In accordance with FCC requirements, changes or modifications not expressly approved by Thomson Inc. could void the user's authority

to operate this product. This device generates and uses radio frequency (RF) energy, and if not installed and frequency (RF) energy, and if not installed and used properly, this equipment may cause interference to radio and television reception. If this equipment does cause interference to radio or television reception (which you can determine by turning the equipment off and on), try to correct the interference by one or more of the following measures:

• Reorient the receiving antenna (that is, the antenna for the radio or television that is "receiving" the interference).

• Move the unit away from the equipment that is receiving interference.

that is receiving interference.
• Plug the unit into a different wall outlet so that the unit and the equipment receiving interference are on different branch circuits. If these measures do not eliminate the interference, please consult your dealer or an experienced radio/television technician for additional uncertifier.

experienced radio/television technician for additional suggestions.
Also, the Federal Communications Commission has prepared a helpful booklet, "How To Identify and Resolve Radio TV Interference Problems." This booklet is available from the U.S. Government Printing Office, Washington, DC 20402. Please specify stock number 004-000-00345-4 when ordering copies.
This product complies with DHHS Rules 21 CFR Subchapter J. Applicable at the date of manufacture.

Unpacking Your System

You should have:

One main unit (with 2 speakers);

One remote control;

One AM loop antenna;

To ensure sufficient ventilation, keep the spacing shown as below:

One user's guide; One safety leaflet; Owner registration card.

ront view

ide view

1 4"

Installation

Before You Begin

The AC power plug is polarized (one blade is wider than the other) and only fits into AC power outlets one way. If the plug won't go into the outlet completely turn the plug over ompletely, turn the plug over and try to insert it the other way. If it still won't fit, contact a qualified electrician to change the outlet, or use a different one. Do not attempt to bypass this safety feature.

CAUTION: TO PREVENT ELECTRIC SHOCK, MATCH WIDE BLADE OF PLUG TO WIDE SLOT, FULLY INSERT.

lave a Blast-Just Not in your eardrums!
Make sure you turn down the
volume on the unit before you
put on headphones. Increase
the volume to the desired level
only after headphone are in
place.

Connecting the Speakers

The speaker connection jacks are located on the back of the unit.

When connecting the speakers, match the red wires to the red jacks and the black wires to the black jacks.

NOTE: Make sure the insulation is completely removed from ends of the speaker wires at all connection points.

Before you use your audio system, you'll want to make sure the FM antenna is positioned properly. The FM antenna is the coiled wire connected to the back of the unit. Uncoil it, making sure it is fully

extended (you may even want to tape it to the wal

behind the unit. if possible. The higher, the better.)

the back of the unit if you listen to AM stations. Rotate the AM loop antenna for better reception

You'll also need to connect the AM antenna loop to

Release tab to lock wire in the terminal.

Speaker Wire Connection

Using the Antenna

WARNING: TO PREVENT FIRE OR ELECTRICAL SHOCK HAZARD, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.
