tracks.
- If you display the MP3 Navigator when a disc is playing, the currently playing folder and track numbers are shown at the top left of the screen.

Total number of Folder

- On the right side is a list of MP3 tracks from the first title in the list.

Navigate using the following controls:

Cursor buttons (◀/▶) – Select folder and tracks from the current screen.

Cursor buttons (▲/▼) – Select the previous/next of folders and tracks. To move rapidly up or down a long list of folders or tracks, press and hold the **cursor buttons** (▲/▼).

ENTER – Play the currently selected folder or track. MP3 tracks that are unplayable on this system are automatically skipped and the display shows "UNPLAYABLE MP3 FORMAT".

MENU – Exit the MP3 Navigator

PROGRAM – Add the currently selected track to the program list. (Tracks in the program list are marked ✓.) Pressing **PROGRAM** repeatedly will add the track to the program list repeatedly.

See 'Programming MP3s' on page 46 for how to use program play.

(Press **MENU** to exit the MP3 Navigator first.)

CLEAR – Clear the currently selected track from the program list.

Repeat Play

– DVD/Super VCD/Video CD/CD/MP3

You can repeat an entire title, folder, chapter or track, or just a part.

Repeat play of a chapter/track

– DVD/Super VCD/Video CD/CD/MP3

Press **REPEAT** once during playback of the chapter or track you want to repeat.

Repeat play of a title/folder – DVD/MP3

Press **REPEAT** twice during playback of the title or folder you want to repeat.

Repeat play of a disc

– Super VCD/Video CD/CD/MP3

Super VCD/Video CD/CD

Press **REPEAT** twice during playback of the disc you want to repeat.

MP3

Press **REPEAT** three times during playback of the disc you want to repeat.

To repeat a program

Press **REPEAT** once during program playback to repeat the program.

To cancel repeat play

Press **CLEAR**. Playback continues, but the repeat function is canceled.

Repeat play of a specified section

– DVD/Super VCD/Video CD/CD

Press **REPEAT A-B** at the beginning and end of the section you want to repeat.

- When **REPEAT A-B** is pressed a second time, the disc returns to the location where **REPEAT A-B** was pressed first and plays the selected section repeatedly.
- You can only perform A-B repeat within the same title, chapter, or track.

To cancel A-B repeat play

Press **CLEAR**. Playback continues, but the repeat function is canceled.

Return to a specified location on a disc – DVD/Super VCD/Video CD/CD

- 1 Press **REPEAT A-B** at the desired location.
- 2 When you want to return to the specified location, press **PLAY** ►.

To clear the specified location

Press **CLEAR** to cancel repeat play or to clear the specified location that was set using **REPEAT A-B**.

Notes

- With some DVD discs, there may be times when repeat playback is not possible. In these cases, the  mark will appear on the screen.
- With Super VCDs/Video CDs, repeat play is not possible when the menu is displayed (PBC playback). To perform repeat play, start playback without displaying a menu by pressing the track number to be repeated when the disc is stopped, and then press **REPEAT**.
- You cannot use A-B repeat when listening to an MP3.
- If you switch camera angle during repeat play, repeat play is cancelled.

Random Play – DVD/Super VCD/Video CD/CD/MP3

Play titles, chapters, or tracks on a disc in random order.

Random playback of chapters within one title – DVD

Press **RANDOM** once, then press **ENTER** or **PLAY**.

“Random Chapter” appears on the screen, and chapters within the title will be played back in random order.

Random playback of titles – DVD

Press **RANDOM** twice, then press **ENTER** or **PLAY**.

“Random Title” appears on the screen, and titles will be played back in random order.

Random playback of tracks

– Super VCD/Video CD/CD/MP3

Press **RANDOM**.

“Random” appears on the screen, and random playback begins.

To change titles, chapters, or tracks during random play

- Press **NEXT** or **RANDOM** and the next randomly selected title, chapter, or track starts playing.
- Press **PREVIOUS** and playback of the current title, chapter, or track starts again from the beginning.

To stop random play

Press **CLEAR**. This returns you to normal playback of chapters/tracks in order from the chapter/track currently playing.

Notes

- With Super VCDs/Video CDs, random play is not possible during playback when the menu is displayed (PBC playback). To perform random play, start playback without displaying a menu by pressing a track number button while in the stop mode, and then press **RANDOM**.
- Random play of programmed chapters/tracks is not possible.
- In the case of DVDs, random playback may not be possible with some discs.
- Repeat playback of random playback is not possible. In these cases, the  mark will appear on the screen.

Playback in a Desired Order (Program Play) – DVD/Super VCD/Video

CD/CD/MP3

The titles and chapters within a title on a DVD and similarly MP3, CD and Super VCD/Video CD tracks can be arranged to play in the order you want.

Programming DVDs

A program with a maximum of 24 steps can be memorized.

1 Press PROGRAM.

The Program screen appears.

2 Use the cursor buttons (◀/▶) to select either [Program Chapter] or [Program Title].

3 Once the program type is selected. Use the cursor button (▼) to enter the program window.

When [Program Chapter] is selected, you must also select what title the chapters are in. Use the **cursor button (▲)** to highlight "Title" and then use the **number buttons** to enter the title number to be used.

4 In the program window, use the number buttons to enter the numbers of the titles or chapters in the order you want to program them in.

- To program DVD titles/chapters 9, 7, and 18 in order, press **9, 7, +10** and **8**.

5 Press ENTER or PLAY ►.

- Playback starts in the set order.
- Press **PROGRAM** to return to the previous display. The program will not begin until **ENTER** is pressed.

To program a pause in a program

Press **PAUSE II** instead of a number button.

"II" appears on the screen and the pause can be programmed.

A pause cannot be programmed as the first or last position in a program, and two or more pauses cannot be programmed in succession.

To delete a number:

Use the **cursor buttons (▲/▼/◀/▶)** to highlight the incorrect number and then press **CLEAR**.

The number is deleted. If the number was before another number, the later numbers are reordered automatically.

To insert a number:

Use the **cursor buttons (▲/▼/◀/▶)** to highlight the number to be placed after the new number and then press the **number button(s)** of the number to be inserted.

The new number is inserted before the previously selected number.

To stop program play

Press **STOP ■**.

Notes

- When programming chapters, chapters not programmed may appear on the screen. This is not a malfunction.
- Programming may not be possible with certain DVD discs. On these types of discs, the  mark will appear on the screen when programming is attempted.
- Only chapters within the same title can be programmed during chapter programming.

Programming Super VCDs/Video CDs, CDs

A program with a maximum of 24 steps can be memorized.

1 Press PROGRAM.

The program screen appears. When a Super VCD/Video CD or CD is loaded, the cursor appears in the program window.

2 Use the number buttons to enter the numbers of the tracks in the order you want to program them in.

- To program tracks 9, 7, and 18 in order, press **9**, **7**, **+10** and **8**.
- To edit the program, refer to the procedures on the previous page.

3 Press ENTER or PLAY ►.

- Playback starts in the specified track order.
- To stop the program play, press **STOP ■**.

Notes

- To program a pause, or to add or delete a number, refer to the procedures for 'Programming DVDs' on page 44.
- You cannot program when playing a Super VCD/Video CD using menu selections (during PBC).

Additional programming options – DVD/Super VCD/Video CD/CD

After you have made a program, it is then possible to confirm, add, or clear the contents of the program.

To confirm the contents of a program:

On a CD or Super VCD/Video CD track program, press **PROGRAM** to confirm. The program screen displays the current program.

On a DVD, select the program type (title or chapter) with the **cursor buttons** (◀▶). The current DVD title or chapter program can then be confirmed on the appropriate program screen.

To add to a program:

- Press **PROGRAM**.
- Press a **number button** to add a new title, chapter, or track at the end of the program.
- Press **PROGRAM** to exit the program screen.

To delete a program:

- Press **PROGRAM**.
- Select the program with the **cursor buttons** (◀▶), then press **CLEAR**.
- Press **PROGRAM** to exit the program screen.

Notes

- The complete program will be deleted even if the disc tray is open or power off (standby).
- Pressing **CLEAR** when the disc is stopped will clear all programs.

Programming MP3s

A program with a maximum of 24 steps can be memorized.

1 Press PROGRAM to enter the [MP3 Program] screen.

If you added tracks to the program list from the 'Using the MP3 navigator' on page 41, the tracks are displayed here.

From this screen you can enter folder and track numbers directly to build up a program list.

2 Use the number buttons to enter a three-digit folder number.

The number of folders on the disc is displayed in the top-left of the screen.

Once you've entered a valid folder number, the name of the folder appears.

3 Use the number buttons to enter a three-digit track number.

The number of tracks in the current folder is displayed in the top-left of the screen.

Once you've entered a valid track number, the name of the track appears.

Navigate using the following controls:

Cursor buttons – Navigate the program list.

CLEAR – Clear the currently selected item in the program list.

ENTER – Start playing the program list.

PROGRAM – Exit the [MP3 Program] screen.

To make a program of your favorite parts of a disc as it plays – DVD/Video CD/CD/MP3

With this player, it is possible to make a program as you watch a DVD or Video CD or while listening to an MP3 or a CD .

To add a title/chapter/track to a program, press and hold PROGRAM for about 2 seconds.

The current title/chapter/track number appears on-screen together with the program step number. If there isn't already a program then a new one will be created.

To confirm the contents of a program:

Press **PROGRAM**.

Notes

- When using this function to program DVDs, the program being created corresponds to the Program screen (chapter or title) that appears when **PROGRAM** is pressed. Be sure to check that the appropriate program type is selected.
- You cannot make a program containing chapters in different titles.

To save a program in memory – DVD

This player can memorize the programs on up to 24 DVDs. By turning the **[Program Memory]** to **[On]**, the player will save your program and recall it the next time you use the same DVD. When the program memory exceeds 24, programs will be erased in chronological order from the oldest program in memory.

1 Use the cursor button (▼) to highlight [Program Memory] and use the cursor button (▶) to select [On].

2 Press ENTER.

The program is saved in memory.

Note

When a DVD with a program stored in memory is loaded, program playback may start automatically.

To erase a program saved in memory – DVD

The player erases programs in chronological order when the maximum number of programs that can be held in memory is exceeded. To prevent the player from erasing older programs that you may still use regularly, or when you don't want to use a program anymore, it is possible to manually erase programs stored in memory.

1 Load a DVD that has a program stored in memory.

2 Press PROGRAM.

The program screen appears.

3 Use the cursor button (▼) to highlight [Program Memory] and use the cursor buttons (▶/▼) to select [Off].

4 Press ENTER.

The program is cleared from memory.

Continuing Playback from a Specified Location (Last Memory) – DVD/Super VCD/Video CD

The Last Memory function is convenient when you want to continue viewing a disc from the point where you were watching before. Unlike the resume function, the Last Memory function is effective even if the DVD is removed from the player (Last Memory locations saved for Super VCDs/Video CDs are effective only if the disc remains loaded in the player).

Last Memory may not work reliably with some Video CDs that feature PBC.

Memorizing a Last Memory location to return to later

- 1 Press LAST MEMORY during play.**
The "LAST" indicator lights on the player.

- 2 Press \odot to turn the power to standby, or stop playback with STOP ■.**

Once memorized, the memorized point will be recalled even if the power is turned off, or if the disc is ejected. Points on up to 5 discs can be memorized, and those points are recalled the next time any of the discs are played back.

- A Last Memory point can be memorized for only one Super VCD/Video CD at a time as the function is only effective until the Super VCD/Video CD is removed from the player.

Resuming playback from where LAST MEMORY was pressed

- 1 Load a disc that has a Last Memory point memorized.**

Some DVDs will start playback automatically when loaded. In this case, press **STOP ■** to stop playback.

- 2 Press LAST MEMORY while in the stop mode.**

The disc begins playback at the memorized point.

- Last Memory mode may not function for some DVDs.
- You can use Last Memory for up to five discs (after that the one used least recently is deleted to make space for a new one).
- Even with a disc you have memorized with Last Memory, playback begins at the start of the disc if you press **PLAY ►**.
- This function is for playback of DVDs or Super VCDs/Video CDs only. You cannot use it with CDs and MP3s.

To clear the Last Memory location

- 1 Load a disc that has a Last Memory point memorized.**

Some DVDs will start playback automatically when loaded. In this case, press **STOP ■** to stop playback.

- 2 Press LAST MEMORY while in the stop mode.**

The disc begins playback at the memorized point.

- 3 Once the picture appears, press LAST MEMORY again.**

- 4 While "Last Memory" is displayed on the screen, press CLEAR.**

The "LAST" indicator disappears from the display.

Memorizing Settings for Often Viewed DVDs (Condition Memory) – DVD

You can store in memory settings for DVDs you often watch. Settings remain in memory even if you remove the disc from the player, or switch power to the player to standby. If you load a disc that has its settings memorized, “**COND.**” appears in the display. When you start playing the disc, the memorized settings are automatically recalled.

When a disc that has memorized settings is loaded

“**Condition Memory**” will appear on the screen, and the previously memorized settings will be selected.

Erasing the recorded contents

Load a disc that has memorized settings, and press **CLEAR** while “**Condition Memory**” is being displayed. The disc’s recorded data will be erased.

Notes

- Settings are stored in memory for use any time.
- You can use Condition Memory for up to 15 discs (after that the one used least recently is deleted to make space for a new one).
- If you make changes to any of the settings memorized in Condition Memory, press **CONDITION MEMORY** during playback to memorize new settings.
- Switching of the multi-language mode etc., is automatic on some discs.

Press **CONDITION MEMORY** during playback.

Settings are memorized for the disc currently playing.

The following six settings are memorized:

On Screen Display (page 30)

Video Adjust (page 31)

Multi-Angle (page 33)

Multi-Language (pages 34, 35)

Multi-Language subtitles (page 36)

Parental Lock Level (page 51)

Singing Your Favorite Songs Along with Karaoke Discs (DV-533K only)

– DVD/Super VCD/Video CD/CD/MP3

This player has a karaoke feature that lets you sing along with your favorite songs, featuring a microphone jack conveniently located on the front panel as well as controls for mixing the vocal level and amount of digital echo effect.

For this function, 'Analog Audio Connection' are necessary (page 15).

1 Turn both **VOLUME** and **ECHO** counterclockwise to the minimum level.

To avoid possible damage to your speakers, be sure to turn down the volume completely before preceding to step 2.

2 Connect a microphone (not supplied) to the **MIC** input jack.

The karaoke function is active whenever a microphone is connected to the player. Make sure that the plug is inserted firmly and completely into the jack to use the karaoke function.

3 Load a disc with the music you want to use.

4 Play the title, chapter or track and adjust the volume of the audio playback.

- For more information on loading a disc and playing back a title, chapter or track, refer to the section 'Getting Started Using Your DVD Player' starting on page 20.
- Adjust the volume on the TV or component that audio connections are made to. **VOLUME** on the front panel controls only the level of the microphone.

5 When the music starts, turn **VOLUME** clockwise while speaking or singing into the microphone to adjust the vocal volume to an appropriate level.

6 Turn **ECHO** clockwise to adjust the amount of echo effect that you want added to the vocals.

The amount of echo effect needed may differ for different styles of music and for different preferences.

When "howling" occurs

If sound from the speakers is picked up by a mic and output again through the speakers, the result is a screeching sound known as "howling".

To eliminate howling:

- Point the mic away from the speakers.
- Move the mic away from the speakers.
- Turn **VOLUME** counterclockwise to lower the volume level.
- Turn **ECHO** counterclockwise to lower the echo effect.

Note

Reduce the volume when plugging in the microphone to prevent feedback.

Setting the Parental Lock Level – DVD

This player lets you set the Parental Lock if the DVD has a parental lock level recorded on it. With Parental Lock capable discs, you can block access to material you feel is inappropriate for your children. Refer to the DVD disc jacket and the accompanying documentation to see if a particular disc contains a parental lock level.

Make changes to the **[Parental Lock]** setting in the Setup screen **General** menu. Please note that changes to the Parental Lock level cannot be made when a disc is playing. Stop playback of the disc before attempting to make any changes.

You cannot select **[Level]** or **[Country Code]** until you have registered a password. Select **[Password]** to register a new password. See *'Entering the password'* on this page for how to register a new password.

Settings: **Password (Password Change)**

(For information, refer to *'Entering the Password'* on this page.)

Level

(For information, refer to *'Setting the Parental Lock Level'* on the following page.)

Country Code

(For information, refer to *'Setting the Country Code'* on the following page.)

When a DVD with a set Parental Lock level is loaded

Playback cannot be started until the code number has been correctly input by using the **cursor buttons** (◀/▶/▲/▼) or the **number buttons**, and **ENTER** has been pressed.

Entering the Password

When you select either **[Level]** or **[Country Code]**, it is necessary to register the password (4-digit code number). You'll be asked to confirm your existing password before registering a new one. Use the following steps at any time you are asked to enter or confirm your password.

1 Use the cursor buttons (▲/▼) or the number buttons to select a number between 0 and 9.

You can also use the **number buttons** to enter the numbers directly. When entering your password for the first time, or changing it, you will be asked to reenter your password. When using the **number buttons** to confirm the password, the numbers appear as asterisks, and the cursor advances automatically to the next position.

2 Use the cursor buttons (◀/▶) to move the cursor to a different position in the password.

When all four numbers of the password have been entered, **ENTER** appears on the screen.

3 Press ENTER to set the password.

The password is entered.

Note

Be sure not to forget your password. If you should forget it, reset the system, and enter a new password. To reset the system, see *'Resetting the Player to System Settings'* (page 53). Please note that this procedure resets the system, and clears all saved settings, not just the password.

Setting the Parental Lock Level

Change the Parental Lock level to a higher or lower level according to the settings printed on the DVD disc jacket or accompanying documentation. If you use the Condition Memory function to save the settings for a particular disc, the Parental Lock level is saved as well. Because it is saved in memory, Parental Lock levels can be set for individual discs according to their content rather than a set level for all DVDs.

1 Select [Level] in the [Parental Lock] setting and press ENTER.

The screen changes to the password input screen. To enter the password, refer to 'Entering the Password' on the previous page.

You cannot select [Level] until you have registered a password.

2 Use the cursor buttons (◀/▶) to adjust the Parental Lock Level.

The lock icons appear "unlocked" up to the selected level to indicate that access is available.

3 Press ENTER to set the new level.

The new Parental Lock level is set and the screen returns to the **General** menu screen. To go back to the **General** menu screen without making any changes, press **RETURN**.

Changing the Password

Change your password whenever you feel it is necessary. However, if you forget your existing password, you cannot enter this screen to change it.

1 Select [Password Change] in the [Parental Lock] setting and press ENTER.

The screen changes to the password input screen. To enter the password, refer to 'Entering the Password' on the previous page.

2 Use the cursor buttons (◀/▶/▲/▼) or the number buttons to enter the new password.

3 When the new password has been entered, press ENTER.

The new password is set and the screen returns to the **General** menu screen. To go back to the **General** menu screen without making any changes, press **RETURN**.

Setting the Country Code

Change your Country Code whenever you feel it is necessary. However, if you forget your existing password, you cannot enter this screen to change it.

1 Select [Country Code] in the [Parental Lock] setting and press ENTER.

The screen changes to the password input screen. To enter the password, refer to 'Entering the Password' on the previous page.

The Country Code selection screen appear.

2 Use the cursor buttons (◀/▶) to select either "List of Codes" or "Code".

3 If you select "List of Codes", use the cursor buttons (▲/▼) to select the country.

For country codes which are only shown as a code, please refer to 'Country Code List' on page 53.

List of Codes

If you select "Code", use the cursor buttons (▲/▼) to input the numbers of the input code.

Use the **cursor buttons** (◀/▶) to change the position of the cursor. You can also use the **number buttons** to enter the code.

Code (0~2)

4 Press ENTER to set the new Country Code.

To exit the screen without making any changes, press **RETURN**.

Country Code List

Changing the Background of the Screen

You can select a background to appear when the player is in the stop mode. Make changes to the **[Background]** setting in the Setup screen **Video 2** menu.

Settings: **Pioneer Logo***
Black

*Factory setting

Turning the Screen Saver On and Off **Expert**

As a protective function against residual images on the TV screen or monitor, a phenomenon referred to as "screen burn", the screen saver appears when the same screen has been displayed for a length of time. By default, the screen saver is turned on. However, the screen saver function can be turned on and off at your discretion.

Make changes to the **[Screen Saver]** setting in the Setup screen **Video 1** menu in the **[Expert]** menu mode (page 25).

Settings: **On***
Off

*Factory setting

Resetting the Player to System Settings

To reset the player, press and hold **■ (stop)** on the front panel when pressing **⏻ STANDBY/ON** to turn the unit from standby to on.

All program memory, saved settings from functions such as Video Memory, Last Memory and Condition Memory are cleared, TV System is reset to **AUTO** and all Setup screen menus are returned to factory settings.

Viewing Disc Information

– DVD/Super VCD/Video CD/CD/MP3

Use **DISPLAY** to get current information about the disc currently loaded. You can get information about the titles and chapters on a DVD or tracks on a Super VCD/Video CD or CD or folders and tracks on a MP3. When viewing DVDs, you can also check the digital bitstream transmission rate.

Press DISPLAY during while a disc is playing. Press DISPLAY repeatedly to change the information being displayed.

The disc information is displayed superimposed over the video image on the screen.

Press and hold DISPLAY to display the time remaining on the disc.

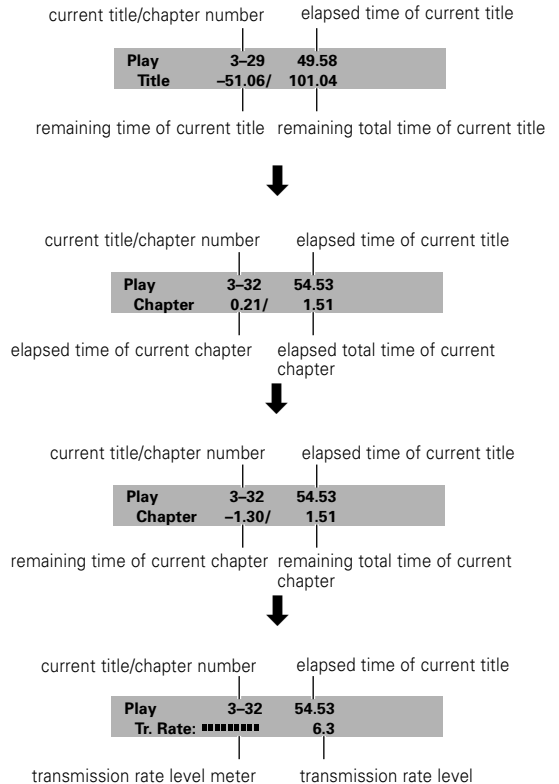

When you release the button, the information disappears.

Notes

- Depending on the format and type of disc being used, not all screens may be displayed.
- When playing Video CDs in PBC mode or unfinalized CDs not all the above information is displayed.

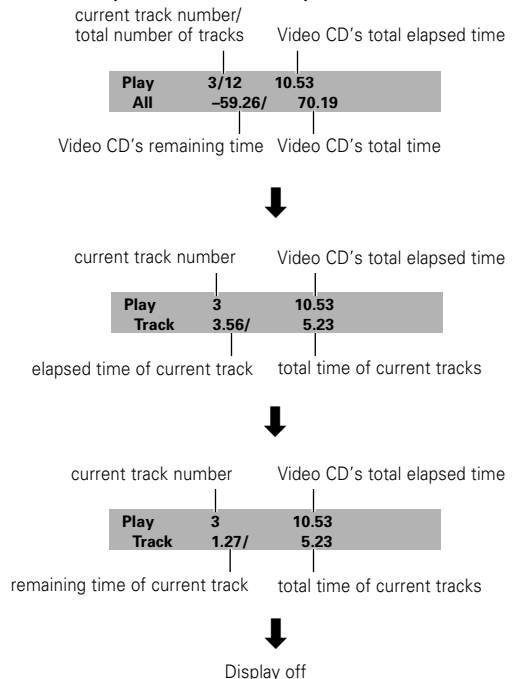

The display changes for each type of disc as follows each time the button is pressed.

Additional Information

Disc Care

How to hold discs

When loading or removing discs, try not to touch their playing surfaces.

Cleaning

Fingerprints or other dirt on the disc may affect sound and picture quality.

To clean your discs, use a soft clean cloth to wipe them. If necessary, moisten a soft cloth with diluted neutral detergent to remove heavy dirt or fingerprints.

Do not wipe in a circular direction (Concentric scratches in the disc groove tend to cause noise).

Gently wipe from the inside toward the outer edge.

Discs must not be cleaned with record cleaning sprays, or static prevention sprays, etc. Also do not use volatile liquids such as benzine, or thinner, etc.

Never play cracked or warped discs

The disc revolves in the player at high speed when it is played. Never play a cracked, scratched or warped disc. This may damage the player or cause it to malfunction.

Never use discs with special shapes

CD's with special shapes (heart-shaped CDs, octagonal CDs, etc.) cannot be played on this set. Attempting to do so may damage the set. Do not use such CDs.

After using discs, store them upright

After playing a disc, always remove it from the player and return it to its jacket. Then store it standing upright away from heat and humidity.

- Store discs carefully. If you store discs at an angle, or stacked on top of each other, discs may become warped even when in their jackets.
- Do not leave discs in locations such as the seat of a car, which may become excessively hot.
- Do not fix labels or stickers to discs. The disc may become unplayable as a result.
- Do not load more than one disc into the player.

CAUTION WHEN USING THE DISC

All rights reserved.

Unauthorized public performance, broadcasting or copying is a violation of applicable laws.

For Proper and Long Use of This Unit

Do not move the unit during playback

During playback, the disc rotates at high speed. Do NOT lift or move the unit during playback. Doing so may damage the disc.

When moving the unit

When changing places of installation or packing the unit for moving, be sure to remove the disc and return the disc table to its original position in the player. Then, press **⏻** **STANDBY/ON** and switch the power to standby. **Check that the "--OFF--" indication on the display goes off**, then disconnect the power cord. Moving this unit with the disc loaded may result in damage to this unit.

Installation

- Select a stable place to the side of a TV set or stereo system to be connected to the unit.
- When using the unit with a stereo system, install the speakers a little bit away from the TV.
- Do NOT install the unit on top of a TV or color monitor. Install the unit away from equipment that may be affected by magnetism, such as a cassette deck.
- Do NOT place objects on top of the unit.

Avoid installing in a place that is:

- Exposed to direct sunlight
- Exposed to humidity or where ventilation is poor
- Extremely hot or cold
- Exposed to vibration
- Exposed to dust
- Exposed to oily smoke, steam or heat (for example, a kitchen)

Do not block vents

Do NOT use the player on top of a long-fibered carpet, bed or sofa, and do not cover it with a cloth, etc. This will prevent heat radiation and could result in damage.

Avoid heat

Do NOT place the unit on equipment which generates heat, such as an amplifier. When installing the unit in a rack, place it on the lowest shelf possible (however, not where it is exposed to dust) and separated from the amplifier to avoid the heat generated by the amplifier or other audio equipment.

CAUTION: WHEN PLACING THE UNIT IN A STEREO RACK WITH GLASS DOORS

Be sure there is ample space between the unit and the glass doors when opening the disc table using the remote control. If the disc table opens against strong resistance, such as a closed glass door, damage to the unit may result.

Condensation

Moisture may form in the operating section of the player if the player is brought from cool surroundings into a warm room or if the temperature of the room rises suddenly. When this happens, the player's performance will be impaired.

To prevent this, let the player stand in its new surroundings for about an hour before switching it on, or make sure that the room temperature rises gradually. Condensation may also form during the summer if the player is exposed to the breeze from an air conditioner. In such cases, change the location of the player.

Switch POWER to STANDBY when not using the unit

Depending on the strength of the TV or radio broadcast signal, having the TV or radio on while power to the unit is on may result in stripes on the TV screen or noise. However, this is not a malfunction of this unit or the TV or radio. In such a case, switch the power of the unit to standby.

Power-cord caution

Handle the power cord by the plug. Do not pull out the plug by tugging the cord and never touch the power cord when your hands are wet as this could cause a short circuit or electric shock. Do not place the unit, a piece of furniture, etc., on the power cord, or pinch the cord. Never make a knot in the cord or tie it with other cords. The power cords should be routed in such a way that they are not likely to be stepped on. A damaged power cord can cause a fire or give you an electrical shock. Check the power cord once in a while. When you find it damaged, ask your nearest PIONEER authorized service center or your dealer for a replacement.

Cleaning the player

To clean the PLAYER, wipe with a soft, dry cloth. For stubborn dirt, wet a soft cloth with a mild detergent solution made by diluting one part detergent to 5 or 6 parts water, wring well, then wipe off the dirt. Also use a dry cloth to wipe the surface dry. Do not use volatile liquids such as benzene and thinner which are harmful to the unit.

Lens cleaner

The player's pickup lens should not become dirty in normal use, but if for some reason it should malfunction due to soiling, contact your nearest PIONEER authorized service center. Lens cleaners are commercially available, but special care should be exercised in their use since some may cause damage to the lens.

Notes on using optical cables

- Do not route cords around sharp angles. When storing, wind the cords so that they have a diameter of at least 15 cm (6 in.).
- When connecting, push all the way into the terminal.
- Do not use cords with a length of over 3 m (9.9 feet).
- If moisture or dust has collected on the plug, wipe it with a soft cloth before connecting.

Language Code List

Language codes are used when setting the audio and subtitle language preferences (**page 37**).

Troubleshooting

Incorrect operations are often mistaken for trouble and malfunctions. If you think that there is something wrong with this component, check the points below. Sometimes the trouble may lie in another component. Inspect the other components and electrical appliances being used. If the trouble cannot be rectified even after exercising the checks listed below, ask your nearest PIONEER authorized service center or your dealer to carry out repair work.

The disc table comes back out automatically, shortly after the disc table is closed.

The disc is dirty or warped.

- ➔ Refer to 'Disc Care' (page 56).

The disc is not placed properly on the disc table.

- ➔ Use the disc table guide to align the disc (page 20).

Region number does not conform with this unit.

- ➔ If the region number on the disc does not match the number on the player, the disc cannot be used (page 62).

There is condensation on the operating section of the player.

- ➔ Allow time for condensation to evaporate. If player is near an air conditioning unit, you should move the player (page 57).

Playback is not possible.

The disc has been loaded upside down.

- ➔ Check that the disc has been loaded with the label side facing up.
- ➔ A Super VCD that does not conform with the IEC standards might not play normally.

mark appears on screen.

The selected function does not operate for that disc.

mark appears on screen.

The operation is prohibited by the player.

Picture playback stops and the operation buttons cannot be used.

- ➔ Stop disc playback (press **STOP** ■), then start playback again.

New settings made in the Setup screen menus while a disc is playing are ineffective.

Some settings can be changed while a disc is playing, but are not effective. This is not a malfunction.

- ➔ Make the same setting when the player is stopped.
- ➔ Stop disc playback (press **STOP** ■), then start playback again. When playback is resumed, the new settings should be in effect. Please note that making settings in the Setup screen menus may cancel the resume function.

When making changes in the Setup screen menus, is displayed.

There is a Video CD, CD or MP3 loaded in the player and the setting that was changed only applies to DVD performance.

- ➔ The setting will be effective the next time a DVD is loaded.

Settings are canceled.

When the power is turned off by power failure or by unplugging the power cord, settings will be canceled.

- ➔ Before unplugging the power cord, press  **STANDBY/ON** and check that "--OFF--" disappears in the display.

No picture.

Connection is incorrect.

- ➔ Check that cord connections are correct and that plugs are firmly connected.

Operation (settings) of TV or AV amplifier is not appropriate.

- ➔ Be sure that your TV, receiver, or amplifier is set up to view DVD playback.

The screen is stretched or aspect does not change.

The multi aspect setting is not appropriate.

- ➔ Change the aspect setting in the **[TV Screen]** setting in the Setup screen **Video 1** menu to the screen type most appropriate to the TV or monitor you are using (page 29).

Picture disturbance during playback or dark.

This is not a malfunction.

- ➔ This player is compatible with Macro-Vision System copy guard. Some discs include a copy prevention signal, and when this type of disc is played back, stripes etc., may appear on some sections of the picture depending on the TV.

The TV system may be set inappropriately.

- ➔ See 'Setting the TV System' on page 17.

Discs respond differently to particular player functions which may result in the screen becoming black for a brief instant or shaking slightly when the function is executed.

- ➔ These problems are largely due to differences between discs and disc content and are not malfunctions of this player.

Audio is output from the analog output jacks but not from the digital output jack.

Player settings are incorrect.

- ➔ In the **Audio 1** menu, check that the appropriate digital audio output formats are selected, and that the **[Digital Out]** setting is not set to **[Off]** (page 27).

When recorded on a VCR or passed through an AV selector, there is disturbance in the playback picture.

This is not a malfunction.

- ➔ Due to the player's copy protection circuits, connection of this device through a VCR or an AV selector may prevent recording or cause picture problems.

Remote control operation is not possible.

The rear panel control input jack on the player is being used.

- ➔ Point the remote control at the component that the player is connected to (page 16).

The remote control is too far from the player, or the angle with the remote sensor is too wide.

- ➔ Be sure to operate the remote from a location within its operating range (page 8).

The batteries are exhausted.

- ➔ Replace the exhausted batteries with all new batteries (page 8).

Some settings in the Setup Menu do not appear.

- ➔ The Setup Menu Mode is set to **[Basic]**; set it to **[Expert]** (page 25).

Audio is not output or is distorted.

The Setup screen **Audio 1** menu **[96 kHz PCM Out]** setting is set to **[96 kHz]**.

- ➔ Either connect using the analog outputs, or set **[96kHz PCM Out]** in the **Audio 1** menu to **[96kHz ▶ 48 kHz]** (pages 15, 27).

The disc is dirty.

- ➔ Refer to *'Disc Care'* (page 56).

The connection plugs are not inserted fully into the terminals or are not connected.

- ➔ Check that all connection plugs are firmly inserted.

The connection plug or terminal is dirty.

- ➔ Check that the plugs and terminals are wiped clean of dirt, etc.

Audio cable connection is wrong.

- ➔ Check to make sure that the audio cables are connected correctly (page 15).

Connection is made to the stereo amplifier's PHONO input terminal.

- ➔ Change connection to any input terminal except PHONO.

The pause mode is engaged.

- ➔ Press **PLAY ▶** or **PAUSE II** to exit the pause mode.

Stereo amplifier operation is incorrect.

- ➔ Check input (CD, AUX, etc.) selector to determine if it is selected for DVD playback.

Noticeable difference in DVD and CD volume.

DVDs and CDs use different recording methods.

- ➔ This is not a malfunction.

No DTS audio output.

- ➔ You can only play DTS discs if you have a DTS-compatible amplifier or a DTS decoder. From the disc menu screen, or using the **AUDIO** button, select a non-DTS setting (pages 21, 34).
- ➔ If this unit is connected to a non-DTS compatible amplifier or decoder using a digital audio cable, set **[DTS Out]** to **[Off]** in the Setup menu. If you do not do this, noise will be output if you try and play a DTS disc (page 27).
- ➔ If this unit is connected to a DTS-compatible amplifier or decoder using a digital audio cable, check the amplifier settings, and that the cable is properly connected (page 15).

"DTS DIGITAL OUT OFF" is displayed on-screen.

If this unit is connected to a DTS-compatible amplifier or decoder, set **[DTS Out]** and **[Digital Out]** to **[On]** from the Setup menu (page 27). If you do not have a DTS-compatible amplifier or decoder, you cannot play DTS discs. In this case, select a non-DTS setting from the disc menu or by using the **AUDIO** button (pages 21, 34).

The disc containing the MP3 tracks won't play.

If the disc is a recordable CD, make sure that the disc is finalized. If the message **"UNPLAYABLE MP3 FORMAT"** is displayed when you try to play a disc/ track:

- ➔ Check that the track(s) are in the MPEG1 Audio Layer 3 format.
- ➔ Check that the sampling rate of the track(s) are 44.1 or 48kHz.

Some MP3 tracks appear to be missing from a disc.

- ➔ If a track name does not end in ".mp3" or ".MP3", this player will not recognize it as an MP3 track.
- ➔ This player only recognizes the first 250 folders and tracks on a disc. If there are more folders/ tracks than this, you will not be able to play them.
- ➔ This player is not compatible with multi-session discs. If the disc is multi-session, you will only be able to play tracks recorded onto the first session.

The audio recorded on the disc is not output properly.

- ➔ If the audio is switched to **[2]** when playing a Super VCD that contains only one stereo soundtrack, there may be no sound at all. To restore the sound, return the **AUDIO** button back to its original position (page 35).

There is a howling or high-pitched sound from the speakers when using the karaoke function. (DV-533K only)

- The mic is too close or pointing towards the speakers.
 - ➔ Try to keep the mic pointed away from the speakers.
 - ➔ Turn down the volume on the mic.

Karaoke functions are not possible. (DV-533K only)

- A mic is not connected to the player or is not turned on.
 - ➔ Check that a mic is connected to the player. If the mic has an on/off switch, check that the mic is switched on.

The mic volume is turned down all the way.

- ➔ Adjust the mic volume so that vocals can be heard.

Caution

Static electricity or other external influence may cause malfunctioning of this unit. In this case, unplugging the power cord and then re-plugging it in will usually reset the unit for proper operation. If this does not correct the problem, please consult your nearest PIONEER service center.

Terms

Aspect ratio

Aspect ratio refers to the length to height ratio of TV screens. The ratio of a standard TV is 4:3, while the ratio of a high-definition or wide TV is 16:9. The latter allows you to enjoy a picture with a wider perspective.

Chapter number

Chapter numbers are the numbers assigned to sections of a title on the disc, similar to chapters in a book. If the disc includes chapter numbers, you can locate the section you want very quickly using search and other functions.

Component (color difference) video output

The color signal of the TV is divided into the luminance (Y) signal and the color (Pb and Pr) signals and then output. In this way mutual interference of each signal is avoided. On a TV with component input jacks, these signals are synthesized to produce the picture.

Condition memory

“Condition” refers to the various mode settings, etc. On this player, various conditions, such as those set during playback, can be memorized. This function allows you to play back the same disc at any time without having to redo your preferred settings.

Digital bitstream

The bitstream does not refer to the audio signal, but rather to the digital data that, once converted, becomes the audio signal. The player outputs digital bitstreams via the digital optical or digital coaxial output. If the bitstream cannot be decoded by the connected AV amplifier etc., digital noise is produced. Digital bitstream formats compatible with different entertainment systems can be selected in the Setup screen **Audio 1** menu.

Digital output (Coaxial)

Output of the digital audio signal is transmitted electronically using a coaxial cable. Because the signal being transmitted is digital, connection must be made to the coaxial digital input of another component. Noise will be output if connected to the analog audio inputs as the digital signal cannot be decoded.

Digital output (Optical)

Normally, audio is converted to an electric signal and transmitted through an electric wire from the player to the amplifier, etc. Changing this signal to a digital signal and transmitting it through an fiber-optic cable is called optical digital output. Similarly, optical digital input receives digital signals from external units such as an AV amplifier or receiver.

Multi-session

A CD-R/RW that contains two or more ‘sessions’. Each session is a complete recording process, so each session is read as a complete disc.

Dolby Digital

Using a maximum of 5.1 channels of audio, this high quality surround system is used in many of the finer movie theaters around the world.

DTS

DTS stands for Digital Theater System. DTS is a surround system different from Dolby Digital that has become a popular surround sound format for movies. In order to enjoy the benefits of DTS encoded discs, the digital output jack (either coaxial or optical) of this player needs to be connected to an AV amplifier or receiver or to a DTS decoder to be able to enjoy the surround sound of DTS audio. DTS audio is not output from the analog audio outputs.

Dynamic range

Dynamic range refers to the difference between the maximum and minimum levels of the audio soundtrack as measured in decibels (dB).

Compressing the dynamic range raises the minimum signal level and lowers the maximum signal level. This allows you to hear voices and other low level audio signals clearly while lowering strong audio signals like the sound of explosions.

File extension

A tag added to the end of a filename to indicate the type of file. For example, “.mp3” indicates an MP3 file.

MP3

MP3 (MPEG1 audio layer 3) is a compressed audio file format. Files are recognized by their file extension “.mp3” or “.MP3”.

MPEG

Short for Moving Picture Experts Group. This is an international standard for compression of moving images. On some DVDs, digital audio has been compressed and recorded in this format.

Multi-angle

When you watch a TV program, you are watching the image filmed through the TV camera. Because of this, the picture is displayed on your TV from the viewpoint of the TV camera’s position. In a TV studio, the image is filmed by many cameras at the same time, and one of those images is selected by the program director and transmitted to your TV. If all the filmed images were transmitted to your TV you would be able to select the camera image you want. Some DVD discs are recorded with the angles of more than one camera used for filming, and these can be selected using this player. These types of discs are called multi-angle discs.

Parental lock level

This function was suggested by parents concerned about what type of media their children were able to watch. Parental lock restrictions are restrictions incorporated into titles which include scenes that parents may not wish their children to view.

PCM

PCM stands for Pulse Code Modulation and is digital audio. The digital audio of CDs is PCM. This player also has a function that converts Dolby Digital and MPEG digital bitstreams into PCM to enable you to listen to quality digital sound even without a special decoder.

Playback Control (PBC)

This refers to signals recorded on a Super VCD/Video CD (Version 2.0) enabling playback control.

You can use menus recorded on discs with PBC for easy, interactive search for desired scenes, and playback. You can also enjoy viewing high-resolution/standard resolution still images.

Regional restriction codes (region number)

Regional restriction codes are built in to DVD players and DVD discs for each sales region. If the regional code of the DVD player does not match one of the regional codes of the DVD disc, playback is not possible.

The region number can be found on the rear panel of the DVD player. The illustration below shows the regions and corresponding region numbers.

Sampling Frequency

When a sound wave is converted to a digital signal, the sound is sampled and converted to data at a specific frequency rate. For example, a signal with a 96 kHz sampling rate indicates that in one second, the analog signal was sampled 96000 times to produce the digital signal.

Subtitle

Subtitles are language titles superimposed on movies, or other media. Up to 32 different subtitle languages can be recorded on a DVD disc. The subtitle function can be used to select the language of your choice.

S-video

Connecting the S-video output on the player to a TV or monitor with S-video input via an S-video cable produces clearer picture reproduction by sending separate signals for the luminance and the color. These signals are then combined by the television to produce a better quality picture.

System control

When you connect this player via a cord with a mini plug to another Pioneer component such as a receiver or an amplifier bearing the  mark, you can control the player as though it were a component in a system. To control the player, point the player's remote control at the component that the player is connected to, and not the player itself.

Time number

The time number corresponds to the elapsed playback time of a disc from its beginning. When using the time search function, use the time number to locate scenes that occur at the time selected.

Title number

DVD discs are divided into units referred to as titles, and titles are divided into chapters. Menu screens do not belong to any title. A disc which contains a movie may have only one title with many or no chapter divisions. Karaoke discs may have many titles, assigning a title to each song on the disc.

TruSurround

TruSurround is a simulated surround system which produces a surround sound effect from stereo speakers.

Specifications

General

System DVD, Super VCD, Video CD, CD and MP3 files
Power requirements

DV-533 / DV-533K (except for Taiwanese model)
..... AC 110-127/220-240 V, 50/60 Hz
DV-533K (Taiwanese model only) AC 110 V, 60 Hz
DV-440 AC 120 V, 60 Hz

Power consumption

DV-533 / DV-533K (except for Taiwanese model) 13 W
DV-533K (Taiwanese model only) / DV-440 12 W

Power consumption in standby mode less than 1 W
Weight

DV-533 / DV-440 2.5 kg (5 lb 9 oz)
DV-533K 2.6 kg

Dimensions (Not including protruding cables, etc.)

DV-533 / DV-440 420 (W) x 279 (D) x 55 (H) mm
(16 ⁹/₁₆ (W) x 11 (D) x 4 ³/₁₆ (H) in.)

DV-533K 420 (W) x 284 (D) x 55 (H) mm

Operating temperature +5°C to +35°C (+36°F to +96°F)

Operating humidity 5% to 85% (no condensation)

Note

The specifications and design of this product are subject to change without notice, due to improvement.

Dear Customer:

Selecting fine audio equipment such as the unit you've just purchased is only the start of your musical enjoyment. Now it's time to consider how you can maximize the fun and excitement your equipment offers. This manufacturer and the Electronic Industries Association's Consumer Electronics Group want you to get the most out of your equipment by playing it at a safe level. One that lets the sound come through loud and clear without annoying blaring or distortion-and, most importantly, without affecting your sensitive hearing.

Sound can be deceiving. Over time your hearing "comfort level" adapts to higher volumes of sound. So what sounds "normal" can actually be loud and harmful to your hearing. Guard against this by setting your equipment at a safe level BEFORE your hearing adapts.

To establish a safe level:

- Start your volume control at a low setting.
- Slowly increase the sound until you can hear it comfortably and clearly, and without distortion.

Once you have established a comfortable sound level:

- Set the dial and leave it there.

Taking a minute to do this now will help to prevent hearing damage or loss in the future. After all, we want you listening for a lifetime.

We Want You Listening For A Lifetime

Used wisely, your new sound equipment will provide a lifetime of fun and enjoyment. Since hearing damage from loud noise is often undetectable until it is too late, this manufacturer and the Electronic Industries Association's Consumer Electronics Group recommend you avoid prolonged exposure to excessive noise. This list of sound levels is included for your protection.

Decibel

Level	Example
30	Quiet library, soft whispers
40	Living room, refrigerator, bedroom away from traffic
50	Light traffic, normal conversation, quiet office
60	Air conditioner at 20 feet, sewing machine
70	Vacuum cleaner, hair dryer, noisy restaurant
80	Average city traffic, garbage disposals, alarm clock at two feet.

THE FOLLOWING NOISES CAN BE DANGEROUS UNDER CONSTANT EXPOSURE

90	Subway, motorcycle, truck traffic, lawn mower
100	Garbage truck, chain saw, pneumatic drill
120	Rock band concert in front of speakers, thunderclap
140	Gunshot blast, jet plane
180	Rocket launching pad
