

FOR USE AS A PRE-FILTER

The 225T panels are manufactured from two distinct 100% resin bonded polyester media layers with a wire support frame sealed in between the two layers. This provides a self-supportive, self sealing panel filter which significantly decreases air bypass when installed in the entire filter track.

The entry layer of the 225T panel is made from 15 denier polyester fibers lofted to a 1" depth. This single denier media provides the first stage of filtration. The downstream side of the media is treated

with a special non-migrating tackifier which significantly increases the filter's efficiency. The second media layer is made from 6 denier polyester fibers heavily needled to a dense 1/4" depth. This adds a final layer of defense against small particulate.

The progressive density media structure is what makes the 225T panel so effective. The particles are "funneled" out of the airstream. Large particles are captured on the outer layer and finer particles are captured in the final layer.

225 Panel filters are available as single panels with one single wire support covering the entire filter area, or link panels utilizing multiple wire support pieces inside a single piece of media. Both the single panels and the link panels are available in custom sizes.

Test Type	Fractional Efficiency
Test Number	T033103A
Flow Rate/Velocity	1968 cfm
Test Aerosol:	KCI Neutralized
DP ("H2O)	0.414
Size	24x24 panel
Size Range (mm)	Initial Fractional Efficiency (%)
0.3-0.4	0.8
0.4-0.55	6.3
0.55-0.7	14.8
0.7-1.0	25.2
1.0-1.3	34.4
1.3-1.6	40.6
1.6-2.2	47.0
2.2-3.0	53.5
3.0-4.0	59.6
4.0-5.5	65.7
5.5-7.0	70.2
7.0-10.0	75.4
