Introduction

Thank you for purchasing the DocuPen™ Portable Scanner.

This portable scanner functions as a quick and simple tool that can be taken anywhere to swipe over a smooth flat clean surface to capture black and white images.

This manual provides instructions for scanning documents with the DocuPen[™] and downloading the scanned images to your PC.

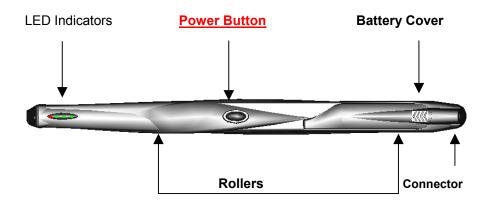

Please read these instructions carefully to obtain optimum performance and longer service life from the unit. Retain this manual for future reference.

Check the Contents

The following components are included in your DocuPen[™] product package:

- The DocuPen[™] unit
- Four Energizer coin cells, 1.55v silver oxide, high drain
- USB cable for downloading scanned images.
- CD DocuPen[™] TWAIN driver & PaperPort ® OCR Software
- Quick Start Sheet
- Calibration Sheet
- Warranty & Registration Card (At back of Manual)
- This Operation Manual
- Leather Case

DocuPen[™] Overview

Pen Scanner Power Button

- Press one time to turn the DocuPen[™] on in Standard scan mode (200x100 dpi).
- Press two times to turn the DocuPen[™] on and put the pen in Hi Resolution scan mode (200x200 dpi).
- Press to respond to prompts when downloading or erasing the pen's memory bank.

LED Indicators

The 4 LED indicators at the top of the DocuPen[™] from left to right indicate the following:

LED LIGHTS	Condition
LED #1	 Processor On/Off and Scan Speed Too Fast When you press the DocuPen[™] power button, this red light turns on, & also the #2, & #3 LED indicating that the DocuPen[™] is ready for use. This light also flashes if your scan speed is too fast.
LED'S #2 & #3	 Available Memory Capacity The state of the second and third lights indicate the Memory capacity available for scanning during power up: Both lights on = more than 50% total memory capacity available. 1 light on = 25% to 50% total capacity available. No lights on = less than 25% total capacity available. Lights flash after scanning = no capacity available. You must download images.
LED #4 ALL 4 LED'S ON READY TO SCAN HI-RES MODE	Scan Resolution By default, the DocuPen™ 's scan resolution is 100 dpi. When you press the power button two times, this light turns on, indicating that the resolution is set at 200 dpi (Hi resolution mode).

SEE ALSO: Blinking LEDs also indicate error conditions. The error conditions and their meanings are discussed on page 38.

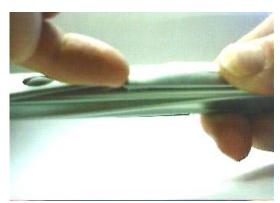

Getting Started

Inserting the Batteries

The factory has left the cover in position but not locked in place, to allow easier battery loading. Therefore simply push forward & lift up at the narrow end.

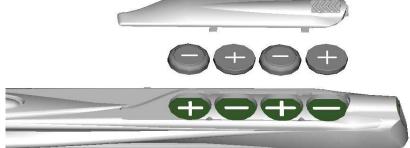

The DocuPen[™] uses 4 (four) 1.55v silver oxide high drain coin cell batteries included in the package. The recommended battery is Energizer 389VP (SR1130W).

1. To remove the battery compartment cover and insert the batteries:

Looking at the top of the DocuPen[™], push down firmly on the cover with thumb at the back and slide toward the front of the unit. At the same time lift up at the front of the cover with index finger while pushing forward.

2. Insert the new batteries correctly as illustrated below.

IMPORTANT: You must install the batteries correctly according to the polarity markings in the battery compartment. **Same type polarity markings must touch**.

For example, in a "+" marked compartment, insert the battery "+" side down.

3. Lower the Cover over the Battery compartment, and align the four legs on the bottom of the cover, with the openings in the casing.

4. Slide the battery cover into the closed position, till it clicks, and is fully closed. Firmly push while grasping with thumb.

Changing the Batteries

Note that you can change the batteries any time the unit is turned off. Changing the batteries does not affect the images stored in the DocuPen[™] 's memory bank.

All four battery cells must be changed at the same time.

Check Battery Cover Contacts, for damage.

Good contact Bent contact If the contact is bent it can be gently pushed up to good position.

About the Battery Life

Typical battery life depends on several factors including scan duration, scan resolution, and type of service.

The battery life under **normal service** is typically 200 document pages at 100 dpi or 100 document pages at 200 dpi (both scanning 8.5"x11" pages. (Based on intermittent use over several weeks).

The battery life under **continuous use service** involves two full drain cycles of 60 pages at 100 dpi or 30 pages at 200 dpi per cycle. In this case, the batteries require a 12-hour recovery to be able to continue. A second full drain in this type of service can be attained; however, overall total battery life will be shorter and a lower total number of pages scanned will be realized (approximately 150 document pages at 100 dpi or 75 document pages at 200 dpi).

We recommend the use of fresh Energizer 389 coin cells, 1.55v silver oxide, high drain. Other brands may not achieve optimum scan quantities.

Inferior batteries can also cause delays during scanning, as the unit may Time Out if sufficient voltage is not supplied by the batteries, or re-calibration may also be required.

Do not store the unit for long periods of time such as several months with out removing, the batteries. Replacing the batteries with fresh Energizer 389 coin cells once re-use is required. Scans in memory will remain onboard, and can be retrieved when required.

If unit is left in extreme cold or hot conditions, allow to adjust to normal room temperatures before proceeding to scan.

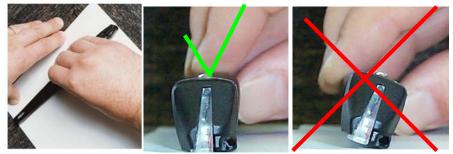

Points to Remember Before You Scan

To obtain the best scan results, note the following:

The document you scan must be well supported on a smooth flat, clean, & stable surface.

It is recommended that you hold the top of the document with one hand while you scan with the other.

Hold document Hold the Scanner flat, Do Not tilt

Typically scanning from top of document down

1. Place your document on a smooth, flat, clean surface.

2. Place the DocuPen[™] just above the area you want to scan, with the LED indicator lights on the left side of the document to be scanned.

3. Press the DocuPen[™] 's Power button once for standard resolution this places the unit in "ready" mode" for scanning in default Standard mode (100 dpi).

Scanning

4. Slowly roll the DocuPen[™] down across the area you want to scan. The LEDs activate, and the unit begins scanning as soon as you start moving the pen. When you stop moving the pen, the LEDs shut off and scanning stops.

Apply even pressure, in the center of the scanner to allow the rollers to rotate smoothly down the document.

When you stop scanning the image is saved to the pen's internal flash memory and the DocuPen[™] power turns off. You must wait momentarily till the data is compressed, and stored in the onboard memory.

For OCR applications we suggest to scan in hi-resolution (200dpi) mode.

Pressing the Power button two times. The right-most LED indicator light turns on indicating Fine resolution (200 dpi) scan mode best for OCR applications.

Scanning in hi resolution mode.

Additional Scanning Tips

What you scan is what you get. The DocuPen[™] is sensitive to changes in direction and scan speed and records every movement you make. The more uniform your scan swipe, the better your scanned image results. This may take a little practice at first.

Your entire scan swipe motion must be sooth and uniform. Scanning too quickly or abruptly changing acceleration causes the **RED LED** to flash, reminding you to reduce your scanning speed.

Scanning Too Fast

It should take approximately 4 seconds to scan an 8.5"x11" document in standard mode.

It should take approximately 8 seconds to scan an 8.5"x11" document in fine. (high resolution) mode.

All scanned images are in black and white and are stored in the pen's memory bank for easy download at any time later.

Scanning Lengths

Typical scans include documents in standard or legal format that may be up to 8.5" wide.

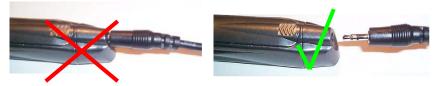

Also in standard resolution mode (100 dpi), documents up to 36 inches long can be scanned.

In fine resolution mode (200 dpi), documents up to 18 inches long can be scanned.

If you stop during a scan just momentarily the unit will stop scanning. It is therefore important to scan in a continuous smooth motion.

Additional Scanning Tips Continued

For better control over the DocuPen[™] 's movement, it is recommended that you **detach the cable before you scan**.

During Scanning better control without cable...

When scanning books or

bound pages, it may be easier to scan in landscape mode across the page. This will follow the natural curve better.

Images can be turned with the Imaging Software, within Windows, or Paperport.

Beware of and avoid staples, and paper clips.

These can interfere with a scan, and could also cause damage to the scanner.

Installing the DocuPen[™] Software

The DocuPen™ includes a proprietary TWAIN scan driver on the included CD.

TWAIN is an industry standard for software that controls optical input devices such as scanners and video capture interface cards. TWAIN support allows the DocuPen[™] to be controlled from your PC scanner or imaging software. After installation, the DocuPen[™] driver is made available to your Windows TWAIN-compatible applications. Such as Windows Imaging, or PaperPort ®. This gives you the ability to download the scanned images to your computer, as well as to view and manage the scanned image files.

DocuPen[™] Driver Platform Requirements

Before you install the DocuPen[™] driver, make sure that your computer meets the following minimum system requirements:

Microsoft Windows 9x/2000/NT/ME/XP operating system (XP Requires Twain Compliant software such as in PaperPort ® 8.0 OCR Software included.)

CD-ROM for driver installation

Windows 2000 & XP log on as Administrator

- 1. Close all Windows programs during the loading of software.
- 2. Disable any virus protection software temporarily.
- 3. Unplug the USB cable before installing software.
- 4. Insert the Docuport CD-ROM into your CD drive.
- 5. The CD is auto play, and should self start.
- 6. Note that the instructions in this document refer to both Kodak Imaging for Windows and also PaperPort ® SE 8.0 as two imaging/scanning applications.

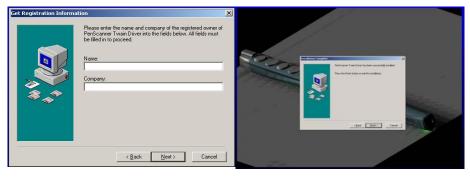

PaperPort ® SE 8.0 will install automatically with different pop-up windows. This is required for Windows XP platform.

This will install Docupen Driver and Scansoft OCR. Before you proceed please, close all other running applications and virus detection programs.	Videome to Predicareer. Yes No	Beet) Core

7. In the first opening Welcome window, click the Yes button to continue, then the Next button

8. After reading and agreeing to the terms of the DocuPen[™] Software

License Agreement, click the **YES** button to continue.

- 9. You will be prompted to enter registration information.
- 10. Then click the **FINISH** button to complete the Pen Twain installation.

11. The Prolific USB Driver will load next.

12. Simply follow on screen instructions.

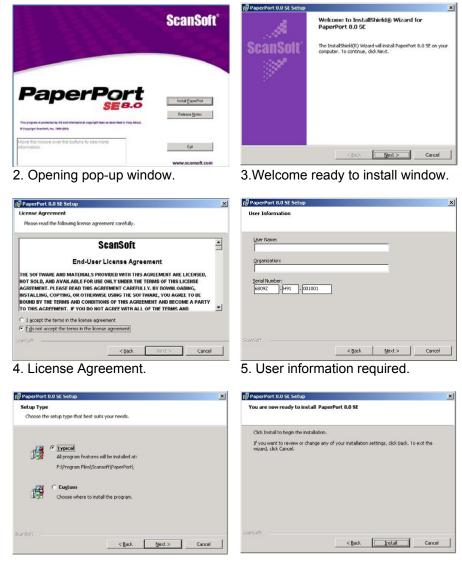

13. Remember to remove USB Cable if plugged in.

14. The Prolific 2303 installation is complete, click *Finish*

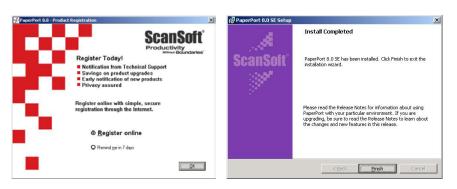

If you are running under Windows XP you must continue & install the ScanSoft® PaperPort ® SE 8.0 OCR Software. If you are asked to Restart after this Software loads, click *NO* since you will be required to restart after the next step.

Installing the Paperport® SE 8.0 Software

1. The final software to load is the Paperport® SE 8.0, simply follow on screen instructions to proceed. <u>This is required</u> <u>under Windows XP</u>

- 6. Installation Set-up.
- 7. Set-up Ready to Install.

8. Registration window.

9. Installation complete.

A	You must restart your computer to restart now?	r before using PaperPort. Do you want
	Vec	No

10. Restart required.

Once your computer is restarted, if you have a USB port you can safely plug in the USB cable. The Serial cable can be plugged in at any time.

You should have a brief pop-up message from the Hardware Wizard.

WINDOWS SHOULD SELF INSTALL THE DRIVERS, IF NOT REFER TO THE TROUBLESHOOTING SECTION PAGE 37

You can now start the Imaging program by Kodak®, or the PaperPort ® SE 8.0 by ScanSoft®

Downloading

All images of the documents you scan are maintained in the DocuPen[™] 's flash memory bank. After downloading the memory bank to your computer, you can view and manage the individual images using any TWAIN-compatible imaging application. When you download the DocuPen[™] 's memory bank to your computer, you overwrite the existing image file created from the previous download. Before you download your most recent scanned images, make sure you have viewed and saved all image files from the previous download.

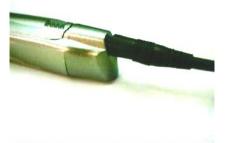

To download the scanned images to your computer:

- 1. Connect the provided USB cable to the USB port on your computer.
- 2. The USB can be plugged into any available USB port.

USB Plug

3. Fully insert the stereo cable plug end into the DocuPen[™] the black plastic plug edge should touch the silver casing on the pen scanner.

To download using Windows 98/2000/ME/ with Kodak Imaging:

- 1. Open the Imaging for Windows application, which is included with all versions of Windows 95 and later.
- 2. For Windows XP, please use the PaperPort ® SE 8.0 OCR software.

Generally, the **Imaging** command can be found under the Windows. Desktop **Start, Programs Accessories** menu. Choose the Imaging command to open the Imaging application Window that applies to your operating system.

Windows 2000 SELECT DEVICE Windows 98 SELECT SCANNER

For **downloading** with the **PaperPort ® SE 8.0 see page 25** for installation, & general set-up. This should self-install during CD installation.

You can also read the help & Tutorial sections of the respective Software.

3. From the list of TWAIN-compliant scanners, select **PenTwain**, and click the **OK** button.

Managing File Edit View Page Zoom Tools Annotation Help DG 日本	
Select Source PenTwain	The Sale Here Page Zoom Tools Annotation Help The Sale Here Page Zoom Tools Annotation Help The Sale Page Zoom
OK Cancel	

Depending on how many other Twain compliant devices you may have only one, or more.

You must select PenTwain source when you are using the DocuPen[™] scanner .If you have used another device prior, then that device will remain default till you reselect PenTwain device. This is only the case if you have multiple scanners.

If you only have DocuPen[™] as a scanner then it will remain default, until another device is added.

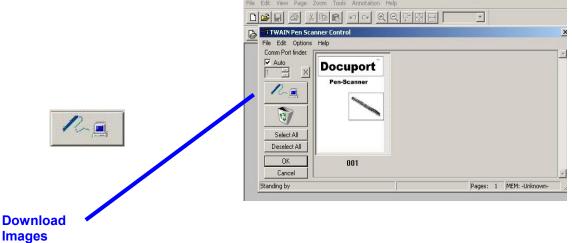

From the Imaging File menu, choose the Acquire Image (Win 2000) Scan New (Win 98) command. 4.

Windows 2000 says Acquire Image

5. Clicking either will open the Pen Scanner Control window, giving you the opportunity to view and manage your scanned images.

Windows 98 says Scan New

6. To download the scanner's memory bank, choose the File Download Bank command or click the download icon.

A message displays prompting you to press the DocuPen[™] scanner power button.

7. In response to the prompt, press the **DocuPen™ power button**, **<u>FIRST</u> and <u>Immediately AFTER</u> click the OK button in the prompt window.**

If you miss the timing you only have 3-4 seconds

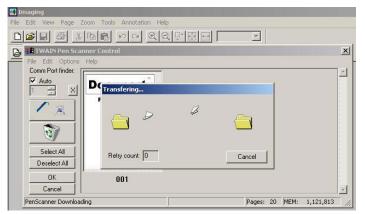

you may encounter an error message such as;

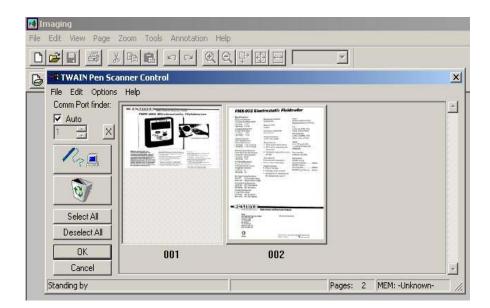

No problem, simply press the **DocuPen™** power button and <u>Immediately AFTER</u> click the

Retry button in the prompt window.

Otherwise the DocuPen[™] memory bank transfers, & downloads to your computer. If you still cannot download see Trouble shooting page 37.

Normal file transfer in progress.

After the download is complete, thumbnail images of all scanned pages display in the Pen Scanner Control window.

Note that the number of scanned image pages displays in the status bar of the Pen Scanner Control window.

Viewing Images

To view an image, simply click on the image thumbnail in the Pen Scanner Control window and click the OK button. The image displays in the Imaging application window.

<u>Note:</u> that if you select more than one image thumbnail in the Pen Scanner Control window, then all selected images display in the Imaging application window. The selected images display as individual pages of the scanned image file.

<u>**Tip:**</u> To quickly select all images in the memory bank, click the Pen Scanner Control window's **Select All** button, and then click **OK**.

To download the Scanned Images Using Win XP & PaperPort® SE 8.0

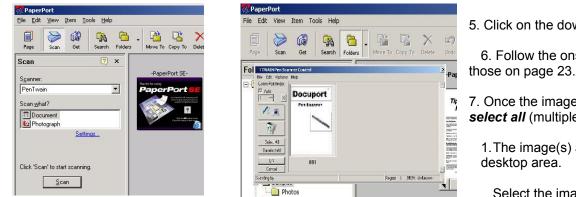

- 1. You must have already loaded the software during installation.
- 2. Open PaperPort ® SE 8.0 & Select source by clicking on Scan.

3. The Pen Twain is the source for this application. You may have more than one source, so **Pen Twain must be selected** when using the DocuPen[™].

To open the Twain Penscanner Control window click on scan. 4.

5. Click on the download icon.

Ra

6. Follow the onscreen instructions same as

7. Once the image(s) download, Click OK or select all (multiple images.)

1. The image(s) are loaded to your

Select the image(s) and each can be run under all the applications that the software has detected such as Word, or Excel, etc.

2. At this point you can run the OCR, as you require for a single or multiple page document.

3. Other applications are automatically listed at the bottom status bar. This depends what applications you have on your system.

4. Simply select the image and Click on the application you wish to use or drag your file over to the application. It starts automatically.

5. The default file format is .max, which allows you to stack & unstack multiple pages.

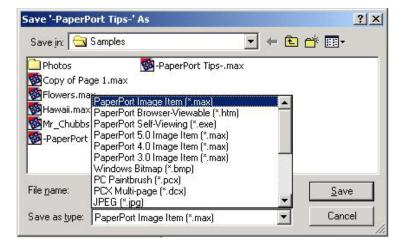

6. You can select other default file formats such as, tiff, jpg, bmp. but these cannot be un-stacked, all images will open in the selected application. They can then be manipulated separately, or altogether.

Saving Images in PaperPort® SE 8.0

You can save scanned images to a separate file on your PC in either of the following ways:

From the PaperPort Desktop Window: Click on one or more thumbnail images in the Desktop window, and choose the window's *File, Save As,* command. In the standard Windows Save As dialog box, define the image file name and destination folder. Then click the Save button.

Saving Images in Windows's Imaging

You can save scanned images to a separate file on your PC in either of the following ways:

From the Imaging Control Window: Click on one or more thumbnail images in the Pen Scanner Control window, and choose the window's *File, Save As,* command. In the standard Windows Save As dialog box, define the image file name and destination folder. Then click the Save button.

From the Kodak imaging application: View one or more thumbnail images, and then save the image file using the imaging application's **File, Save** command. Define the file name, destination, and image file type.

Creating Multi-Page Image Files: To create an image file having more than one page, first select the desired pages in the Pen Scanner Control window, and then export all selected images to a file.

From the File, save as menu you may save the files in .tif, .bmp, .jpg formats.

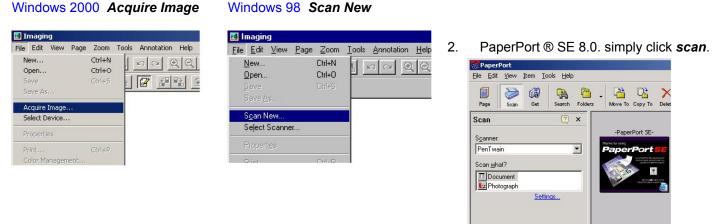

If you require saving to other formats, we suggest you open and save the images using PaperPort ® SE 8.0 (see page 27)

Erasing the DocuPen[™] Memory Bank

After you have save the desired scanned image files on your hard disk, it is recommended that you empty the DocuPen[™] 's memory bank. By doing so, you ensure maximum storage capacity and optimum scanning speed.

To erase the DocuPen[™] memory bank:

1. Choose the **Acquire Image** (Win 2000) **Scan New** (Win 98) command. If you are running under Windows XP or using PaperPort ® SE 8.0. then simply click *scan*.

3. The Twain Penscanner Control Window will open.

4. Erase the DocuPen[™] memory by selecting the recycle icon.

Click 'Scan' to start scanning.

5. A prompt warns you that erasing the memory bank will clear all scanned images from the DocuPen[™] 's memory.

PenTwain	×	
<u>.</u>	WARNING All images in the PenScanner will be lost. Are you sure you want to completely erase the PenScanner bank?	
	<u>Yes</u> <u>N</u> o	

6. Click on **Yes** a second pop-up prompts you to erase.

PenTwaii	n		×
	Erase: Press The Sca	anner Button To Turn O	n Scanner,
	ОК	Cancel	

7. **Press** the **DocuPen[™] power button FIRST**, and then click the **OK** button in the **window within 3-4** seconds.

8. The DocuPen[™] memory bank will be erased.

NOTE: The Erase Bank command erases only the DocuPen[™] memory

bank. The temporary image file from the previous download still

exists on your computer's hard drive. It will reappear in the Twain Penscanner Control Window until the next new downloaded data is transferred. This can be very useful for saving forgotten images that have already been deleted from the scanner's memory.

Simply unplug the cable from the back of pen, and your DocuPen[™] is now ready to continue scanning.

What is the Capacity of the Pen's Memory Bank?

The number of pages that can be stored in the memory bank depends greatly on the image text, graphics, and scanning resolution. Note that documents with heavy graphics and text consume more memory than documents with no graphics and light text.

The table below estimates the number of pages that can be maintained in the memory bank before you must download the images.

Scan DPI	# Pages (w/ light Text/graphics)	# Pages (w/ heavy Text/graphics)
@100 dpi	100 pgs	25 pgs
@200 dpi	50 pgs	12 pgs

LED lights do not turn on?

Make sure you have installed the batteries correctly, see pg. 8 & 9. Check the battery cover contacts, see pg. 43

Images are not readable?

If you are having problems scanning, see the troubleshooting tips and suggestions on pg. 13 & 14:

All LED lights flashing simultaneously?

Depending on how many flashes there are it typically means that the DocuPen[™] 's memory is full. Download the images to your PC.

See also pg. 38 Blinking LED Lights Error Conditions.

Do I need my computer to scan?

No you do not, you can take the scanner anywhere to scan, you will need a computer to download your images when you want to see, print, or e-mail them.

How Are the Scanned Images Handled?

Every time you scan a document, the scanned image is added to the DocuPen[™] 's internal flash memory bank. The number of scanned images that can be maintained in the memory bank depends on the complexity of the scanned documents.

(Refer to the section Capacity of Pen's Memory Bank page 31)

The image file is downloaded as one whole file. The images, or pages can after downloading be separated or edited individually.

This can be done in either Windows Imaging, or PaperPort

To view the scanned images, you must download the DocuPen[™] 's memory bank to your computer. The memory bank is downloaded to your computer as a single file containing all the scanned images.

After you download the memory bank, you view and manage the images from within your imaging application.

You can also manage & view images & especially text with the included ScanSoft® OCR software.

See the section Downloading Images to Your computer for more details. Page 20 to 25.

The USB Cable will work on Windows 98/2000/ME/XP LOAD THE SOFTWARE CD FIRST, THEN RESTART, AND PLUG IN CABLE TO P.C.

What is a Good Scanned Image?

Good scan sample

SIMCO's Model FMX-002 Electrostatic Fieldmeter is a compact, portable instrument for measuring electrostatic charge. The FMX-002 measures positive and negative polarity electrostatic charges to 20kV (20,000V) at a distance of one inch (25mm). Two LED guide ring lights on the measuring side of the unit converge at the proper distance from a test object. The conductive case and ground lead facilitate reference grounding for accurate measurement. The FMX-002 can also be used for periodic verification of ionizer balance performance to $\pm 200V$ by attaching a charge plate.

The handy, compact design of this unit allows electrostatic survey measurements in all work areas. It can be used for:

- Determining static charge levels and the need for neutralization
 Deciding the placement of ionizers
- Periodic verification readings

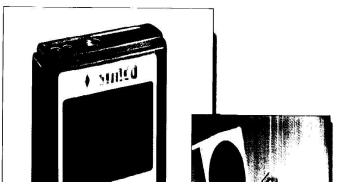

Features

- Bar graph indicates field polarity and intensity
- Easy plate attachment for ion balance measurement
- Portable, compact and lightweight
- Auto-ranging digital display
- Automatic off function
- HOLD function holds even after power is turned off
- Battery condition display (4 stages)
- Multi-function audible alarm
- Includes viovi storage case

Why is part of image missing?

You have stopped moving scanning or the roller was not in contact with the document.

FMX-002 Electrostatic Fieldmeter

If you stop even momentarily, the scanner stops scanning, and image is incomplete. You will have to re-scan.

Why is image compressed? Your scan was too fast.

FMX-002 Electrostatic Fieldmeter

SIMCO's Model FMX-002 Electrostatic Fieldmeter is a compact, portable instrument for measuring electrostatic charge. The FMX-002 measures positive and negative polarity electrostatic charges to 20kV (20,000V) at a distance of one inch (25mm). Two LED guide ring lights on the measuring side of the unit converge at the proper distance from a test object. The conductive case and ground lead facilitate reference grounding for accurate measurement. The FMX-002 can also be used for periodic verification of ionizer balance performance to ±200V by attaching a charge plate.

- The handy, compact design of this unit allows electrostatic survey measurements in all work areas. It can be used for:
- Determining static charge levels and the need for neutralization
- and the need for neutralization
 Deciding the placement of ionizers
- Periodic verification readings

Features

Text & image are compressed.

Why is image skewed?

The scan was twisted to one side, try practice scanning more straightly. FMX-002 Electrostatic Fieldmeter

SIMCO's Model FMX-002 Electrostatic Fleidmeter is a compact, portable instrument for compact, portable instrument for measuring electrostatic charge. The FMX-002 measures positive and negative polarity electrostatic charges to 20kV (20 Mpt) and charges to 20kV (20,000V) at a charges to 20kV (2000V) at a distance of one inch (25mm). Two LED guide ring lights on the measur-ing side of the unit converge at the proper distance from a test object. The conductive case and ground head facility of comes converting lead facilitate reference grounding for accurate measurement.

The FMX-002 can also be used for periodic verification of ionizer balance performance to ±200V by attaching a charge plate.

The handy, compact design of this unit allows electrostatic survey measurements in all work areas. It can be used for:

- Determining static charge levels
- and the need for neutralization Deciding the placement of ionizers
- Periodic verification readings

Bar graph indicates field polarity

- and intensity Easy plate attachment for ion
- balance measurement
- Portable, compact and lightweight
- Auto-ranging digital display
- Automatic off function HOLD function holds even after
- power is turned off
- Battery condition display (4 stages)
- Multi-function audible alarm
- Includes vinyl storage case,
- ground lead, and battery

Troubleshooting Cannot Connect to the Penscanner

PenTwain message when trying to Download, or Erase:

1. Ensure cables fully inserted.

The black plastic plug should touch the silver casing.

It is also possible that you missed the timing sequence, ie; first 3 LED's are on for 4 seconds during power on.

2. Ensure that ports are working.

Both the Serial (com ports) & the USB ports should be checked in the Windows Device Manager. You can also try switching ports from auto to manual. If you have both serial & USB connections try switching cables.

To re Device	einstall the drivers f	or this device, click Reinstall Driver.	۲ ۲

Important You must install the USB Driver before attaching USB cable.

You should remove the drivers in the Windows Control Panel Add/Remove Programs, & install fresh from the CD.

Follow instructions on Page 15 & 16.

Troubleshooting Blinking LED Lights Indicate Error Conditions

LED lights do not turn on at all.

Make sure you have installed the batteries correctly. Check battery contacts page 43.

Led Lights on, but no scanner light.

Batteries are weak, replace with 4 new batteries.

Error	Meaning		
3 blinks during scan	Data buffer full This condition indicates that the DocuPen [™] 's data scan buffer is full, and you will not be able to scan further. If there is enough available space left in the buffer, the device will attempt to save the scanned data in the DocuPen [™] 's memory bank.		
4 blinks after scan	Not enough space available in memory bank This condition indicates that the DocuPen™ 's memory bank is full, and the scanned image cannot be saved. You must download the DocuPen™ 's memory bank, erase the scan memory, and re-scan the image.		
5 blinks at scan start	Not enough space available in memory bank This condition indicates that the DocuPen [™] 's memory bank is full, and the scanned image cannot be saved. You must download the DocuPen [™] 's memory bank, and erase the scan memory.		
6 blinks when you turn on the DocuPen™	Power lost during last erase operation This condition indicates that during the previous erase operation, the DocuPen [™] lost power and, consequently, its calibration values have been lost. This may be due to weak batteries. Change batteries if required. Before resuming scanning, you must upload the calibration values to the DocuPen [™] . See instructions on page 43.

Troubleshooting

Download Failed Error Messages

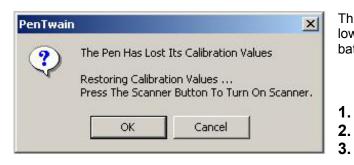

You may also see the following error messages during a failed download.

- 2. Verify battery polarity.
- 3. Check battery contacts.
- 4. Download as normal.
- 5. Delete Memory Bank.
- 6. Scan as Normal

Troubleshooting

Lost Calibration Message

This message may appear during an erase operation when the power is low, or interrupted. This can happen due to inferior batteries, or damaged battery cover contacts.

- Install 4 new batteries.
- Verify battery polarity.
- Check battery contacts.

Good contactBent contactIf the contact is bent it can be gently pushed up to good position.

- 4. Click OK Proceed to erase memory as detailed on pages 29 & 30.
- 5. You can also restore buy attempting to download.

This same pop-up message will ask you to **Restore Calibration Values**.

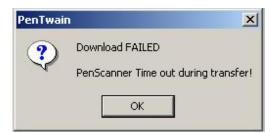

Push Power Button on Penscanner FIRST Click OK.

Once the values have been restored, you can scan as usual.

Troubleshooting

Download Failed Messages

You may also see the following messages during a failed download.

This can occur when the batteries are weak, or another application is running.

Avoid multiple applications running.

1. Install 4 new batteries.

- 2. Verify battery polarity.
- 3. Check battery contacts.
- 2. Download as normal.

This is normal, it means there is nothing to download, Memory Bank, has no scans stored, they have already been erased, and no scans have been done since.

- 1. Click OK
- 2. Unplug Pen scanner.
- 3. Ready to use.

Appendix

A. DocuPen[™] Specifications

SCANNING

Resolution - Standard mode 200x100 dpi; or Fine mode 200x200 dpi

Scan speed - 4-8 seconds per 8.5"x11" page (varies depending on text, graphics, and scanning resolution)

Scan width - 8.07"

Scan length - 36", @ Standard scanning resolution, 18" @ Hi-Resolution

Software interface - TWAIN driver & OCR Software

Scanning method - Contact image sensor

Scanning mode - Black and white

SOFTWARE SUPPORT

Windows 98/2000/ME/XP TWAIN driver interface Windows ® Imaging or other scan software such as PaperPort ® OCR CD-ROM installation disk

COMPUTER INTERFACE

USB cable via 2.5mm stereo jack

SIZE AND WEIGHT

Size - 8.5" long x .66" wide x .70" high

Weight - 4 oz (including batteries)

POWER SOURCE AND MEMORY

Memory - 2MB flash; up to 100 pages at 100 dpi or 12k file size (the number of pages varies depending on text, graphics, and scanning resolution)

Power source - 4 coin cells, type 389 (SR1130W) High Drain 1.55v Silver Oxide

B. Proper Handling and Safe Use

Avoid bending or dropping the DocuPen[™] unit.

Do not scan over sharp objects such as staples, or paper clips

Do not store the unit in high, or very low temperatures, or humid or dusty places.

Do not place or drag the scanner lens down on a hard abrasive surface.

Do not tap the unit to unload the batteries.

If you drop the unit in water or get water inside it, unload the batteries immediately and contact your Docuport representative.

To help keep the scanning area clean, store the unit in the leather pouch when not in use.

When storing for extended periods of time remove the batteries.

If the unit becomes dirty, it can be wiped with a soft damp cloth or alcohol swab. Avoid any abrasive or harsh chemicals.

Do not leave this device within the reach of children.

Warranty

Docuport Inc. warrants that this product (but not the included batteries) is free from defects in materials and function at the time of original purchase and for a period of 90 days from that date.

If, during the warranty period, any defect in the product arises due to a deficiency in materials or function, Docuport Inc. pledges to, at Docuport Inc.'s option, either to repair or replace the defective product with the same or an equivalent model.

To obtain warranty service, proof of purchase in the form of retailer's bill of sale or invoice must be presented as evidence that the unit is within warranty period, and by filling out the Warranty Card and transmitting the information to Docuport Incorporated via E-mail or Fax or Mail to;

The Portable Imaging Company 555 Rene Levesque Montreal Quebec H2Z 1B1 Fax: 514-871-3864 1-877-DOCUPEN (362-8736) www.docuport.com

Docuport Inc., however, takes no responsibility for:

- 1. Damage caused during shipping, by accidents, malicious damage, modification, incorrect usage, force majeure, or any cause beyond the control of Docuport Inc., including but not limited to lightning, water, fire, public disturbances, riots, strike, war, or other similar conflicts.
- Damage (including but not limited to direct or indirect personal injury, lost profits, fall in production, losses of or alterations to processed information or any other incidental or consequential damages) caused by the product or because the product cannot be used.
- 3. Deficient maintenance or a repair performed by unauthorized persons.
- 4. Incompatibility due to technological developments.
- 5. Defects caused by external equipment or abnormal wear.
- 6. Defects caused by normal wear and tear.
- 7. Damage caused by the usage of inappropriate battery.
- 8. Damage to the external unit such as scratches and abuse of optical surface and related internal components.
- Damage arising in connection with or as a consequence of upgrading with the additions to or alterations of the product, using software or hardware not produced by or approved in writing by Docuport Inc.
