XMODS[®] Suspension and Steering Kit

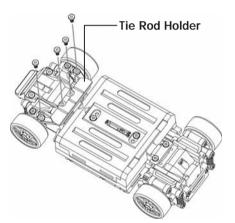

Thank you for purchasing your Suspension and Steering Kit from *Radioshack*. Please read this user's guide before installing, setting up, and using your new product.

When you need to adapt your car's handling for different driving conditions, the steering and suspension upgrade will enhance your competitive edge. This upgrade consists of three kinds of tie rods and damper springs. Change the tie rods to adjust and improve steering. Change the dampers and springs to improve handling on different driving surfaces. Before installing, turn off your vehicle and controller and detach the car body.

Changing the Tie Rod

- 1. Remove two screws from the tie rod holder and two screws from the tie rod.
- 2. Take out the current tie rod.
- 3. Insert the new tie rod and tighten the screws.

Note: You must match the slot on the tie rod with the servo horn as illustrated. If

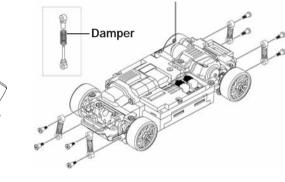

- necessary, use a screwdriver to adjust the servo horn to the correct position.
- 4. Replace the tie rod holder and tighten the screws.
 - *Note:* Do not overtighten the screws when reassembling the car.
