#### ◆ ADF

# Note

□ When copying custom size originals, make sure you specify the size of the originals. If not, the image may not be copied properly. See p.17 "Placing custom size originals".

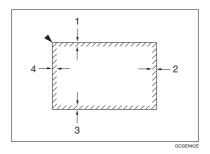

#### Sizes difficult to detect

It is difficult for the machine to automatically detect the sizes of the following types of originals, so select the paper size manually.

- Originals with indexes, tags, or other protrusions
- Transparent originals such as OHP transparencies or translucent paper
- Text or picture dense original
- Originals containing solid images
- Originals containing solid images around their edges

# **Missing Image Area**

Even if you correctly place originals in the ADF or on the exposure glass, margins of a few millimeters on all four sides of the original might not be copied.

- 1. 0.5 4.0 mm, 0"- 0.16"
- 2. 0.5 6.0 mm, 0"- 0.24"

- 3. 0.5 4.0 mm, 0"- 0.16"
- 4. 1.5 5.0 mm, 0.06"- 0.20"

# **Placing Originals**

#### 

Place originals only when all correction fluid and ink has completely dried. Not taking this precaution could dirty the exposure glass, thus resulting in blemished copies.

# 

For original sizes you can set, see p.9 "Originals".

# **Original Orientation**

This function is useful for copying torn originals or large originals.

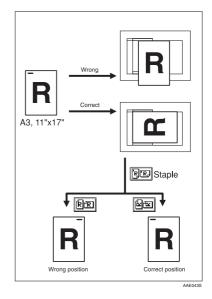

You can set the original orientation in the following ways.

Select this function when original orientation is the same as copy paper orientation.

# ♦ 90° turn 🖳 🗷

Use this to copy A3 □, B4 JIS □ or 11" × 17" □ size originals. The machine rotates the copy image by 90°. This is useful for copying large originals using the Staple, Duplex, Combine, or Stamp functions.

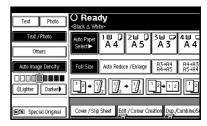

For example, to copy A3 □ or 11" × 17" □ originals with the Staple function selected:

Note

☐ It is recommended that you use the Original Orientation function with the Auto Paper Select or Preset Reduce/Enlarge function.

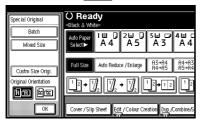

# 1 Press [Special Original].

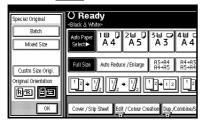

# **2** Select the original orientation.

#### Standard orientation

● Make sure 🖭 is selected.

#### 90° turn

Press [OK].

# Placing Originals on the Exposure Glass

p.16 "Placing originals of mixed sizes"

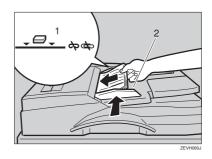

When placing custom size originals: p.17 "Placing custom size originals"

- Do not stack originals above the limit mark on the side guide of the ADF.
- ☐ The last page should be on the bottom.
- □ Do not place objects on the sensors or cover them with your hands, or the original size may not be detected properly. Also, do not place anything on the exposure glass cover as this could cause a malfunction.

- 1 Set the document guide to the original size.
- Place the aligned originals face up into the ADF.

#### 1. Limit mark

#### 2. Document guide

# 

☐ The machine can automatically detect the following sizes as standard size copy paper:

Metric	A3□, A4□, A5□, B4 JIS□,
version	B5 JIS□, B6 JIS□
Inch	$11" \times 17" \square, 8^1/_2" \times 11" \square,$
version	$5^1/_2" \times 8^1/_2" \square$

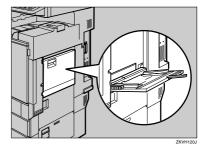

- ☐ Select the paper size when making horizontal copies.
- ☐ If you use non-standard size copy paper or special paper, you should input its vertical and horizontal dimensions directly. See p.17 "Placing custom size originals". The sizes you can input are as follows:

Metric	•	Vertical: 90.0 – 305.0 mm
version	•	Horizontal: 148.0 – 457.2 mm

- Adjust the density of each colour using the density of a chosen basic colour.
- Directly specify the density of each colour using the number keys.

#### Note

- ☐ Adjust the colours to be registered such that the total density of yellow, magenta, cyan, and black is under 255%.
- ☐ When the total density of a registered colour is over 256%, it will be corrected to 255%.
- When copying with user colours, the finer shades may vary depending on the condition of the machine.
- ☐ In order to correctly reproduce originals, the values entered are corrected by the machine, and copies are made using the optimum values. Therefore, there may be slight colour differences when copying using "Text" and when using "Photo".
- ☐ Up to 15 colours can be registered.

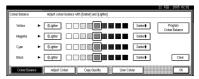

- ☐ Sample prints of user colours can also be made on an A4 ☐, 8<sup>1</sup>/<sub>2</sub>" × 11" ☐ size page or on an A3 ☐, 11" × 17" ☐ size page.
- Printing out a user colour sample will be counted under the full colour counter.

## If You Cannot Make Copies As You Want

This section explains causes of, and remedies for, unexpected copy results.

#### ◆ Basic

Problem	Causes	Solutions
Copies are not stapled.	There are jammed staples in the stapler.	Remove jammed staples. See "Removing Jammed Staples" General Settings Guide.
		<b>𝒯</b> Note
		<ul> <li>After removing jammed staples, staples might not eject the first few times you try to use the sta- pler.</li> </ul>
	The number of copies exceeds stapler capacity.	Check the stapler capacity. See p.131 "Staple".
	Copy paper is curled.	Turn the copy paper over in the tray.
Staples are wrongly positioned.	Originals are not placed correctly.	Check originals are placed in the correct position. See p.45 "Staple".
You cannot combine several functions.	Selected functions cannot be used together.	Check the combination of functions and make the settings again.
		See p.125 "Combination Chart".
When sorting, the pages are divided into two blocks.	The memory became full in the middle of sorting and the pages were delivered in two blocks.	You can interrupt copying when memory becomes full. See p.122 "Memory Full Auto Scan Restart".
Paper does not output during printing with stapling.	If you stop printing while using the staple function, sheets not stapled during printing may be left in the staple unit.	Press the <b>[Clear Modes]</b> key and cancel copy settings, including stapling.
Colours changed even though they were not selected.	If colour range is set to "Wider" and if red is selected, colours such as magenta and orange may change.	Adjust the colour range by setting the colour width. See p.123 "Adjust Colour Image".
Colours not selected will be erased when using Erase mode.	If colour range is set to "Wider" and if red is selected, colours such as magenta and orange may change.	Adjust the colour range by setting the colour width. See p.123 "Adjust Colour Image".

## ◆ Edit

Problem	Causes	Solutions
When using the Double Copies function, parts of the original image are not copied.	The original and copy paper combination is not correct.	Select A3  for A4  originals and A4 for A5 originals. See p.63 "Double Copies".
When using the Border, Centre, or Centre/Border function, parts of the origi- nal image are not copied.	You set a wide erased margin.	Make the margin width narrower. You can adjust it between 2-99 mm. See "Erase Border Width" and "Erase Centre Width" in p.115 "Edit P.1/3". Place originals correctly.

When using the Combine function, parts of the image are not copied.	You specified a reproduction ratio that does not match the sizes of originals and copy paper.	When you specify a reproduction ratio using the Manual Paper Select function, make sure the ratio matches originals and the copy paper.
		☐ Select the correct reproduction ratio before using the Combine function.
Copies are not in correct order.	You placed the originals in incorrect order.	When placing a stack of originals in the ADF, the last page should be on the bottom.
		If you place an original on the exposure glass, start with the first page to be copied.

## **♦** Duplex

Problem	Causes	Solutions
When using Duplex, copy is made Top/Bottom even though Left/Right is selected.	You placed the originals in the wrong orientation.	Place the originals in the correct orientation. See p.13 "Original Orientation".
Copies are not in correct order.	You placed the originals in incorrect order.	When placing a stack of originals in the ADF, the first page should be on top.
		If you place an original on the exposure glass, start with the first page to be copied.

## When Memory Is Full

□ If you set [Memory Full Auto Scan Restart] in User Tools (see p.122 "Memory Full Auto Scan Restart") to [Yes], even if memory becomes full, the memory overflow message will not be displayed. The machine will make copies of scanned originals first, then automatically scan and copy remaining originals. When this happens, the resulting sorted pages will not be sequential.

Message	Causes	Solutions
Memory is full.* originals have been scanned.	The scanned original exceeds the number of pages that can be stored in memory.	Press [Print] to print out already scanned originals and then delete scan data.
Press [Print] to copy scanned originals. Do not remove remaining originals.		Or, press [Clear] to simply delete scan data.
<ul><li>✓ Note</li><li>□ Copying will stop and this message will be displayed when the memory is full.</li></ul>		
Press [Resume] to scan and copy remaining originals.  [Stop] [Resume]	The machine checks if the remaining originals should be copied, after the scanned original is printed.	To continue copying, remove all copies, and then press [Resume]. To stop copying, press [Stop].

## 

 $\hfill\square$  When using the Rotate Sort or Staple functions, the capacity may be reduced.

### Staple

- The following types of paper cannot be stapled:
  - Translucent paper
  - OHP transparencies
  - Label paper (adhesive labels)
  - Thick paper
  - Curled paper
  - Paper of low stiffness
  - Paper of mixed sizes
- In the following cases, copies will be delivered to the shift tray without stapling:
  - When the number of sheets for one set is over stapler capacity
  - When memory reaches 0% during copying
- When using Double Copies, or [1 Sided→1 Sided], [1 Sided→2 Sided], [2 Sided→1 Sided], or [2 Sided→2 Sided] in Combine mode, select 
   □ paper for □ original and □ paper for □ original.
- When using Double Copies, or [1 Sided 2 Pages→ 1 Sided Combine] and [1 Sided 4 Pages→ 2 Sided Combine] in Combine mode, select □ paper for □ original and □ paper for □ original.
- When using [Left 2] or [Top 2] with Double Copies, or [1 Sided→1 Sided], [1 Sided→2 Sided], [2 Sided→1 Sided], or [2 Sided→2 Sided] in Combine mode, select paper for original and paper for original.
- When the finisher is installed, even if you place different size originals in the ADF, appropriate size of copy paper can be automatically selected and stapled using the Mixed Size mode and Auto Paper Select function. Load the paper you want to use in the paper trays beforehand. Paper sizes that can be stapled when using the Mixed Size mode are as follows:
  - A3□ and A4□
  - B4 JIS□ and B5 JIS□
  - $11" \times 17" \square$  and  $8^1/_2" \times 11" \square$
- Paper sizes and orientation that can be used in the Staple function and the stapler capacity are as follows:

	Paper size	Stapler capacity
2 tray finisher	A4 \( \bullet \), B5 JIS \( \bullet \bullet \), 8\(^1/_2\)" \times 11\(^1\) \( \bullet \)	2–50 sheets
	A3□, B4 JIS□, 11" × 17"□, 8 <sup>1</sup> / <sub>2</sub> " × 14"□	2–30 sheets
Booklet finisher	A4 $\square$ $\square$ , B5 JIS $\square$ $\square$ , 8 $^1/_2$ " $\times$ 11" $\square$ $\square$	2–50 sheets
	A3□, B4 JIS□, 11"×17"□, 8 <sup>1</sup> / <sub>2</sub> "×14"□	2–25 sheets
	When Saddle Stitch function is selected:	2–10 sheets
	A3□, B4 JIS□, A4□, 11" × 17"□,	
	$8^{1}/_{2}$ " × 11" $\Box$ , $8^{1}/_{2}$ " × 14" $\Box$	
	mixed size	2–25 sheets

### Note

- $\square$  When stapling B4 $\square$ , A3 $\square$ , 8<sup>1</sup>/<sub>2</sub>" × 14" $\square$ , 11" × 17" $\square$ , pull out the extender of the finisher tray.
- ☐ When the number of copies exceeds tray capacity, copying stops. If this happens, remove the copies from the shift tray, and then resume copying.
- The tray capacity for the stapled sheets is as follows: (paper weight: 80 g/m², 20 lb.)

	Paper size and orientation	Tray capacity
2 tray finisher	Finisher shift tray 1	
	A4 □ □, B5 JIS □ □, 8¹/2" × 11" □ □	• 10–50 sheets: 50–10 sets

- You cannot change stapling positions during copying.
- When the original image is rotated, the staple orientation changes by 90°.
- The maximum original image size that can be rotated is as follows:

Metric version	A4
Inch version	8 <sup>1</sup> / <sub>2</sub> "×11"

- When using [Top Slant], [Left 2] or [Top 2] with Combine, Double copies or Auto Reduce / Enlarge function, "Blank part will appear. Check orientation." message may appear depending on the orientation of originals and paper you placed. In this case, change the paper orientation.
- When [Left 2] or [Top 2] is selected, the following settings are useful to rotate images appropriately:
  - Auto Reduce / Enlarge or Auto Paper Select
  - With image rotation in Auto Tray Switching of User Tools
- If you select Saddle Stitch function with the booklet finisher, the machine staples and folds the paper in the centre, then delivers the paper folded.
- If you select Saddle Stitch function in Magazine or Booklet mode, the machine staples the paper, and folds it like a book, then delivers the paper folded.

#### Punch

- When using Punch and Combine, Double Copies, or Auto Reduce / Enlarge, the message "Blank part will appear. Check orientation."
  may appear because of the orientation of the original and the copy paper.
  If this occurs, change the orientation of the copy paper.
- Since punch holes are made in each copy, the punch hole positions vary slightly.
- Punchable paper sizes are as follows:

2 tray finisher			
Punch kit type			
2 & 4 holes type	2 holes	D	A3-B5 JIS, 11" × 17"
		D	A4-A5, 8 <sup>1</sup> / <sub>2</sub> " × 11"
	4 holes	D	A3, B4 JIS, 11" × 17"
		D	A4, B5 JIS, 8 <sup>1</sup> / <sub>2</sub> "×11"
4 holes type	4 holes	D	A3-B5 JIS, 11" × 17"
		D	A4-A5, 8 <sup>1</sup> / <sub>2</sub> " × 11"
2 & 3 holes type	2 holes	D	A3-B5 JIS, 11" × 17"
		D	A4-A5, 8 <sup>1</sup> / <sub>2</sub> " × 11"
	3 holes	D	A3, B4 JIS, 11" × 17"
		D	A4, B5 JIS, 8 <sup>1</sup> / <sub>2</sub> " × 11"

Booklet finisher			
Punch kit type			
2 holes type	2 holes	₽	A3, A4, B4 JIS, B5 JIS, 11" × 17", 8 <sup>1</sup> / <sub>2</sub> " × 14", 8 <sup>1</sup> / <sub>2</sub> " × 11"
		D	A4, B5 JIS, 8 <sup>1</sup> / <sub>2</sub> "×11"
4 holes type	4 holes	D	A3
		D	A4

 The punch hole positions change according to the orientation of the paper selected.

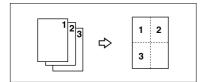

### Duplex

- You cannot use the following copy paper with this function:
  - Paper smaller than A5,  $5^1/2$ "  $\times 8^1/2$ " (possible on A5  $\square$ ,  $5^1/2$ "  $\times 8^1/2$ "  $\square$ )
  - Paper thicker than 105 g/m<sup>2</sup>, 28 lb.
  - Paper thinner than 60 g/m<sup>2</sup>, 17 lb.
  - · Translucent paper
  - OHP transparencies
  - Label paper (adhesive labels)
  - Postcards
- When an odd number of originals is placed in the ADF, the back of the last page of copied paper is blank.
- During copying, the image is shifted to allow for the binding margin.
- The following paper sizes can be duplexed: A3 $\square$ , B4 JIS $\square$ , A4 $\square$  $\square$ , B5 JIS $\square$ , A5 $\square$ , 11" × 17" $\square$ , 8 $^1/_2$ " × 14" $\square$ , 8 $^1/_2$ " × 11"  $\square$  $\square$

### Combine

- In this mode, the machine selects the reproduction ratio automatically.
   This reproduction ratio depends on copy paper sizes and the number of originals.
- The reproduction ratios you can specify are 25–400%.
- If the calculated ratio is under the minimum ratio, it will be automatically
  adjusted to within acceptable range. However, with some ratios, parts of
  the image might not be copied.
- You cannot use custom size paper.
- If the orientation of originals is different from that of the copy paper, the
  machine will automatically rotate the image by 90° to make copies properly.

 If the number of originals placed is less than the number specified for combining, the last page segment will be left blank as shown.

### Series Copies

- The machine sets the reproduction ratio automatically to meet the paper size and copies the originals together onto the paper.
- The reproduction ratios you can specify are 25–400%.
- If the calculated ratio is under the minimum ratio, it is automatically adjusted to within acceptable range. However, with some ratios, parts of the image might not be copied.
- If the orientation of originals is different from that of the copy paper, the
  machine will automatically rotate the image by 90° to make copies properly.
- You cannot copy with originals different in size and orientation.
- If the number of originals scanned is less than a multiple of 4, the last page is copied blank.
- In Magazine or Booklet mode, the copying may take some time after scanning originals.
- When the booklet finisher is installed, if you select Saddle Stitch function in Magazine or Booklet mode, the machine staples and folds the paper in the centre, then delivers the paper folded.

# Image Repeat

Depending on the paper size, ratio, and orientation, parts of repeated images may not be copied.

# Centring

Though the original is set to a different orientation from the paper loaded, the machine will not rotate the image by 90° (Rotate copy).

### Erase

The width of the erased margin varies depending on the reproduction ratio. If the size of the original is different from sizes listed in the following chart, the erased margin might be shifted:

### · Metric version

Where original is placed	Paper size and orientation
Exposure glass	A3D, B4 JISD, A4DD, B5 JISDD
ADF	A3□, B4 JIS□, A4□□, B5 JIS□□, A5□□

### Inch version

Where original is placed	Paper size and orientation
Exposure glass	$11" \times 17" \square, 8^1/_2" \times 14" \square, 8^1/_2" \times 11" \square \square$
ADF	$11" \times 17" \square$ , $8^{1}/_{2}" \times 14" \square$ , $8^{1}/_{2}" \times 11" \square$ $\square$ , $10" \times 14" \square$ , $5^{1}/_{2}" \times 8^{1}/_{2}" \square$

### Margin Adjustment

- If you set a binding margin that is too wide, part of the image may not be copied.
- When making copies in Combine mode, the binding margin is added to the copies after the combination is finished.

# Background Numbering

If the numbers overlap the copied image, the parts overlapped may look like some pattern.

# Preset Stamp

- You can change the size and density of the stamp with User Tools. Depending on the setting, density may change.
- Depending on paper size, if you change the stamp size, parts of the stamp might not be printed.

### Date Stamp

• When using Combine mode, the date stamp is printed as follows:

 When using Magazine or Booklet function, the date stamp is printed as follows:

# Page Numbering

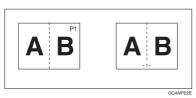

When page numbering is used with Combine mode, page numbers are printed as follows:

Page Numbering per original:
 Combined with 1 Sided / 2 Sided in the Combine function

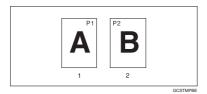

CANPE0E

- Page Numbering per copy: Combined with Magazine or Booklet function
- Page Numbering per copy:
   Combined with 1 Sided / 2 Sided in the Combine function

If you combine this function with the Duplex (Top to Top) function and select [P1, P2] or [1/n, 2/n], page numbers on the back are printed as follows:

### 1. Front

### 2. Back

### Front Cover, Front/Back Cover

- If Blank mode is selected, the cover will not be counted as a copy.
- Front and back covers are two-sided copied depending on the settings made in Display Time in Cover Sheet Tray of User Tools (System Settings).
  - If Display Time is selected to the At Mode Selected, settings made in Cover Sheet Tray will take priority.
  - If Display Time is selected to Full Time, settings made in Paper Type will take priority.

    See "Paper Type" and "Cover Sheet Tray" in "Tray Paper Settings", General Settings Guide.

# Slip Sheets

If you do not copy onto slip sheets, they are excluded from the number of copies counted.
