

Installation Quick Start Guide for RMX 2000

Basic Setup

Do not remove the protective plastic caps from LAN1, LAN3 and ShMG ports.

Modifying the USB Key Settings

1 Insert the *USB Key* provided with your system into the PC workstation and doubleclick **LanConfigUtility.exe** to start the utility.

- **2** Modify the parameters in the utility's dialog box using the information supplied by your network administrator.
- 3 Click OK.
- **4** Remove the *USB Key* from the PC.

First-time Power-up and Connection to MCU

1 Insert the *USB Key* containing the modified IP addresses in the *USB* port on the RMX's back panel.

2 Power the RMX **ON**.

The parameters in the **lan.cfg** file are uploaded from the *USB key* to the RMX's memory and applied during the power-up sequence.

System power-up sequence may take up to five minutes.

During the first-time power-up the red ERR LED on the RMX's front panel remains ON until both the *Management* and *IP Network Services* have been defined.

3 Remove the *USB key*.

Download from Www.Somanuals.com. All Manuals Search And Download.

Enter the IP address of the RMX Control Unit and press Enter.

Modifying the Default IP Service

This section describes the definition of H.323 Network Service. For detailed description of H.323, SIP and ISDN Network Service definitions, see the RMX Getting Started Guide, "First Time Installation and Configuration".

On the RMX 2000, IPv4 is the default protocol for setting the Network Service in the Fast Configuration Wizard.

In the Fast Configuration Wizard, select Next to move from one window to another.

Connecting to a Conference Directly or via Entry Queue (EQ)

The RMX is shipped with pre-configured default conferencing entities that can be used to dial in and start conferences. Default (Transit) Entry Queue ID: 1000, default Meeting Room IDs: 1001, 1002, 1003, and 1004.

H.323 Participants

H.323 participants dial:

dial 925Maple_Room.

SIP Participants

The dialing string is composed of the conference routing name as registered with the SIP server and domain name in the format: conference name@domain name

For example, if conference routing name is 1001, the string is 1001@polycom.com.

ISDN and PSTN Participants

Optional. Modify the default settings of the system flags that define the general system behavior such as the number of digits in the conference ID assigned by

the MCU These flags can be modified later, if required, by selecting the System Configuration option from the Setup menu.

Operation

13 Create a new **User** with Administrator permissions and delete the default User (POLYCOM). For system security reasons, only when this step is completed and if there are no *System Errors*, the system is fully configured and the green RDY LED on the CNTL module (on the RMX's front panel) turns ON.

[MCU Prefix in Gatekeeper][Conference or Entry Queue ID/Name]

For example, if the MCU prefix in gatekeeper is 925, you can dial to the default (Transit) Entry Queue by entering 925 or 9251000 and be routed to Meeting Rooms by entering its ID (i.e. 1001, 1002, 1003 or 1004). You can connect directly to one of the default Meeting Rooms, by dialing its number, for example, 9251001.

Alternatively, you can use the Entry Queue or conference name to connect directly to the conference. For example, if the conference name is Maple_Room, the participant can

ISDN and PSTN participants can connect to conferences and Meeting Rooms directly or via an Entry Queue by dialing one of the numbers (including the country and area code if needed) assigned to the conference, Meeting Room or Entry Queue. When connecting to an EQ they are routed to their conference according to the conference ID. For example, if the assigned dial in number is 4045555, the ISDN/PSTN endpoint dials this number with the appropriate area code (for example, 678) and country code (001).

Conference Control Using DTMF Codes

	DTMF String	Operation	DTMF String
	*6	Request individual assistance	*0
	#6	Request assistance for conference	00
st Volume	*9	Increase Listening Volume	*76
ast Volume	#9	Decrease Listening Volume	#76
	*83	Change To Chairperson	*78
o modify	**	Show Number of Participants	*88
