# FOR YOUR SAFETY

Before operating the monitor, please read this manual thoroughly. This manual should be retained for future reference.

# FCC Class B Radio Frequency Interference Statement WARNING: (FOR FCC CERTIFIED MODELS)

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- 1. Reorient or relocate the receiving antenna.
- 2. Increase the separation between the equipment and receiver.
- 3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- 4. Consult the dealer or an experienced radio/TV technician for help.

#### NOTICE:

- The changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- Shielded interface cables and AC power cord, if any, must be used in order to comply with the emission limits.
- The manufacturer is not responsible for any radio or TV interference caused by unauthorized modification to this equipment. It is the responsibilities of the user to correct such interference.

#### **WARNING:**

To prevent fire or shock hazard, do not expose the monitor to rain or moisture. Dangerously high voltages are present inside the monitor. Do not open the cabinet. Refer servicing to qualified personnel only.

#### **PRECAUTIONS**

- Do not use the monitor near water, e.g. near a bathtub, washbowl, kitchen sink, laundry tub, swimming pool or in a wet basement.
- Do not place the monitor on an unstable cart, stand, or table. If the monitor falls, it can injure a person and cause serious damage to the appliance. Use only a cart or stand recommended by the manufacturer or sold with the monitor. If you mount the monitor on a wall or shelf, use a mounting kit approved by the manufacturer and follow the kit instructions.
- Slots and openings in the back and bottom of the cabinet are provided for ventilation. To ensure reliable operation of the monitor and to protect it from overheating, be sure these openings are not blocked or covered. Do not place the monitor on a bed, sofa, rug, or similar surface. Do not place the monitor near or over a radiator or heat register. Do not place the monitor in a bookcase or cabinet unless proper ventilation is provided.
- The monitor should be operated only from the type of power source indicated on the label. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.
- The monitor is equipped with a three-pronged grounded plug, a plug with a third (grounding) pin. This plug will fit only into a grounded power outlet as a safety feature. If your outlet does not accommodate the three-wire plug, have an electrician install the correct outlet, or use an adapter to ground the appliance safely. Do not defeat the safety purpose of the grounded plug.
- Unplug the unit during a lightening storm or when it will not be used for long period of time. This will protect the monitor from damage due to power surges.
- Do not overload power strips and extension cords. Overloading can result in fire or electric shock.
- Never push any object into the slot on the monitor cabinet. It could short circuit parts causing a fire or electric shock. Never spill liquids on the monitor.
- Do not attempt to service the monitor by yourself; opening or removing covers can expose you to dangerous voltages and other hazards. Please refer all servicing to qualified service personnel.
- To ensure satisfactory operation, use the monitor only with UL listed computers which have appropriate configured receptacles marked between 100 - 240V AC, Min. 5A.
- The wall socket shall be installed near the equipment and shall be easily accessible.

# Important Recycle Instruction:

Lamp(s) inside this product contain mercury and must be recycled or disposed of according to local, state or federal laws. For more information, contact the electronic industries alliance at <a href="https://www.elae.com/ww.elae.com/ww.elae.com/ww.elae.com/ww.elae.com/ww.elae.c

#### SPECIAL NOTES ON LCD MONITORS

The following symptoms are normal with LCD monitor and do not indicate a problem.

#### **NOTES**

- Due to the nature of the fluorescent light, the screen may flicker during initial use. Turn off the Power Switch and then turn it on again to make sure the flicker disappears.
- You may find slightly uneven brightness on the screen depending on the desktop pattern you use.
- The LCD screen has effective pixels of 99.99% or more. It may include blemishes of 0.01% or less such as a missing pixel or a pixel lit all of the time.
- Due to the nature of the LCD screen, an afterimage of the previous screen may remain after switching the image when the same image has been displayed for a long time. The monitor will slowly recover from this.
- When the screen becomes black or flashing, or cannot illuminate any more, contact your dealer or service center to replace parts. Don't repair the screen by yourself!

#### **BEFORE YOU OPERATE THE MONITOR**

#### **FEATURES**

- 21.5"(546mm) TFT Color LCD monitor
- 16:9 Widescreen
- Crisp, Clear Display for Windows
- Recommened Resolutions: 1920X 1080@60Hz
- Ergonomic Design
- Space Saving, Compact Case Design

#### **CHECKING THE CONTENTS OF THE PACKAGE**

#### The product package should include the following items:

- 1. LCD monitor
- 2. Base
- 3. User's Guide
- 4. Power Cord
- 5. D-sub Cable
- 6. DVI Cable
- 7. Audio Cable

#### INSTALLATION INSTRUCTIONS

#### **BASE**

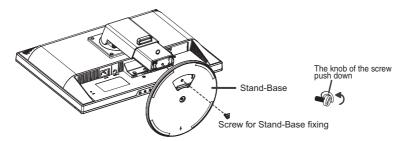

The monitor is supplied complete with a stand. If you prefer to wall mount the monitor, please follow the instructions below to remove the stand. Be sure to include the stand with the monitor if it is necessary to return the unit.

# CAUTION

- Put the monitor on a stable surface. The monitor may cause injury or damage if it falls or is dropped.
- Do not give a strong impact to the monitor. It may cause damage.
- Unplug the monitor before removal or installation to avoid electric shock or damage.

#### <Installation>

- ① Put a piece of soft cloth on the table beforehand to prevent the monitor from being scratched. Lay the monitor flat on a table with front face down.
- (2) Install the Stand-Base to the Monitor.
- ③ Fix the monitor to the stand by using the screw. Once screw is securely fastened, push down the knob on the screw.

#### <Remove>

- Put a piece of soft cloth on the table beforehand to prevent the monitor from being scratched.
   Lay the monitor flat on a table with front face down.
- (2) Pull up the knob of the screws, and remove the screw and the Stand-Base.

## <Stopper pin>

Please stand the monitor and then remove the stopper pin on the back of the stand slowly while pushing top face of the stand before you install the monitor. Careful attention is required as the monitor is sprung loaded and may expand quickly when removing it.

#### CONTROLS AND CONNECTORS

#### SIGNAL CABLE

**Connecting the Signal Cable:** Plug one end of the signal cable to the LCD monitor and the other end to a computer or a video source.

**Connecting the Power Cord:** Plug the AC-power cord one end to LCD monitor's AC input socket , the other end to Wall outlet.

**Connecting the Audio Cable:** Connect the audio cable between the monitor's audio input and the PC's audio output.

**Caution:** If the AC outlet is not grounded (with three holes), install the proper grounding adapter (not supplied).

| 2. | HDMI Cable  |
| 3  | DVI Cable   |
| 4  | D-SUB Cable |
| 5  | Audio Cable |

#### ADJUSTING THE VIEWING ANGLE

- For optimal viewing it is recommended to look at the full face of the monitor, then adjust the monitor's angle to your own preference.
- Hold the stand so you do not topple the monitor when you change the monitor's angle.
- You are able to adjust the monitor's angle from -5° to 19°.

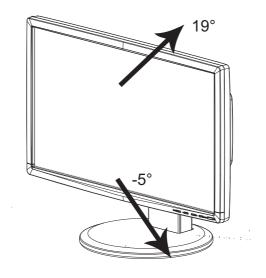

Figure 3

#### **NOTES**

- Do not touch the LCD screen when you change the angle. It may cause damage or break the LCD screen.
- Careful attention is required not to catch your fingers or hands when you change the angle.

# **OPERATING INSTRUCTIONS**

#### **GENERAL INSTRUCTIONS**

Press the power button to turn the monitor on or off. The other control buttons are located at front panel of the monitor (See Figure 4). By changing these settings, the picture can be adjusted to your personal preferences.

- The power cord should be connected.
- Connect the video cable from the monitor to the video card.
- Press the power button to turn on the monitor position. The power indicator will light up.

#### **EXTERNAL CONTROLS**

| 1. | Source/AutoAdjust/EXIT |
|----|------------------------|
|    | button                 |
| 2. | ECO (-)                |
| 3. | Volume Hotkey(+)       |
| 4. | Menu / Enter           |
| 5. | Power Indicator        |
| 6. | Power button           |

#### FRONT PANEL CONTROL

#### Power Button:

Press this button to switch ON/OFF monitor's power.

#### Power Indicator:

Blue --- Power On mode.
Orange --- Power saving mode.

#### • MENU/ENTER:

Activates OSD menu or function adjust confirm.

### • ECO/(-)

Activates the ECO control when the OSD is OFF or navigate through adjustment icons when OSD is ON or adjust a function when function is activated.

#### Volume/+:

Activates the volume control when the OSD is OFF or navigate through adjustment icons when OSD is ON or adjust a function when function is activated.

### • Source/Auto Adjust/Exit:

When the OSD is OFF, pressing Auto/Source button will toggle between sources. Press continuously to select the input source indicated in the message bar.Press Menu/Enter button to change to the selected source.

Auto configure hot key:(VGA input only) When the OSD is OFF,press and hold down the button for 2 seconds to auto configure.

when OSD menu is ON, this button will act as a Exit Key (Exit OSD menu)

**OSD Lock Function:** To lock the OSD, press and hold the MENU button while the monitor is off and then press power button to turn the monitor on. To un-lock the OSD - press and hold the MENU button while the monitor is off and then press power button to turn the monitor on.

#### **NOTES**

- Do not install the monitor in a location near heat sources such as radiators or air ducts, or in a place subject to direct sunlight, or excessive dust or mechanical vibration or shock.
- Save the original shipping carton and packing materials, as they will come in handy if you ever have to ship your monitor.
- For maximum protection, repackage your monitor as it was originally packed at the factory.
- To keep the monitor looking new, periodically clean it with a soft cloth. Stubborn stains may be removed with a cloth lightly dampened with a mild detergent solution. Never use strong solvents such as thinner, benzene, or abrasive cleaners, since these will damage the cabinet. As a safety precaution, always unplug the monitor before cleaning it.
- do not scratch the screen with hard things, It may cause permanent damage.
- Don't leak liquid into monitor which will result in the damage of component

#### **HOW TO ADJUST A SETTING**

- 1. Press the MENU-button to activate the OSD window.
- Press + or to navigate through the functions. Once the desired function is highlighted, press the MENU-button to activate it. If the function selected has a sub-menu, press + or - again to navigate through the sub-menu functions. Once the desired function is highlighted, press MENU-button to activate it.
- 3. Press + or to change the settings of the selected function.
- 4. To exit and save, select the exit function. If you want to adjust any other function, repeat steps 2-3.

#### PLUG AND PLAY

### Plug & Play DDC 2B Feature

This monitor is equipped with VESA DDC 2B capabilities according to the VESA DDC STANDARD. It allows the monitor to inform the host system of its identity and, depending on the level of DDC used, communicate additional information about its display capabilities.

The DDC 2B is a bidirectional data channel based on the I<sup>2</sup>C protocol. The host can request EDID information over the DDC 2B channel.

THIS MONITOR WILL APPEAR TO BE NON-FUNCTIONAL IF THERE IS NO VIDEO INPUT SIGNAL. IN ORDER FOR THIS MONITOR TO OPERATE PROPERLY, THERE MUST BE A VIDEO INPUT SIGNAL.

This monitor meets the Green monitor standards as set by the Video Electronics Standards Association (VESA) and The Swedish Confederation Employees (NUTEK). This feature is designed to conserve electrical energy by reducing power consumption when there is no video-input signal present. When there is no video input signal this monitor, following a time-out period, will automatically switch to an OFF mode. This reduces the monitor's internal power supply consumption. After the video input signal is restored, full power is restored and the display is automatically redrawn. The appearance is similar to a "Screen Saver" feature except the display is completely off. The display is restored by pressing a key on the keyboard, or clicking the mouse.

# **TECHNICAL SUPPORT (FAQ)**

| Problem & Question   | Possible Solution   |
|--|---|
| Power LED is not on  | *Check if the Power Switch is in the ON position *Power Cord should be connected  |
| No Plug & Play   | *Check if the PC system is Plug & Play compatible  *Check if the Video Card is Plug & Play compatible  *Check if the D-15 plug pin of Video Cable is bent   |
| Picture is fuzzy   | *Adjust the Contrast and Brightness Controls.   |
| Picture bounces or a wave pattern is present in the picture                | *Move electrical devices that may cause electrical interference.  |
| The power LED is ON but there's<br>no video or no picture.                 | *Computer Power Switch should be in the ON position.  *Computer Video Card should be snugly seated in its slot.  *Make sure monitor's video cable is properly connected to the computer.  *Inspect monitor's video cable and make sure none of the pins are bent.  *Make sure computer is operational by hitting the CAPS LOCK key on the keyboard while observing the CAPS LOCK LED. The LED should either turn ON or OFF after hitting the CAPS LOCK key. |
| Missing one of the primary colors (RED, GREEN, or BLUE)                    | *Inspect the monitor's video cable and make sure that none of the pins are bent.  |
| Screen image is not centered or sized properly.  Picture has color defects | *Adjust pixel frequency (CLOCK) and FOCUS or press hot-key (AUTO).  |
| Picture has color defects (white does not look white)                      | *Adjust RGB color or select color temperature.  |
| Horizontal or vertical disturbances<br>on the screen                       | *Use win 95/98 shut-down mode Adjust CLOCK and FOCUS or perform hot- key (AUTO-key).  |

CLOCK (pixel frequency) controls the number of pixels scanned by one horizontal sweep. If the frequency is not correct, the screen shows vertical stripes and the picture has not correct width.

FOCUS adjusts the phase of the pixel clock signal. With a wrong phase adjustment the picture has horizontal disturbances in light picture.

For FOCUS and CLOCK adjustment use "dot-pattern" or win 95/98 shut-down mode pattern.

#### **ERROR MESSAGE & POSSIBLE SOLUTION**

#### NO SIGNAL:

- 1. Check that the signal-cable is properly connected, If the connector is loose, tighten the connector's screws.
- 2. Check the signal-cable's connection pins for damage.

#### **INPUT NOT SUPPORT:**

Your computer has been set to unsuitable display mode, set the computer to display mode given in the following table.
