Thank you for purchasing the ICA-525. It is versatile and high image solution of surveillance application for day and night. The ICA-525 is also a stand-alone camera system with a built-in processor and web server that provides highest quality video and system performance.

Before Installation

Before installation, please be sure to read this quick installation guide or user's manual of bundle CD carefully to complete machine installation.

Network Interface	10/100M Base-TX Ethernet
Monitoring System	Recommended for Internet Explorer 6.0 or later
System Hardware	 CPU: Pentium 4, 1.5GHz or above Memory Size : 512 MB (512 MB or above Recommended) VGA card resolution : 1024 x 768 or above Sound Card : Necessary Network bandwidth: In VGA resolution mode, minimum upload bandwidth is 1Mbps

System Requirements

Package Content

ICA-525 x 1

Power Adapter x 1

Screws x 4

Telephone box x 1

L-Wrench x 1

CD Disk x 1

Quick Installation Guide x 1

- 1. If any of the above items are missing, please contact your dealer immediately.
- Using a power supply with a different voltage that the one included with the ICA-525 will cause damage and void the warranty for ICA-525.

Identification of Cables

1. RJ45 LAN socket: Connect to PC or Hub/Switch. For connect to 10Base-T Ethernet or 100Base-TX Fast Ethernet cabling. This Ethernet port built N-Way protocol can detect or negotiate the transmission speed of the network automatically. Please use Category 5 "straight through" cable to connect the ICA-525 to a 100Mbps Fast Ethernet network switch or hub.

In case you need to connect the device to PC or notebook directly, you should use cross over cable instead.

2. RS-485 & DI/DO: Connect to a local keyboard controller and connect to sensor in and alarm out devices.

Inside the TEL box:					
Name	Function				
12VDC	DC 12V output (50mA maximum)	12VDC	A	A	D-
GND	GND				
D+	RS485 data +	NC	()	(\mathbf{P})	NC
D-	RS485 data -	DI	æ	(\mathbf{A})	D+
DI	Digital signal input				
DO	Digital signal output	GND		Ð	DO
			1		1

The RS-485 of ICA-525 is master that can control external scanner.

- 3. Local Video output (BNC port): The Network Camera also provides composite video output. User can use BNC video cable to connect the Network Camera with a TV monitor or VCR.
- 4. DC-in Jack: The input power is 12VDC. Note that supply the power to the Network Camera with standard power adapter included in package. Otherwise, the improper power adapter may damage the unit and result in danger.
- 5. Line in (audio in): Connect an audio input source to the ICA-525.
- 6. Line out (audio out): Connect a loud speaker to the ICA-525. This function is for voice alerting and two-way audio.

Hardware Installation

1. Use the provided L-wrench, loosen the tamper-resistant housing cover (with screws still attached on the cover). The unit has factory installed side conduit entry and one may adjust the cables to back conduit entry according to installation requirement.

During the installation, please take care and avoid crash. That may cause the device damage.

2. Set the mounting base onto the wall or ceiling and center it over the mounting hole, using the supplied four retaining screws to secure the main body.

3. Set the proper image by moving the camera body and set the focus by turning the lens to left or right direction.

- 1. Vari-Focal Dome Operation Guide: Once the picture appears on the monitor, open the cover and adjust the lens wrench to "NEAR $\leftarrow \rightarrow$ FAR", get the view zoom that you desire, and then adjust the focus wrench of the lens to obtain the best picture. After adjustment, tighten both wrenches.
- During adjust focus, please take cares that don't touch, collision and knock sensor.

4. When the ICA-525 focus adjustment has been completed, use the provided Lwrench to fasten the tamper-resistant housing to the main body.

5. When using the side conduit cabling, it is suggested to cover the cables using metal covers (to prevent external damage and for waterproof prevention), and wined the waterproof adhesive type onto the metal cover before installation.

- 6. Connect the LAN cable to Ethernet's switch or hub and the DC-Jack to the power source. The video output to monitor or other video through a 75 Ohms type coaxial cable if you will use BNC cable.
- 7. Done

Initial Utility Installation and operation

- 1. Insert the bundled CD into the CD-ROM drive to launch the autorun program. Once completed, a welcome menu screen will appear.
- 2. Click the "IPWizard" hyperlink, you will see the InstallShield Wizard dialog box as below.
