## INTRODUCTION

Thank you for your purchase of the DB 25b, a passive direct box designed to take high impedance signals and convert them to low impedance. The unit features an Attenuator volume control for the input signal, and a Ground Lift switch which may reduce unwanted hum caused by "ground loops".

## DESCRIPTION

**Input Jacks:** 1/4" unbalanced jacks for receiving line or instrument level signals.

**Attenuator:** Reduces the input signal by the amount indicated.

**Ground Lift Switch:** In the "Lift" position, the ground connection of the XLR jack is disconnected from the chassis.

**Output Jack:** XLR balanced jack for connection to a mixing board or other balanced input device.

## SPECIFICATIONS

Frequency Response: 20 - 20kHz +/- 3 dB

Output Impedance: 600 Ohms

Input Impedance: 50K Ohms

Max Output Level: +4 dBm
