QUICK START GUIDE

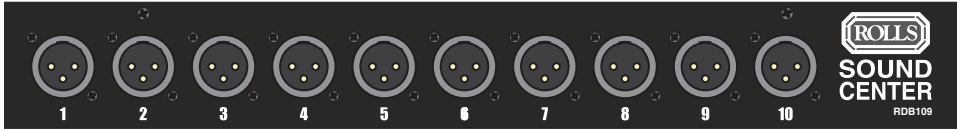

INTRODUCTION

Thank you for your purchase of the ROLLS RDB109 SOUND CENTER. The RDB109 is an audio distribution device with a single balanced XLR line-level input, distributed via transformer isolation to ten balanced XLR outputs.

NOTE: This manual assumes the user has a basic working knowledge of the proper connection and operation of professional audio equipment.

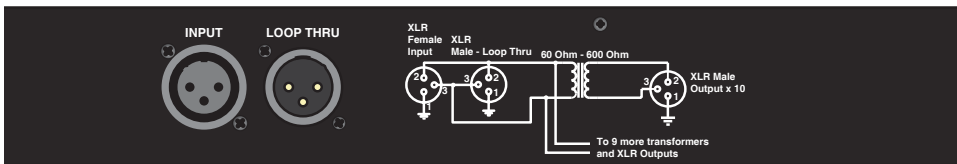

DESCRIPTION

FRONT PANEL

Output Jacks 1 - 10: Balanced XLR jacks.

REAR PANEL

INPUT: Balanced female XLR jack.

LOOP THRU: Balanced male XLR jack hard-wired to the INPUT jack.

OPERATION

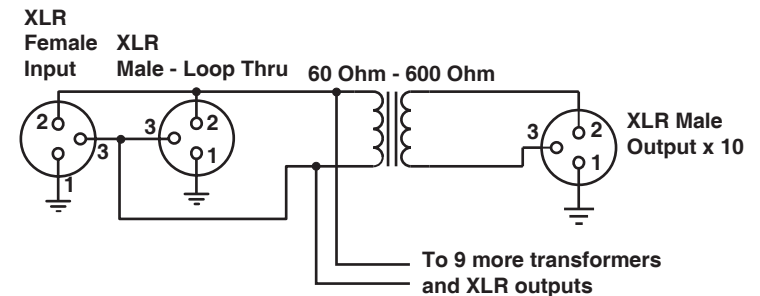

Connect the input source to the INPUT of the RDB109. This may be a line level or consumer level signal. We do not recommend connecting a microphone directly into the RDB109 INPUT. Connect the RDB109 OUTPUTS to the inputs of the recording, broadcasting, etc. devices.
