Introduction

Your 5-in1 Universal Gamer Remote is designed to operate up to five home entertainment devices and has three dedicated modes to operate Media Center PCs, Play Station 2 and Microsoft X-Box 360 gaming systems.

- **Macros** – For programming Master Power control
- **Learning** – to capture unique functions from your devices' original remote controls
- **Direct Code Setup** – for easy device programming with setup codes
- **Innovative Code Search** – allows setup of your devices without looking up codes
- **Volume Lock** – to assign volume controls to individual devices or to one global device
- **Extensive Code Library** – largest and most efficient group of IR remote control codes for virtually every current brand on the market.

Xbox 360 is a trade mark of Microsoft Corp.

PlayStation is a registered trademark of Sony Computer Entertainment Inc.

Installing Batteries

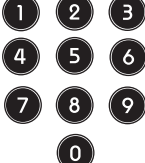

1. Open the battery compartment cover (located on the back of the remote)
2. Insert 2 AAA batteries (not included) in the compartment, mating the polarity symbols (+ and -) inside.
3. Replace the cover.

Battery Notes

- If your remote stops operating properly, replace the batteries. All settings will be restored.
- Use only fresh batteries of the required size and recommended type.
- Do not mix old and new batteries, different types of batteries (that is, standard, alkaline or rechargeable), or rechargeable batteries of different capacities.
- If you do not plan to use the remote for an extended period, remove the batteries. They can leak chemicals that can destroy electronic parts.
- Dispose of old batteries promptly and properly. Do not burn or bury them.

Key Charts

Press this key...	To...
	Enter programming features.
	Turn on or off the selected device. This key can also be programmed to turn on or off all of your programmed equipment.
	The LED (red light) blinks to show that the remote control is working and is sending signals.
	Select a desired home entertainment device to control.
	Select a desired media center or game console to control.
	Display your selected device's main menu.
	Display your selected device's program guide or setup menu.
	Exit from your selected device's guide or menu.
	Display the current channel and program information.
	Move the cursor in the program guide and menu screens.
	Choose options from your selected device's menu or guide.
	X-BOX 360: Y, X A and B Commands Playstation 2: Circle, X, Triangle and Square Command Media Center PC: Yellow, Blue, Green and Red Commands
	Raise (or lower) the sound volume.

Press this key...	To...
	Select the next or previous channel. Select the next or previous chapter on some DVD players and page up or down while viewing the Guide on a DIRECTV receiver.
	Recall the last channel being viewed on the selected device.
	Start the media on your game console or Media Center PC.
	Turn the sound on or off for the selected device
	Control the basic functions of your DVR, DVD, VCR, or VOD event (if available through your Cable or Satellite provider).
	Control the skip back and skip forward function of your DVR, DVD, or VCR.
	Turn backlight on and off.
	Directly enter channels (for example, 09 or 206) to be viewed.
	Directly input channel numbers on some TVs or make a selection in the devices menu.
	Cycle through the available inputs of the selected device.

Programming a Device

Your remote comes pre-programmed to operate SONY TVs, DVD players, VCRs, Audio Receivers and DIRECTV HD or HD with PVR satellite receiver. To control other brands, follow these steps to program your remote.

Before proceeding, find the codes for your devices in "**Manufacturers Codes.**"

1. Turn on the device (for example, DVD player) and, if needed, load media (for example, a DVD).
2. On the remote, press a device key (**TV, CBL/SAT, DVD, VCR or AUD**).
3. Press and hold **P** until the LED blinks twice, then release.
4. Enter the first five-digit code for your device. The LED blinks once as you enter each digit. If the code is correct, the LED blinks twice.

If the LED does not blink twice, repeat steps 2-4 and try entering the code again.

5. Aim the remote at the device and press **Power** (or **PLAY**, if the device does not have a **Power** key). The device should turn off. If it does not, repeat steps 2-5, trying each code for your brand until you find one that works. If you cannot find a code that works, perform the steps in "**Searching for Your Code.**"
6. Repeat steps 1 to 5 for each device you want to program.

Programming Notes

If no key is pressed within 10 seconds, the remote control exits the programming.

To program a TV/DVD, TV/VCR/DVD, or TV/VCR Combo, use the **TV, DVD, or VCR** device key.

If you have a VCR/DVD combo, you may need to set up both a **VCR** and **DVD** code.

You can assign any device key to work with any available device. For example, if you want to use **AUD** to control a second TV, simply follow the same steps listed in "**Programming a Device**" using the codes listed in "**Manufacturers Codes**" for your TV.

Searching for a Code

If your device does not respond to the remote after trying all codes listed for your brand or if your brand is not listed, try searching for your code.

Use the following device code digits to control a specific device:

Code Digit	Device
0	Cable / Satellite
1	TV
2	DVD, VCR, DVR/PVR
3	Audio, Misc Audio

1. Turn on your device and, if needed, load media (for example, a DVD).
2. On the remote control, press a device key (**TV, CBL/SAT, DVD, VCR** or **AUD**) once; it blinks once. Then press and hold **P** until the LED blinks twice.
3. Enter **9 9 1**. The LED blinks twice.
4. Press the code digit for your device. The device key blinks twice. Aim the remote control at the device and press **Power** once.
5. Press and release the **CH+** key continuously, then stop when the device turns off.

The remote is sending IR codes from its extensive library to the selected device, starting with the most popular code first.

6. Press **Power**. The device should turn on, then press **P** to lock in the code.

If the device does not turn on during step 6, slowly press and release **CH-** to go back through the codes, press and release **P** when the device turns on.

Checking the Codes

If you have set up the remote using the procedure in "**Searching for a Code**," you may want to know which five-digit code is operating your equipment.

1. On the remote control, press a device key once (**TV, CBL/SAT, DVD, VCR** or **AUD**); it blinks once. Then press and hold **P** until the device key blinks twice.
2. Enter **9 9 0**. The device key blinks twice.
3. To find the first digit of the code, press **1** once. Count the number of times the LED blinks and write down the number.

If the LED blinks once, the first digit is 1, if it blinks twice, the first digit is 2, etc. If a code digit is 0, the selected device key does not blink.

4. Repeat step 3 four more times for the remaining digits, pressing **2** to find the second digit, **3** to find the third digit, **4** to find the fourth digit, and **5** to find the fifth digit. Write down the rest of the code and keep it in a safe place.

Volume Lock

Your remote comes preset with the volume locked to the TV mode. This configuration allows you to control the volume of the TV while in the CBL/SAT, DVD or VCR modes.

However, you may change the Volume Lock setting to Global Volume Lock to a different mode so that volume control is always controlled through your audio receiver. After that, you can perform Individual Volume Unlock on a selected device to set its volume control for independent operation.

Locking Volume Control to One Device

1. Press and hold **P** until the LED blinks twice, then release.
2. Enter **9 9 3**. The LED blinks twice.
3. Press the device key for the device you wish to control volume (for example, TV). The LED blinks twice.

4. Now when you press **VOL+**, **VOL-**, or **MUTE**, the selected device (for example, TV) controls the volume regardless of the current mode.

Unlocking Volume Control for a Single Device

1. Press the device key for the device you wish to unlock (for example, TV).
2. Press and hold **P** until the LED blinks twice, then release.
3. Enter **9 9 3**. The LED blinks twice.
4. Press **VOL-**. The LED blinks four times.
5. Repeat Steps 1-4 for any other devices that you want to have independent volume control.

Unlocking All Volume Controls

1. Press and hold **P** until the LED blinks twice, then release.
2. Enter **9 9 3** and then press **VOL+**. The LED blinks four times. You can now independently control volume for all programmed devices.

Learning

You can program any non-used key on your remote to learn a function that is unique to your home entertainment devices (for example, **EJECT** for a **DVD**).

If no key is pressed within 10 seconds, the remote control exits the programming.

Have your original remote controls handy before beginning.

Learning Functions

1. Hold down **P** until the red light blinks twice.
2. Press **9 7 5**. The red light blinks twice.
3. Press the device key that corresponds with the desired device's remote (**TV**, **CBL/SAT**, **DVD**, **VCR** or **AUD**).
4. Press the desired learning key. The red light blinks rapidly.
5. Place the device's remote control head-to-head (about 2 inches apart) with the

Gamer Remote.

6. On the device's remote control, hold down the key to be learned until the red light on the Gamer Remote blinks twice. If the red light does not blink twice, repeat Steps 1–5.
7. To lock in learned functions on the Gamer Remote, hold down **P** until the red light blinks twice.
8. To test a learned function, press the learned key on the Gamer Remote and use the function as usual.

Deleting a Learned Function

1. Hold down **P** until the red light blinks twice.
2. Press **9 7 6**. The red light blinks twice.
3. Press the device key that corresponds with the desired device's remote (**TV**, **CBL/SAT**, **DVD**, **VCR**, or **AUD**).
4. Press the key for the learned function you want to delete twice. The LED blinks twice.

Programming Master Power

1. Press the device key for the device you wish to start the Power Macro (for example, **CBL/SAT**).
2. Press and hold **P** until the LED blinks twice, then release.
3. Enter **9 9 5**. The LED blinks twice.
4. Press **Power**. The LED blinks once.
5. Press the **CBL/SAT** key followed by **Power**, press **TV** then **Power**, press **DVD** then **Power**, press **VCR** then **Power**, press **AUD** then **Power**.
6. To finish, Press and release the **CBL/SAT** key.
7. Press and hold in **P** until the LED blinks twice.

Step 5 can be modified to only include the device you want associated with the Master Power.

Troubleshooting

Problem	Solution
LED does not blink when you press a key.	Replace batteries with two (2) new AAA alkaline batteries.
LED blinks when you press a key, but device does not respond.	Make sure the remote is aimed at your device and is not more than 15 feet away.
LED blinks one long blink.	An entry error has occurred (for example, wrong key). Try entry sequence again.
Remote does not control devices or commands are not working properly.	Try all listed codes for the device. Make sure the device operates with an infrared remote control.
CH+, CH-, and LAST do not work for your RCA TV.	Due to RCA design from 1983 to 1987, only the original remote control operates these functions
No volume on a second TV.	See " Changing Volume Lock. "
Channels do not change properly.	If the original remote control required you to press Enter or OK to change channels, press Enter or OK on this remote after entering the channel number.

RF Emissions Information

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The user is cautioned that changes and modifications made to the equipment without the approval of manufacturer could void the user's authority to operate this equipment.
